

CROATIAN NATIONAL BANK

B U L L E T I N

No. 51 - July 2000

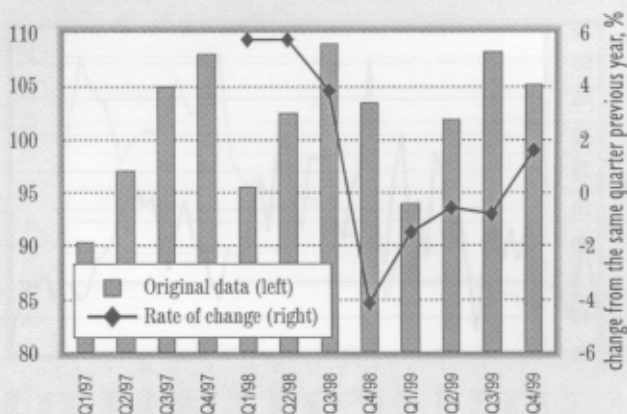

REAL SECTOR

In view of the April and May developments in industrial production it is not likely that the production growth of 3.7%, recorded in the first quarter, will be repeated in the second quarter. The decrease in production by 4.7% in April and the 1.1% increase in May, compared to the same months last year, resulted in a 1.8% total decline in production, compared to the same two-month period last year. A zero rate of change in production in the second quarter of 2000, compared to the same quarter of the previous year, would require a 3.5% growth in the industrial production in June. On the other hand, the increase in tourist night-stays by 76.1% in April and 27.0% in May, compared to the corresponding months in 1999, as well as the April growth of retail trade turnover by 13.0% in real terms will contribute positively to the total economic developments in the second quarter of 2000.

In the period from January to May 2000 industrial production increased by 1.4% compared to the corresponding period last year. Comparison of production developments by NCEA-branches shows an 8.9% growth in mining and extraction and a 2.0% growth in production industry, while supply of electricity, gas and water fell by 3.3%. The share of mining and extraction in the total industry is approximately the same as the share of one sector in the total processing industry, thus having no major influence on the total industrial production. In the first five months processing industry grew faster than the industrial production. The largest positive contributor to the total industry growth was production of chemical products (1.8 percentage points). The next three positive contributors were production of radio, TV and communication equipment (0.6 percentage points), production

of other non-metallic mineral products (0.5 percentage points) and production of metallic products (0.4 percentage points). The largest negative contribution (0.3 percentage points) was made by the following three sectors: manufacture of clothes, production of electric machines and appliances, and production of other transportation facilities (including shipbuilding).

In the supply of electricity, gas and water production has been continuously decreasing since August 1999 (except in January 2000), and in the first five months this sector contributed to a 0.5 percentage points decrease in the total industry production.

Production classified by main industrial branches shows that the largest positive contribution to the growth of total industry was made by intermediate products (8.4% growth in the first five months), whereas durable consumer goods contributed only slightly. In all other sectors production declined, and the largest negative contribution was made by non-durable consumer goods.

The growth of total trade turnover in real terms observed in February, March and April had an impact on a cumulative increase by 3.8% in the first four months of 2000, compared to the first four months of the previous year. Retail trade turnover increased by 8.2% in real terms in the first four months, while the employment grew by 4.5% compared to last April. The retail trade inventories increased by 13.5% in nominal terms. In the first quarter of this year retail trade turnover grew by 6.6% which, together with consumption of residents abroad and non-residents in the country, points to an increase in household consumption in the first quarter. The data on gross domestic product for the respective quarter are still not known.

The volume of construction projects in the period from January to March 2000 decreased by 10.7% compared to the corresponding period in 1999. The value of net construction orders in the first quarter dropped by 24.5% compared to the corresponding quarter last year, while the value of finished projects fell by 19.7%. In the first quarter of 2000 the number of finished residential units increased by 20.7% compared to the first quarter of 1999. Significant decrease in capital industrial production as well as in the volume and value of construction projects shows a possibility of decline in the investment activity based on the quarterly gross domestic product calculation, compared to the first quarter of 1999.

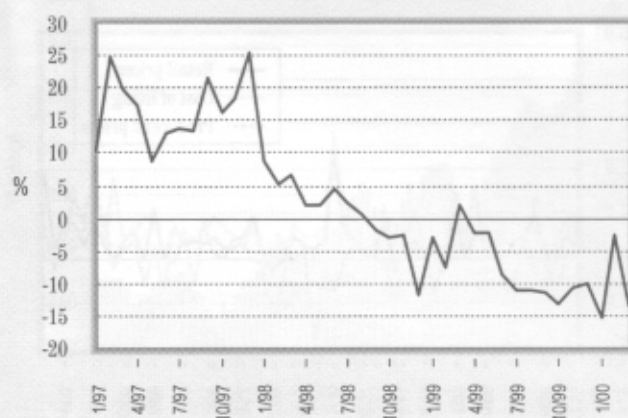

In the January-May period 2000, tourist arrivals in Croatia increased by 27.9% compared to the corresponding period in 1999, while night-stays rose by 28.6%. In the first five months total tourist night-stays amounted to 3,256 million. Domestic tourist night-stays were 30.6% and foreign 69.4%. In May the number of night-stays increased by 27.0% compared to the same month last year, where domestic tourist night-stays grew by 11.1% and foreign by 32.6%.

PRICES

Retail prices rose by 1.9% in June while the annual inflation rate went up from 5% in May to 7% in June. This substantial rise in retail prices was due to an increase in excise duties imposed on petroleum derivatives, alcoholic beverages, beer and certain makes of cars (excises imposed on tobacco products will be raised in July). This was a measure taken by the Croatian government in order to reduce a shortfall in budgetary revenues caused by reduced taxes and contributions on wages and prolonged terms of VAT

(prices of services relative to goods' prices), 1992 = 100

payment. The prices of goods covered by the retail price index increased by 2.4% in June, including a 3% increase in industrial products' prices and a 13.8% increase in the prices of beverages.

At the same time industrial foodstuffs' prices rose by a moderate 0.5%, while the prices of agricultural products fell by 7.6%. The weights of these groups of products used in calculating the cost of living index exceed their weights in the retail price index. This, together with lower weights of petroleum derivatives and beverages, resulted in the cost of living rising at a lower rate than retail prices, i.e. by 0.7%, bringing the annual rate up from 4.2% in May to 5.6% in June.

Producers' prices of industrial products rose by 0.7% in June, which contributed to their annual growth of 10.6%. The rise in producers' prices was considerably influenced by an 11% increase in the prices of industrial products from the field of crude petroleum and natural gas extraction.

The increase in excise duties in June had a direct one-time impact on the growth of retail prices. It can be expected that the rise in prices will undergo a postponed cost related carry-over in the next several months. However, it is not likely that inflationary pressures will substantially increase on account of a stable, only slightly appreciating, exchange rate (which, among other things, has a stabilizing effect on inflationary expectations), the current year's slow growth of wages and reduced cost of labor.

EMPLOYMENT AND WAGES

In May this year unemployment registered with the Croatian Employment Service decreased by 5,000 (1.5%). It reached 351,000 at the end of the month, 36,000 (11.4%)

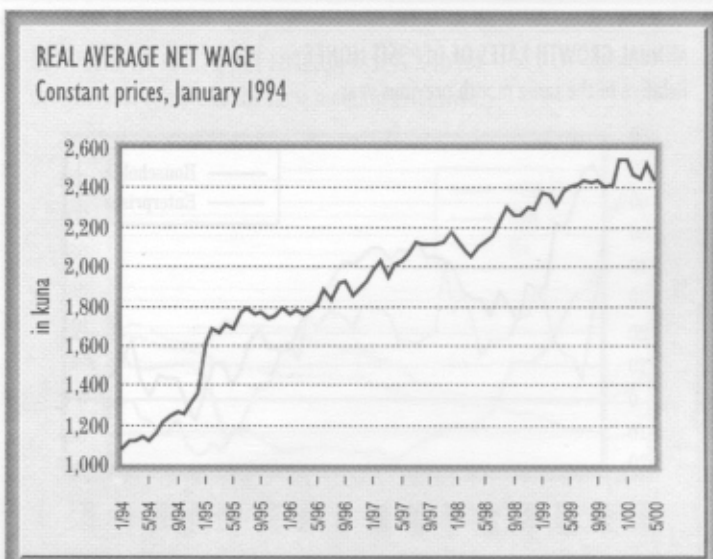

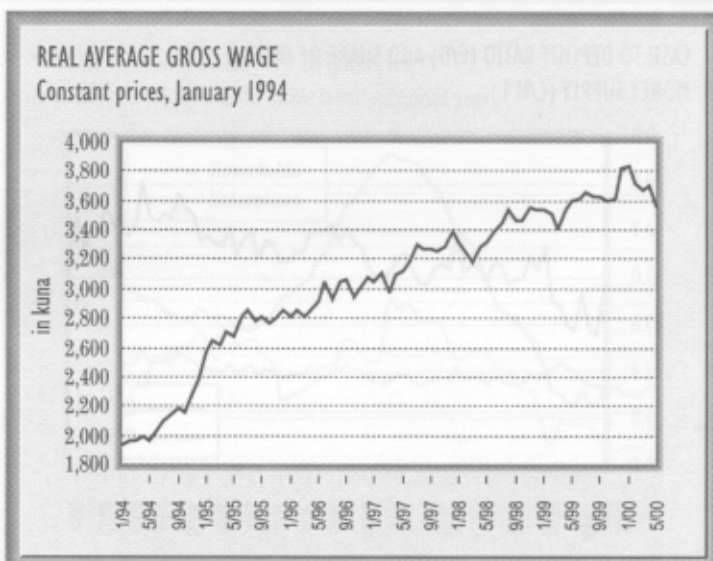

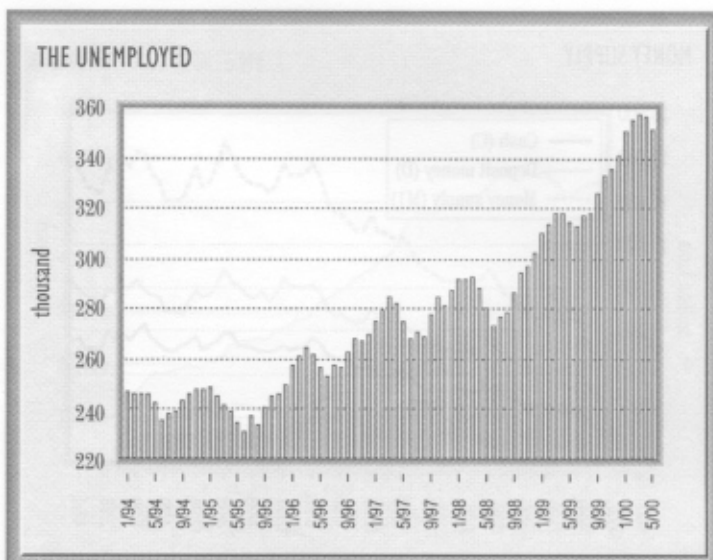

more than in the same period last year. This continued a seasonal downward trend in registered unemployment started in April. Newly registered unemployment rose by 5.8% in the first five months, compared to the same period of 1999. Total number of unemployed cleared out of the records grew by 10.6%, owing to a 22.4% rise in employment through CES and the fact that the number of unemployed cleared out due to other reasons remained stagnant. Employment rose by 0.2% in May, standing at 1,322,000. This growth, together with a decline in registered unemployment, reduced the unemployment rate from April by 0.3%, bringing it down to 21%.

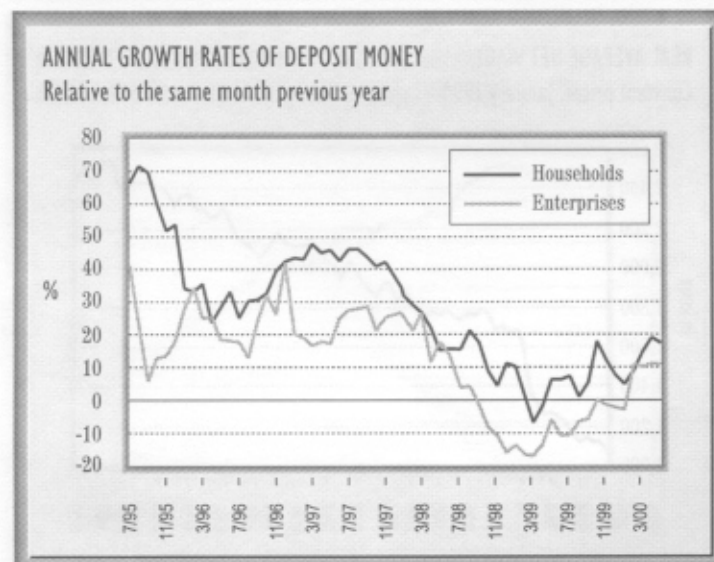

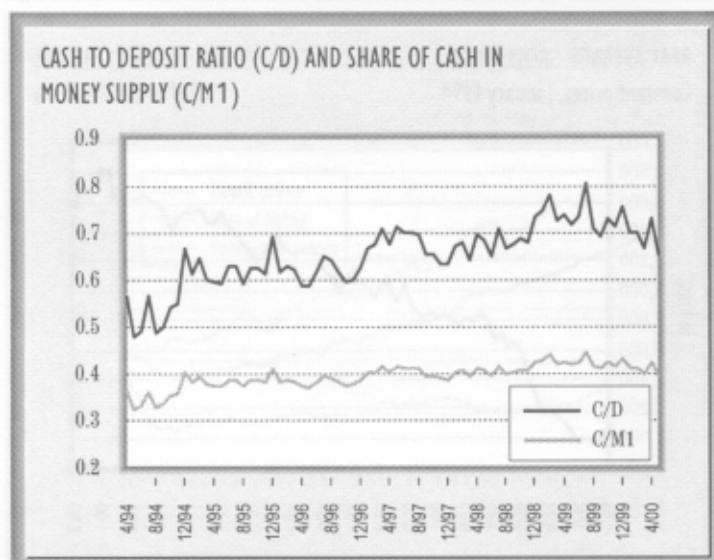

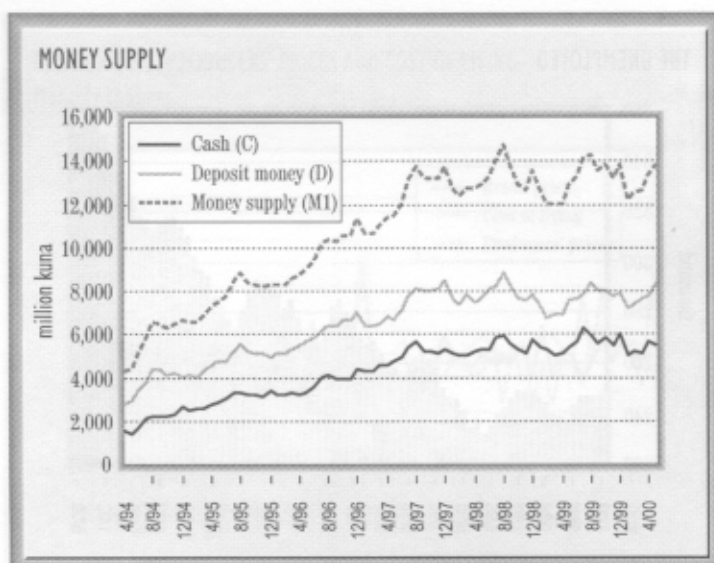

Compared to April, net wages in May were reduced by 2.9% in nominal terms and 3.6% in real terms. Gross wages decreased by 3.7% in nominal and 4.3% in real terms. This decrease was primarily due to making compensation and back payments as early as April. Growing at a reduced rate compared to last year; net wages paid in the first five months of 2000 rose by 9.1% in nominal terms and 4.9% in real terms. Due to recent tax reductions gross wages equaled this rate of growth, rising by 9.3% in nominal terms and 5.1% in real terms.

MONETARY DEVELOPMENTS

In May, total liquid assets increased considerably, lending remained stagnant while net foreign assets of the banking system rose mildly.

The increase in total liquid assets in May resulted equally from the rise in the money supply (HRK 0.5bn) and the growth in quasi-money (HRK 0.5bn), with M4 reaching HRK 60bn. Currency in circulation declined by HRK 0.2bn, while the total increase in the

money supply resulted from the growth in deposit money (HRK 0.7bn), which stood at HRK 8.4bn at the end of May. The increase in deposit money was mostly due to an increase in the enterprise sector (HRK 0.6bn). Recovery of the economic activity, seen in physical indicators, as well as the government's more orderly repayment of its obligations due, contribute to an improvement of the private sector liquidity. Preliminary data for June, indicating continuing substantial growth in the enterprises' deposit money, are also encouraging. The increase in quasi-money resulted from the HRK 0.4bn growth in foreign currency deposits and HRK 0.1bn in kuna deposits. Kuna equivalent amount of foreign exchange savings exceeded HRK 42bn in May. The substantial growth in foreign exchange savings seen over the first quarter of this year has slowed down, so that the average monthly growth in foreign exchange deposits is HRK 0.35bn.

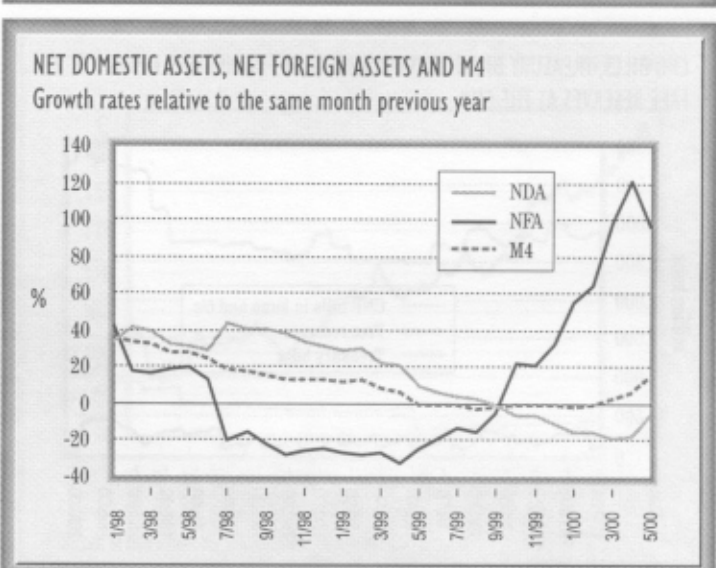

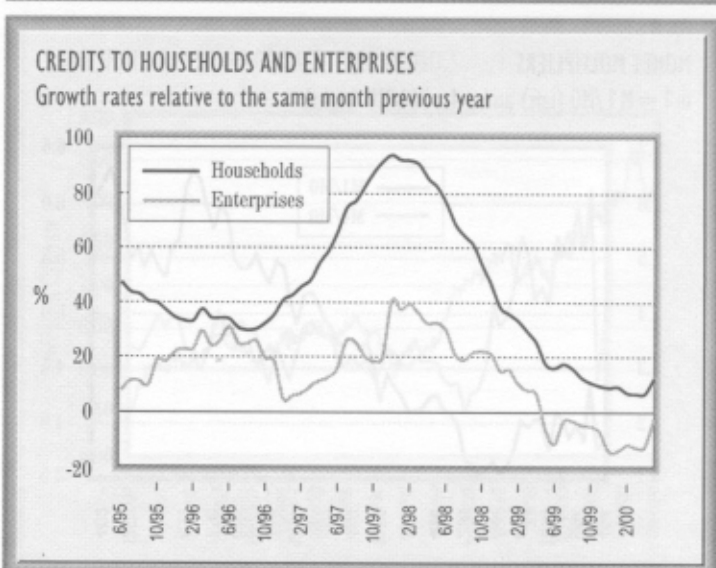

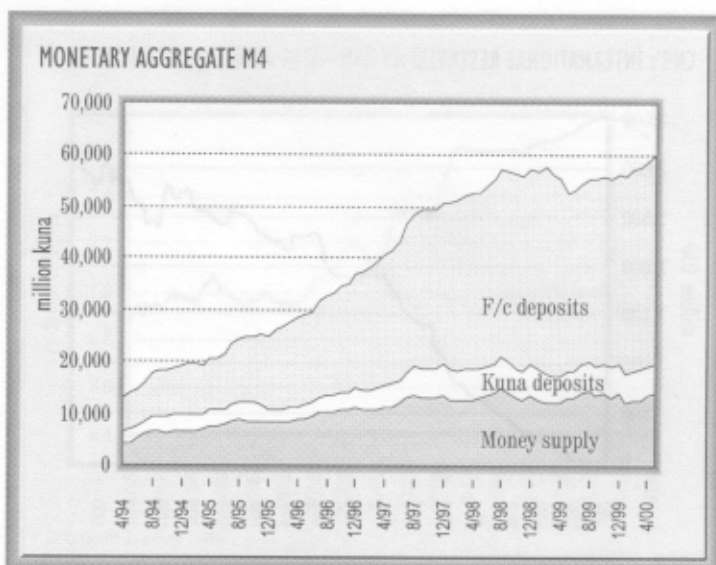

Movements in foreign exchange savings over the first half of this year should be put in a broader perspective. Over the first five months of last year foreign exchange deposits fell by HRK 3.4bn (9.0%), while in the same period this year they grew by HRK 3.3bn (8.9%). The last year's decline in savings was caused by the banking crisis and bankruptcy of four banks. The upsurge in savings over the first quarter this year is actually the end of the return of deposits expatriated last year. Since this source of growth has been exhausted, foreign exchange savings continue to grow at moderate rates, reflecting an autonomous inflow of foreign currency into the domestic banking system.

Bank lending has remained stagnant. Total lending grew by HRK 0.1bn in May, while the total increase over the first five months was HRK 0.5bn. Bank lending at

the end of May stood at HRK 56.4bn. Balance sheet data for May compared to those of April indicate even a drop in lending to enterprises. Extremely high liquidity of banks is still not sufficient by itself to lead to a growth in credits to the private sector. Banks searching for instruments in which to place surplus liquidity are confronted with limitations of the domestic financial market (securities market being shallow and of poor liquidity) and foreign exchange regulations which impose restrictions on placements into foreign exchange assets. On the other hand, lending to domestic sectors has not increased at all.

Net foreign assets of commercial banks declined, while the central bank's assets grew in May. The May intervention of USD 71m led to a redistribution of foreign exchange reserves of commercial banks in favor of the central bank. Banks increased their foreign exchange assets over the first quarter up to the limit set by the foreign exchange regulations thus finding placement for their free liquid assets. This trend was reversed in May because banks, obviously pressurized by the increased purchase of foreign currency from clients, lowered both their foreign exchange assets and the level of CNB bills in foreign exchange. With the almost unchanged external indebtedness, net foreign assets of commercial banks fell by HRK 1bn, while those of the central bank grew by HRK 1.1bn, reaching HRK 23.9bn in May.

The central government net relations with commercial banks remained mostly stagnant over May; the government only continued to decrease its foreign exchange deposits with commercial banks. At the end of May, banks' claims on the central government were HRK 16.3bn or 17% of assets, while claims on the private sector were 58.2% of assets.

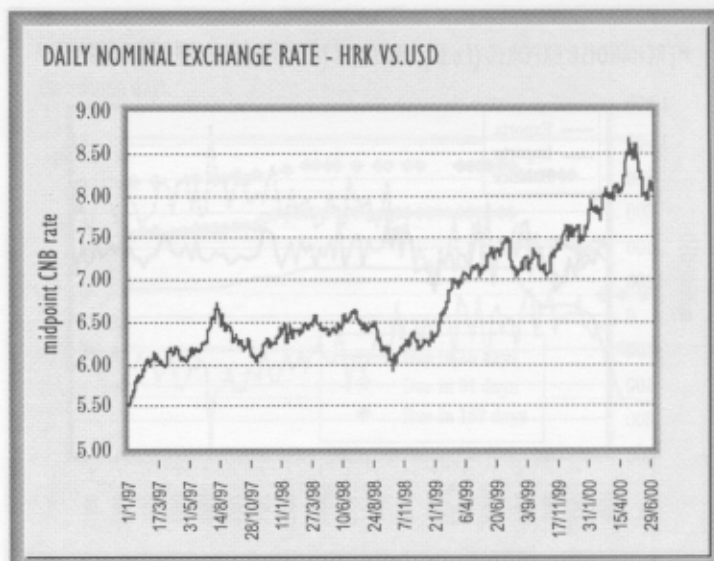

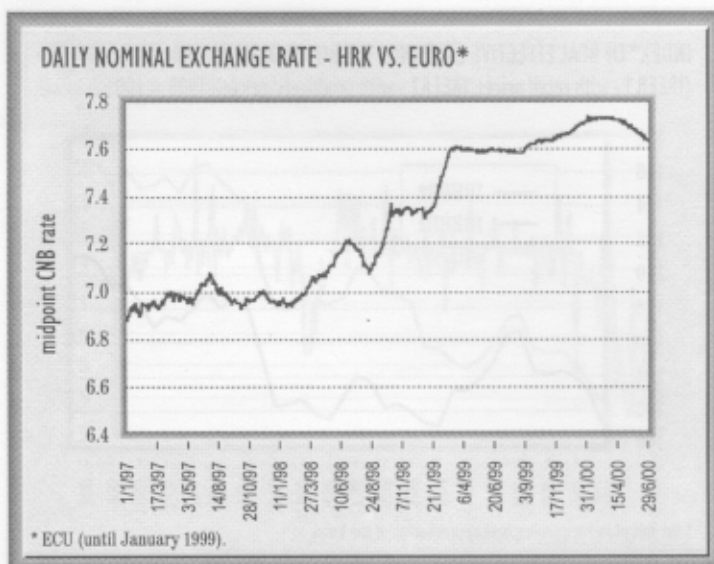

June. Favorable indicators in real activity point to a recovery of domestic demand (growth in retail trade turnover and domestic tourists' night-stays), so that domestic sectors' demand for cash grows vigorously in accordance with these developments.

EXCHANGE RATE

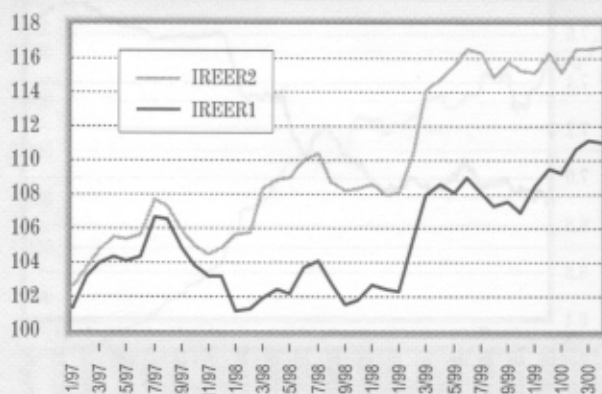

The exchange rate of the kuna against the Euro has remained stable, mildly appreciating for the fourth consecutive month (nearing HRK 7.66 in June). In June, the average exchange rate of the kuna against the Euro appreciated by 0.51%, and it also strengthened by 0.15% compared to December last year. The kuna versus the Euro exchange rate was similar in end June - appreciating by 0.58% compared to end May and 0.52% compared to end December last year.

In June, the appreciation of the kuna against the US dollar was even greater, reflecting the strengthening of the Euro against the US dollar on the world exchanges over the past weeks. Thus, the kuna versus the US dollar strengthened in June, on average, by 5.09% compared to May this year, i.e. by 2.9% on an end-of-month basis. However, this considerable strengthening of the kuna against the dollar only partly compensated for the depreciation of the domestic currency against the dollar in the previous period. Compared to December last year, the average exchange rate of the kuna against the US dollar thus depreciated by 6.62%, whereas the end-month exchange rate depreciated by 5.21%. Since the beginning of the year, the Euro has depreciated against the US dollar in the world foreign exchange markets by approximately the same amount.

The daily effective exchange rate of the kuna against the basket of currencies appreciated by a total

of 1.3% in June compared to end May, whereas it depreciated by 1.25% compared to end December in 1999.

The central bank purchased a total of EUR 89.5m at the foreign exchange auction held on June 23 in order to somewhat relieve the pressure for appreciation of the domestic currency.

According to preliminary data for April, the real effective exchange rate of the kuna deflated by retail prices appreciated by 0.13%, whereas the real effective exchange rate deflated by producer prices depreciated by 0.11%.

BALANCE OF PAYMENTS

The consequences of the new methodology for data on exports and imports in international merchandise trade, which was implemented in January 2000, are visible in data from the reports that have been successively received. As a result of subsequent inclusion of all information dating from a particular month in the data for that month, data on total exports and imports have been constantly revised.

Total exports over the first five months of 2000 amounted to USD 1,663.9m, which is a 0.1% increase compared to the same period of 1999. By contrast, merchandise imports in the same period amounted to USD 2,882.6m, only 1.0% less than in the same period of 1999. Such movements in 2000 resulted in a 3% decrease in the deficit. The merchandise trade deficit for the first five months of 2000 amounted to USD 1,218.6m in absolute terms. Therefore, the coverage of imports by exports increased from 57.1% to 57.7% for the periods compared.

Initially high growth rates of exports in the first months of 2000, evident from the previous reports, have been replaced by progressively lower rates as the Central Bureau of

Statistics has updated the information. This indicates that merchandise trade level is similar to that in 1999.

According to SITC sections, exports have continued to increase most in the sectors of mineral fuels and lubricants (54.8%), chemical products (15.2%) and manufactures classified by material (11.1%). According to the classification of exports by economic group of countries, exports to EU countries have increased by 13.8% compared to the same period of 1999.

MONEY MARKET AND INTEREST RATES

June was characterized by high liquidity of participants on the money market, large money supply and considerable decrease in interest rates. The average interest rate in daily transactions in the first 23 days of June was around 8.6% (in May it was 11.3%). During that period the average interest rate in daily transactions fell to 7.5%, which was also the lowest interest rate on callable loans, which account for the major share in daily transactions (71% in June). The average daily turnover increased by a high 30%, compared to May. By contrast, trading on the overnight market decreased on average by 13%. Interest rates on overnight transactions on the Zagreb Money Market fell to 4%, while those on interbank transactions fell to 2%. At the same time, at one point the overnight ZIBOR was 1.1%. In the last two days of the observed period, interest rates rose and demand increased significantly, reaching the level where it equaled supply. Overnight transactions also increased during the same period.

On the primary market, the amount of purchased short-term CNB and Treasury bills was substantial. Interest rates continued

Source: Agency for Domestic Payments

their downward, decreasing trend which started in May. The amount of purchased kuna CNB bills exceeded HRK 2.2bn. At the last auction the rates on 35-day bills were 7.95%; those on 91-day bills stood at 9% while the rates on 182-day bills were 10%. The amount of bought Treasury bills stood at over HRK 1.7bn, at 10% interest on 42-day bills and 11% interest on 91-day bills. There was a significant discrepancy between interest rates on CNB and Treasury bills. Both rates, however, were on the decrease, signaling a decrease in other interest rates. With regard to foreign currency denominated CNB bills, interest rates on EURO denominated bills increased, influenced by interest rates movements on markets abroad. There was a slight decrease in interest rates on US dollar denominated bills and a decrease in the amount of purchased US dollar denominated bills, obviously as a reflection of the strengthening of the kuna exchange rate in recent days.

May data on commercial banks' lending rates speak in favor of our thesis that the April average was indeed high, mostly because of the change in the relative importance of weights. Temporarily, greater weight had been attached to average interest rate on short-term household loans, mostly through current account overdraft facilities at interest of around 20.7%. The average interest rate on total kuna credits in May was 12.4%. It should be observed that the decrease in interest rate was also due to decreased interest rates on corporate lending. The average interest rate on short-term kuna corporate lending without a currency clause fell by over 2 percentage points, compared to April and now stands at around 9.5%. Interest rates on long-term credits (above all on kuna credits with a currency clause) were 11.3%. By contrast, de-

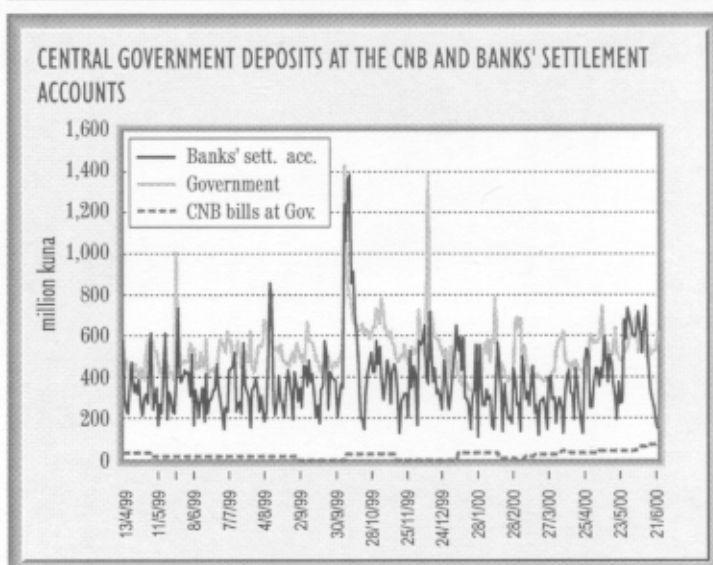

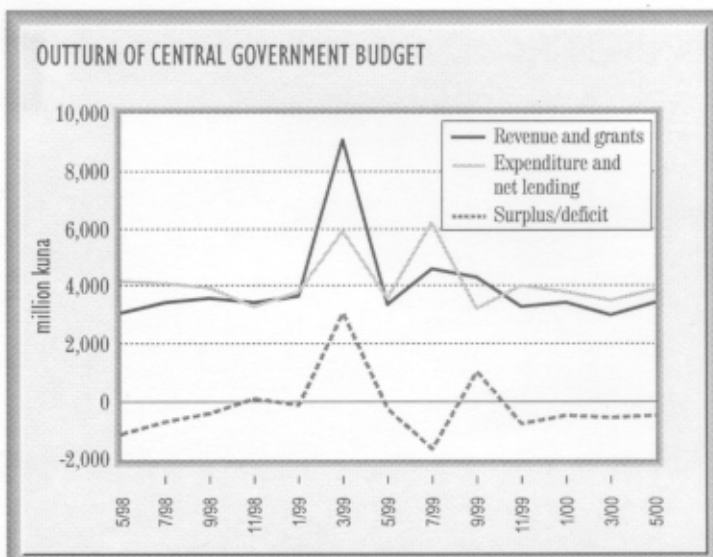

posit interest rates continued to fall, exhibiting a trend present in all banks. In May this was mostly observed in the average interest rate on kuna deposits, which fell to 3.9%. This decrease was observed with all types of deposits. As for the interest rate spread, the available indicators point to a level ranging from 8.3 to 8.6 percentage points.

GOVERNMENT BUDGET

In May, budgetary expenditures exceeded revenues by HRK 384m. The deficit was mostly financed from foreign sources, and only a smaller part from domestic sources. Budget deficit of the central government in the first five months of the year amounted to HRK 853m.

Revenues were HRK 3,475m in May, which is an increase of 11.0% compared to the same month last year. In contrast with April's large tax revenue shortfalls, tax revenues in May were the largest collected this year. This can be explained by very good VAT revenues, exceeding those generated in May last year by 30.1%. In addition, revenues from excise duties also increased by 16.4% compared to last year. The relatively high level of tax revenues from VAT and excise duties in May are probably a reflection of the previously announced increase in excise duties planned for June, which led consumers to increase their supplies by purchasing certain products in advance. It should be noted that budgetary revenues in the first five months of this year increased by 17.7% compared to the same period last year. In terms of tax revenues alone, this year's revenues grew by only 4.8% compared to last year.

Expenditures in May were HRK 3,859m or 7.6% less than last May. However, during the first five months of the year expenditures were up 3.1%, compared to the same period last year.

¹⁾ The privatisation of Privredna banka Zagreb brought about a one-off decrease in its balance sheet of 2,759.4 million kuna. Loans in f/c to public enterprises diminished on the assets side and at the same time obligations to the Republic of Croatia arising from foreign credits diminished on the liabilities side. Loans in f/c to public enterprises are listed under assets item "2.2. Claims on other domestic sectors". Obligations to the Republic arising from loans in f/c are listed under assets item "2.1 Claims on central government and funds (net)".

¹⁾ The privatisation of Privredna banka Zagreb brought about a one-off decrease in its balance sheet amount of 2,759.4 million kuna. Loans in f/c to public enterprises diminished on the assets side and at the same time obligations to the Republic of Croatia arising from loans in f/c diminished on the liabilities side. Loans in f/c to public enterprises are listed under assets item "4.2 Claims on enterprises". Obligations to the Republic of Croatia arising from loans in f/c are listed under liabilities item "6. Central government and funds' deposits".

Classification and Presentation of Data on Claims and Liabilities

Data on financial institutions' claims and liabilities are classified according to institutional sectors and financial instruments. The institutional sectors are: financial institutions, central government and funds, other domestic sectors and foreign sector.

The financial institutions sector includes following sub-sectors: monetary authorities (the central bank), deposit money banks (DMBs), other banking institutions and other financial institutions. The central bank is the Croatian National Bank (CNB). Deposit money banks are institutions the Croatian National Bank has granted permission to perform banking business services in accordance with the Law on Banks, including savings banks during a transition period. Data on DMBs does not include claims and liabilities of banks undergoing bankruptcy procedures, nor former branches of banks with their headquarters in the former Yugoslavia. Other banking institutions comprise housing savings banks. Other financial institutions are financial institutions not classified as banks or other banking institutions (for example insurance companies)

The central government and funds comprises government institutions including Croatian Roads Authority, State Agency for Deposit Insurance and Bank rehabilitation and Croatian Guarantee Agency, and following central government funds: Croatian Health Insurance Institute, Croatian Pension Insurance Institute, Croatian Employment Service, Croatian Privatization Fund, Public Water Management Fund and Croatian Bank for Reconstruction and Development. Other domestic sectors are local government authorities and local funds, public and private companies and households, including craftsmen and non-profit institutions. In some tables other domestic sectors are divided into following sub-sectors: local government (which comprises local government authorities and local funds), public and private enterprises, and households (including craftsmen and non-profit institutions).

Foreign sector includes foreign legal entities and individuals.

All data on claims and liabilities refer to balances at the end of the reporting period. Foreign exchange items are reported in their

kuna equivalent at the midpoint CNB exchange rate at the end of the reporting period.

Table A1: Monetary and Credit Aggregates

The table shows data on some basic monetary and credit aggregates, including their monthly growth rates. In September 1999, all the monetary aggregates were revised. In previous publications of the CNB, data on claims and obligations of savings banks were not included in the compilation of the monetary aggregates.

Reserve money has been taken over in its entirety from the Monetary Authorities Accounts (Table C1).

Money (M1) is defined in the same way as the corresponding item in the Monetary Survey (Table B1). It comprises cash outside banks, deposits with CNB by other banking institutions and other domestic sectors as well as DMBs' demand deposits. *Money (M1a)* comprises currency outside banks and DMBs' demand deposits, increased by the demand deposits of the central government and funds with DMBs.

Broadest money (M4) comprises Money (M1), savings and time deposits, foreign currency deposits as well as bonds and money market instruments (all above components taken over from the Monetary Survey (Table B1).

Net domestic assets are defined as a difference between total liquid assets and foreign assets (net).

Domestic credit comprises DMBs' claims on other domestic sectors, other banking institutions and other financial institutions.

In May 1999 banks bankruptcy proceedings have been initiated over few banks so their assets and liabilities are excluded from monetary statistics. In April 1999 those banks' share in Monetary Aggregate M1 amounted to 259.3 million kuna and in Monetary Aggregate M4 amounted to 4,035.8 million kuna. Data for June 1999 are comparable to data for July 1999 if Bank Placements are increased by 3,513.5 million kuna.

Table B1: Monetary Survey

The monetary survey shows consolidated data from the Monetary Authorities Accounts (Table C1) and DMB's Accounts (Table D1).

Foreign assets (net) are the difference between total foreign assets and total foreign liabilities of the CNB and DMBs.

Domestic credit is the sum of corresponding items from Monetary Authorities Accounts and DMB's accounts. Claims on central government and funds are reported on the net basis, i.e. decreased by central government and funds' deposits with the CNB and DMBs.

Money is the sum of currency outside banks, deposits by other banking institutions with the CNB, deposits by other domestic sectors with the CNB and DMB's demand deposits (item *Demand deposits* in DMB's Accounts, Table D1).

The items *Savings and time deposits*, *Foreign currency deposits* as well as *Bonds and money market instruments* are entirely taken over from the DMB's Accounts, while the item *Restricted and blocked deposits* represents the sum of corresponding items from the Monetary Authorities Accounts (excluding DMB's blocked deposits with the CNB) and DMB's Accounts. *Other items (net)* are unclassified liabilities decreased by unclassified assets.

In May 1999 banks bankruptcy proceedings have been initiated over few banks so their assets and liabilities are excluded from monetary statistics. In April 1999 those banks' share in total amounted to 4,296.3 million kuna. Data for June 1999 are comparable to data for July 1999 if Claims on other domestic sectors and Other items (net) are increased by 3,513.5 million kuna.

Table B2: Number of Reporting Deposit Money Banks and Savings Banks and Their Classification by Size

The table shows the total number of DMBs and savings banks which report monthly to the CNB. Their operation is shown in the DMB's accounts.

Special reporting requirements applied to savings banks until June 1995. Savings banks were not legally obliged to report on their operations, so that data up to June 1995 only to those savings banks that reported voluntarily to the CNB. From July 1995 on, the data cover all Savings Banks. In accordance with the Law on Banks, savings banks must meet the conditions set out in the law by December 31, 2001, or they will be liquidated.

The table also shows the classification of reporting DMBs and savings banks according to their total assets.

In May 1999 banks bankruptcy proceedings have been initiated over few banks so their assets and liabilities are excluded from monetary statistics.

Table C1: Monetary Authorities Accounts

The table reports data on claims and liabilities by monetary authorities. In September 1999, the data were revised, with savings banks being transferred for the subsector other banking institutions to the subsector banks. The whole data series has been revised accordingly.

Foreign assets include the following forms of foreign currency and kuna claims on foreign legal entities and individuals: monetary gold, holdings of special drawing rights, foreign cash in vaults, reserve position in the International Monetary Fund, current account balances with foreign banks, time deposits in foreign banks, foreign currency security investments and other claims. *Claims on central government and funds* are loans and overdue claims on the budget of the Republic of Croatia. *Claims in kuna* are short-term loans granted for the purpose of overcoming timing differences between incoming revenues and execution of budgetary expenditures, long-term loans granted by special decrees by the government of the Republic of Croatia, and overdue claims on the State Budget for liabilities to the IMF and foreign banks. *Claims in foreign currency* was a counter-entry to the liability to the IMF based on the succession of membership in that institution.

Claims on other domestic sectors are loans and overdue claims on other domestic sectors, including banks in bankruptcy proceedings.

Claims on DMBs are credit to DMBs, deposits by the CNB with DMBs and overdue claims on DMBs. *Credit to DMBs* is split according to the type of financial instruments. *Refinancing of DMBs* include loans granted within general and selective quotas up to the end of 1993, as well as advances to DMBs for performing currency exchanges. Refinancing loans granted within the general and selective quotas were paid back in their entirety by the end of April 1994. In July 1994, they were formally revoked. Item *Lombard credits* comprises credits

to DMBs for regular maintaining of the day-to-day liquidity, which were replaced by lombard credits in December 1994. Short-term liquidity loans, which have been granted since the beginning of 1999, also serve to bridge liquidity problems. Other credits include interventive credits, special credits for bridging liquidity problems granted in the past (initial credits, prerehabilitation credits) and due but unpaid credits. Overdue claims on DMBs comprise settlement account overdrafts (until mid-1994) and banks' failure to correctly and promptly allocate and maintain statutory reserve requirements.

Since May 1999 claims on other domestic sectors include overdue claims on banks over which bankruptcy proceedings have been initiated.

Due to the reclassification of savings banks from the subsector other banking institutions to the subsector banks, data for Claims on DMBs and Claims on other banking institutions were revised.

Reserve money consists of currency outside banks, cash in DMBs' vaults, DMBs' deposits with the CNB, other banking institutions' deposits and other domestic sectors' deposits with the CNB. *DMBs' deposits* are: settlement account balances, statutory reserves deposited on a special account with the CNB as well as CNB bills on obligatory basis. *Deposits by other banking institutions* are: settlement account balances of housing savings banks. *Deposits by other domestic sectors* are: other domestic sectors' giro account balances which, on the basis of legal acts are deposited at the Croatian National Bank.

Restricted and blocked deposits include required foreign exchange reserves, restricted deposits and blocked foreign exchange deposits. Banks and savings banks are required to place foreign exchange reserve deposits in accounts at the Croatian National Bank on the basis of certain foreign exchange deposits they hold. Restricted deposits are kuna funds set aside on the basis of court order or legal regulation and deposits of banks over which bankruptcy proceedings have been initiated. Blocked foreign exchange deposits are funds that were set aside in special accounts at the Croatian National Bank for repaying unpaid amounts due to foreign creditors.

Foreign liabilities include use of IMF credits, liabilities to international financial institutions and foreign banks.

Central government and funds deposits are demand deposits and foreign currency deposits of the Republic of Croatia and republic funds with the CNB, and CNB bills purchased by central government institutions.

CNB bills are CNB bills on a voluntary basis in kuna and in f/c excluding CNB bills voluntarily purchased by central government institutions.

Capital accounts include reserves, provisions and the income and cost accounts.

Other items (net) are unclassified liabilities decreased by unclassified assets of the CNB's accounts.

Due to the reclassification of savings banks from the subsector other banking institutions to the subsector banks, data for Currency outside banks, DMB's cash in vaults, DMB's deposits and Deposits of Other Banking Institutions were changed. Since May 1999 including deposits of banks over which bankruptcy proceedings have been initiated.

Table D1: Deposit Money Banks' Accounts

DMBs accounts include data on DMBs' claims and liabilities. DMBs' mutual claims and liabilities are consolidated. In September 1999, the data was revised to include savings banks. The whole data series was revised accordingly.

Required reserves held at the Central Bank include kuna and foreign exchange reserves. Kuna reserves include vault cash and kuna funds held in accounts at the Central Bank. Foreign exchange reserves include foreign exchange held in accounts at the Central Bank.

Foreign assets are the following forms of kuna and foreign currency claims on foreign legal entities and individuals: foreign cash in vaults, deposits with foreign banks (including loro letters of credit and other collateral), securities, loans, equities.

Claims on central government and funds are the following forms of claims in kuna and foreign currency: securities and loans. The main forms of claims on the central government are shown separately: bonds issued in accordance with the Decree Law on the Transformation of Household Foreign Exchange Savings Deposits with Banks into the Public Debt of the Republic of Croatia, and bonds issued in accordance with the Law on the Issue of Bonds for the

Restructuring of the Economy of the Republic of Croatia.

Claims on other domestic sectors include the following claims in kuna and foreign currency: money market instruments, bonds, loans (including acceptances), and equities.

The same forms of kuna and foreign currency claims are included in claims on other banking institutions and other financial institutions, with one difference: *Claims on other banking institutions* also include deposits with those institutions.

The items *Demand deposits, Savings and time deposits, Foreign currency deposits* as well as *Bonds and money market instruments* comprise banks' liabilities to other domestic sectors, other banking institutions and other financial institutions.

Demand deposits include giro and current accounts balances and other transferable deposits, minus currency in the payment system, i.e. checks in banks' vaults and checks in collection.

Savings and time deposits are: kuna sight deposits as well as kuna time and notice deposits.

Foreign currency deposits are: foreign currency sight deposits as well as foreign currency time and notice deposits.

Bonds and money market instruments are: banks' liabilities for securities issued (net) and loans obtained.

Foreign liabilities comprise the following forms of kuna and foreign currency liabilities to foreign legal entities and individuals: giro and current accounts, savings deposits (including *loro* letters of credit and other forms of collateral), time deposits, loans received and liabilities due.

Central government and funds' deposits are all forms of DMBs' kuna and foreign currency liabilities (except restricted and blocked deposits) to the central government and funds.

Credit from central bank comprises loans obtained from the CNB and deposits by the CNB with DMBs. Repurchase of securities is also considered and treated as loan.

Restricted and blocked deposits comprise the following DMBs' liabilities: kuna and foreign currency restricted deposits by other domestic sectors, other banking institutions, other financial institutions, central government and funds as well as foreign legal entities and individuals; and households' blocked foreign currency deposits, regulated by the Decree Law on the Transformation of Household Foreign

Exchange Savings Deposits with Banks into the Public Debt of the Republic of Croatia

Capital accounts are share capital, profit or less in the current year, retained profit (loss), required reserves, other capital reserves and provisions for identified and unidentified losses

Other items (net) are unclassified liabilities decreased by unclassified assets.

In May 1999 banks bankruptcy proceedings have been initiated over few banks so their assets and liabilities are excluded from monetary statistics. In April 1999 those banks' share in total DMBs' accounts amounted to 5 701.4 million kuna. On the assets side, most significant were: Claims on enterprises (4,378.7 million kuna) and Claims on households (701.4 million kuna). On the liabilities side, most significant were: Foreign currency deposits (3,443.7 million kuna), Foreign liabilities (1,024.6 million kuna) and Capital accounts (854.6 million kuna). Beginning in July 1999, the total amount of provisions for identified losses is shown within the Capital accounts line. Data for June 1999 are comparable to data for July 1999 if Claims on other domestic sectors and Capital accounts are increased by 3,513.5 million kuna. Other items have been corrected by small amounts.

Tables D2-D12

This group of tables (with the exception of Table D5) represents an elaborate presentation of appropriate items of claims and liabilities of DMBs' Accounts (Table D1).

Table D2: Deposit Money Bank's Foreign Assets

This table shows DMBs' claims on foreign legal entities and individuals.

Foreign assets of DMB's comprise foreign assets in kuna and foreign currency.

Claims on foreign banks and *Claims on foreign nonbanks* (total and by financial instruments) are shown separately within both foreign assets in kuna and in foreign currency.,m

In May 1999 banks bankruptcy proceedings have been initiated over few banks so their assets and liabilities are excluded from monetary statistics. In April 1999 those banks' Foreign Assets amounted to 402.3 million kuna.

Through June 1999, some household f/c savings deposits were included in Demand deposits and f/c savings deposits.

Table D3: Deposit Money Banks' Claims on the Central Government and Funds

The table shows kuna and foreign currency DMBs' claims on the central government and funds.

Bonds arising from blocked foreign currency savings deposits are issued in accordance with the Decree Law on the Transformation of Household Foreign Exchange Savings Deposits with Banks into the Public Debt of the Republic of Croatia

Big bonds are those issued in accordance with the Law on the Issue of Bonds for the Restructuring of the Economy of the Republic of Croatia.

Other claims are all other DMBs' kuna and foreign currency claims on central government and funds: securities, loans and equities.

In May 1999 banks bankruptcy proceedings have been initiated over few banks so their assets and liabilities are excluded from monetary statistics. In April 1999 those banks' Claims on Central Government and Funds amounted to 17.8 million kuna.

Table D4: Deposit Money Bank's Claims on Other Domestic Sectors

The table shows DMBs' kuna and foreign currency claims on other domestic sectors, classified according to financial instruments: money market instruments, bonds, loans and advances (including acceptances and purchased claims), and equities and arrears.

Since October 1994, foreign currency loans can be granted only when DMB's simultaneously borrow abroad in their own name and for the account of the end-user.

In May 1999 banks bankruptcy proceedings have been initiated over few banks so their assets and liabilities are excluded from monetary statistics. In April 1999 those banks' Claims on Other Domestic Sector amounted to 5,088.0 million kuna. Data for June 1999 are

comparable with data for July 1999 if the item Loans and Advances under Claims in kuna is increased by 2,904.3 million kuna, the item Shares and Participations is decreased by 520.3 million kuna, and if the item Loans and Advances under Claims in f/c is increased by 1,129.4 million kuna.

Table D5: Distribution of Deposit Money Banks' Loans by Domestic Institutional Sectors

The table shows data on kuna and foreign currency loans granted by DMBs to domestic sectors, including acceptances, financial leases, payments made on the basis of guarantees and similar instruments and purchased claims.

In May 1999 banks bankruptcy proceedings have been initiated over few banks so their assets and liabilities are excluded from monetary statistics. In April 1999 those banks' loans amounted to 4,463.3 million kuna. Data for June 1999 are comparable with data for July 1999 if total loans in kuna are increased by 2,972.6 million kuna, and total loans in f/c are increased by 840.9 million kuna.

Table D6: Demand Deposits with Deposit Money Banks

The table shows demand deposits with DMBs, classified by domestic institutional sectors.

Demand deposits are the sum of other domestic sectors', other banking institutions' and other financial institutions' giro and current accounts balances, minus currency in the payment system, i.e. by amount of checks in banks' vaults and checks in collection. Banks obligations arising from kuna payment instruments issued are included in the household sector.

In May 1999 banks bankruptcy proceedings have been initiated over few banks so their assets and liabilities are excluded from monetary statistics. In April 1999 Demand deposits with those banks amounted to 259.3 million kuna.

Table D7: Time and Savings Deposits with Deposit Money Banks

The table shows *Kuna savings and time deposits* by other domestic sectors, other banking

institutions and other financial institutions with DMBs.

In May 1999 banks bankruptcy proceedings have been initiated over few banks so their assets and liabilities are excluded from monetary statistics. In April 1999 Time and Savings Deposits with those banks amounted to 323.7 million kuna. In July 1999, certain deposits of local government, government, enterprises, other banking institutions and other financial institutions were reclassified from savings to time deposits.

Table D8: Foreign Currency Deposits with Deposit Money Banks

The table shows foreign currency savings and time deposits by other domestic sectors, other banking institutions and other financial institutions with DMBs. Foreign currency savings deposits are all foreign currency sight deposits, while foreign currency time deposits also include foreign currency notice deposits.

In May 1999 banks bankruptcy proceedings have been initiated over few banks so their assets and liabilities are excluded from monetary statistics. In April 1999 Foreign Currency Deposits with those banks amounted to 3,443.7 million kuna.

Table D9: Bonds and Money Market Instruments

The table shows DMBs liabilities for securities issued (net) and loans received from other domestic sectors, other banking institutions and other financial institutions.

Money market instruments (net) comprise DMBs net liabilities for CNB bills, bills of exchange (issued and accepted) and other securities issued.

Bonds (net) comprise DMBs net liabilities for kuna and foreign currency bonds issued, as well as debt and hybrid instruments that under certain conditions may be included in the supplementary capital of banks.

Other domestic borrowings comprises loans received, reported total and classified by institutional sectors.

In May 1999 banks bankruptcy proceedings have been initiated over few banks so their assets and liabilities are excluded from monetary statistics. In April 1999 those banks' Bonds and Money Market Instruments amounted

to 9 million kuna. In July 1999, certain debt and hybrid instruments were reclassified from Time and notice deposits to Bonds (net). The amount reclassified was 3,513.5 million kuna.

Table D10: Deposit Money Banks' Foreign Liabilities

The table shows DMBs' total foreign currency and kuna liabilities to foreign legal entities and individuals, with the exception of restricted kuna and foreign currency deposits by foreign legal entities and individuals.

DMBs' foreign liabilities comprise foreign currency liabilities and foreign kuna liabilities.

Within foreign kuna and foreign currency liabilities, liabilities to foreign banks are reported separately from liabilities to foreign nonbanks (total and by financial instruments)

In May 1999 banks bankruptcy proceedings have been initiated over few banks so their assets and liabilities are excluded from monetary statistics. In April 1999 those banks' Foreign Liabilities amounted to 1,024.6 million kuna.

Table D11: Central Government and Funds Deposits with Deposit Money Banks

The table reports total DMBs' kuna and foreign currency liabilities to the central government and funds, with the exception of restricted (kuna and foreign currency) deposits by the central government and funds with DMBs.

Kuna and foreign currency deposits by Republic of Croatia and republic funds are shown separately. Kuna deposits comprise demand deposits, savings deposits, kuna time and notice deposits, and kuna loans obtained from the central government and funds. Foreign currency deposits comprise foreign currency sight deposits, as well as savings deposits, foreign currency time and notice deposits.

In May 1999 banks bankruptcy proceedings have been initiated over few banks so their assets and liabilities are excluded from monetary statistics. In April 1999 Central Government and Funds Deposits with those banks amounted to 193.5 million kuna.

Table D12: Restricted and Blocked Deposits with Deposit Money Banks

The table shows restricted and blocked deposits by the central government and funds, other domestic sectors, other banking institutions, other financial institutions and foreign legal entities and individuals with DMBs.

Restricted and blocked deposits include two categories of deposits: restricted (kuna and foreign currency) deposits and blocked foreign currency deposits.

Blocked foreign currency deposits include households' foreign currency deposits regulated by the Decree Law on the Transformation of Household Foreign Exchange Savings Deposits with Banks into the Public Debt of the Republic of Croatia

In May 1999 banks bankruptcy proceedings have been initiated over few banks so their assets and liabilities are excluded from monetary statistics. In April 1999 Restricted and Blocked deposits with those banks amounted to 39.9 million kuna. In July 1999, data on blocked deposits of central government and of enterprises were revised.

Table E1: Housing Savings Banks' Accounts

Housing savings banks' accounts include data on claims and liabilities of the Croatian housing savings banks. All housing savings banks' claims and liabilities refer exclusively to domestic sectors.

Housing savings banks' required reserves held at the Central Bank include kuna vault cash and kuna funds held in accounts at the Central Bank.

Claims on central government and funds are claims in kuna on the Republic of Croatia and republic funds.

Claims on other domestic sectors include kuna loans to local government and households.

Claims on banks include loans extended to banks, as well as deposits with banks.

The item Time deposits includes local government and households time deposits.

Bonds and money market instruments are housing savings banks' liabilities for securities issued (net) and loans obtained.

Capital accounts include share capital, profit or loss in the current year, retained profit (loss), required reserves, other capital reserves, and provisions for identified and unidentified losses.

Other items (net) are unclassified liabilities decreased by unclassified assets.

Table F1 - Credit Rates of Croatian National Bank

The table shows interest rates used by the CNB to calculate and charge interest on loans and on all other claims.

Lending CNB interest rates are being set by special decrees of the Council of the Croatian National Bank, on annual basis. Exceptionally, from June 1995 to September 11, 1996 interest rate charged by CNB on lombard credits has been 1.5 percentage point higher than the weighted average interest rate on CNB bills on voluntary basis (which serve as collateral for lombard credits) in cases when the weighted average interest rate was higher than 16.5%. Congruently, from June 1995 to August 1996 the table reports weighted average interest rate on lombard credits. Interest rate in September 1996 is calculated as weighted average of interest rate applied in first 10 days of September 1996 (according to the regime mentioned above) and fixed interest rate applied since September 11, 1996.

Time series presented in the table contain certain breaches, due to changes in CNB's monetary policy instruments. Consequently, until November 1994, column 4 shows interest rates on regular credits for maintenance of day-to-day liquidity, which were granted based on securities portfolio, and from December 1994 onwards, interest rates on lombard credits.

Furthermore, data shown in column 6 refer, until September 1994, to interest rates on special credits for savings deposits' payments and for payments from households' current accounts, and from October 1994 until September 1997 to interest rates on daily credits for savings deposits and current accounts in kuna. Daily credits, as opposed to special credits, are paid back on the same day. In October 1997, this instrument was replaced by daily credits for overcoming short-term liquidity problems that are collateralized by CNB bills. Since December 16, 1998 this credit is incorporated in lombard credit, applying different interest rate for its usage within one day.

Data shown in column 7 refer, until December 1994 to interest rate on initial credits, and since March 18, 1998 to credits for overcoming illiquidity problems of banks under evaluation for entry into rehabilitation and restructuring procedures and since February

1999, to interest rates on short-term liquidity credits. Since December 1999 data show interest rates on short term liquidity credit over 3 months which is 1 percentage point higher than interest rate on lombard credits. Interest rate on short-term liquidity credit up to 3 months is 0,5 percentage point higher than interest rate on lombard credits.

Interest rates reported in column 8 refer to the use of statutory reserves, which was being used by the banks (in prescribed percentage) to maintain day-to-day liquidity until September 1994. Interest rates paid until September 1994 on the use of statutory reserve funds in amount above prescribed and/or for longer period than allowed are shown in column 9. Since October 1994, interest rates paid on the use of statutory reserve funds are the same as those used for any other failure to fulfill financial obligations, in accordance with the late interest regulations (shown in column 10).

Until June 1994 the same interest rate was applied to funds used above amounts available on giro accounts and to inaccurately calculated or under-appropriated statutory reserves (reported in column 9). From July to September 1994, interest rate applied to the use of those funds was 21%, and since October 1994 the same interest rates have been applied as for other failures to fulfill financial obligations, shown in column 10.

Table F2: Deposit Rates of Croatian National Bank

The table shows interest rates paid by the CNB on funds deposited with the CNB as well as on securities issued.

Interest rates paid by the CNB for appropriated statutory reserve funds are being set by the Council of the CNB. Until 7 October 1993, CNB was setting different exchange rates for statutory reserve funds based on savings and time deposits. Therefore, for that period the table reports weighted average interest rate on appropriated statutory reserve funds (column 3). From 8 October 1993 until the end of February 1994, CNB paid no interest on appropriated statutory reserve funds, and since March 1994, uniform rate has been applied to these funds.

Interest rates on obligatory CNB bills are set by the Council of the CNB.

Until October 1993, interest rates on CNB bills on voluntary basis were also set by the Council of the CNB, while since November 1993,

they have been set at CNB bills' auction sales. Congruently, since November 1993, columns 5, 6 and 7 report weighted average interest rates attained in auctions of the CNB bills.

Until October 1994, interest rates on CNB bills on voluntary basis due in 30 and 90 days are reported in columns 6 and 7 respectively.

Since April 1998 column 9, 10, 11 report weighted average interest rates of the voluntary CNB bills in EUR and USD (until December 1998 in DEM and USD), due in 63, 91, 182 and 365 days attained in CNB bill's auctions as a weighted average of subscribed amounts in those two currencies.

Table F3: Deposit Money Banks' Reserves on Obligatory Basis

This table shows data on monthly averages of day-to-day balances of DMB's required reserves with the CNB. Savings banks are included beginning in July 1999, and the earlier data have not been revised.

Reserve requirement (column 3) represents the prescribed amount of funds banks are required to deposit on a special statutory reserve account with the CNB, or to maintain (in average) on their settlement accounts or in vaults. This amount corresponds with the statutory reserve instrument of January 1995, while until December 1994 it comprised two instruments: statutory reserves and liquid assets requirement - LAR (except for the part in which banks were conforming to this requirement by registering CNB bills on voluntary basis).

Column 4 shows weighted average reserve requirement ratio as a percentage of the reserve requirement (column 3) in the reserve base. Column 5 shows the portion of the reserve requirement banks are required to deposit on a special statutory reserves account with the CNB (until December 1994 this amount corresponds with the statutory reserves instrument, while since January 1995 until May 1998, banks have been required to deposit at least 75% of the total reserve requirement on a special account with the CNB and since May 1998 at least 60% of the amount).

Column 6 shows the percentage of the statutory reserves deposited with the CNB in the total reserve requirement.

Column 7 shows the total amount of other obligatory deposits with the CNB, including obligatory CNB bills, those voluntary CNB bills

used by banks to maintain the prescribed minimal liquidity (LAR), special statutory reserves (until July 1995) and statutory reserves on f/c deposits, f/c credits from foreign banks and guaranties and f/c credits from foreign banks.

Column 8 shows the total reserve requirement as a sum of reserve requirement and other deposits with the CNB on obligatory basis. Column 9 shows the percentage of total reserve requirement in the reserve base.

Column 10 shows weighted average remuneration rate for all forms of immobilized funds (i.e. for all components of total reserve requirement).

Column 11 shows the use of obligatory reserves, which includes use of appropriated statutory reserve funds (authorized and unauthorized), inaccurately calculated statutory reserves, non-maintenance of the prescribed minimal liquidity, i.e. (since January 1995) non-maintenance of the minimal average settlement account and vault balance (determined in accordance with the calculation of statutory reserves), unregistered amount of the CNB bills on obligatory basis and inaccurately calculated special statutory reserves (until July 1995) and inaccurately calculated statutory reserves on f/c deposits, f/c credits from foreign banks and guaranties and f/c credits from foreign banks.

Table F4: Deposit Money Banks' Liquidity Indicators

The table reports monthly averages of day-to-day balances of some indicators of DMBs' liquidity. Savings banks are included beginning in July 1999. The past data has not been revised.

Column 3 shows free reserves, defined as bank's total reserves (on settlement accounts and in vaults) decreased by the minimal average settlement account and treasury balance, as prescribed by instruments of the CNB (until December 1994 by the requirement for banks' minimal liquidity, and since January 1995 by statutory reserve requirement).

Column 4 shows the primary liquidity ratio as a percentage of monthly day-to-day free reserves averages in monthly day-to-day averages of deposits which constitute the reserve base.

Column 5 shows the monthly average of day-to-day balances of secondary liquidity sources used. Secondary liquidity sources comprise: use of statutory reserves (until October 1994), regular loans for maintenance of day-to-

day liquidity (until November 1994), use of funds exceeding those available on the bank's giro account (until October 1994), special credits for overcoming illiquidity problems (initial credits, credits for overcoming illiquidity problems of banks under evaluation for entry into rehabilitation and restructuring procedures), lombard credits (since December 1994), intervention credits for overcoming illiquidity (since October 1994), short-term liquidity credits (since February 1999) as well as outstanding liabilities due to the CNB.

Column 6 reports monthly average of day-to-day balances of CNB bills on voluntary basis in kuna (until December 1994, this amount is decreased by the portion of voluntarily registered CNB bills used by banks to maintain the prescribed minimal liquidity).

Column 7 reports monthly average of day-to-day balances on CNB bills on voluntary basis in foreign currency (EUR and USD).

Table G1: Deposit Money Banks' Credit Rates

The table contains weighted averages of DMBs' monthly interest rates on kuna and foreign currency loans, reported on a yearly basis. Savings banks are not covered.

Columns 3 and 4 show interest rates on the interbank, daily and overnight money markets, according to information received from Money Market Zagreb. Data on DMBs' interest rates on kuna and foreign currency credits are based on DMBs' periodic reports. Basis for calculation of DMBs' weighted averages are amounts of credits bearing corresponding interest rates, which were disbursed during the reported month, with the exception of interest rates on giro and current accounts credit lines, for which weighted averages were calculated based on the balance of these loans at the end of the reported month.

Column 5 shows interest rates on total (short-term and long-term) kuna credits not indexed to foreign currency. Interest rates on short-term kuna credits (shown in column 6) also include interest rates on discounted short-term securities (not indexed to foreign currency), weighted based on their face value.

Columns 8, 9, 10 shows interest rates on total (short-term and long-term) kuna credits indexed to foreign currency, including interest rates on discounted short-term securities indexed to foreign currency.

Interest rates on foreign currency credits (columns 11, 12 and 13) refer to credits released in Deutsche Mark or US dollars in a reported month, while weighted averages are calculated based on their kuna equivalent using current exchange rate. Credits released in other currencies are not included in this table.

Relative significance of particular interest rates (reported in the last line of the table) refers to data for the last period included in the table. It is calculated as a percentage of corresponding credit category (to which exchange rates apply) in total credits included in the calculation of weighted averages for that period.

Table G2: Deposit Money Banks' Deposit Rates

The table shows weighted averages of monthly DMBs' interest rates on kuna and foreign currency deposits, reported on a yearly basis. Savings banks are not covered.

Data on interest rates on DMBs' deposits are obtained from DMBs' periodic reports.

Column 3 reports weighted averages of monthly interest rates on total kuna deposits (sight deposits, savings and time deposits) not indexed to foreign currency. Weighted averages of monthly interest rates on total kuna deposits indexed to foreign currency are reported in column 6.

Interest rates on foreign currency deposits refer to deposits received in Deutsche Mark or US dollars, while weighted averages are calculated based on their kuna equivalent using current exchange rate. Deposits received in other foreign currencies are not included in the data reported in this table.

The basis for calculation of weighted averages is the end-of-month balance of deposits. Kuna and foreign currency time and savings deposits are exceptions; for them weighted averages are calculated (since July 1995) based on the amounts of those deposits received during the reported month. Weighted averages of interest rates on total kuna and foreign currency deposits (columns 3 and 7) are weighted by the end-of-month balances of all categories included in the calculation.

Kuna and foreign currency deposits used as collateral for credit are included, while restricted deposits (deposits used for payment of imports and other restricted deposits) are not

included into the calculation of weighted averages.

Table G3: Deposit Money Banks' Trade with Foreign Exchange

Data on trade with foreign exchange between DMBs comprise transactions of purchase and sale of foreign exchange on domestic foreign currency market. The transactions are classified by categories of participants (legal entities or individuals, banks, CNB). Source of data are DMBs periodic reports on trading with foreign exchange, sent to the CNB on a regular basis. The amounts are stated in Euro (EUR), converted from other foreign currencies using the CNB's midpoint exchange rate (reporting period average). Other Croatian National Bank transactions include foreign exchange sales and purchases on behalf of Ministry of Finance.

Table H1-H5: Balance of Payments

The balance of payments is compiled in accordance with the recommendations of the International Monetary Fund (Balance of Payments Manual, Fifth Edition, 1993). Data sources include: reports of the Central Bureau of Statistics, the Croatian Health Insurance Institute, the Payments Institute, Commercial banks, enterprises and the Croatian national Bank, as well as research by the Tourism Institute and the Croatian National Bank.

Balance of Payments of the Republic of Croatia data are recorded in US dollars (USD) and national currency (HRK). The balance of payments in both reporting currencies is compiled using the same sources of information and the same principles regarding the scope of transactions covered and the procedures for composing particular positions. Depending on the sources of data available, conversion of transaction values from the original currencies into reporting currencies is performed:

- a) by applying the midpoint exchange rate of the Croatian National Bank on the date of the transaction;
- b) by applying monthly and quarterly average midpoint exchange rates of the Croatian National Bank;
- c) by applying the average monthly exchange rate versus the US dollar when assessing transactions representing the difference between

balances evaluated according to the exchange rate applicable at the end of the period.

Exports and Imports are shown on an f.o.b. basis. The basic data source for these items is the Report of the Central Bureau of Statistics on merchandise foreign trade of the Republic of Croatia. The data of the Central Bureau of Statistics are modified in accordance with the compilation method of the IMF: merchandise imports, which are shown in the Central Bureau of Statistics' report in c.i.f. terms, are corrected to f.o.b. (corrected for classification) and both imports and exports are corrected so that the coverage includes goods defined as such in the balance of payments methodology but not included in the statistics on merchandise trade.

Regarding exports, beginning with the first quarter of 1999, coverage has been increased via estimates of purchases by individual foreign travelers in the Republic of Croatia. These estimates are based on the Survey on Consumption of Foreign Travelers in Croatia carried out jointly by the Croatian National Bank and the Institute for Tourism. Regarding imports, the difference between c.i.f. and f.o.b. is estimated on the basis of research studies of the CNB on samples of the largest importers, and the resulting value of f.o.b. imports is adjusted on the basis of foreign payments for repairs of ships as well as supply purchases in foreign ports, as well as estimates of the purchases of individual Croatian citizens abroad, obtained via a research study of the CNB. From the first quarter of 1999 on, estimates are based on the Survey on Consumption of Domestic Travelers Abroad carried out jointly by the Croatian National Bank and the Institute for Tourism. For the 1993 to 1996 period, merchandise imports from the merchandise trade statistics are modified by estimates of imports in duty-free zones (prepared by the CNB), while from 1997 on, data on these imports are included in the merchandise trade statistics.

Beginning with the first quarter of 1999, income and expenditures from transport services are compiled on the basis of data from a new CNB research project on international transport services, with two exceptions: first, income and expenditures from road transport are compiled via data on realized foreign payments, and second, a portion of expenditures on transport services for transport of goods imported to the Republic of Croatia are based on a survey of the largest Croatia importers. This survey is carried

out in the context of the reformulation of data on imports from a c.i.f. to an f.o.b. basis.

Income from travel-tourism is calculated on the basis of the Survey on the Consumption of Foreign Travelers in Croatia starting in the first quarter of 1999. This survey is carried out jointly by the Croatian National Bank and the Institute for Tourism. Additional data from the Croatian Health Insurance Institute on health services provided to non-residents is also used.

Expenditures from travel-tourism is, starting in the first quarter of 1999, based on the results of the Survey on the Consumption of Domestic Travelers Abroad, and is supplemented by data on foreign exchange expenditures of the Croatian Health Insurance Institute.

Income from transport services is recorded on the basis of research by the Croatian National Bank. This research was based on data provided by Croatian transport enterprises to the CNB. The data from this project are added to data from the statistics on international payments and income from pipelines and road transport, which were not included in the research project.

Expenditures on transport services include part of the difference between c.i.f. and f.o.b. imports, which pertain to services provided by non-residents, as well as estimates of the operating costs of Croatian transport companies in international transport. This estimate was performed by the Croatian National Bank, and amounts to 40% of the income of Croatian transport companies shown in the Croatian National Bank's research.

Income from travel and tourism is calculated as the total value of foreign exchange cash and checks purchased from nonresidents, the purchase of foreign checks from residents, foreign transfers of funds to the accounts of enterprises engaged in tourism, the sale of local currency and travelers checks abroad, health services provided to non-residents, receipts for scholarships and specialized study by non-residents in the Republic of Croatia, estimates of tourist expenditures of non-residents in registered lodging and accommodations and estimates of other forms of tourist expenditures of non-residents. The estimate of tourist expenditure in registered lodging and accommodations is based on research by the Institute of Tourism, and the estimate of other forms of tourist expenditure is based on econometric analysis of the Croatian National Bank. The other categories mentioned

are based on data from foreign payments statistics.

Expenditures for travel and tourism are calculated as the total value of outflows for official travel, stipends and specialized study, foreign exchange expenditures of the Croatian Health Insurance Institute, outflows for tourism organized by domestic tourism enterprises and estimates of the foreign tourist expenditures of residents. These estimates are based on research by the CNB, while the other categories mentioned are based on data on foreign payments.

Other services includes data from the foreign payments statistics which related to investment projects abroad, customs clearing services, representation fees, insurance services, postal services and the costs of Croatian representative offices overseas. To this category is added a part of unclassified services which can be explained as a linear trend, as well as estimates of the expenditures of international peacekeeping and humanitarian missions for goods and services in the Republic of Croatia, based on research by the Croatian National Bank.

The income account includes data from the foreign payments statistics on payments on the basis of interest, data from CNB research on income paid from foreign direct and portfolio investment of the private sector, Croatian National Bank data and Payments Institute data on income paid from foreign portfolio investment in the official sector and estimates of the factor income of resident peacekeeping and humanitarian missions in the Republic of Croatia, based on research of the Croatian National Bank. For the period 1993 to 1996, data on foreign direct investment do not include data on retained profit.

Current transfers to the government include data from the foreign payments statistics on the payment of pensions and other social transfers, monetary support and gifts, as well as data from the merchandise trade statistics of the Republic of Croatia on imports and exports of goods without payment obligation.

Income from transfers to other sectors includes data from the foreign payments statistics on the total value of foreign exchange transfers received from abroad. To this is added an estimate for unregistered transfers. This estimate is seen as 15% of the difference between the unexplained foreign exchange inflows and outflows of the household sector.

The foreign exchange receipts of the household sector include the purchase of foreign cash at exchange offices from residents and deposits of foreign cash in foreign exchange accounts of residents at domestic banks. Payments made abroad and income earned through business trips, education and training, tourist receipts and other tourist income are added to this. The total inflow is decreased by: estimated tourist income and estimates of purchases by individual foreign tourists in the Republic of Croatia (Survey on the Consumption of Foreign Tourists in Croatia carried out jointly by the Croatian National Bank and Institute of Tourism) plus consumption of goods and services by members of peacekeeping and humanitarian missions in the Republic of Croatia.

The foreign exchange expenditures of the household sector include purchases of foreign cash by exchange offices and withdrawals of foreign cash from households' foreign exchange accounts at domestic banks. Realized foreign payments and expenditures from business trips, education and training, tourist payments and other tourist expenditures are added to this. The total outflow is decreased by: individuals' expenditures for goods abroad and expenditures for foreign tourism by residents.

Expenditures on transfers of other sectors is based on foreign payments data on the total value of foreign exchange transfers abroad.

Capital accounts are compiled from data on realized foreign payments by migrants (income and expenditures).

Foreign direct and portfolio investment includes data on those investments from the research of the CNB and data from the securities register of the official sector (Central bank and central government) at the Croatian National Bank and Payments Institute. In the 1993 to 1996 period, data on foreign direct investment of the private sector (banks and other sectors) do not include direct foreign debt investment, nor retained profit of the investor.

Other investment is classified according to the following institutional sectors: Croatian National Bank, Government, Banks and Other. The Government sector comprises central government, local government and local funds. The Banking Sector comprises commercial banks.

Assets--trade credit has been compiled since the first quarter of 1996. It includes advances paid for goods imports by Croatian

importers. Starting in the first quarter of 1999, it includes loans with maturities below 90 days given by Croatian exporters to foreign buyers.

Assets--foreign exchange and deposits--banks shows the change in the total liquid foreign exchange of banks authorized to do business abroad. Assets--foreign exchange and deposits--other sectors includes a part of the net foreign exchange inflows of the household sector which is not classified on the current account, and which amounts to 85% of the unexplained foreign exchange inflows to the household sector.

Liabilities--trade credit has been compiled since the first quarter of 1996, and includes data on loans with a maturity below 90 days granted by foreign suppliers to Croatian importers. From the first quarter of 1999 on, this item includes data on advances granted by foreign purchasers to Croatian exporters for exports of goods, as well as data on long-term and short-term (from 91 days to 1 year) trade credits to the government and other sectors.

Data on credits and arrears are obtained from statistics on foreign credit relations of the Croatian National Bank, which are based on concluded credit agreements registered with the Croatian National Bank.

Currency and deposits includes changes in those foreign exchange and kuna foreign liabilities of the monetary authorities (CNB) and banks based on current accounts, time accounts, Loro letters of credit, guarantees, sight deposits and demand deposits.

Changes in the foreign exchange reserves of the Croatian National Bank on a transactions basis are estimated using accounting data on the stock of foreign exchange reserves in particular currencies at the end of the months. In the estimation of transactions in the period from 1993 to the first quarter of 1999, changes in the original currencies were transformed into dollar changes using the average monthly exchange rate of the currency in question against the US dollar. Starting from the second quarter of 1999, the source of data on changes in international reserves has been a Report on International Reserves Transactions compiled by the CNB Accounting Department.

Table H6: International Reserves and Banks' Foreign Exchange Reserves

The international reserves of the Croatian National Bank are shown according to the

methodology contained in the *Balance of Payments Manual* (International Monetary Fund, 1993), and include those foreign claims of the Croatian National Bank that can be used to bridge imbalances in international payments. International reserves include Special Drawing Rights, reserve position in the International Monetary Fund, foreign currency, and deposits at foreign banks, as well as bonds and debt instruments.

The foreign exchange reserves of commercial banks include foreign currency and domestic commercial banks' deposits at foreign banks. These foreign exchange reserves represent an additional source of liquidity for bridging imbalances in international payments.

Table H7: International reserves and foreign currency liquidity

International reserves and foreign currency liquidity are shown in accordance with a Template on international reserves and foreign currency liquidity, drawn up by the IMF. A detailed explanation of the Template is given in "Data Template on International Reserves and Foreign Currency Liquidity – Operational Guidelines, October 1999" issued by the IMF.

The first part of the Template shows total assets of the Croatian National Bank in convertible foreign currency. Official international reserve assets (I.A.) show only those types of assets that are readily available to the CNB at any moment for bridging international payments mismatches. Official international reserves include: short-term foreign negotiable debt securities, foreign currency cash, foreign currency sight deposits, foreign currency time deposits which can be withdrawn before maturity, foreign currency time deposits with a remaining maturity of less than three months, reserve position with the IMF, special drawing rights, gold, and reverse repos with foreign currency negotiable debt securities. Other foreign currency reserve assets of the CNB (I.B.) include foreign currency time deposits with a remaining maturity of over three months.

The second part of the Template shows fixed predetermined foreign currency net liabilities of the Croatian National Bank and the central government (excluding extrabudgetary funds) that fall due in the next twelve months. Foreign currency loans, debt securities and deposits (II.1.) include future interest payments

on banks' foreign currency reserve requirements with the CNB (only interest payments for the next month are included), payments of future maturities of foreign currency CNB bills, future principal and interest payments on loans from the IMF, and future principal and interest payments on the central government's foreign currency debts (excluding extrabudgetary funds). Aggregate short and long positions in forwards and futures in foreign currency (II.2.) include future collections (+) or payments (-) arising from currency swaps between the CNB and domestic commercial banks (temporary sale or purchase of foreign currency). The item Other (II.3) includes future payments arising from repo agreements with foreign currency negotiable securities.

The third part of the Template shows predetermined contingent foreign currency net liabilities of the Croatian National Bank and the central government (excluding extrabudgetary funds), which fall due in the course of the next twelve months. Contingent foreign currency liabilities (III.1) include future principal and interest payments on foreign loans guaranteed by the central government, and banks' foreign currency reserve requirements. (The inclusion of reserve requirements in foreign currency is based on the assumption that there will be no changes in ratios or in the base of foreign currency reserve requirements, which comprises household deposits in foreign currency with remaining maturities of up to three months). Undrawn credit lines show potential inflows (+) or outflows (-) which would arise from drawdowns under these credits.

The fourth part of the Template lists memo items. Short-term, domestic currency debt indexed to foreign currency (IV.a) shows obligations arising from the Law on the Transformation of Household Foreign Exchange Deposits into the Public Debt of the Republic of Croatia, which fall due in the next 12 months. Pledged assets (IV.c) show time deposits in foreign currency with maturities of over 3 months listed in item I.B. which are also a pledge. Repo transactions with securities show the value of collateral that is the subject of repo agreements and reverse repo transactions with securities as well as how these transactions are registered in the Template. The currency structure of international and other foreign currency reserves shows the foreign currency

structure of the total foreign currency assets of the CNB (section I).

Table H10: Indices of Effective Exchange Rate of the Kuna

Index of the nominal effective exchange rate of the kuna is a weighted geometric average of the index of bilateral exchange rates of the kuna against the euro, US dollar, Swiss franc, British pound and Slovenian tolar. The weights are determined based on the average share of a particular foreign currency in the structure of the current account of the balance of foreign currency transactions between July 1996 and January 2000. The year 1995 is a base period for calculating the index. The index of the nominal effective exchange rate is an aggregate indicator of the average value of national currency against a basket of currencies. An increase in the index of the nominal effective exchange rate of the kuna in a certain period indicates that the kuna has depreciated against the currency basket. The index of the real effective exchange rate is a weighted geometric average of the index of bilateral exchange rates of the kuna corrected for the relevant relative price indices (the ratio of price indices in partner countries and domestic prices). Producer price and retail price indices are used, in particular the total harmonized retail price index for the Economic and Monetary Union member countries. Data for the last two months are preliminary.

Table H11: External Debt structured by Domestic Sectors

According to a new methodology in force starting in March 2000, external debt is defined as the total of liabilities of residents, including: deposits of foreign legal entities and individuals (these deposits were not included under the old methodology), loans granted by foreigners with an original maturity longer than 90 days (loans for financial purposes are counted regardless of their maturity) and bonds and money market instruments issued on foreign markets (at face value).

External debt by domestic sector is shown in the same manner as in the Capital and Financial Account of the BOP:

1) Direct Investments – include borrower lender transactions that are interrelated by

ownership (borrower or lender owns more than 10 percent of the other);

2) Government – in addition to Central Government, this item includes Government Funds, the Croatian Bank for Reconstruction and Development, local government authorities and funds;

3) Croatian National Bank;

4) Banks - banking institutions and saving banks;

5) Other domestic sectors – consist of other financial institutions (other than banks and savings banks), enterprises and households.

Each sector is further divided into Portfolio and other investments. Portfolio investments include bond and money market instruments. Other investments include currency and deposits (foreign deposits) and Credits. Credits are divided into Trade Credits (sale of goods for delayed payment) and Other Credits (all other credit obligations).

Outstanding external debt is expressed in millions of US dollars according to the CNB's midpoint foreign currency rate at the end of the period. The balance includes so-called non-reported principal payments (they should have been paid but are not statistically reported as paid) and future principal payments.

Table H12: External Debt structured by Creditors

The Table shows outstanding external debt by foreign creditors valued in the same way as in Table H8.

Table H13: External Debt and Estimated Future Payments structured by Domestic Sectors

The Table shows outstanding debt at the end of the period and the principal and interest payment projection. All data are shown at the midpoint exchange rate of the CNB at the end of period.

Projected interest payments do not include interest on foreign deposits and late interest. Payments are projected at the interest rates at the contracting time and do not reflect changes of variable interest rates.

The memo points out the outstanding publicly guaranteed debt – total and the outstanding debt of the banking sector and other sectors covered by government guarantee. The

difference is the amount of the government guarantees issued to the Government sector (for example HBOR, Croatian Roads Authority, etc. included in a broad definition of Government).

Table I3: Central Government Debt

Data on central government debt are gathered from available data and are not reconciled with the Ministry of Finance of the Republic of Croatia. Central government debt consists of domestic and external debt. The sources of data on domestic debt of the central government are the following: first, the official publication of the Ministry of Finance "Ministry of Finance Monthly Statistical Review" regarding data on securities issued by the Republic of Croatia, and second, Monetary Authorities' Accounts and Deposit Money Banks' Accounts regarding data on securities issued by the central government funds and loans received. The source of data on central government external debt is the external debt statistics collected by the CNB.

LICENSED BANKS

a) licensed banks in accordance with Article 37 of the Banking Law (full authorization)

1. ALPE JADRAN BANKA d.d. Split
2. BANK AUSTRIA CREDITANSTALT CROATIA d.d. Zagreb
3. BAYERISCHE HYPO - UND VEREINSBANK AG Glavna podružnica Zagreb
4. BJELOVARSKA BANKA d.d. Bjelovar
5. BNP-DRESDNER BANK (CROATIA) d.d. Zagreb
6. BRODSKO-POSAVSKA BANKA d.d. Slavonski Brod
7. CASSA DI RISPARMIO DI TRIESTE - BANCA d.d. Zagreb
8. CENTAR BANKA d.d. Zagreb
9. CONVEST BANKA d.d. Zagreb
10. CREDO BANKA d.d. Split
11. CROATIA BANKA d.d. Zagreb
12. ČAKOVEČKA BANKA d.d. Čakovec
13. DALMATINSKA BANKA d.d. Zadar
