**No. 38 - MAY 1999**

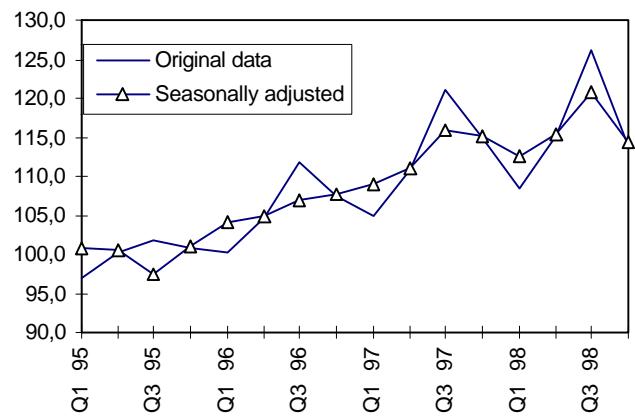

## REAL SECTOR

All indicators of real sector activity continued their downward trend in the first months of 1999. The first indicator made public, and the most significant indicator of total activity – the index of the physical volume of industrial production – shows that output in the first quarter decreased by 3.6 percent compared to the first quarter last year. The number of tourist night-stays in the first quarter decreased by 9.8 percent compared to the corresponding period last year. Real trade turnover decreased by 11.6 percent in the first two months of the year, while retail trade turnover decreased by 8.7 percent on the annual level. Data on gross domestic product in the first quarter of the year will be made public at the end of the second quarter.

For the sixth consecutive month, industrial production showed a year-on-year monthly decrease; the largest decrease in industrial production came in February (6.3 percent) while the smallest came in March of this year (0.6 percent). Data on production in major industrial groups in the first three months of the year show that production in the energy sector grew, while production in the other four groups (intermediate goods, capital goods, durable consumer products and non-durable consumer products) decreased at a similar rate to the corresponding period last year. Considering the areas of the National Classification of Activities (NKD) which make up industry, production in mining and extraction decreased by 13.2 percent, production in the processing industry decreased by 7.5 percent, while the supply of electrical energy, gas and water increased by 20.3 percent.

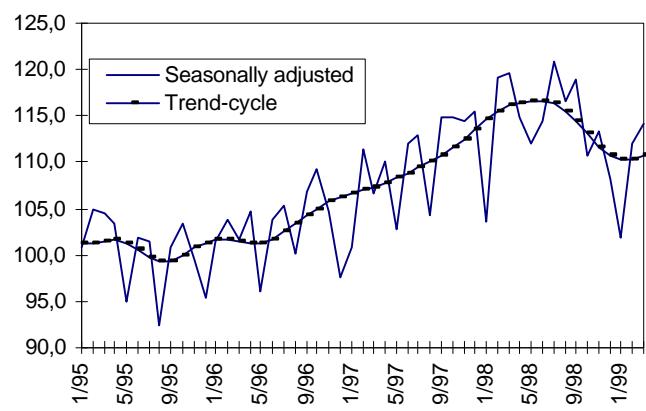

## GROSS DOMESTIC PRODUCT

Real base indices (1995=100)

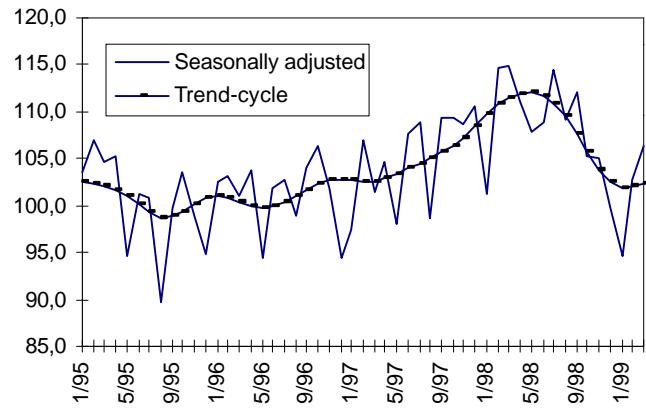

## MANUFACTURING PRODUCTION INDEX

Seasonally adjusted and trend-cycle (1995=100)

## PROCESSING INDUSTRY

Seasonally adjusted and trend-cycle (1995=100)

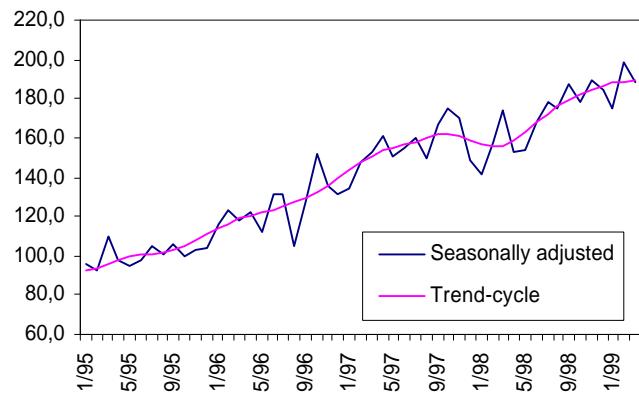

There are few branches of industrial activity that have been on the upward phase of the short-term cycle. Out of the 28 branches, only five have been moving upward: extraction of other mineral ore and stone; production of coke, production of oil derivatives; production of other transportation devices; recycling; and supply of electrical energy, gas, steam and hot water. Three branches showed no growth during the month (production of clothes; dying and finishing of fur, processing and finishing of leather and production of leather goods; production of metal products except machines and equipment). In all other branches, production has been falling.

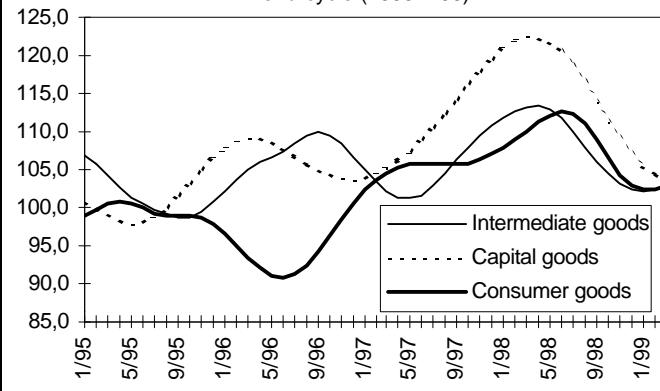

Inventories of finished products in industry at the end of March exceeded inventories in the same month last year by 10.9 percent. This indicates the continuation of last-year's trend of decrease in demand for industrial products. Industrial employment decreased in the first quarter of the year by 5.6 percent. At the same time, labor productivity grew by 2.1 percent on the annual level. A very large proportion of the recorded unsettled payment orders registered with the Payments Institute refers to the industrial sector. By value, the largest share of those payment orders refers to the production of food and beverages. This branch holds third place on the list of all economic activities.

Real retail trade turnover continued its downward tendencies from the fourth quarter of 1998. At the end of February, it showed a two-month annual decrease at a rate of 11.6 percent. Real retail trade turnover decreased by 8.7 percent. Insolvency continues to exert significant pressure on trade activities. Currently, wholesale trade takes the first place among all economic activities in the number of registered unpaid payment orders, while retail trade takes second place.

Late entries and corrections slowed data collection in construction. Due to this, the index of physical volume of construction works for 1999 is not yet available. What is available, though, are the data for the fourth quarter of 1998 i.e. the results for all of 1998 regarding net orders of construction works, value of construction works completed, and residential construction. For the first two indicators there are no data available for the preceding year, so there can be no indication of direction and intensity of change. As far as residential construction in 1998 is concerned, its volume decreased compared to 1997. The number of residential units (apartments) completed decreased by 5.8 percent, while the square footage of completed residential units decreased by 9.3 percent. The picture was quite the opposite in the first three month of 1998. Nevertheless, residential construction activity decreased significantly in the last quarter. Consequently, the level of residential construction from 1997 was not achieved.

The number of registered tourists in the first quarter of the year decreased by 7.0 percent on the annual level. Tourist night-stays decreased by a total of 9.8 percent compared to the first quarter of the preceding year. Within this, night-stays by domestic tourists decreased by 13.5 percent, and night-stays by foreign tourists decreased by 3.9 percent. The impact of the Kosovo crisis reversed positive prognoses for tourism made at the end of last year.

Seasonally adjusted and trend-cycle (1995=100)

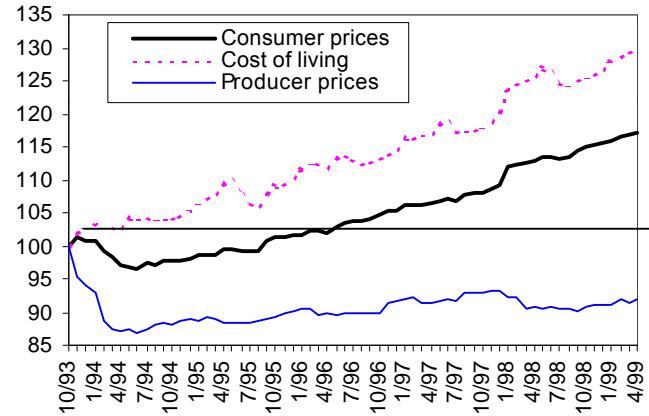

#### CONSUMER PRICES, PRODUCER PRICES, COST OF LIVING (monthly changes)

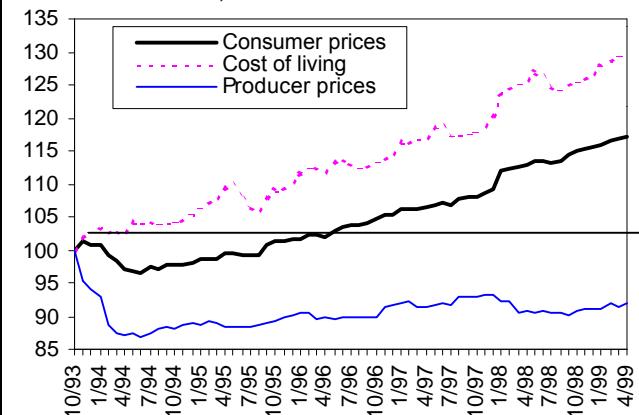

## PRICES

In April, prices were again stable. Retail prices in April increased by 0.3 percent, 3.6 percent on the annual level. The increase in retail prices was mostly the result of a 0.4 percent increase in the prices of goods, rather than the 0.2 percent increase in the prices of services. This trend was the result of a 1.5 percent (including seasonal products), and 0.9 percent (excluding seasonal products) increase in agricultural prices. Significant increase of 0.5 percent was recorded in industrial products (without foodstuffs). Industrial products contain a large component of imported products, so the increase in their prices can be linked to the depreciation of kuna during first two months of 1999. Retailers adjusted prices to take depreciation into account in April. Prices of industrial product increased by 5.3 percent on the annual level. Prices of beverages increased by 0.4 percent, 4.9 percent on the annual level. The cost of living index increased by 0.4 percent in April, 3.2 percent compared to the same time last year. The cost of services increased by 0.9 percent, and the cost of goods 0.3 percent. The increase in the cost of services was mainly the result of a 1.7 percent increase in postal services. The increase in the cost of education, culture and entertainment of 0.6 percent (8.4 percent on the annual level) is partly responsible for the increase in the cost of services. The prices of clothes and footwear increased by 0.9 percent in April, an 8.0 percent increase compared to the same period last year. Indices of industrial products' prices increased by 0.6 percent, 1.7 percent compared to the same month last year. The most significant increases came in prices of energy, 1.8 percent, and non-durable consumer goods, 0.5 percent.

## EMPLOYMENT AND WAGES

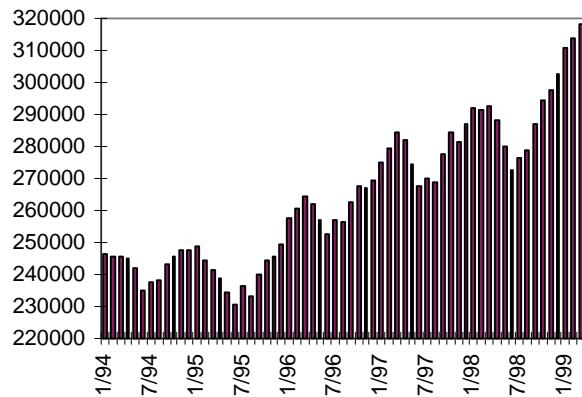

Registered unemployment reached 318,157 at the end of the March. It continued to increase faster than seasonally expected. March's level represents an increase of 4,421 or 1.4 percent compared to the end of the February. Also, registered unemployment increased by 22,276 or 7.6 percent on average in the first quarter of 1999 compared to the same period of 1998.

Total employment decreased in March by 2,626 (0.2 percent), falling to 1,308,785 at the end of the month. During the first quarter of 1999, the workforce decreased by 43,717 (3.2 percent), on the annual level.

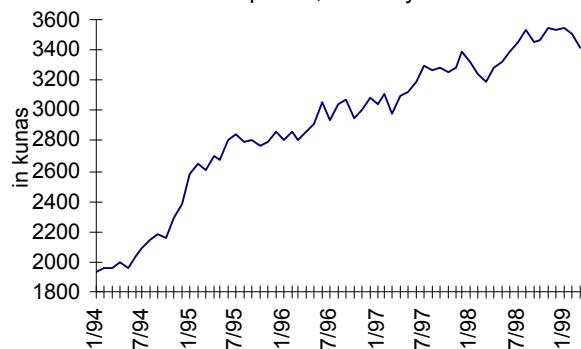

Total active population increased by 1,795 (0.1 percent) during March, while the decrease of the total active population in the first quarter amounted to 21,441 (1.3 percent) on the annual level. The rate of unemployment reached 19.6 percent at the end of the March, which represents 1.8 percent increase compared to the same month of last year.

Average gross wages decreased by 105 kuna or 2.4 percent in March. Wages have either stagnated or decreased each month since last August. Still, the year-on-year index of growth in the first quarter increased at the rapid rates of 11.1 percent in nominal terms and 7.5 percent in real terms. This is the result of fast growth of gross wages in the period before the stagnation. Net wages paid in March decreased by 2.1 percent in nominal terms and 2.6 percent in real terms compared to February. Nevertheless, on the year-on-year level net wages grew faster than gross wages, recording a 16.6 percent nominal increase and a 12.8 percent real increase.

## MONETARY DEVELOPMENTS

March was characterized by significant decreases in total liquid assets as well as banks' claims on the central government. This was accompanied by a moderate increase in credit. Total liquid assets decreased in March by 1.2 billion kuna (2.1 percent), mostly due to a decrease in quasi-money of 1.1 billion kuna. The money supply decreased mildly (by 0.05 billion kuna) compared to the end of February; for the second consecutive month it stagnated at about 12 billion kuna. While in the preceding months the decrease in money supply occurred to a larger degree through a decrease in deposit money (with a slight increase in the share of cash in money supply), this month cash decreased by 0.2 billion kuna, along with an identical increase in deposit money. In addition, up till now the structure of deposit money by sectors showed a significantly larger decrease in deposit money of the enterprise sector compared to deposit money of the household sector. This month, however, deposit money of the enterprise sector increased while at the same time the deposit money of the household sector decreased.

Such tendencies indicate that the enterprise sector's period of adjustment to a deteriorating economic environment has come to an end, and its demand for money stabilized. This equilibrium point is naturally at a low level of output. Nevertheless, it seems that the several month long trend of adjustment of activity (and transactions demand for money) is finished. The household sector, on the other hand, continues to decrease its demand for money.

The significant decrease in foreign currency deposits in March (by 0.86 billion kuna, i.e. 2.2 percent) coupled with a decrease in kuna deposits (by 0.28 billion kuna) gives no indication that the decrease in money supply might have been caused by a possible increase in foreign exchange deposits (offering protection of the foreign currency clause). Just the opposite – the decrease in foreign exchange deposits indicates an increase in the kuna liquidity of the household sector at the expense of its foreign exchange assets. It also suggests the expatriation of those assets and / or simply their outflow from the banking system. The entire March decrease in foreign currency deposits occurred in the household sector.

.

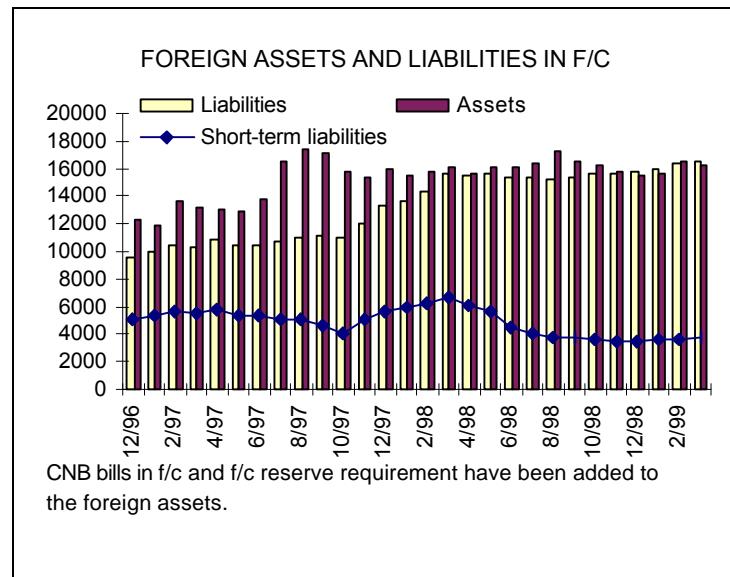

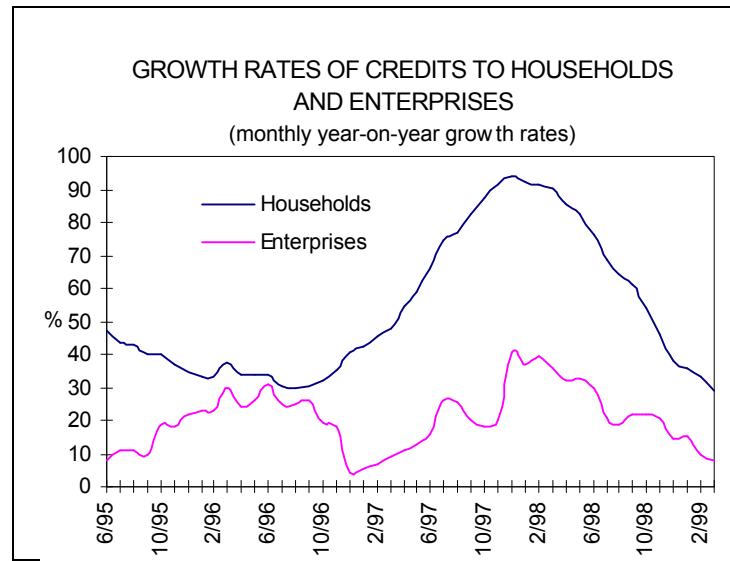

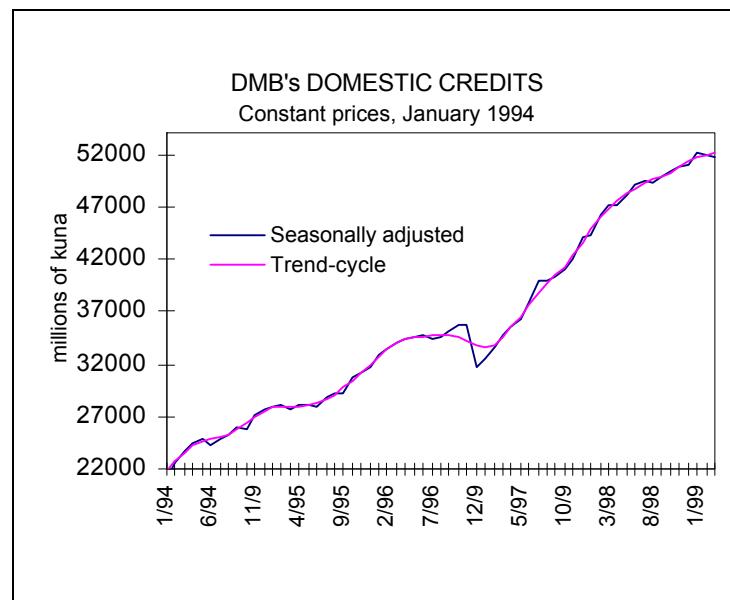

The March increase in credit was modest. Credit to the household sector increased by 0.2 billion kuna, while credit to enterprises was at a complete standstill. Credit increased by 0.6 billion kuna through an increase in uncollected claims and shares. The annual growth rate of credit amounted to 13.8 percent, with credit to the household sector growing at 29.2 percent, while credit to enterprises grew at 7.6 percent.

It is quite encouraging to note that banks' net claims on central government decreased again (following three consecutive months of growth), by more than 1 billion kuna. In that amount, 0.49 billion kuna refers to the repayment of credit from the Croatian National Bank and 0.7 billion kuna refers to the balance of net CNB claims on central government on the day of March 31, 1999. The rest refers to a decrease in net debt of the central government to commercial banks - a decrease mainly due to the increase in government's foreign currency deposits with commercial banks, and in minor part due to a decrease in banks' claims on the central government (decreased purchase of treasury bills in March compared to February, as well as a decrease in bonds).

Total foreign exchange assets of commercial banks (deposited abroad and with the central bank) decreased slightly in March compared to end of February. At the same time, commercial banks' foreign exchange liabilities increased by the same amount. In March, banks decreased their foreign exchange foreign assets by 0.9 billion. Currently these amount to 11.4 billion kuna. They also increased holdings of foreign exchange treasury bills and their required foreign exchange reserves (by 0.7 billion kuna). The total increase for these two items is 4.8 billion kuna. On the other hand, commercial banks increased their foreign indebtedness by 0.2 billion kuna. On 31 March 1999, foreign exchange liabilities amounted to 16.5 billion kuna. Nevertheless, with the exception of normal oscillations in daily items, banks' foreign exchange position mainly stagnated.

The central bank's foreign exchange transactions in April were the smallest yet this year. But the effect on foreign exchange reserves was (again) negative. In April, foreign exchange reserves decreased by USD 11.5 million, reaching USD 2,424.5 million on April 28, 1999. This represents a decrease of USD 391 million compared to the end of December 1998.

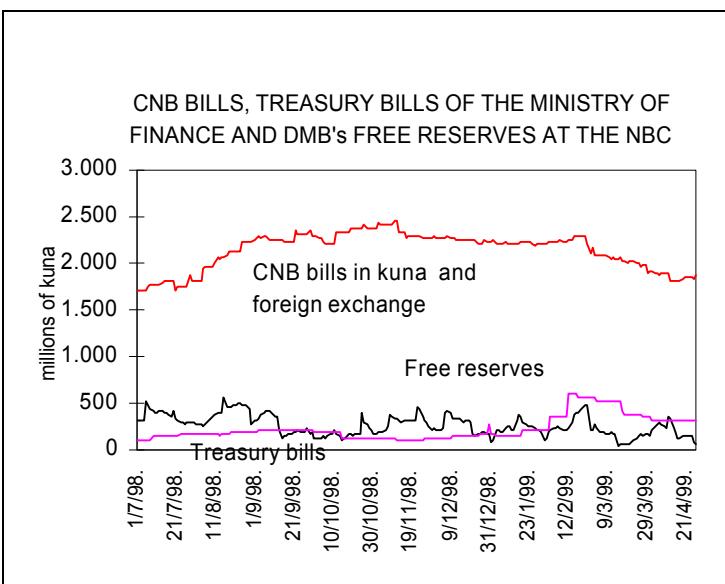

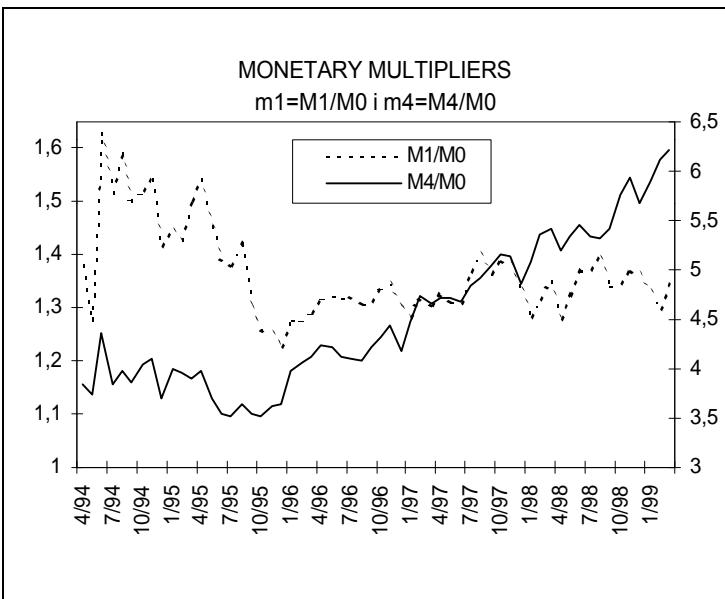

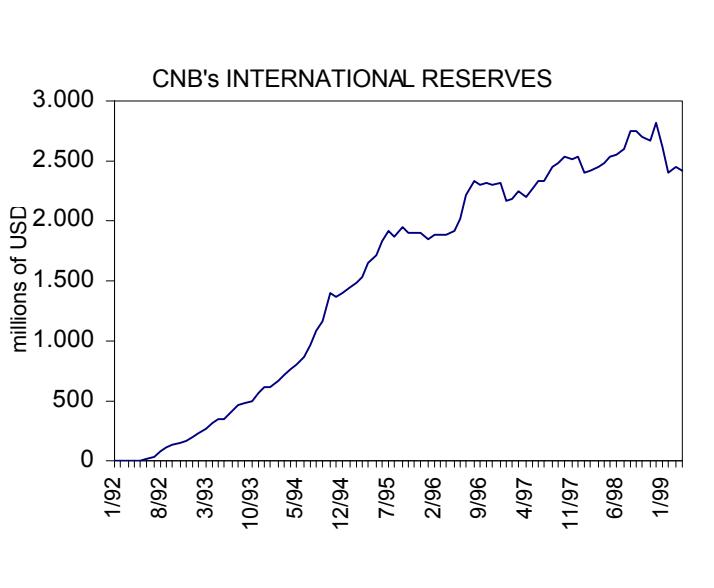

The April change in the level of foreign exchange reserves was the result of the net sale of foreign exchange to commercial banks (in the value of USD 36 million), as well as of the net effect of transfer of banks' mandatory foreign exchange reserves and net decrease in CNB bills purchased (in the amount of USD 8.5 million), and of other transactions. There were no foreign exchange transactions with the Ministry of Finance in April.

Within the framework of domestic activity of the Croatian National Bank, the central government increased its indebtedness by an additional 100 million kuna in April, increasing the balance of credit to the central government to 1.4 billion kuna. Central bank lending to commercial banks was just as extensive in April as it was in March. Banks used an average daily Lombard credit of 0.1 billion kuna, compared to 0.3 billion kuna throughout March. The repurchase of treasury bills was also slightly milder. Nevertheless, the use of liquidity loans with the central bank, which tripled in March compared to February, reaching 0.96 billion kuna, reached an average daily level of 1.06 billion kuna in April.

Reserve money decreased slightly in April compared to the end of March. This was due to a decrease in both cash and in banks' deposits with the central bank. Among other items in liabilities of the Croatian National Bank, there have been decreases in banks' CNB bill holdings, and in central government's deposit money with the Croatian National Bank (by 0.1 billion kuna). Only the foreign exchange mandatory reserve grew at the legally prescribed rate.

The regulation on the use of foreign exchange CNB bills was changed in April. In April, banks could pledge up to 40 percent of foreign exchange CNB bill holdings for Lombard credit, while 55 percent would be acknowledged as legal reserve requirement. In May, these percentages were changed to 30 percent and 65 percent, respectively. This enables commercial banks to use the treasury bills for two purposes – as loan collateral and as legally required foreign exchange reserves.

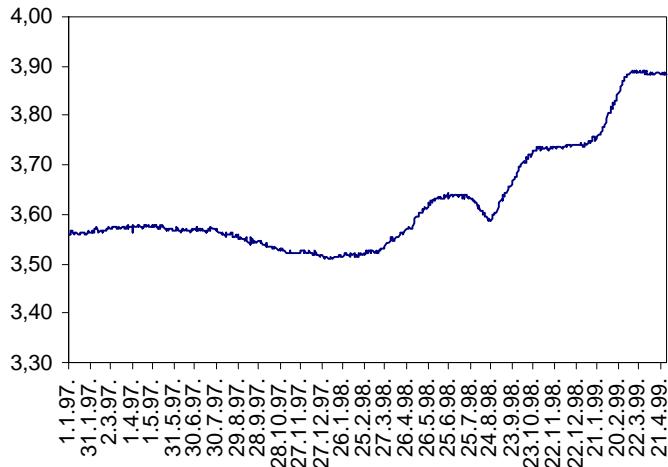

## EXCHANGE RATE

The successful stabilization of the German mark exchange rate during March continued in April, with the kuna appreciating additionally against the German mark. The rate reached 3.8813 kuna at the end of the month, which is the lowest exchange rate of German mark since the beginning of March. This represents a relatively long period of exchange rate stability, compared to the past 12 months, and shows that the macroeconomic environment became more stable in the past two months. The pressure on the kuna decreased on the domestic foreign exchange market, as a result of increased demand for kuna which were spent on targeted and speculative purchases of foreign exchange during the first quarter. Also, the demand for the foreign exchange by deposit money banks decreased, as a result of the foreign credit services. The Croatian National Bank decreased the intensity of interventions on the foreign exchange market through auctions of the foreign exchange. Total net sales of foreign exchange during April amounted to USD 35.9 million, compared to 232 million dollars sold in February. The greatest contribution to economic stability was the monetary policy of the Croatian National Bank, which lead to the stabilization of the exchange rate of the German mark between 3.88 and 3.89 kuna, and the exchange rate of euro between 7.59 and 7.60 kuna.

The daily nominal exchange rate was also stable, recording a slight depreciation of 0.3 percent during April. The main reason for this is the depreciation of the kuna against US dollar, which appreciated by 1 percent against the kuna during April. The depreciation of the kuna against the US dollar is a result of the depreciation of euro against US dollar. The exchange rate of the euro against the US dollar was 1.06 at the end of April, which represents a 7.5 percent depreciation since the beginning of this year.

NOMINAL DAILY EXCHANGE RATE HRK vs. 100 DEM

## BALANCE OF PAYMENTS

The current account deficit of the balance of payments amounted to USD 1,553.8 million in 1998. This represents a 36.2 percent decrease compared to 1997. The current account deficit amounted to 7.3 percent of the Gross Domestic Product, compared to 4.3 percent in 1996 and 12.2 percent in 1997.

A decrease in the merchandise trade deficit (20.2 percent), an increase in exports (by 9.5 percent) and a decrease in imports mainly caused the decrease (by 7.0 percent). At the same time, earnings from services increased slightly (2.4 percent), earnings from current transfers decreased (16.9 percent), and the deficit on the income account doubled, as a result of increases in interest rates on foreign credits.

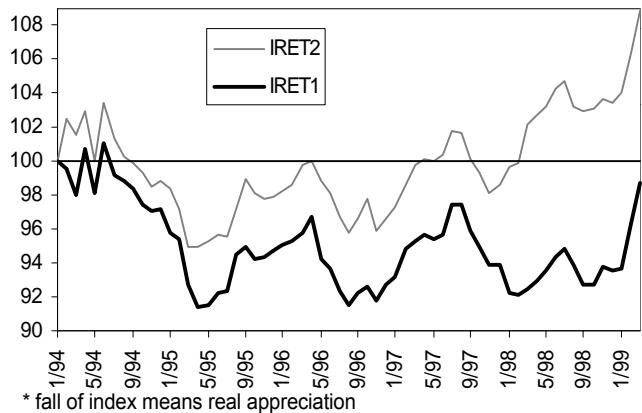

Changes in the current account were followed by the financial account, which amounted to USD 2,148.8 million (i.e. 24.6 percent less than in 1997). There were significant changes in the structure of financing. The most significant form of financing in 1998 was again the increase in liabilities to foreign creditors (49 percent), although it decreased significantly compared to 1997.

At the same time, direct investment increased its share of financing the current account deficit, amounting to 36 percent. Foreign exchange reserves increased by USD 276.5 million, which represents a 22.9 percent increase compared to 1997.

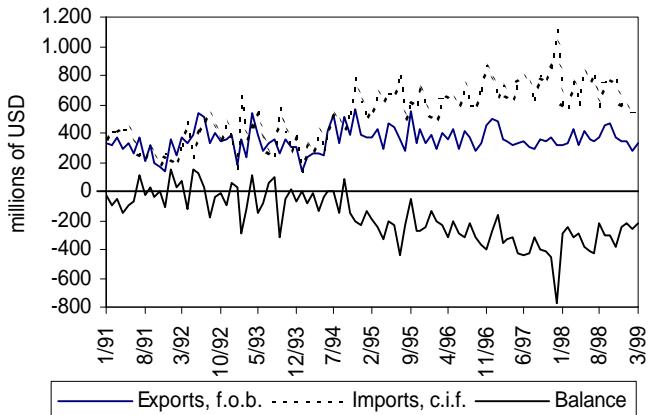

According to the Bureau of Statistics data, the merchandise trade deficit continued to decrease in the first quarter, reaching USD 704.3. This was a 17.0 percent decrease compared to the same period last year. Merchandise exports f.o.b. amounted to USD 961.4 million, an 11.1 percent decrease, while imports c.i.f. were USD 1,665.7 million, a 13.8 percent decrease.

Expressed in kuna, exports amounted to 6,390.6 million kuna in the first quarter, a 7.7 percent decrease compared to the same period last year. Imports amounted to 11,060.5 million kuna, a 10.4 percent decrease.

## MONEY MARKET AND INTEREST RATES

In April, interest rates on the Money Market Zagreb continued to fall. From an average of 15.47 percent in March, interest rates decreased in the 28 days of April to 15.20 percent. The reason for such developments cannot be found in the relation of supply and demand, for there have been days when demand was three times greater than supply, yet the price of money never rose above last months' average. We presume that the introduction of the Real Time Gross Settlement System (RTGS) under the auspices of the Croatian National Bank significantly increased the quality and ease of banks' daily liquidity management. This is confirmed in unofficial reckoning by the largest banks. It also made it possible to perform transactions on the money market at a lower cost. As far as the time structure of rates is concerned, interest rates have oscillated between 14.5 and 16 percent.

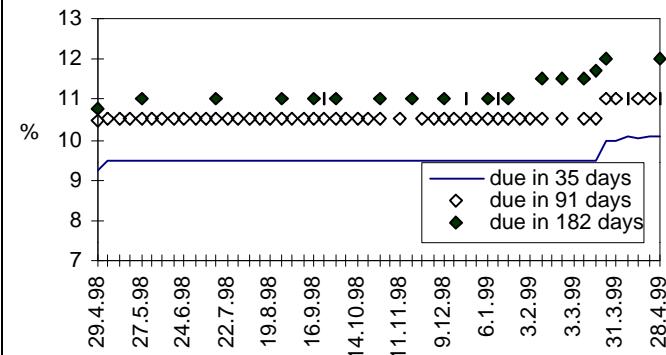

Interest rates on CNB bills in kuna, as well as total purchases of such bills, have been rising slightly. The average interest rate on 35-day CNB bills was 10.08 percent in the last auction, and still showing upward tendencies. The average interest rates on 91 and 182 day CNB bills remained stable in April at 11 and 12 percent, respectively. On the other hand, interest rates on foreign exchange CNB bills decreased and total purchases also decreased.

Interest rates on CNB bills denominated in EUR decreased significantly. Interest rates on 63-day CNB bills dropped during the month of April from 2.82 percent to 2.40 percent, while for 91 days rates decreased from 2.82 to 2.41 percent. Interest rates on CNB bills denominated in USD also decreased – for 63 days from 4.78 percent to 4.77 percent. In contrast to these developments, interest rates on Ministry of

## GOVERNMENT BUDGET

March was the fourth consecutive month in which the Government Budget had a negative balance. Budgetary revenues collected in March were 746 million kuna less than expenditures. This implies a shortfall of 1,837 million kuna during the first three months of the year. The March shortfall was also the largest of 1999. It was financed in its entirety by an increase in foreign indebtedness. Increase in foreign debt was effected through an emission of eurobonds, which was recorded within other external loans.

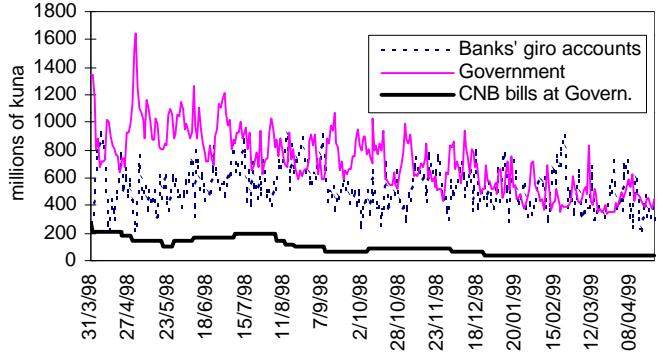

March revenue collection can hardly be characterized as satisfactory. On the monthly level, March revenues were undoubtedly the most plentiful of the current year. Nevertheless, compared to revenues collected in March 1998, they were 10 percent or by 360 million kuna less. In the first three months of the year, this year's revenues lagged behind last year's by about 1,740 million kuna or 18 percent. It should be noted that slow revenue collection in 1999 was in major part due to a decreases in revenues from value added tax collection.

In March, State Budget expenditures were 3.9 billion kuna. Compared to the same month last year, March expenditure increased by 611 million kuna or 18 percent. It should be noted that the majority of savings within expenditures were effected in purchases of other goods and services. However, the main generator of increased expenditures remained subsidies and other current transfers, which doubled in March this year compared to the same period last year.

From foreign governments	-77	-385
Other borrowing abroad	1469	1 835

Finance Treasury bills have been on the rise. The bills are offered for 42 days only, while the amount of purchase was constantly decreasing. The interest rate increased from 10.60 percent to 10.80 percent. Commercial banks' interest rates have also been decreasing. Following increases in the average interest rate on total kuna loans in 1998 and the first two months of 1999 (from 14.3 percent to 15.5 percent), rates in March 1999 plummeted back to 14.8 percent. This was in major part caused by a relatively low (compared to previous years) average interest rate on kuna loans with the currency clause of 13.2 percent. The average interest rate on kuna loans without the currency clause remains at the high level of 16.3 percent. Compared to the beginning of 1998, this represents a substantial increase of 2.3 percentage points. The cause of this increase should primarily be sought in the banking crisis, which began around the middle of last year. Even though these loans are not directly indexed to the exchange rate, the depreciation of the kuna in the last quarter of 1998 and in the first two months of 1999, which raised costs for banks, also contributed to the increase in this interest rate.

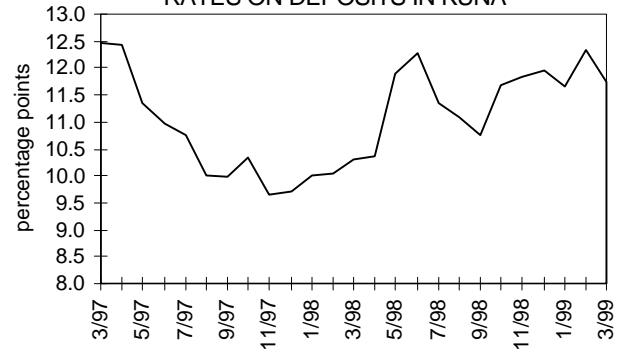

On the liability side, in addition to high interest rates on all deposits (which represents a huge expense for all banks) there has been again a significant discrepancy in interest rates on kuna and foreign exchange deposits. The average interest rate on kuna deposits amounted to about 4.5 percent, while the average interest rate on foreign currency deposits amounted to 4.1 percent (decreasing by a total of 1.5 percentage points in the last eight months).

The interest rate "spread" slightly decreased compared to February, when it reached its two-year high. This data only indicates the inefficiency of domestic banks and the level of improvement still possible through rationalization of their business.

DMBs INTEREST RATES ON DEPOSITS  
(annual level)

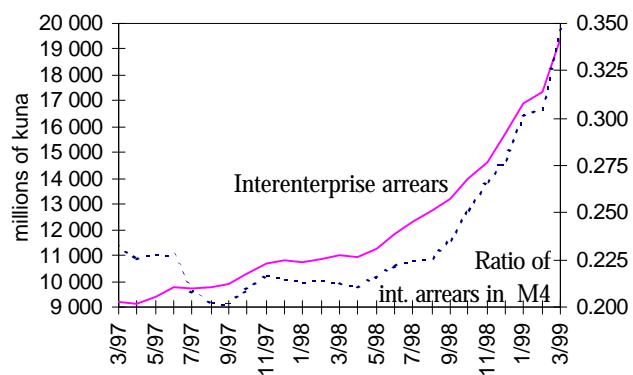

DIFFERENCE BETWEEN INTEREST RATES  
ON CREDITS IN KUNA AND INTEREST  
RATES ON DEPOSITS IN KUNA

Note: spread is calculated as a difference between interest rates on non-indexed credits in kuna and interest rates on non-indexed deposits in kuna.

## **Classification and Presentation of Data on Claims and Liabilities**

Data on financial institutions' claims and liabilities are classified according to institutional sectors and financial instruments. Institutional sectors are: financial institutions, central government and funds, other domestic sectors and foreign sector.

The financial institutions sector includes following sub-sectors: monetary authorities (the central bank), deposit money banks (DMBs), other banking institutions and other financial institutions. The central bank is the Croatian National Bank (CNB). Deposit money banks are institutions granted, by the Croatian National Bank, the permission to perform banking business services in accordance with the Law on Banks and Savings Banks. Data on DMBs does not include claims and liabilities of former branches of banks with their headquarters in the former Yugoslavia. Other banking institutions comprise savings banks and housing savings banks. Since July 1995 savings banks have been under auspices, and have operated with the permission of the CNB. Other financial institutions are financial institutions not classified as banks or other banking institutions (insurance companies, investment funds, savings cooperatives etc.)

The central government and funds comprises government institutions including Croatian Roads Authority, State Agency for Deposit Insurance and Bank rehabilitation and Bank and Croatian Guarantee Agency, and following central government funds: Croatian Health Insurance Institute, Republic Fund for Pension and Disability Insurance of Workers in Croatia, Croatian Employment Service, Croatian Privatization Fund, Public Water Management Fund and Croatian Bank for Reconstruction and Development. Other domestic sectors are other central government funds (those not classified under the central government and funds sector), local government authorities and local funds, public and private companies and households, including craftsmen and non-profit institutions. In some tables other domestic sectors are divided into following sub-sectors: local governments and funds (including other republic funds, local government authorities

and local funds), public and private enterprises, and households (including craftsmen and non-profit institutions).

Foreign sector includes foreign legal entities and individuals.

All data on claims and liabilities refer to balances at the end of the reporting period. Foreign exchange items are reported in their kuna equivalent at the midpoint CNB exchange rate at the end of the reporting period.

## **Table A1: Monetary and Credit Aggregates**

The table shows data on some basic monetary and credit aggregates, including their monthly growth rates.

*Reserve money* has been taken over in its entirety from the Monetary Authorities Accounts (Table C1).

*Money (M1)* is defined in the same way as the corresponding item in the Monetary Survey (Table B1). It comprises cash outside banks, deposits with CNB by other banking institutions and other domestic sectors as well as DMBs' demand deposits. *Money (M1a)* comprises currency outside banks and DMBs' demand deposits, increased by the demand deposits of the central government and funds with DMBs.

*Broadest money (M4)* comprises Money (M1), savings and time deposits, foreign currency deposits as well as bonds and money market instruments (all above components taken over from the Monetary Survey (Table B1)).

*Net domestic assets* are defined as a difference between total liquid assets and foreign assets (net).

*Domestic credit* comprises DMBs' claims on other domestic sectors, other banking institutions and other financial institutions.

## **Table B1: Monetary Survey**

The monetary survey shows consolidated data from the Monetary Authorities Accounts (Table C1) and DMB's Accounts (Table D1).

*Foreign assets (net)* are the difference between total foreign assets and total foreign liabilities of the CNB and DMBs.

*Domestic credit* is the sum of corresponding items from Monetary Authorities Accounts and DMB's accounts. Claims on central government and funds are reported on the net basis, i.e. decreased by central government and funds' deposits with the CNB and DMBs.

*The money* is the sum of currency outside banks, deposits by other banking institutions with the CNB, deposits by other domestic sectors with the CNB and DMB's demand deposits (item *Demand deposits* in DMB's Accounts, Table D1).

Items *Savings and time deposits*, *Foreign currency deposits* as well as *Bonds and money market instruments* are entirely taken over from the DMB's Accounts, while item *Restricted and blocked deposits* represent the sum of correspondent items from Monetary Authorities Accounts (excluding DMBs blocked deposits with the CNB) and DMBs Accounts. Other items (*net*) are unclassified liabilities decreased by unclassified assets.

**Table B2: Number of Reporting Deposit Money Banks and Savings Banks and Their Classification by Size**

The table shows the total number of DMBs and savings banks which report monthly to the CNB. Their operation is shown in the DMB's/savings banks' accounts.

Due to the fact that savings banks were not legally obliged to report their operation to the CNB until June 1995, the total number of savings banks refers only to those savings banks which reported voluntarily to the CNB. In July 1995, coordination of the registration of savings banks with the Law on Banks and Savings Banks, and reporting to the CNB became compulsory. Since July 1995, total number of savings banks reporting to the CNB has corresponded with the total number of registered savings banks. The table also shows the classification of reporting DMBs and savings banks according to their total assets.

**Table C1: Monetary Authorities Accounts**

The table reports data on claims and liabilities by monetary authorities. *Foreign assets* include the following forms of foreign currency and kuna claims on foreign legal entities and individuals: monetary gold, holdings of special drawing rights, foreign cash in vaults, reserve position in the International Monetary Fund, current account balances with foreign banks, time deposits in foreign banks, foreign currency security investments and other claims. *Claims on central government and funds* are loans and overdue claims on the budget of the Republic of Croatia. *Claims in kuna* are short-term loans granted for the purpose of overcoming the incoordination between incoming revenues and execution of budgetary expenditures, long-term loans granted by special decrees by the government of the Republic of Croatia, and overdue claims on the State Budget for liabilities to the IMF and foreign banks. *Claims in foreign currency* was a counter-entry to the liability to the IMF based on the succession of membership in that institution.

*Claims on other domestic sectors* are loans and overdue claims on other domestic sectors.

*Claims on DMBs* are credit to DMBs, deposits by the CNB with DMBs and overdue claims on DMBs. *Credit to DMBs* is split according to the type of financial instruments. *Refinancing of DMBs* include loans granted within general and selective quotas up to the end of 1993, as well as advances to DMBs for performing currency exchanges. Refinancing loans granted within the general and selective quotas were paid back in their entirety by the end of April 1994. In July 1994, they were formally revoked. Item *Lombard credits* comprises credits to DMBs for regular maintaining of the day-to-day liquidity, which were replaced by lombard credits in December 1994. Overdue claims on DMBs comprise loans due, giro account overdrafts and banks' undiscipline in allocation and maintenance of statutory reserve requirements.

*Reserve money* consists of currency outside banks, cash in DMBs' vaults, DMBs' deposits with the CNB, other banking institutions' deposits and other domestic

sectors' deposits with the CNB. *DMBs' deposits* are: giro account balances, statutory reserves deposited on a special account with the CNB as well as CNB bills on obligatory basis. *Deposits by other banking institutions* are: giro account balances of savings banks as well as statutory reserves of savings banks' deposited on a special accounts with the CNB. *Deposits by other domestic sectors* are: other domestic sectors' giro account balances (this refers to accounts opened with the CNB by October 1994, since when they have been in the process of transition into deposits with the DMBs).

*Restricted and blocked deposits* include required foreign exchange reserves, restricted deposits and blocked foreign exchange deposits. Banks and savings banks are required to place foreign exchange reserve deposits in accounts at the Croatian National Bank on the basis of certain foreign exchange deposits they hold. Blocked deposits are mainly kuna funds set aside on the basis of court order or legal regulation. Blocked foreign exchange deposits are funds that were set aside in special accounts at the Croatian National Bank for repaying unpaid amounts due to foreign creditors.

*Foreign liabilities* include use of IMF credits and liabilities to international financial institutions.

*Central government and funds deposits* are demand deposits and foreign currency deposits of the central government and funds with the CNB, and CNB bills voluntary subscribed by the Croatian Bank for Reconstruction and Development and State Agency for Deposit Insurance and Bank Rehabilitation.

*CNB bills* are CNB bills on voluntary basis in kuna and in f/c excluding CNB bills voluntary subscribed by the Croatian Bank for Reconstruction and Development and State Agency for Deposit Insurance and Bank Rehabilitation.

*Capital accounts* include reserves, funds, undistributed profit and f/c revaluation adjustment (net).

*Other items (net)* are unclassified liabilities decreased by unclassified assets of the CNB's accounts.

**Table D1: Deposit Money Banks' Accounts**

DMBs' accounts include data on Croatian DMBs' claims and liabilities. DMBs' mutual claims and liabilities are consolidated.

*Required reserves* held at the Central Bank include kuna and foreign exchange reserves. Kuna reserves include vault cash and kuna funds held in accounts at the Central Bank. Foreign exchange reserves include foreign exchange held in accounts at the Central Bank.

*Foreign assets* are the following forms of kuna and foreign currency claims on foreign legal entities and individuals: foreign cash in vaults, nostro letters of credit and other collateral's with foreign banks, deposits with foreign banks, securities, loans, equities and arrears. Unregulated claims on institutions of former Yugoslavia are shown separately.

*Claims on central government and funds* are the following forms of claims in kuna and foreign currency: securities, loans, equities and arrears (including claims for interest charged and due 30 and more days prior to the reporting date). Main forms of claims on the central government are shown separately: bonds issued in accordance with the Decree Law on the Transformation of Household Foreign Exchange Savings Deposits with Banks into the Public Debt of the Republic of Croatia, and bonds issued in accordance with the Law on the Issue of Bonds for the Restructuring of the Economy of the Republic of Croatia.

*Claims on other domestic sectors* include the following claims in kuna and foreign currency: securities, loans (including acceptances), equities and claims due.

Same forms of kuna and foreign currency claims are included in claims on other banking institutions and other financial institutions, with one difference: *Claims on other banking institutions* also include deposits with those institutions.

Items *Demand deposits, Savings and time deposits, Foreign currency deposits* as well as *Bonds and money market instruments* comprise banks' liabilities to other domestic sectors, other banking institutions and other financial institutions.

*Demand deposits* include giro and current accounts balances and other transferable deposits, decreased by currency in the payment system, i.e. checks in banks' vaults and checks in collection.

*Savings and time deposits* are: kuna sight deposits as well as kuna time and notice deposits.

*Foreign currency deposits* are: foreign currency sight deposits as well as foreign currency time and notice deposits.

*Bonds and money market instruments* are: banks' liabilities for securities issued (net) and loans obtained.

*Foreign liabilities* comprise the following forms of kuna and foreign currency liabilities to foreign legal entities and individuals: giro and current accounts, loro letters of credit and other collateral's, savings and time deposits, loans received and liabilities due. Unregulated liabilities to institutions in former Yugoslavia are shown separately within foreign liabilities.

*Central government and funds' deposits* are all forms of DMBs' kuna and foreign currency liabilities (except restricted and blocked deposits) to the central government and funds.

*Credit from central bank* comprises loans obtained from the CNB and deposits by the CNB with DMBs. Repurchase of securities is also considered and treated as loan.

*Restricted and blocked deposits* comprise the following DMBs' liabilities: kuna and foreign currency restricted deposits by other domestic sectors, other banking institutions, other financial institutions, central government and funds as well as foreign legal entities and individuals; households' blocked foreign currency deposits, regulated by the Decree Law on the Transformation of Household Foreign Exchange Savings Deposits with Banks into the Public Debt of the Republic of Croatia and foreign currency deposits by domestic sectors to cover outstanding liabilities due to foreign creditors.

*Capital accounts* are share capital, reserves, provisions, current profit or loss, undistributed profits and f/c revaluation adjustments (net).

*Other items (net)* are unclassified liabilities decreased by unclassified assets.

## Tables D2-D12

This group of tables (with the exception of Table D5) represents an elaborate presentation of appropriate items of claims and liabilities of DMBs' Accounts (Table D1).

### Table D2: Deposit Money Bank's Foreign Assets

This table shows DMBs' claims on foreign legal entities and individuals.

*Foreign assets* of the DMBs comprise foreign assets in kuna and foreign currency as well as DMBs' claims on the former Yugoslavia and the adjustment for former branches. Item *Claims on former Yugoslavia*.

*Claims on foreign banks* and *Claims on foreign nonbanks* (total and by financial instruments) are shown separately within both foreign assets in kuna and in foreign currency. Within *Claims on former Yugoslavia*, those in kuna and in foreign currency are shown separately.

### Table D3: Deposit Money Banks' Claims on the Central Government and Funds

The table shows kuna and foreign currency DMBs' claims on the central government and funds.

*Bonds* arising from blocked foreign currency savings deposits are issued in accordance with the Decree Law on the Transformation of Household Foreign Exchange Savings Deposits with Banks into the Public Debt of the Republic of Croatia

*Big bonds* are those issued in accordance with the Law on the Issue of Bonds for the Restructuring of the Economy of the Republic of Croatia.

*Other claims* are all other DMBs' kuna and foreign currency claims on central government and funds: securities, loans, equities, postponed interest arrears (claims for interest due but not payable before relations with foreign creditors are regulated) and arrears (including claims for interest due 30 and more days prior to the reporting date).

*Adjustment for former branch banks* refers entirely to other central government's bonds.

#### **Table D4: Deposit Money Bank's Claims on Other Domestic Sectors**

The table shows DMBs' kuna and foreign currency claims on other domestic sectors, classified according to financial instruments: bills of exchange, commercial bills, bonds, other short-term securities, loans and advances (including acceptances and commodity futures), equities and arrears.

By October 1994, foreign currency loans were granted only when counterparted by DMB's loan abroad, in bank's name and on behalf of the final beneficiary of the loan. Due to the fact that foreign debts are still not entirely regulated, there is an item *Postponed interest arrears*. It refers to claims on interest due at the original due date, but the obligation to pay is postponed until relations with foreign creditors are regulated.

#### **Table D5: Distribution of Deposit Money Banks' Loans by Domestic Institutional Sectors**

The table shows data on kuna and foreign currency loans granted by DMBs to domestic sectors, including acceptances and commodity futures.

#### **Table D6: Demand Deposits with Deposit Money Banks**

The table shows demand deposits with DMBs, classified by domestic institutional sectors.

Demand deposits are the sum of other domestic sectors', other banking institutions' and other financial institutions' giro and current accounts balances, as well as other transferable deposits, decreased by currency in the payment system, i.e. by amount of checks in banks' vaults and checks in collection.

#### **Table D7: Time and Savings Deposits with Deposit Money Banks**

The table shows *Savings deposits of households* in kuna as well as *Time and notice deposits* in kuna by other domestic sectors, other banking institutions and other financial institutions with DMBs.

#### **Table D8: Foreign Currency Deposits with Deposit Money Banks**

The table shows foreign currency savings and time deposits by other domestic sectors, other banking institutions and other financial institutions with DMBs. Foreign currency savings deposits are all foreign currency sight deposits, while foreign currency time deposits also include foreign currency notice deposits.

#### **Table D9: Bonds and Money Market Instruments**

The table shows DMBs liabilities for securities issued (net) and loans received from other domestic sectors, other banking institutions and other financial institutions.

*Money market instruments (net)* comprise DMBs net liabilities for CNB bills, bills of exchange (issued and accepted) and other securities issued.

*Bonds (net)* comprise DMBs net liabilities for kuna and foreign currency bonds issued.

*Other domestic borrowings* comprises loans received, reported total and classified by institutional sectors.

#### **Table D10: Deposit Money Banks' Foreign Liabilities**

The table shows DMBs' total foreign currency and kuna liabilities to foreign legal entities and individuals, with the exception of restricted kuna and foreign currency deposits by foreign legal entities and individuals.

DMBs' foreign liabilities comprise foreign currency liabilities, foreign kuna liabilities and DMBs' liabilities to the former Yugoslavia.

Within foreign kuna and foreign currency liabilities, liabilities to foreign banks are reported separately from liabilities to foreign nonbanks (total and by financial instruments). Within liabilities to the former Yugoslavia, liabilities in foreign currency are reported separately from kuna liabilities.

Item *Postponed interest arrears* on foreign currency loans showing within foreign currency liabilities refers to liabilities for interest due on the original due date, but payable after the regulation of relations with foreign creditors.

**Table D11: Central Government and Funds Deposits with Deposit Money Banks**

The table reports total DMBs' kuna and foreign currency liabilities to the central government and funds, with the exception of restricted (kuna and foreign currency) deposits by the central government and funds with DMBs.

Kuna and foreign currency deposits by Republic of Croatia and republic funds are shown separately. Kuna deposits comprise demand deposits, kuna time and notice deposits, and kuna loans obtained from the central government and funds. Foreign currency deposits comprise foreign currency sight deposits, as well as foreign currency time and notice deposits.

**Table D12: Restricted and Blocked Deposits with Deposit Money Banks**

The table shows restricted and blocked deposits by the central government and funds, other domestic sectors, other banking institutions, other financial institutions and foreign legal entities and individuals with DMBs.

*Restricted and blocked deposits* include two categories of deposits: restricted (kuna and foreign currency) deposits and blocked foreign currency deposits.

*Blocked foreign currency deposits* include households' foreign currency deposits regulated by the Decree Law on the Transformation of Household Foreign

Exchange Savings Deposits with Banks into the Public Debt of the Republic of Croatia, as well as domestic sectors' deposits regulated by the Decree Law on the Settlement of Arrears to External Creditors.

**Table E1: Savings Banks' Accounts**

Savings banks' accounts include the data on savings banks' claims and liabilities. Savings banks' mutual claims and liabilities are consolidated.

*Reserves* are savings banks' kuna cash in vaults and kuna deposits with the CNB.

*Foreign assets* refer to foreign currency in savings banks' possession within arrangements with DMBs regarding performing currency exchange transactions.

*Claims on central government and funds* are all kuna and foreign currency claims on the Republic of Croatia and central government funds.

*Claims on other domestic sectors* are the following forms of kuna and foreign currency claims: securities, loans, equities and claims due. Claims on local governments and funds, enterprises and households, are shown separately within this item.

*Claims on DMBs* include the following forms of kuna and foreign currency claims on DMBs: savings and time deposits, securities, loans, equities and arrears. Item *Claims on other financial institutions* comprises the same forms of kuna and foreign currency claims.

*Demand deposits* comprises other domestic sectors' and other financial institutions' kuna giro and current accounts balances as well as other transferable deposits.

*Savings and time deposits* are households' savings deposits in kuna as well as time and notice deposits by other domestic sectors, domestic deposit money banks and other financial institutions.

*Foreign currency deposits* are households' foreign currency savings and time deposits.

*Bonds* are liabilities by other banking institutions for securities issued (net), as well as loans received from other domestic sectors, domestic DMBs and other financial institutions.

*Foreign liabilities* are foreign savings and time deposits in foreign currency.

*Central government deposits* are kuna time and notice deposits by the Republic of Croatia and central government funds.

*Credit from central bank* comprise kuna loans obtained from the Croatian National Bank.

*Capital accounts* are: share capital, reserves, provisions, current profit or loss, undistributed profit and f/c revaluation adjustment (net).

*Other items (net)* are unclassified assets decreased by unclassified liabilities.

#### **Table F1 - Credit Rates of Croatian National Bank**

The table shows interest rates used by the CNB to calculate and charge interest on loans and on all other claims.

Lending CNB interest rates are being set by special decrees of the Council of the Croatian National Bank, on annual basis. Exceptionally, from June 1995 to September 11, 1996 interest rate charged by CNB on lombard credits has been 1.5 percentage point higher than the weighted average interest rate on CNB bills on voluntary basis (which serve as collateral for lombard credits) in cases when the weighted average interest rate was higher than 16.5%. Congruently, from June 1995 to August 1996 the table reports weighted average interest rate on lombard credits. Interest rate in September 1996 is calculated as weighted average of interest rate applied in first 10 days of September 1996 (according to the regime mentioned above) and fixed interest rate applied since September 11, 1996.

Time series presented in the table contain certain breaches, due to changes in CNB's monetary policy instruments. Consequently, until November 1994, column 4 shows interest rates on regular credits for maintenance of day-to-day liquidity, which were granted based on securities portfolio, and from December 1994 onwards, interest rates on lombard credits.

Furthermore, data shown in column 6 refer, until September 1994, to interest rates on special credits for savings deposits' payments

and for payments from households' current accounts, and from October 1994 until September 1997 to interest rates on daily credits for savings deposits and current accounts in kuna. Daily credits, as opposed to special credits, are paid back on the same day. In October 1997, this instrument was replaced by daily credits for overcoming short-term liquidity problems which are collateralized by CNB bills. Since December 16, 1998 this credit is incorporated in lombard credit, applying different interest rate for its usage within one day.

Data shown in column 7 refer, until December 1994 to interest rate on initial credits, and since March 18, 1998 to credits for overcoming illiquidity problems of banks under evaluation for entry into rehabilitation and restructuring procedures and since February 1999, to interest rates on short-term liquidity credits.

Interest rates reported in column 8 refer to the use of statutory reserves, which was being used by the banks (in prescribed percentage) to maintain day-to-day liquidity until September 1994. Interest rates paid until September 1994 on the use of statutory reserve funds in amount above prescribed and/or for longer period than allowed are shown in column 9. Since October 1994, interest rates paid on the use of statutory reserve funds are the same as those used for any other form of financial undiscipline, in accordance with the late interest regulations (shown in column 10).

Until June 1994 the same interest rate was applied to funds used above amounts available on giro accounts and to inaccurately calculated or under-appropriated statutory reserves (reported in column 9). From July to September 1994, interest rate applied to the use of those funds was 21%, and since October 1994 the same interest rates have been applied as for other forms of financial undiscipline, shown in column 10.

#### **Table F2: Deposit Rates of Croatian National Bank**

The table shows interest rates paid by the CNB on funds deposited with the CNB as well as on securities issued.

Interest rates paid by the CNB for appropriated statutory reserve funds are being set by the Council of the CNB. Until 7 October 1993, CNB was setting different exchange rates for statutory reserve funds based on savings and time deposits. Therefore, for that period the table reports weighted average interest rate on appropriated statutory reserve funds (column 3). From 8 October 1993 until the end of February 1994, CNB paid no interest on appropriated statutory reserve funds, and since March 1994, uniform rate has been applied to these funds.

Interest rates on CNB bills on obligatory basis are set by the Council of the CNB.

Until October 1993, interest rates on CNB bills on voluntary basis were also set by the Council of the CNB, while since November 1993, they have been set at CNB bills' auction sales. Congruently, since November 1993, columns 5, 6 and 7 report weighted average interest rates attained in auctions of the CNB bills.

Until October 1994, interest rates on CNB bills on voluntary basis due in 30 and 90 days are reported in columns 6 and 7 respectively.

Since April 1998 column 9, 10, 11 report weighted average interest rates of the CNB bills on voluntary basis in EUR and USD (until December 1998 in DEM and USD), due in 63, 91, 182 and 365 days attained in CNB bill's auctions as a weighted average of subscribed amounts in those two currencies.

**Table F3: Deposit Money Banks' Reserves on Obligatory Basis**

This table shows data on monthly averages of day-to-day balances of reserves on obligatory basis by DMBs with the CNB.

*Reserve requirement* (column 3) represents the prescribed amount of funds banks are required to deposit on a special statutory reserve account with the CNB, or to maintain (in average) on their giro accounts or in vaults. This amount corresponds with the statutory reserve instrument of January 1995, while until December 1994 it comprised two instruments: statutory reserves and liquid assets requirement - LAR (except for the part in which banks were conforming to this

requirement by registering CNB bills on voluntary basis).

Column 4 shows weighted average reserve requirement ratio as a percentage of the reserve requirement (column 3) in the reserve base (CNB prescribes different reserve requirement ratios for different categories of deposit).

Column 5 shows the portion of the reserve requirement banks are required to deposit on a special statutory reserves account with the CNB (until December 1994 this amount corresponds with the statutory reserves instrument, while since January 1995 until May 1998, banks have been required to deposit at least 75% of the total reserve requirement on a special account with the CNB and since May 1998 at least 60% of the amount).

Column 6 shows the percentage of the statutory reserves deposited with the CNB in the total reserve requirement.

Column 7 shows the total amount of other deposits with the CNB on obligatory basis, which comprises CNB bills on obligatory basis, part of CNB bills on voluntary basis used by the banks to maintain the prescribed minimal liquidity (LAR), special statutory reserves (until July 1995) and statutory reserves on f/c deposits, f/c credits from foreign banks and guaranties und f/c credits from foreign banks.

Column 8 shows the total reserve requirement as a sum of reserve requirement and other deposits with the CNB on obligatory basis. Column 9 shows the percentage of total reserve requirement in the reserve base.

Column 10 shows weighted average remuneration rate for all forms of immobilized funds (i.e. for all components of total reserve requirement).

Column 11 shows the use of obligatory reserves, which includes use of appropriated statutory reserve funds (authorized and unauthorized), inaccurately calculated statutory reserves, non-maintenance of the prescribed minimal liquidity, i.e. (since January 1995) non-maintenance of the minimal average giro account and vault balance (determined in accordance with the calculation of statutory reserves), unregistered amount of the CNB bills on obligatory basis and inaccurately calculated

---

special statutory reserves (until July 1995) and inaccurately calculated statutory reserves on f/c deposits, f/c credits from foreign banks and guaranties und f/c credits from foreign banks.

**Table F4: Deposit Money Banks' Liquidity Indicators**

The table reports monthly averages of day-to-day balances of some indicators of DMBs' liquidity.

Column 3 shows free reserves, defined as bank's total reserves (on giro accounts and in vaults) decreased by the minimal average giro account and treasury balance, as prescribed by instruments of the CNB (until December 1994 by the requirement for banks' minimal liquidity, and since January 1995 by statutory reserve requirement).

Column 4 shows the primary liquidity ratio as a percentage of monthly day-to-day free reserves averages in monthly day-to-day averages of deposits which constitute the reserve base.

Column 5 shows the monthly average of day-to-day balances of secondary liquidity sources used. Secondary liquidity sources comprise: use of statutory reserves (until October 1994), regular loans for maintenance of day-to-day liquidity (until November 1994), use of funds exceeding those available on the bank's giro account (until October 1994), special credits for overcoming illiquidity problems (initial credits, credits for overcoming illiquidity problems of banks under evaluation for entry into rehabilitation and restructuring procedures), lombard credits (since December 1994), intervention credits for overcoming illiquidity (since October 1994), short-term liquidity credits (since February 1999) as well as outstanding liabilities due to the CNB.

Column 6 reports monthly average of day-to-day balances of CNB bills on voluntary basis in kuna (until December 1994, this amount is decreased by the portion of voluntarily registered CNB bills used by banks to maintain the prescribed minimal liquidity).

Column 7 reports monthly average of day-to-day balances on CNB bills on voluntary basis in foreign currency (EUR and USD).

**Table G1: Deposit Money Banks' Credit Rates**

The table contains weighted averages of DMBs' monthly interest rates on kuna and foreign currency loans, reported on a yearly basis.

Columns 3 and 4 show interest rates on the interbank daily and overnight money markets, according to information received from Money Market Zagreb. Data on DMBs' interest rates on kuna and foreign currency credits are based on DMBs' periodic reports. Basis for calculation of weighted averages are amounts of credits bearing corresponding interest rates, which were disbursed during the reported month, with the exception of interest rates on giro and current accounts credit lines, for which weighted averages were calculated based on the balance of these loans at the end of the reported month.

Column 5 shows interest rates on total (short-term and long-term) kuna credits not indexed to foreign currency. Interest rates on short-term kuna credits (shown in column 6) also include interest rates on discounted short-term securities (not indexed to foreign currency), weighted based on their face value.

Columns 8, 9, 10 shows interest rates on total (short-term and long-term) kuna credits indexed to foreign currency, including interest rates on discounted short-term securities indexed to foreign currency.

Interest rates on foreign currency credits (columns 11, 12 and 13) refer to credits released in Deutsche Mark or US dollars in a reported month, while weighted averages are calculated based on their kuna equivalent using current exchange rate. Credits released in other currencies are not included in this table.

Relative significance of particular interest rates (reported in the last line of the table) refers to data for the last period included in the table. It is calculated as a percentage of corresponding credit category (to which exchange rates apply) in total credits included in the calculation of weighted averages for that period.

**Table G2: Deposit Money Banks' Deposit Rates**

The table shows weighted averages of monthly DMBs' interest rates on kuna and foreign currency deposits, reported on a yearly basis.

Data on interest rates on DMBs' deposits are obtained from DMBs' periodic reports.

Column 3 reports weighted averages of monthly interest rates on total kuna deposits (sight deposits, savings and time deposits) not indexed to foreign currency. Weighted averages of monthly interest rates on total kuna deposits indexed to foreign currency are reported in column 6.

Interest rates on foreign currency deposits refer to deposits received in Deutsche Mark or US dollars, while weighted averages are calculated based on their kuna equivalent using current exchange rate. Deposits received in other foreign currencies are not included in the data reported in this table.

Basis for calculation of weighted averages are end-of-month balances of deposits. Exceptions are kuna and foreign currency time and savings deposits for which weighted averages are calculated (since July 1995) based on amounts of those deposits received during the reported month. Weighted averages of interest rates on total kuna and foreign currency deposits (columns 3 and 7) are weighted by the end-of-month balances of all categories included in the calculation.

Kuna and foreign currency deposits used as a credit collateral are included, while restricted deposits (deposits used for payment of imports and other restricted deposits) are not included into the calculation of weighted averages.

**Table G3: Deposit Money Banks' Trade with Foreign Exchange**

Data on trade with foreign exchange between DMBs comprise transactions of purchase and sale of foreign exchange on domestic foreign currency market. The transactions are classified by categories of participants (legal entities or individuals, banks, CNB). Source of data are DMBs periodic

reports on trading with foreign exchange, sent to the CNB on a regular basis. The amounts are stated in Euro (EUR), converted from other foreign currencies using the CNB's midpoint exchange rate (reporting period average). Other Croatian National Bank transactions include foreign exchange sales and purchases on behalf of Ministry of Finance.

**Table H1-H4: Balance of Payments**

The balance of payments is compiled in accordance with the recommendations of the International Monetary Fund (Balance of Payments Manual, Fifth Edition, 1993). Data sources include: reports of the Central Bureau of Statistics, the Croatian Health Insurance Institute, the Payments Institute, Commercial banks, enterprises and the Croatian national Bank, as well as research by the Tourism Institute and the Croatian National Bank.

Exports and Imports are shown on an f.o.b. basis. The basic data source for these items is the Report of the Central Bureau of Statistics on merchandise foreign trade of the Republic of Croatia. The data of the Central Bureau of Statistics are modified in accordance with the compilation method of the IMF: merchandise imports, which are shown in the Central Bureau of Statistics's report in c.i.f. terms, are corrected to f.o.b. (corrected for classification) and both imports and exports are corrected so that the coverage includes goods defined as such in the balance of payments methodology but not included in the statistics on merchandise trade.

Regarding imports, the difference between c.i.f. and f.o.b. is estimated on the basis of research studies of the CNB on samples of the largest importers, and the resulting value of f.o.b. imports is adjusted on the basis of foreign payments for repairs of ships as well as supply purchases in foreign ports, as well as estimates of the purchases of individual Croatian citizens abroad, obtained via a research study of the CNB. For the 1993 to 1996 period, merchandise imports from the merchandise trade statistics are modified by estimates of imports in duty-free zones (prepared by the CNB), while from 1997 on,

---

data on these imports are included in the merchandise trade statistics.

Income from transport services is recorded on the basis of research by the Croatian National Bank. This research was based on data provided by Croatian transport enterprises to the CNB. The data from this project are added to data from the statistics on international payments and income from pipelines and road transport, which were not included in the research project.

Expenditures on transport services include part of the difference between c.i.f. and f.o.b. imports, which pertain to services provided by non-residents, as well as estimates of the operating costs of Croatian transport companies in international transport. This estimate was performed by the Croatian National Bank, and amounts to 40% of the income of Croatian transport companies shown in the Croatian National Bank's research.

Income from travel and tourism is calculated as the total value of foreign exchange cash and checks purchased from nonresidents, the purchase of foreign checks from residents, foreign transfers of funds to the accounts of enterprises engaged in tourism, the sale of local currency and travelers checks abroad, health services provided to non-residents, receipts for scholarships and specialized study by non-residents in the Republic of Croatia, estimates of tourist expenditures of non-residents in registered lodging and accommodations and estimates of other forms of tourist expenditures of non-residents. The estimate of tourist expenditure in registered lodging and accommodations is based on research by the Institute of Tourism, and the estimate of other forms of tourist expenditure is based on econometric analysis of the Croatian National Bank. The other categories mentioned are based on data from foreign payments statistics.

Expenditures for travel and tourism are calculated as the total value of outflows for official travel, stipends and specialized study, foreign exchange expenditures of the Croatian Health Insurance Institute, outflows for tourism organized by domestic tourism enterprises and estimates of the foreign tourist expenditures of residents. These estimates are based on

research by the CNB, while the other categories mentioned are based on data on foreign payments.

Other services includes data from the foreign payments statistics which related to investment projects abroad, customs clearing services, representation fees, insurance services, postal services and the costs of Croatian representative offices overseas. To this category is added a part of unclassified services which can be explained as a linear trend, as well as estimates of the expenditures of international peacekeeping and humanitarian missions for goods and services in the Republic of Croatia, based on research by the Croatian National Bank.

The income account includes data from the foreign payments statistics on payments on the basis of interest, data from CNB research on income paid from foreign direct and portfolio investment of the private sector, Croatian National Bank data and Payments Institute data on income paid from foreign portfolio investment in the official sector and estimates of the factor income of resident peacekeeping and humanitarian missions in the Republic of Croatian, based on research of the Croatian National Bank. For the period 1993 to 1996, data on foreign direct investment do not include data on retained profit.

Current transfers to the government include data from the foreign payments statistics on the payment of pensions and other social transfers, monetary support and gifts, as well as data from the merchandise trade statistics of the Republic of Croatia on imports and exports of goods without payment obligation.

Income from transfers to other sectors includes data from the foreign payments statistics on the total value of foreign exchange transfers received from abroad. To this is added an estimate for unregistered transfers. This estimate is seen as 15% of the difference between the unexplained foreign exchange inflows and outflows of the household sector.

The foreign exchange receipts of the household sector include the purchase of foreign cash at exchange offices from residents and deposits of foreign cash in foreign

exchange accounts of residents at domestic banks. The total inflow is decreased by: estimate of tourist income and estimates of consumption of goods and services by members of peacekeeping and humanitarian missions in the Republic of Croatia.

The foreign exchange expenditures of the household sector include purchases of foreign cash by exchange offices and withdrawals of foreign cash from households' foreign exchange accounts at domestic banks. The total outflow is decreased by: individuals' expenditures for goods abroad and expenditures for foreign tourism by residents.

Expenditures on transfers of other sectors is based on foreign payments data on the total value of foreign exchange transfers abroad.

Foreign direct and portfolio investment includes data on those investments from the research of the CNB and data from the securities register of the official sector (Central bank and central government) at the Croatian National Bank and Payments Institute. In the 1993 to 1996 period, data on foreign direct investment of the private sector (banks and other sectors) do not include direct foreign debt investment, nor retained profit of the investor.

Other investment is classified according to the following institutional sectors: Croatian National Bank, Government, Banks and Other. The Government sector comprises central government, local government and local funds. The Banking Sector comprises commercial banks.

Funds--foreign exchange and deposits--banks shows the change in the total liquid foreign exchange of banks authorized to do business abroad. Funds--foreign exchange and deposits--other sectors includes a part of the net foreign exchange inflows of the household sector which is not classified on the current account, and which amounts to 85% of the unexplained foreign exchange inflows to the household sector.

Data on credits and arrears are obtained from statistics on foreign credit relations of the Croatian National Bank, which are based on concluded credit agreements registered with the Croatian National Bank.

Changes in the operational state of the foreign exchange reserves of the Croatian National Bank are calculated using current exchange rates of the currencies comprising the reserves, and are shown according to the exchange rate of the US dollar on the last day of the reporting period (end of the quarter or year).

#### **Table H5: International Reserves and Banks' Foreign Exchange Reserves**

The international reserves of the Croatian National Bank are shown according to the methodology contained in the *Balance of Payments Manual* (International Monetary Fund, 1993), and include those foreign claims of the Croatian National Bank that can be used to bridge imbalances in international payments. International reserves include Special Drawing Rights, reserve position in the International Monetary Fund, foreign currency, and deposits at foreign banks, as well as bonds and debt instruments.

The foreign exchange reserves of commercial banks include foreign currency and domestic commercial banks' deposits at foreign banks. These foreign exchange reserves represent an additional source of liquidity for bridging imbalances in international payments.

#### **Table H8: External Debt**

The table shows the balance of external debt at the end of the period, in millions of US dollars, according to the CNB's midpoint foreign currency rate at the end of the period.

External debt is defined as total value of following liabilities for foreign credits: outstanding debt (including principal in arrears) and projection of principal payments.

Principle arrears include principle payments which should have been paid, but for which no statistical information regarding payment has been received.

Interest arrears are estimated by using originally agreed interest rates and do not include late interest.

Short-term credits do not include the use of interbank line of credits.

---

**Table H9: Structure of foreign debt and repayment projection**

The table shows the structure of foreign debt by domestic institutional sectors, as well as the debt stock and a repayment projection for medium-term and long-term borrowing. All data are shown at the midpoint exchange rate of the Croatian National Bank at the end of the period.

Also, the tables show interest-payment projections for medium-term and long-term borrowing.
