**No. 46 - FEBRUARY 2000**

## REAL SECTOR

After four quarters of decline, industrial production grew by 2.8% in the last quarter of 1999 compared to the same quarter of 1998. The increase in industrial production resulted from 3.6% growth in processing industry output, as well as a 1.3% increase in mining and extraction. Electricity, gas and water supply production decreased by 2.3%. The positive trends in industrial production in the last months of 1999 lifted the annual figures, so that the annual decrease was only 1.4%. By contrast, the cumulative year-on-year index had showed a larger decline, especially in the first six months of 1999. Total industry exports behaved differently. Growth (1.8%) was achieved in the third quarter, followed by a negative trend in October and November, resulting in an eleven-month decrease of 7.7% in dollar terms compared to the same period of 1998. Gross domestic product should grow faster in the fourth quarter than in the third quarter, if industrial production growth is any indication. In the third quarter, gross domestic product decreased by 0.9% compared to the same quarter of 1998, while industrial production declined sharply (4.6%).

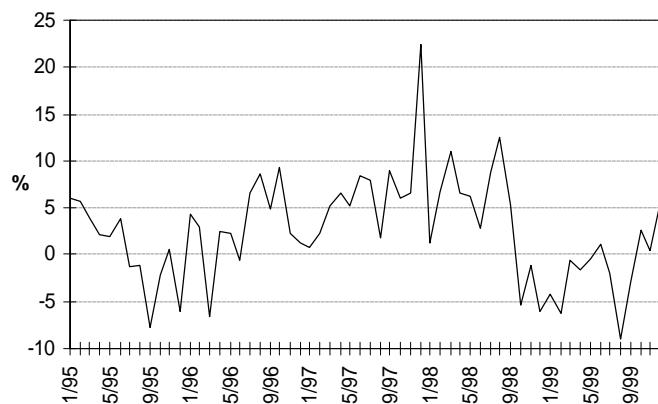

Regardless of the positive trends seen in the fourth quarter, processing industry output decreased by 2.9% in 1999 compared to 1998. Production of other transportation devices, especially shipbuilding, grew in all quarters of 1999, resulting in a 12.6% annual increase. Again, positive production trends were not accompanied by increases in exports. In the first eleven months, exports (in terms of US dollars) were 16.7% lower than in the same period of 1998.

## MANUFACTURING PRODUCTION INDEX

Change from the same month previous year

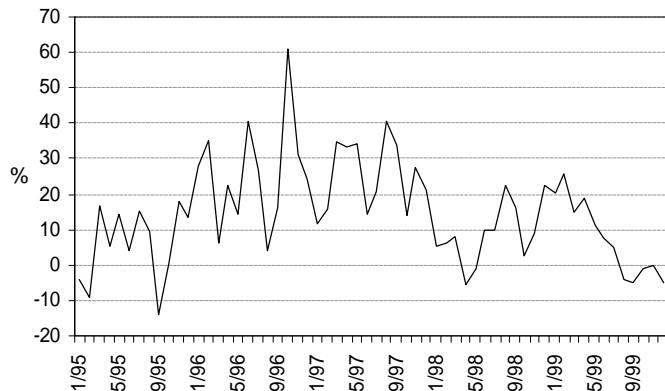

## PROCESSING INDUSTRY

Change from the same month previous year

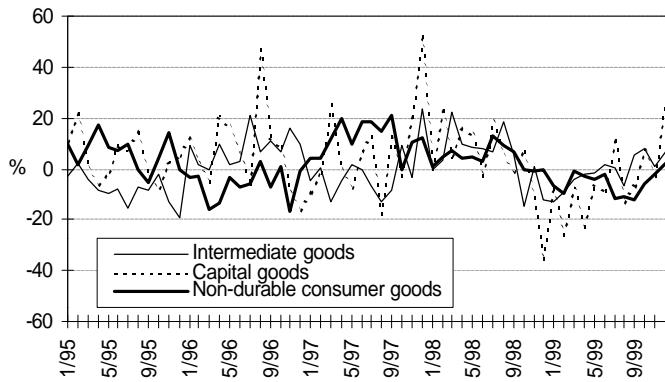

We may note the paper and tobacco industries as examples of industries with positive production trends in 1999, but their share in total industrial production is small. The paper industry grew in all four quarters, achieving an annual growth rate of 20.7%, while the tobacco industry output expanded in the last three quarters, resulting in 10.2% annual growth in 1999. Production of electric machines and appliances declined in only one quarter, and for the year as a whole grew by 3.6% compared to 1998. Oil industry output rose by 7.5% compared to the previous year, and the output could have been even better, if the favorable results achieved in the first three quarters had not been partly offset by a decline in the fourth quarter. Production trends in the largest branches were not encouraging: food and beverages production fell by 7.0% compared to the previous year, publishing and printing industry output fell by 4.7%, and production of other non-metallic mineral products fell by 2.0%. The chemical industry and production of metal products stagnated at last year's production level, despite growth in the last quarter of 1999. Decreased domestic demand in 1999, accumulated payments arrears, and the penetration of foreign trading companies into the domestic market represent only some of the problems burdening the trade sector. Whereas gross value-added in 1998 stagnated, total trade turnover decreased by 11.4% in real terms in the January-November period of 1999, and retail trade turnover dropped by 6.1% in real terms compared to the same period of 1998.

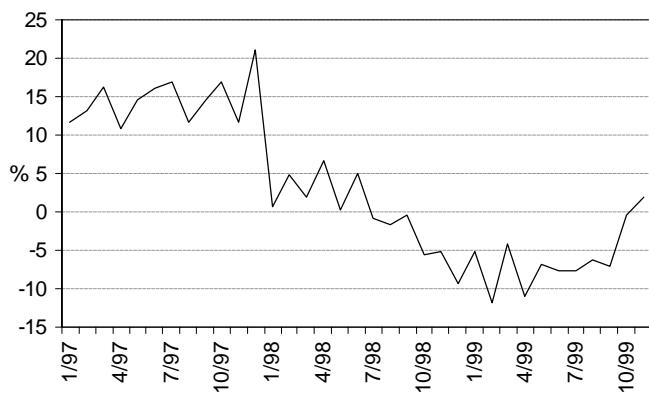

ELECTRICITY, GAS AND WATER SUPPLY  
Change from the same month previous year

INDEX OF PRODUCTION VOLUME IN INDUSTRY  
BY MAIN INDUSTRIAL GROUPS  
Change from the same month previous year

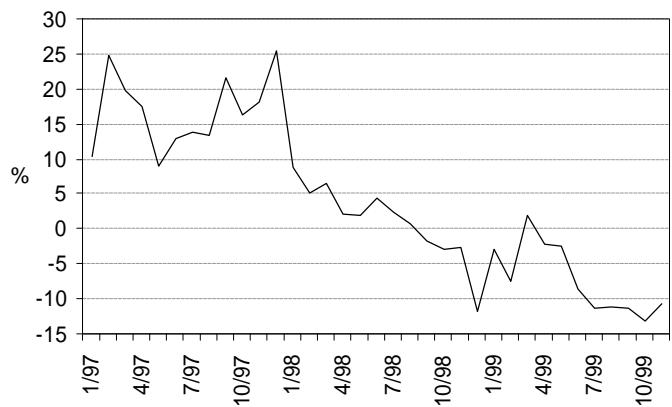

REAL RETAIL TURNOVER  
Change from the same month previous year

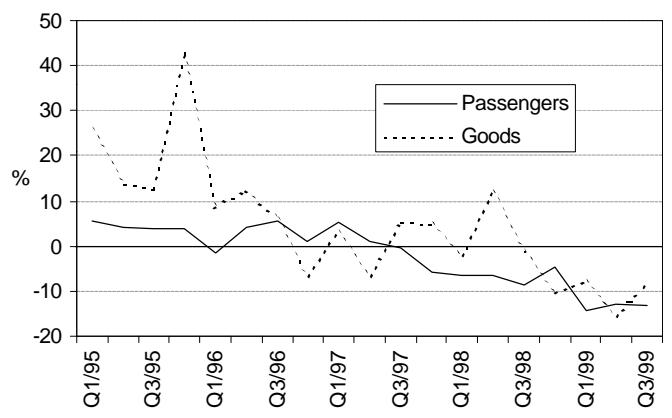

In 1999, the decrease in the physical volume of construction projects was more pronounced than the fall in trade turnover, but smaller than the decline in tourism turnover. Gross value-added in construction grew by 3.2% in 1998, whereas the physical volume of construction products declined by 7.5% in the first eleven months of 1999 compared to the same period of the previous year.

Over 1999, Croatia had 4.7 million tourists (12.8% less than in 1998) and 26.6 million night-stays (15.1% less than in 1998). Favorable Christmas and New Year holidays resulted in a 5.0% increase in the number of night-stays in December 1999 compared to the same month of 1998. This was the only month in 1999 with an increased number of night-stays. Domestic tourists' night-stays fell by 1.3%, while foreign tourists' night-stays dropped by 17.9%. German tourists accounted for the largest number of night-stays, 4.5 million. This is still one fourth less than the turnover in the previous year. Night-stays of tourists from three countries increased compared to 1998: from Bosnia and Herzegovina by 17.0%, from Slovenia by 5.0%, and from Hungary by 1.0%. The night-stays of those tourists accounted for slightly more than one-fifth of total night-stays.

## PRICES

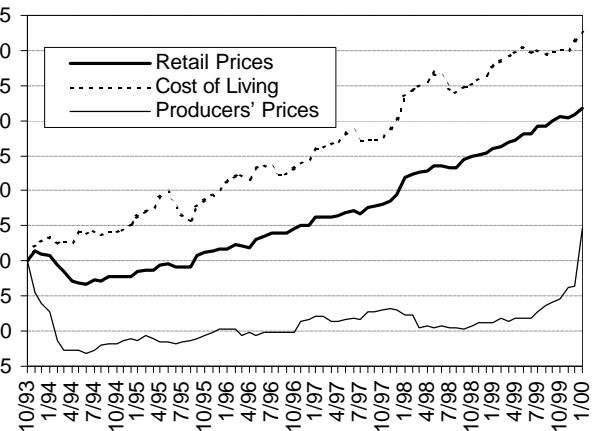

A 10% increase in fuel prices, granted to INA in the middle of the month, affected inflation in January substantially. This increase, though postponed in the pre-election period, allowed domestic fuel prices to start gradually catching up with increased fuel prices on the world market. According to data from the Central Bureau of Statistics, in January retail prices rose by 0.8%, the cost of living by 1% and industrial product prices by as much as 1.9% compared to December. The January increase in retail prices was the largest monthly increase in the last six months, i.e. since the last significant increase in fuel prices in July (8% on average) when prices rose by 1.1%. These developments also increased the annual rate of inflation, measured by retail prices, from 4.3% in November and 4.4% in December to 4.6% in January. The January increase in oil prices explained less of the overall rise in retail prices than the July increase, due to the fact that offsetting seasonal movements, such as the July decrease in agricultural product prices, did not occur. In January, prices of agricultural products rose by an above-average monthly rate of 3.4%. Prices of industrial non-foodstuffs, which account for a significant share of imports, also rose at an above-average rate of 1.1% compared to the previous month.

An unusually sharp monthly increase occurred in industrial product prices. The annual rate of change in industrial product prices increased from 5.9% in December to a disturbing 7.6% in January, and continued the growth that started last February, after the deflation of 2.1% in 1998 and 0.9% in January 1999. This is to a great extent the result of changes in electricity prices and decreases in the kuna exchange rate.

## EMPLOYMENT AND WAGES

At the end of December 1999, unemployment registered with the Croatian Employment Service reached 341,730, 5,849 (1.7%) more than at the end of the previous month, and 38,999 (12.9%) more than at the end of 1998. Registered unemployment in 1999 stood at 321,866 on average, a 34,104 (11.9%) rise compared to 1998. Growth in registered unemployment was mainly caused by the addition of 249,029 people to the unemployment register in 1999, an increase of 27,593 (12.5%) compared to 1998. Most of this is due to a 15.7% increase in previously employed people added to the unemployment register. 210,028 people were taken off the register in 1999, 4,203 (2.0%) more than in 1998.

According to preliminary data from the Central Bureau of Statistics, total employment decreased by 9,743 (0.7%) in December 1999. End-month employment stood at 1,304,540, which is 61,585 (4.5%) less than in end-December 1998. Consequently, the unemployment rate reached 20.8% by the end of 1999, a 2.7 percentage point increase compared to end-December 1998.

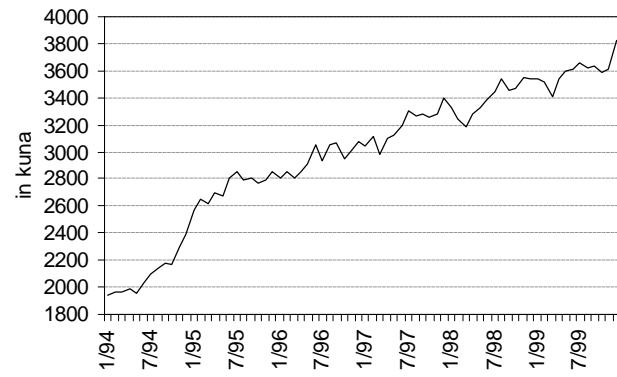

Due to Christmas bonuses, average net wages in December 1999 were 191 kuna (6.3%) higher than in the previous month. Net wages in 1999 were on average 14.3% higher in nominal terms, whereas they increased by 10.3% in real terms. Gross wages increased somewhat less, 9.9% in nominal terms and 6.1% in real terms.

## REAL AVERAGE NET WAGE

Constant prices, January 1994

## MONETARY DEVELOPMENTS<sup>1</sup>

Monetary developments in December were characterized by an increase in the money supply and total liquid assets as well as an increase in net foreign assets. The effects of the "clean-up" of the balance sheet of Privredna Banka Zagreb before its sale can be seen in increased bank claims on central government and decreased bank lending to other sectors.

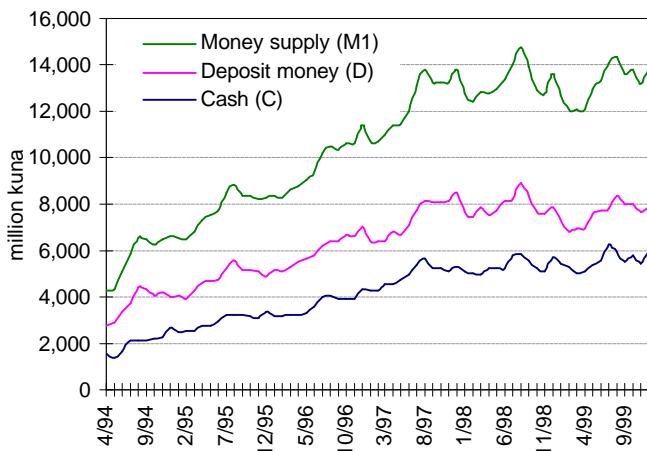

The money supply increased by HRK 0.7bn in December, totaling HRK 13.9bn at the end of the month. The increase can be attributed to a HRK 0.5 bn increase in currency in circulation and HRK 0.2bn increase in deposit money. The amount of currency in circulation at the end of the year was HRK 6bn.

An increase in the money supply is usual for December. During the month, the government was able to settle some of its budgetary obligations with the inflow of proceeds from Samurai bonds. The additional liquidity made an impact on the system, causing companies' deposit money to increase by HRK 0.2bn.

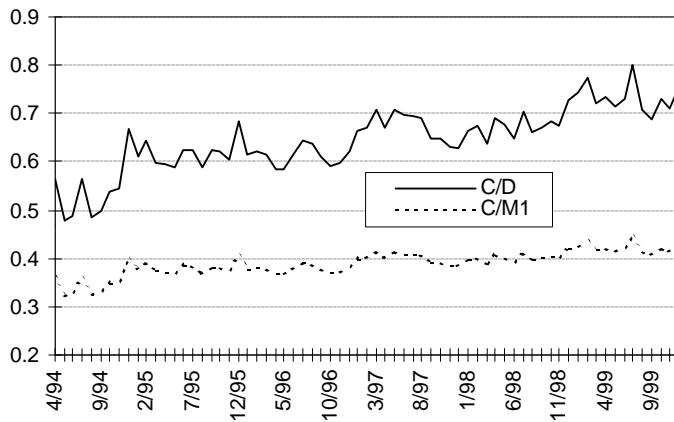

Foreign currency deposits decreased gradually during the month, due to withdrawals of household deposits for Christmas outlays. But in the third 10-day period, as the holidays neared, foreign deposits grew substantially (reaching HRK 0.65bn), probably also due to an increased number of foreign visitors and increased transfers characteristic for the time of the year. Thus, at the end of the year foreign deposits were HRK 36.9bn, an increase of HRK 0.4bn compared to end November.

The total money supply grew by HRK 1bn, reaching HRK 56.4bn at the end of December. It should be stressed that the primary reasons for this increase lie in one-off and seasonal factors, in particular, the Samurai bonds and the Christmas and New Year's holidays.

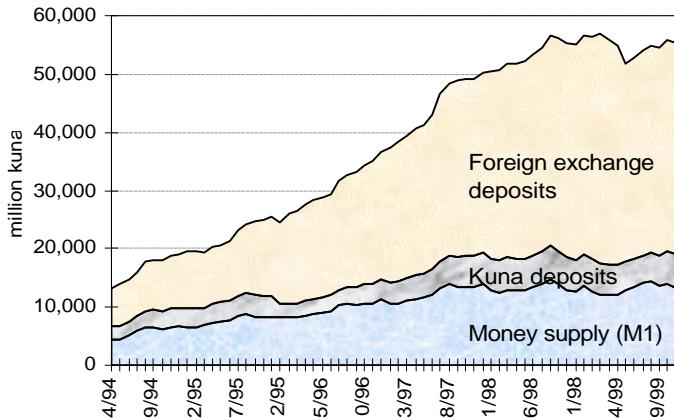

## MONEY SUPPLY

## CASH TO DEPOSIT RATIO (C/D) AND SHARE OF CASH IN MONEY SUPPLY (C/M1)

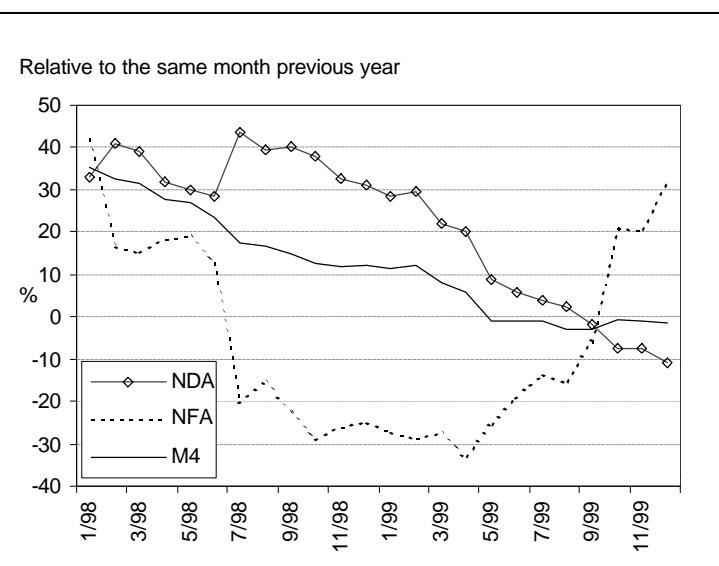

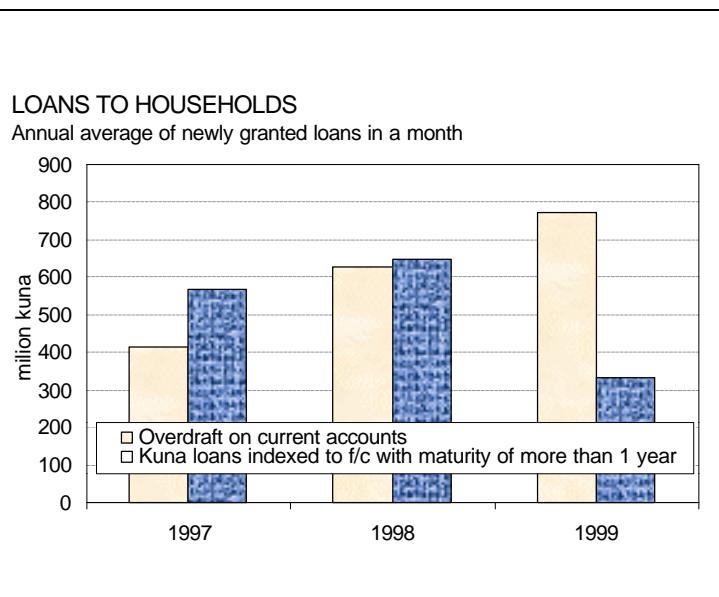

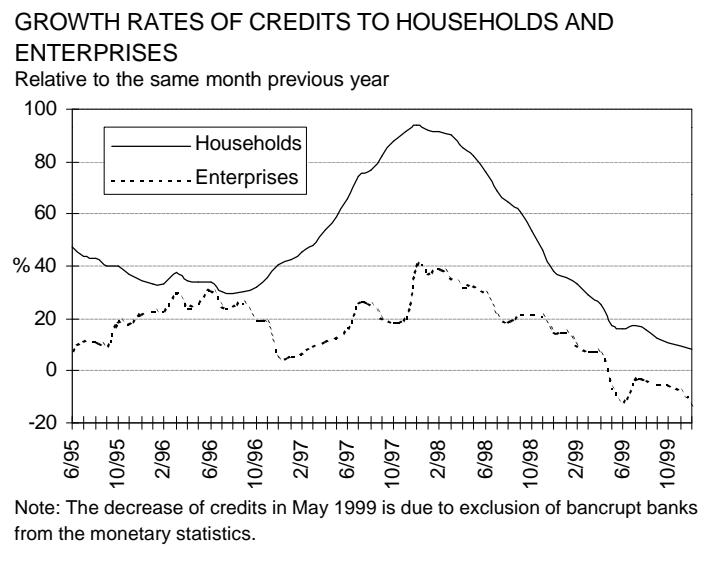

## MONETARY AGGREGATE M4

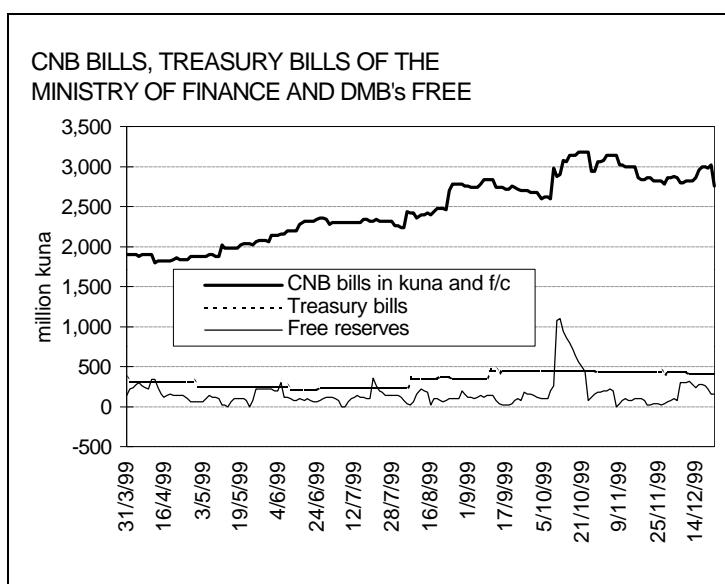

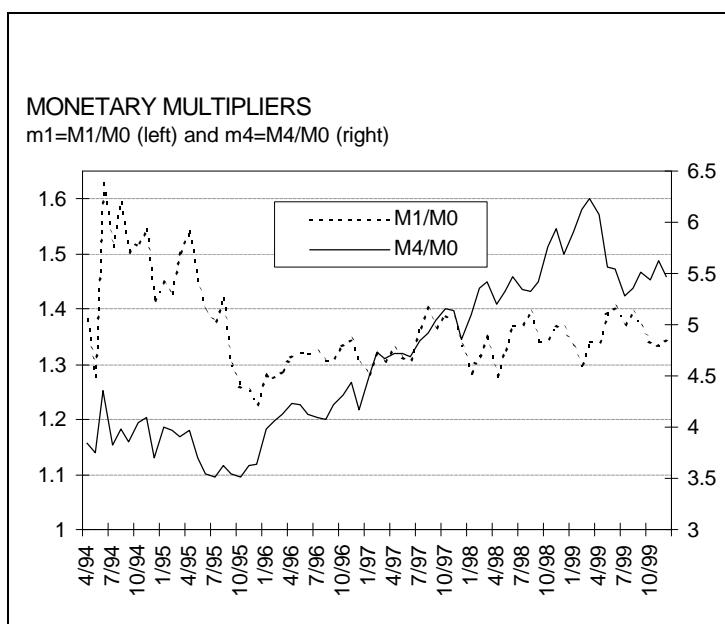

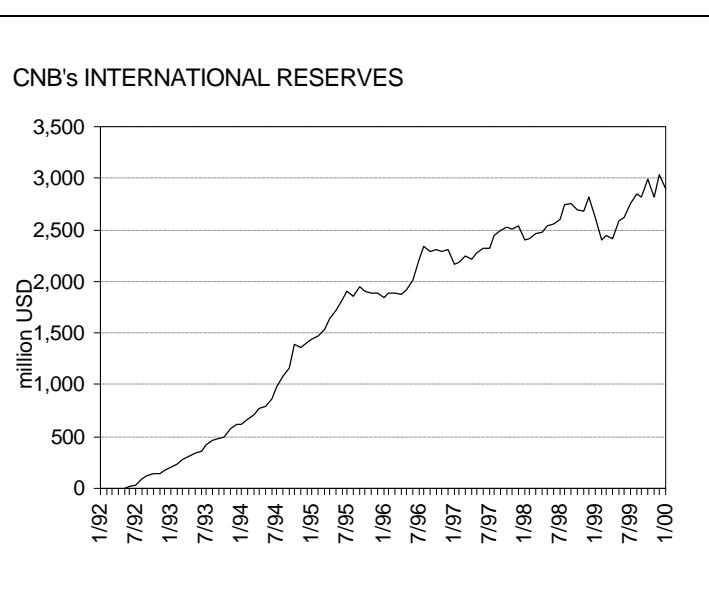

Note: The decrease of f/e deposits from 37,4 billion kuna in April 1999 to 34 billion kuna in May 1999, is due to exclusion of bankrupt banks from the monetary statistics.

<sup>1</sup> This text is based on preliminary data for end 1999, which was all that was available at the time of writing.

Bank lending in December was most affected by the privatization of Privredna Banka Zagreb. The aggregate decrease in bank lending of HRK 1.8bn compared to November can largely be attributed to the removal of a portion of foreign loans to public enterprises from the bank's books. More specifically, these were loans given to public enterprises by Privredna Banka Zagreb based on this bank's borrowing from London Club creditors. In accordance with the privatization scheme of Privredna Banka Zagreb, these loans were transferred to the Agency for Bank Rehabilitation. Lending to enterprises and lending to households increased mildly, with lending to the private sector totaling HRK 56.4bn. The effects of the privatization of Privredna Banka Zagreb can be seen in the item "Net claims on central government". In this item, banks' loans to central government and banks' obligations to central government are netted out. The government held deposits with commercial banks (mostly with Privredna Banka Zagreb) for obligations to London Club creditors taken over by the government in accordance with the 1996 Law (item: refinanced loans). Since some of the loans by Privredna Banka Zagreb to end-users had been removed from the books, the government's deposit obligations diminished accordingly. The government's deposits with Privredna Banka Zagreb decreased by HRK 2.7bn (USD 366m), and banks' net claims on the central government increased. This increase, should therefore, not be attributed to the central government's undertaking new borrowing from commercial banks, but rather to diminished government deposits with commercial banks. At the end of the year, banks' net claims on the central government amounted to HRK 12.3bn, compared to HRK 10.6bn at the end of November. Net foreign assets of the banking system grew in December by HRK 1.2bn and at end December stood at HRK 16.7bn. This is mainly the result of the central bank's increased international reserves following its purchase of the Japanese yen from the central government. Net foreign assets of commercial banks fell mildly in the same period due to decreased foreign assets and increased foreign liabilities.

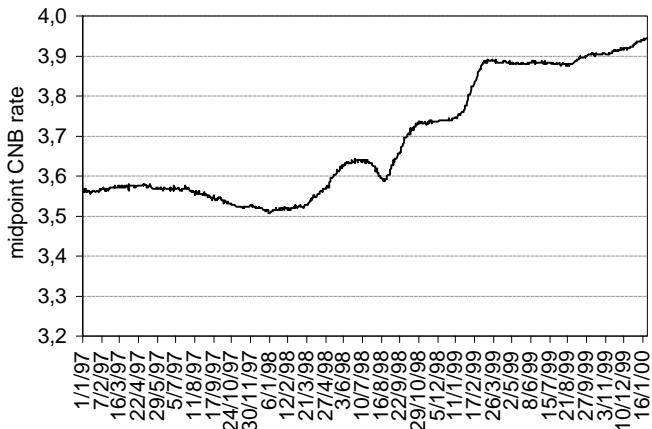

The central bank's activities in January of this year took a much slower pace due to a considerably less turbulent environment compared to the same period last year. Unlike January of last year, this January there was no further new borrowing on the part of the central government, no fear of banking crisis and no low-tides in budget revenues. In addition, the pressure on the kuna to depreciate weakened too, so that, coupled with the seasonally induced pressure, the kuna depreciated equally (0.43%) against the euro (the German mark) and the American dollar, as a result of these currencies' trends on the global market. In mid-January the central bank intervened in the foreign exchange market by selling USD 94m (EUR 91m) to banks. At the end of the month it held one repo auction at which three banks bought a total of USD 14.7m, which they will sell back to the central bank on February 3. Unlike January last year, when USD 150.4m was sold to banks and USD 57m to the central government, this year (until January 25) the central government has not yet bought any foreign exchange from the Croatian National Bank. It did not even buy a cent for the settlement of its obligations to the Paris and London Club, which fall due at the beginning of each year. In addition, the finance minister announced the inflow of proceeds of USD 300m from the sale of Privredna Banka Zagreb at the end of January. It is probable that a portion of this inflow will be offered for purchase to the Croatian National Bank. Given the current exchange rate of the kuna and the liquidity of the banking system, the Croatian National Bank would certainly choose to accept the offer and end this January with a net increase in its international reserves. In its kuna activities, the central bank had no dealings with the central government and its loans to banks also decreased. Banks are not expected to exceed the current average use of Lombard loans, which is usually HRK 200m, while liquidity loans are expected to decrease due to the maturation of some of the loans. The satisfactory liquidity of banks will sustain a high level of HNB bills of HRK 2.9bn, while changes in base money will be based only on the usual seasonal decrease in currency in circulation.

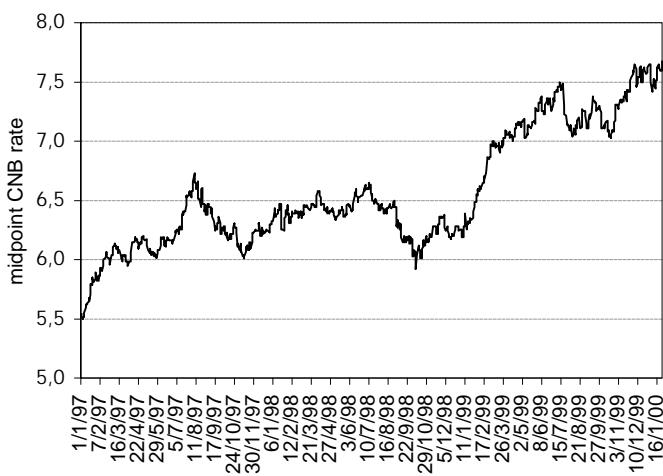

## EXCHANGE RATE

The kuna continued its slight depreciation in January. Commercial banks endeavor to be prepared for depreciation, since it is a common occurrence in the foreign exchange market in this season. Despite additional psychological pressures leading to increase in demand for foreign exchange related to the electoral period and the "millenium bug", which caused a fall of the kuna exchange rate at exchange offices, the depreciation of the kuna against the German mark of 0.43% was significantly lower in January 2000 than in the last two years. In January 1999, the kuna weakened against the German mark by 1% (0.9% in 1998). Since in January the kuna depreciated more against the British pound, by 2.5%, the nominal effective exchange rate of the domestic currency depreciated by 1.3%. This depreciation was somewhat smaller than last year's January nominal effective depreciation of as much as 2%. Data on CNB interventions show that the pressure on the foreign exchange market was less severe than last January. At two auctions held this January, the CNB sold a total of USD 108.6m net, while it sold USD 176.7m net in the same period last year. The CNB sold a total of USD 109.9m net on the foreign exchange market in January this year, USD 123.4m less than the net sale of USD 233.3m in January 1999. The real effective exchange rate of the kuna measured by retail prices and by industrial products' prices depreciated by 7.03% and 6.08% respectively during 1999. This indicates that the price competitiveness of domestic exporters relative to Croatia's most important foreign trading partners has improved.

## BALANCE OF PAYMENTS

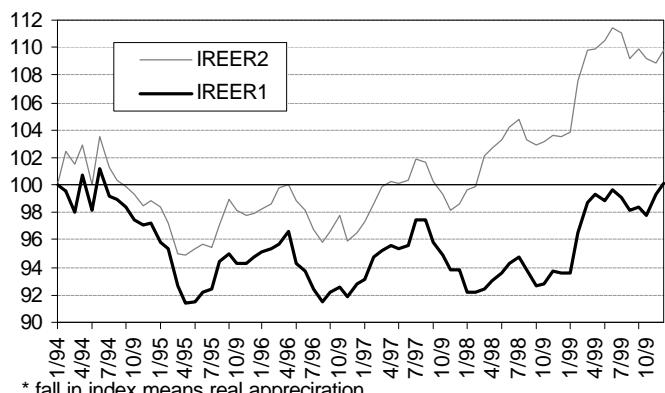

In November 1999, merchandise exports f.o.b. amounted to USD 338.9m, a 10.3% decrease compared to the same period of 1998. Merchandise imports c.i.f. (USD 736.8m) decreased in November 1999 too, by 3.6% compared to the same period last year. Thus, the coverage of exports by imports was 46% in November, and almost reached an all-time low level in 1999. These developments in merchandise exports/imports resulted in a merchandise trade deficit of USD 398.0m, 2.8% more than in November 1998.

Over the first eleven months of 1999, merchandise exports were USD 3,857.2m (an 8.0% fall compared to the same period last year), while merchandise imports for the same period were USD 7,064.7m (a 9.2% fall compared to 1998). The merchandise trade deficit for the January-November period of 1999 amounted to USD 3,207.4m, a 10.6% decreased compared to the same period last year.

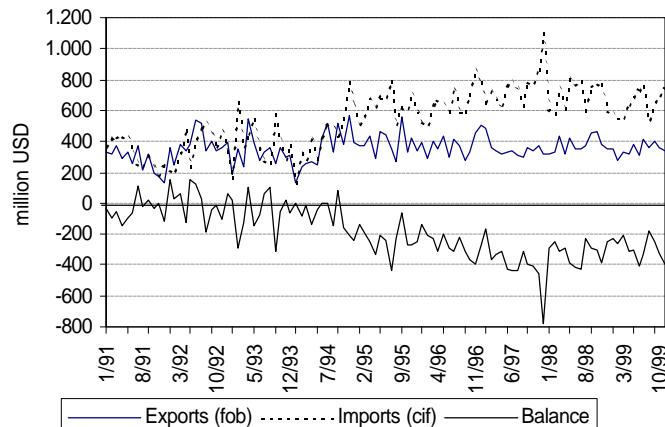

Expressed in kuna, exports for the January-December period of 1999 rose by 4% compared to the same period last year. The increase in imports was somewhat smaller and amounted to 1.1% (in 1999, exports were HRK 26,675.0m, whereas imports were HRK 50,110.5m).

## MONEY MARKET AND INTEREST RATES

The decrease seen in the average interest rate on the Zagreb Money Market in December became sharper in January. The average interest rate in daily transactions was 12.43% (12.72% in December) in the first 26 days of January, and fluctuations slackened (the range was 2 percentage points). The interest rate on callable loans, still the most important in daily transactions, fell to approximately 12%.

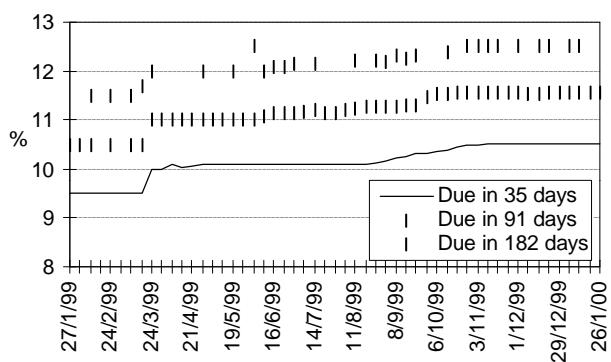

Interest rates on kuna CNB bills have remained stable for three months (10.50% on 35-day CNB bills, 11.55% on 91 day-CNB bills, and 12.50% on 182-day CNB bills). The purchase of CNB bills dropped at recent auctions. This is understandable, since bills sold at special auctions which were not renewed, became due. Interest rates on CNB bills denominated in foreign currencies were lowered, following developments in foreign financial markets. Their decrease was almost dramatic, and can be illustrated by movements in interest rates on 63-day CNB bills, accounting for more than four-fifths of all purchased bills. The average interest rate on CNB bills denominated in EUR was lowered from 3.26% at the end of December to 3.02% at the end of January. The interest rate on CNB bills denominated in USD was lowered from 6.01% to 5.73%. The interest rate on 42-day treasury bills, the only treasury bills available for purchase, has remained steady at 11%. Total purchase decreased from 6.01% to 5.73%. The interest rate on 42-day treasury bills, the only treasury bills available for purchase, has remained steady at 11%. Total purchase decreased compared to the end of 1999. While at the end of 1998 we reported on the issuance of Pliva commercial bills, which were so successfully put on the market, we could not mention any other bills of that kind because none were issued.

INTEREST RATE ON THE ZAGREB MONEY MARKET,  
Daily data on annual basis

INTEREST RATES ON CNB BILLS  
annual basis, on auction days

KUNA, On annual basis

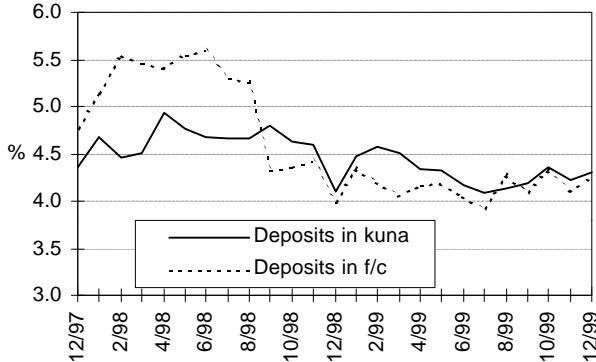

Note: preliminary data for December

However, at the beginning of 2000, commercial bills of Plava Laguna were put on the market via Privredna Banka Zagreb, which again played the main role in that activity. We hope that such information will not be rare in the financial market reports for 2000. The average interest rate on total kuna loans decreased again in December, ending up slightly over 13%. The main factor was a drop in interest rates on newly-extended kuna loans with the foreign currency clause by 0.8 percentage points compared to November, accompanied by an increase in their share in the newly-extended kuna loans to somewhat more than 50%. The amount of newly-extended loans increased in December by 40%. Regarding kuna loans with the foreign currency clause, it should be pointed out that the average interest rate on long-term loans fell by 1 percentage point (from 11.8 to 10.8%).

According to provisional data, average deposit rates grew slightly. Nevertheless, a final evaluation should await final data. All banks announced decreases in deposit rates in December, as well as in January. Although the changes in lending rates were not announced, rates were lowered slightly in December.

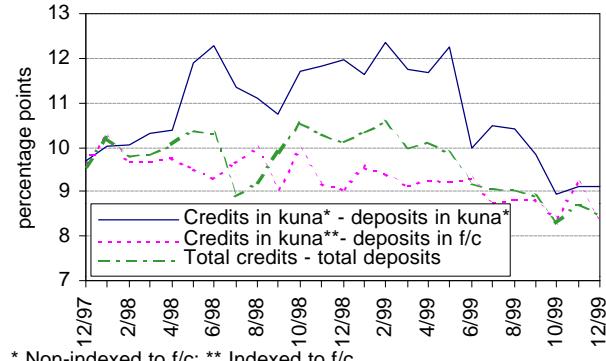

According to our measures of the difference between lending and deposit rates, the average interest rate spread of the banking system continued its long-term tendency to decrease. This is most obvious in the difference between the average interest rates on total loans and total deposits. After stagnating during the summer months, the amount of unsettled payment orders registered at the Agency for Domestic Payments increased sharply starting in September 1999. This trend continued in December. During 1999 as a whole, arrears grew by almost HRK 14bn. Accompanied by the poor efficiency of the legal system, arrears present the most significant impediment to decreasing the banking system's interest rates.

## GOVERNMENT BUDGET

Data on the outturn of the 1999 central government budget are not yet available. We will, therefore, focus on the budget for the first quarter of 2000, i.e. on provisional financing.

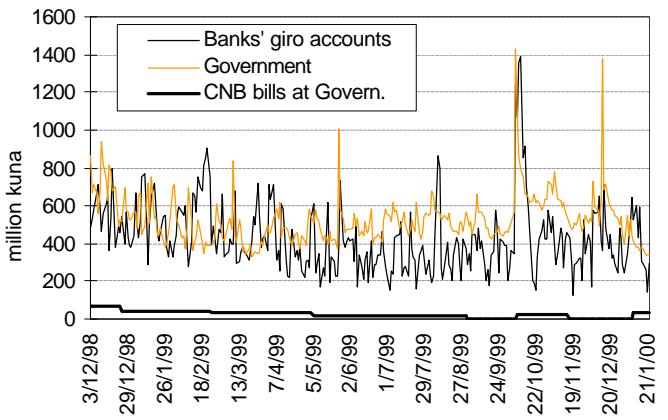

Regarding provisional financing, one should not forget that the central government budgetary deficit in the first eleven months amounted to HRK 956m. Government debt to the CNB was HRK 1.0bn. The debt had to be repaid before the end of the calendar (i.e. fiscal) year. In December, following the issuance of JPY 25bn (USD 245m) worth of bonds to the Japanese market, the debt to the central bank was fully repaid.

The planned amounts of total revenues, expenditures and financing were determined by the decision on the temporary financing of public expenditures of the Republic of Croatia during the January 1- March 31 period of 2000. Revenues planned for the first three months of 2000 are HRK 11.3bn. Planned expenditures are HRK 12.3bn, which requires additional financing of HRK 1.0bn. Planned revenues of HRK 11.3bn account for 23.6% of total revenues planned for 1999. It should be noted that in the first quarter of 1999 only HRK 8.4bn were collected (no significant capital revenue was collected). Capital revenue of HRK 1.6bn is expected in the first quarter of 2000, meaning that current revenues of HRK 9.7bn, or HRK 1.3bn more than in the first quarter last year, are to be generated.

## **Classification and Presentation of Data on Claims and Liabilities**

Data on financial institutions' claims and liabilities are classified according to institutional sectors and financial instruments. The institutional sectors are: financial institutions, central government and funds, other domestic sectors and foreign sector.

The financial institutions sector includes following sub-sectors: monetary authorities (the central bank), deposit money banks (DMBs), other banking institutions and other financial institutions. The central bank is the Croatian National Bank (CNB). Deposit money banks are institutions the Croatian National Bank has granted permission to perform banking business services in accordance with the Law on Banks, including savings banks during a transition period. Data on DMBs does not include claims and liabilities of banks undergoing bankruptcy procedures, nor former branches of banks with their headquarters in the former Yugoslavia. Other banking institutions comprise housing savings banks. Other financial institutions are financial institutions not classified as banks or other banking institutions (for example insurance companies)

The central government and funds comprises government institutions including Croatian Roads Authority, State Agency for Deposit Insurance and Bank rehabilitation and Bank and Croatian Guarantee Agency, and following central government funds: Croatian Health Insurance Institute, Croatian Pension Insurance Institute, Croatian Employment Service, Croatian Privatization Fund, Public Water Management Fund and Croatian Bank for Reconstruction and Development. Other domestic sectors are local government authorities and local funds, public and private companies and households, including craftsmen and non-profit institutions. In some tables other domestic sectors are divided into following sub-sectors: local government (which comprises local government authorities and local funds), public and private enterprises, and households (including craftsmen and non-profit institutions).

Foreign sector includes foreign legal entities and individuals.

All data on claims and liabilities refer to balances at the end of the reporting period. Foreign exchange items are reported in their

kuna equivalent at the midpoint CNB exchange rate at the end of the reporting period.

## **Table A1: Monetary and Credit Aggregates**

The table shows data on some basic monetary and credit aggregates, including their monthly growth rates. In September 1999, all the monetary aggregates were revised. In previous publications of the CNB, data on claims and obligations of savings banks were not included in the compilation of the monetary aggregates.

*Reserve money* has been taken over in its entirety from the Monetary Authorities Accounts (Table C1).

*Money (M1)* is defined in the same way as the corresponding item in the Monetary Survey (Table B1). It comprises cash outside banks, deposits with CNB by other banking institutions and other domestic sectors as well as DMBs' demand deposits. *Money (M1a)* comprises currency outside banks and DMBs' demand deposits, increased by the demand deposits of the central government and funds with DMBs.

*Broadest money (M4)* comprises Money (M1), savings and time deposits, foreign currency deposits as well as bonds and money market instruments (all above components taken over from the Monetary Survey (Table B1).

*Net domestic assets* are defined as a difference between total liquid assets and foreign assets (net).

*Domestic credit* comprises DMBs' claims on other domestic sectors, other banking institutions and other financial institutions.

In May 1999 banks bankruptcy proceedings have been initiated over few banks so their assets and liabilities are excluded from monetary statistics. In April 1999 those banks' share in Monetary Aggregate M1 amounted to 259.3 million kuna and in Monetary Aggregate M4 amounted to 4 035.8 million kuna. Data for June 1999 are comparable to data for July 1999 if Bank Placements are increased by 3 513.5 million kuna.

## **Table B1: Monetary Survey**

The monetary survey shows consolidated data from the Monetary Authorities Accounts (Table C1) and DMB's Accounts (Table D1).

---

*Foreign assets (net)* are the difference between total foreign assets and total foreign liabilities of the CNB and DMBs.

*Domestic credit* is the sum of corresponding items from Monetary Authorities Accounts and DMB's accounts. Claims on central government and funds are reported on the net basis, i.e. decreased by central government and funds' deposits with the CNB and DMBs.

*Money* is the sum of currency outside banks, deposits by other banking institutions with the CNB, deposits by other domestic sectors with the CNB and DMB's demand deposits (item *Demand deposits* in DMB's Accounts, Table D1).

The items *Savings and time deposits*, *Foreign currency deposits* as well as *Bonds and money market instruments* are entirely taken over from the DMB's Accounts, while the item *Restricted and blocked deposits* represents the sum of corresponding items from the Monetary Authorities Accounts (excluding DMB's blocked deposits with the CNB) and DMB's Accounts. *Other items (net)* are unclassified liabilities decreased by unclassified assets.

In May 1999 banks bankruptcy proceedings have been initiated over few banks so their assets and liabilities are excluded from monetary statistics. In April 1999 those banks' share in total amounted to 4 296.3 million kuna. Data for June 1999 are comparable to data for July 1999 if Claims on other domestic sectors and Other items (net) are increased by 3 513.5 million kuna.

**Table B2: Number of Reporting Deposit Money Banks and Savings Banks and Their Classification by Size**

The table shows the total number of DMBs and savings banks which report monthly to the CNB. Their operation is shown in the DMB's accounts.

Special reporting requirements applied to savings banks until June 1995. Savings banks were not legally obliged to report on their operations, so that data up to June 1995 only to those savings banks that reported voluntarily to the CNB. From July 1995 on, the data cover all Savings Banks. In accordance with the Law on Banks, savings banks must meet the conditions set out in the law by December 31, 2001, or they will be liquidated.

The table also shows the classification of reporting DMBs and savings banks according to their total assets.

In May 1999 banks bankruptcy proceedings have been initiated over few banks so their assets and liabilities are excluded from monetary statistics.

**Table C1: Monetary Authorities Accounts**

The table reports data on claims and liabilities by monetary authorities. In September 1999, the data were revised, with savings banks being transferred for the subsector other banking institutions to the subsector banks. The whole data series has been revised accordingly.

*Foreign assets* include the following forms of foreign currency and kuna claims on foreign legal entities and individuals: monetary gold, holdings of special drawing rights, foreign cash in vaults, reserve position in the International Monetary Fund, current account balances with foreign banks, time deposits in foreign banks, foreign currency security investments and other claims. *Claims on central government and funds* are loans and overdue claims on the budget of the Republic of Croatia. *Claims in kuna* are short-term loans granted for the purpose of overcoming timing differences between incoming revenues and execution of budgetary expenditures, long-term loans granted by special decrees by the government of the Republic of Croatia, and overdue claims on the State Budget for liabilities to the IMF and foreign banks. *Claims in foreign currency* was a counter-entry to the liability to the IMF based on the succession of membership in that institution.

*Claims on other domestic sectors* are loans and overdue claims on other domestic sectors, including banks in bankruptcy proceedings.

*Claims on DMBs* are credit to DMBs, deposits by the CNB with DMBs and overdue claims on DMBs. *Credit to DMBs* is split according to the type of financial instruments. *Refinancing of DMBs* include loans granted within general and selective quotas up to the end of 1993, as well as advances to DMBs for performing currency exchanges. Refinancing loans granted within the general and selective quotas were paid back in their entirety by the end of April 1994. In July 1994, they were formally revoked. Item *Lombard credits* comprises credits

to DMBs for regular maintaining of the day-to-day liquidity, which were replaced by lombard credits in December 1994. Short-term liquidity loans, which have been granted since the beginning of 1999, also serve to bridge liquidity problems. Other credits include interventive credits, special credits for bridging liquidity problems granted in the past (initial credits, prerehabilitation credits) and due but unpaid credits. Overdue claims on DMBs comprise settlement account overdrafts (until mid-1994) and banks' failure to correctly and promptly allocate and maintain statutory reserve requirements.

Since May 1999 claims on other domestic sectors include overdue claims on banks over which bankruptcy proceedings have been initiated. Due to the reclassification of savings banks from the subsector other banking institutions to the subsector banks, data for Claims on DMBs and Claims on other banking institutions were revised.

*Reserve money* consists of currency outside banks, cash in DMBs' vaults, DMBs' deposits with the CNB, other banking institutions' deposits and other domestic sectors' deposits with the CNB. *DMBs' deposits* are: settlement account balances, statutory reserves deposited on a special account with the CNB as well as CNB bills on obligatory basis. *Deposits by other banking institutions* are: settlement account balances of housing savings banks. *Deposits by other domestic sectors* are: other domestic sectors' giro account balances which, on the basis of legal acts are deposited at the Croatian National Bank.

*Restricted and blocked deposits* include required foreign exchange reserves, restricted deposits and blocked foreign exchange deposits. Banks and savings banks are required to place foreign exchange reserve deposits in accounts at the Croatian National Bank on the basis of certain foreign exchange deposits they hold. Restricted deposits are kuna funds set aside on the basis of court order or legal regulation and deposits of banks over which bankruptcy proceedings have been initiated. Blocked foreign exchange deposits are funds that were set aside in special accounts at the Croatian National Bank for repaying unpaid amounts due to foreign creditors.

*Foreign liabilities* include use of IMF credits, liabilities to international financial institutions and foreign banks.

*Central government and funds deposits* are demand deposits and foreign currency

deposits of the Republic of Croatia and republic funds with the CNB, and CNB bills purchased by central government institutions.

*CNB bills* are CNB bills on a voluntary basis in kuna and in f/c excluding CNB bills voluntarily purchased by central government institutions.

*Capital accounts* include reserves, provisions and the income and cost accounts.

*Other items (net)* are unclassified liabilities decreased by unclassified assets of the CNB's accounts.

Due to the reclassification of savings banks from the subsector other banking institutions to the subsector banks, data for Currency outside banks, DMB's cash in vaults, DMB's deposits and Deposits of Other Banking Institutions were changed. Since May 1999 including deposits of banks over which bankruptcy proceedings have been initiated.

#### **Table D1: Deposit Money Banks' Accounts**

DMBs accounts include data on Croatian DMBs' claims and liabilities. DMBs' mutual claims and liabilities are consolidated. In September 1999, the data was revised to include savings banks. The whole data series was revised accordingly.

*Required reserves* held at the Central Bank include kuna and foreign exchange reserves. Kuna reserves include vault cash and kuna funds held in accounts at the Central Bank. Foreign exchange reserves include foreign exchange held in accounts at the Central Bank.

*Foreign assets* are the following forms of kuna and foreign currency claims on foreign legal entities and individuals: foreign cash in vaults, deposits with foreign banks (including loro letters of credit and other collateral), securities, loans, equities.

*Claims on central government and funds* are the following forms of claims in kuna and foreign currency: securities and loans. The main forms of claims on the central government are shown separately: bonds issued in accordance with the Decree Law on the Transformation of Household Foreign Exchange Savings Deposits with Banks into the Public Debt of the Republic of Croatia, and bonds issued in accordance with the Law on the Issue of Bonds for the

---

Restructuring of the Economy of the Republic of Croatia.

*Claims on other domestic sectors* include the following claims in kuna and foreign currency: money market instruments, bonds, loans (including acceptances), and equities.

The same forms of kuna and foreign currency claims are included in claims on other banking institutions and other financial institutions, with one difference: *Claims on other banking institutions* also include deposits with those institutions.

The items *Demand deposits*, *Savings and time deposits*, *Foreign currency deposits* as well as *Bonds and money market instruments* comprise banks' liabilities to other domestic sectors, other banking institutions and other financial institutions.

*Demand deposits* include giro and current accounts balances and other transferable deposits, minus currency in the payment system, i.e. checks in banks' vaults and checks in collection.

*Savings and time deposits* are: kuna sight deposits as well as kuna time and notice deposits.

*Foreign currency deposits* are: foreign currency sight deposits as well as foreign currency time and notice deposits.

*Bonds and money market instruments* are: banks' liabilities for securities issued (net) and loans obtained.

*Foreign liabilities* comprise the following forms of kuna and foreign currency liabilities to foreign legal entities and individuals: giro and current accounts, savings deposits (including loro letters of credit and other forms of collateral), time deposits, loans received and liabilities due.

*Central government and funds' deposits* are all forms of DMBs' kuna and foreign currency liabilities (except restricted and blocked deposits) to the central government and funds.

*Credit from central bank* comprises loans obtained from the CNB and deposits by the CNB with DMBs. Repurchase of securities is also considered and treated as loan.

*Restricted and blocked deposits* comprise the following DMBs' liabilities: kuna and foreign currency restricted deposits by other domestic sectors, other banking institutions, other financial institutions, central government and funds as well as foreign legal entities and individuals; and households' blocked foreign currency deposits, regulated by the Decree Law on the Transformation of Household Foreign

Exchange Savings Deposits with Banks into the Public Debt of the Republic of Croatia

*Capital accounts* are share capital, profit or less in the current year, retained profit (loss), required reserves, other capital reserves and provisions for identified and unidentified losses

*Other items (net)* are unclassified liabilities decreased by unclassified assets.

In May 1999 banks bankruptcy proceedings have been initiated over few banks so their assets and liabilities are excluded from monetary statistics. In April 1999 those banks' share in total DMBs' accounts amounted to 5 701.4 million kuna. On the assets side, most significant were: Claims on enterprises (4,378.7 million kuna) and Claims on households (701.4 million kuna). On the liabilities side, most significant were: Foreign currency deposits (3,443.7 million kuna), Foreign liabilities (1,024.6 million kuna) and Capital accounts (854.6 million kuna). Beginning in July 1999, the total amount of provisions for identified losses is shown within the Capital accounts line. Data for June 1999 are comparable to data for July 1999 if Claims on other domestic sectors and Capital accounts are increased by 3,513.5 million kuna. Other items have been corrected by small amounts.

## Tables D2-D12

This group of tables (with the exception of Table D5) represents an elaborate presentation of appropriate items of claims and liabilities of DMBs' Accounts (Table D1).

### Table D2: Deposit Money Bank's Foreign Assets

This table shows DMBs' claims on foreign legal entities and individuals.

*Foreign assets* of DMB's comprise foreign assets in kuna and foreign currency.

*Claims on foreign banks* and *Claims on foreign nonbanks* (total and by financial instruments) are shown separately within both foreign assets in kuna and in foreign currency.,m

In May 1999 banks bankruptcy proceedings have been initiated over few banks so their assets and liabilities are excluded from monetary statistics. In April 1999 those banks' Foreign Assets amounted to 402.3 million kuna.

Through June 1999, some household f/c savings deposits were included in Demand deposits and f/c savings deposits.

**Table D3: Deposit Money Banks' Claims on the Central Government and Funds**

The table shows kuna and foreign currency DMBs' claims on the central government and funds.

*Bonds* arising from blocked foreign currency savings deposits are issued in accordance with the Decree Law on the Transformation of Household Foreign Exchange Savings Deposits with Banks into the Public Debt of the Republic of Croatia

*Big bonds* are those issued in accordance with the Law on the Issue of Bonds for the Restructuring of the Economy of the Republic of Croatia.

*Other claims* are all other DMBs' kuna and foreign currency claims on central government and funds: securities, loans and equities.

In May 1999 banks bankruptcy proceedings have been initiated over few banks so their assets and liabilities are excluded from monetary statistics. In April 1999 those banks' Claims on Central Government and Funds amounted to 17.8 million kuna.

**Table D4: Deposit Money Bank's Claims on Other Domestic Sectors**

The table shows DMBs' kuna and foreign currency claims on other domestic sectors, classified according to financial instruments: money market instruments, bonds, loans and advances (including acceptances and purchased claims), and equities and arrears.

Since October 1994, foreign currency loans can be granted only when DMB's simultaneously borrow abroad in their own name and for the account of the end-user.

In May 1999 banks bankruptcy proceedings have been initiated over few banks so their assets and liabilities are excluded from monetary statistics. In April 1999 those banks' Claims on Other Domestic Sector amounted to 5,088.0 million kuna. Data for June 1999 are comparable with data for July 1999 if the item Loans and Advances under Claims in kuna is

increased by 2,904.3 million kuna, the item Shares and Participations is decreased by 520.3 million kuna, and if the item Loans and Advances under Claims in f/c is increased by 1,129.4 million kuna.

**Table D5: Distribution of Deposit Money Banks' Loans by Domestic Institutional Sectors**

The table shows data on kuna and foreign currency loans granted by DMBs to domestic sectors, including acceptances, financial leases, payments made on the basis of guarantees and similar instruments and purchased claims.

In May 1999 banks bankruptcy proceedings have been initiated over few banks so their assets and liabilities are excluded from monetary statistics. In April 1999 those banks' loans amounted to 4,463.3 million kuna. Data for June 1999 are comparable with data for July 1999 if total loans in kuna are increased by 2,972.6 million kuna, and total loans in f/c are increased by 840.9 million kuna.

**Table D6: Demand Deposits with Deposit Money Banks**

The table shows demand deposits with DMBs, classified by domestic institutional sectors.

Demand deposits are the sum of other domestic sectors', other banking institutions' and other financial institutions' giro and current accounts balances, minus currency in the payment system, i.e. by amount of checks in banks' vaults and checks in collection. Banks obligations arising from kuna payment instruments issued are included in the household sector.

In May 1999 banks bankruptcy proceedings have been initiated over few banks so their assets and liabilities are excluded from monetary statistics. In April 1999 Demand deposits with those banks amounted to 259.3 million kuna.

**Table D7: Time and Savings Deposits with Deposit Money Banks**

---

The table shows *Kuna savings and time deposits* by other domestic sectors, other banking institutions and other financial institutions with DMBs.

In May 1999 banks bankruptcy proceedings have been initiated over few banks so their assets and liabilities are excluded from monetary statistics. In April 1999 Time and Savings Deposits with those banks amounted to 323.7 million kuna. In July 1999, certain deposits of local government, government, enterprises, other banking institutions and other financial institutions were reclassified from savings to time deposits.

**Table D8: Foreign Currency Deposits with Deposit Money Banks**

The table shows foreign currency savings and time deposits by other domestic sectors, other banking institutions and other financial institutions with DMBs. Foreign currency savings deposits are all foreign currency sight deposits, while foreign currency time deposits also include foreign currency notice deposits.

In May 1999 banks bankruptcy proceedings have been initiated over few banks so their assets and liabilities are excluded from monetary statistics. In April 1999 Foreign Currency Deposits with those banks amounted to 3,443.7 million kuna.

**Table D9: Bonds and Money Market Instruments**

The table shows DMBs liabilities for securities issued (net) and loans received from other domestic sectors, other banking institutions and other financial institutions.

*Money market instruments (net)* comprise DMBs net liabilities for CNB bills, bills of exchange (issued and accepted) and other securities issued.

*Bonds (net)* comprise DMBs net liabilities for kuna and foreign currency bonds issued, as well as debt and hybrid instruments that under certain conditions may be included in the supplementary capital of banks.

*Other domestic borrowings* comprises loans received, reported total and classified by institutional sectors.

In May 1999 banks bankruptcy proceedings have been initiated over few banks so their assets and liabilities are excluded from monetary statistics. In April 1999 those banks' Bonds and Money Market Instruments amounted to 9 million kuna. In July 1999, certain debt and hybrid instruments were reclassified from Time and notice deposits to Bonds (net). The amount reclassified was 3,513.5 million kuna.

**Table D10: Deposit Money Banks' Foreign Liabilities**

The table shows DMBs' total foreign currency and kuna liabilities to foreign legal entities and individuals, with the exception of restricted kuna and foreign currency deposits by foreign legal entities and individuals.

DMBs' foreign liabilities comprise foreign currency liabilities and foreign kuna liabilities.

Within foreign kuna and foreign currency liabilities, liabilities to foreign banks are reported separately from liabilities to foreign nonbanks (total and by financial instruments).

In May 1999 banks bankruptcy proceedings have been initiated over few banks so their assets and liabilities are excluded from monetary statistics. In April 1999 those banks' Foreign Liabilities amounted to 1,024.6 million kuna.

**Table D11: Central Government and Funds Deposits with Deposit Money Banks**

The table reports total DMBs' kuna and foreign currency liabilities to the central government and funds, with the exception of restricted (kuna and foreign currency) deposits by the central government and funds with DMBs.

Kuna and foreign currency deposits by Republic of Croatia and republic funds are shown separately. Kuna deposits comprise demand deposits, savings deposits, kuna time and notice deposits, and kuna loans obtained from the central government and funds. Foreign currency deposits comprise foreign currency sight deposits, as well as savings deposits, foreign currency time and notice deposits.

In May 1999 banks bankruptcy proceedings have been initiated over few banks so their assets and liabilities are excluded from monetary statistics. In April 1999 Central Government and Funds Deposits with those banks amounted to 193.5 million kuna.

**Table D12: Restricted and Blocked Deposits with Deposit Money Banks**

The table shows restricted and blocked deposits by the central government and funds, other domestic sectors, other banking institutions, other financial institutions and foreign legal entities and individuals with DMBs.

*Restricted and blocked deposits* include two categories of deposits: restricted (kuna and foreign currency) deposits and blocked foreign currency deposits.

*Blocked foreign currency deposits* include households' foreign currency deposits regulated by the Decree Law on the Transformation of Household Foreign Exchange Savings Deposits with Banks into the Public Debt of the Republic of Croatia

In May 1999 banks bankruptcy proceedings have been initiated over few banks so their assets and liabilities are excluded from monetary statistics. In April 1999 Restricted and Blocked deposits with those banks amounted to 39.9 million kuna. In July 1999, data on blocked deposits of central government and of enterprises were revised.

**Table E1: Housing Savings Banks' Accounts**

Housing savings banks' accounts include data on claims and liabilities of the Croatian housing savings banks. All housing savings banks' claims and liabilities refer exclusively to domestic sectors.

Housing savings banks' required reserves held at the Central Bank include kuna vault cash and kuna funds held in accounts at the Central Bank.

Claims on central government and funds are claims in kuna on the Republic of Croatia and republic funds.

Claims on other domestic sectors include kuna loans to local government and households.

Claims on banks include loans extended to banks, as well as deposits with banks.

The item Time deposits includes local government and households time deposits.

Bonds and money market instruments are housing savings banks' liabilities for securities issued (net) and loans obtained.

Capital accounts include share capital, profit or loss in the current year, retained profit (loss), required reserves, other capital reserves, and provisions for identified and unidentified losses.

Other items (net) are unclassified liabilities decreased by unclassified assets.

**Table F1 - Credit Rates of Croatian National Bank**

The table shows interest rates used by the CNB to calculate and charge interest on loans and on all other claims.

Lending CNB interest rates are being set by special decrees of the Council of the Croatian National Bank, on annual basis. Exceptionally, from June 1995 to September 11, 1996 interest rate charged by CNB on lombard credits has been 1.5 percentage point higher than the weighted average interest rate on CNB bills on voluntary basis (which serve as collateral for lombard credits) in cases when the weighted average interest rate was higher than 16.5%. Congruently, from June 1995 to August 1996 the table reports weighted average interest rate on lombard credits. Interest rate in September 1996 is calculated as weighted average of interest rate applied in first 10 days of September 1996 (according to the regime mentioned above) and fixed interest rate applied since September 11, 1996.

Time series presented in the table contain certain breaches, due to changes in CNB's monetary policy instruments. Consequently, until November 1994, column 4 shows interest rates on regular credits for maintenance of day-to-day liquidity, which were granted based on securities portfolio, and from December 1994 onwards, interest rates on lombard credits.

Furthermore, data shown in column 6 refer, until September 1994, to interest rates on special credits for savings deposits' payments and for payments from households' current accounts, and from October 1994 until September 1997 to interest rates on daily credits for savings deposits and current accounts in kuna. Daily credits, as opposed to special credits, are paid back on the

same day. In October 1997, this instrument was replaced by daily credits for overcoming short-term liquidity problems that are collateralized by CNB bills. Since December 16, 1998 this credit is incorporated in lombard credit, applying different interest rate for its usage within one day.

Data shown in column 7 refer, until December 1994 to interest rate on initial credits, and since March 18, 1998 to credits for overcoming illiquidity problems of banks under evaluation for entry into rehabilitation and restructuring procedures and since February 1999, to interest rates on short-term liquidity credits. Since December 1999 data show interest rates on short term liquidity credit over 3 months which is 1 percentage point higher than interest rate on lombard credits. Interest rate on short-term liquidity credit up to 3 months is 0,5 percentage point higher than interest rate on lombard credits.

Interest rates reported in column 8 refer to the use of statutory reserves, which was being used by the banks (in prescribed percentage) to maintain day-to-day liquidity until September 1994. Interest rates paid until September 1994 on the use of statutory reserve funds in amount above prescribed and/or for longer period than allowed are shown in column 9. Since October 1994, interest rates paid on the use of statutory reserve funds are the same as those used for any other failure to fulfill financial obligations, in accordance with the late interest regulations (shown in column 10).

Until June 1994 the same interest rate was applied to funds used above amounts available on giro accounts and to inaccurately calculated or under-appropriated statutory reserves (reported in column 9). From July to September 1994, interest rate applied to the use of those funds was 21%, and since October 1994 the same interest rates have been applied as for other failures to fulfill financial obligations, shown in column 10.

**Table F2: Deposit Rates of Croatian National Bank**

The table shows interest rates paid by the CNB on funds deposited with the CNB as well as on securities issued.

Interest rates paid by the CNB for appropriated statutory reserve funds are being set by the Council of the CNB. Until 7 October

1993, CNB was setting different exchange rates for statutory reserve funds based on savings and time deposits. Therefore, for that period the table reports weighted average interest rate on appropriated statutory reserve funds (column 3). From 8 October 1993 until the end of February 1994, CNB paid no interest on appropriated statutory reserve funds, and since March 1994, uniform rate has been applied to these funds.

Interest rates on obligatory CNB bills are set by the Council of the CNB.

Until October 1993, interest rates on CNB bills on voluntary basis were also set by the Council of the CNB, while since November 1993, they have been set at CNB bills' auction sales. Congruently, since November 1993, columns 5, 6 and 7 report weighted average interest rates attained in auctions of the CNB bills.

Until October 1994, interest rates on CNB bills on voluntary basis due in 30 and 90 days are reported in columns 6 and 7 respectively.

Since April 1998 column 9, 10, 11 report weighted average interest rates of the voluntary CNB bills in EUR and USD (until December 1998 in DEM and USD), due in 63, 91, 182 and 365 days attained in CNB bill's auctions as a weighted average of subscribed amounts in those two currencies.

**Table F3: Deposit Money Banks' Reserves on Obligatory Basis**

This table shows data on monthly averages of day-to-day balances of DMB's required reserves with the CNB. Savings banks are included beginning in July 1999, and the earlier data have not been revised.

*Reserve requirement* (column 3) represents the prescribed amount of funds banks are required to deposit on a special statutory reserve account with the CNB, or to maintain (in average) on their settlement accounts or in vaults. This amount corresponds with the statutory reserve instrument of January 1995, while until December 1994 it comprised two instruments: statutory reserves and liquid assets requirement - LAR (except for the part in which banks were conforming to this requirement by registering CNB bills on voluntary basis).

Column 4 shows weighted average reserve requirement ratio as a percentage of the reserve requirement (column 3) in the reserve base. Column 5 shows the portion of the reserve

requirement banks are required to deposit on a special statutory reserves account with the CNB (until December 1994 this amount corresponds with the statutory reserves instrument, while since January 1995 until May 1998, banks have been required to deposit at least 75% of the total reserve requirement on a special account with the CNB and since May 1998 at least 60% of the amount).

Column 6 shows the percentage of the statutory reserves deposited with the CNB in the total reserve requirement.

Column 7 shows the total amount of other obligatory deposits with the CNB, including obligatory CNB bills, those voluntary CNB bills used by banks to maintain the prescribed minimal liquidity (LAR), special statutory reserves (until July 1995) and statutory reserves on f/c deposits, f/c credits from foreign banks and guaranties and f/c credits from foreign banks.

Column 8 shows the total reserve requirement as a sum of reserve requirement and other deposits with the CNB on obligatory basis. Column 9 shows the percentage of total reserve requirement in the reserve base.

Column 10 shows weighted average remuneration rate for all forms of immobilized funds (i.e. for all components of total reserve requirement).

Column 11 shows the use of obligatory reserves, which includes use of appropriated statutory reserve funds (authorized and unauthorized), inaccurately calculated statutory reserves, non-maintenance of the prescribed minimal liquidity, i.e. (since January 1995) non-maintenance of the minimal average settlement account and vault balance (determined in accordance with the calculation of statutory reserves), unregistered amount of the CNB bills on obligatory basis and inaccurately calculated special statutory reserves (until July 1995) and inaccurately calculated statutory reserves on f/c deposits, f/c credits from foreign banks and guaranties and f/c credits from foreign banks.

**Table F4: Deposit Money Banks' Liquidity Indicators**

The table reports monthly averages of day-to-day balances of some indicators of DMBs' liquidity. Savings banks are included beginning in July 1999. The past data has not been revised.

Column 3 shows free reserves, defined as bank's total reserves (on settlement accounts and in vaults) decreased by the minimal average settlement account and treasury balance, as prescribed by instruments of the CNB (until December 1994 by the requirement for banks' minimal liquidity, and since January 1995 by statutory reserve requirement).

Column 4 shows the primary liquidity ratio as a percentage of monthly day-to-day free reserves averages in monthly day-to-day averages of deposits which constitute the reserve base.

Column 5 shows the monthly average of day-to-day balances of secondary liquidity sources used. Secondary liquidity sources comprise: use of statutory reserves (until October 1994), regular loans for maintenance of day-to-day liquidity (until November 1994), use of funds exceeding those available on the bank's giro account (until October 1994), special credits for overcoming illiquidity problems (initial credits, credits for overcoming illiquidity problems of banks under evaluation for entry into rehabilitation and restructuring procedures), lombard credits (since December 1994), intervention credits for overcoming illiquidity (since October 1994), short-term liquidity credits (since February 1999) as well as outstanding liabilities due to the CNB.

Column 6 reports monthly average of day-to-day balances of CNB bills on voluntary basis in kuna (until December 1994, this amount is decreased by the portion of voluntarily registered CNB bills used by banks to maintain the prescribed minimal liquidity).

Column 7 reports monthly average of day-to-day balances on CNB bills on voluntary basis in foreign currency (EUR and USD).

**Table G1: Deposit Money Banks' Credit Rates**

The table contains weighted averages of DMBs' monthly interest rates on kuna and foreign currency loans, reported on a yearly basis. Savings banks are not covered.

Columns 3 and 4 show interest rates on the interbank, daily and overnight money markets, according to information received from Money Market Zagreb. Data on DMBs' interest rates on kuna and foreign currency credits are based on DMBs' periodic reports. Basis for calculation of weighted averages are amounts of credits bearing corresponding interest rates,

which were disbursed during the reported month, with the exception of interest rates on giro and current accounts credit lines, for which weighted averages were calculated based on the balance of these loans at the end of the reported month.

Column 5 shows interest rates on total (short-term and long-term) kuna credits not indexed to foreign currency. Interest rates on short-term kuna credits (shown in column 6) also include interest rates on discounted short-term securities (not indexed to foreign currency), weighted based on their face value.

Columns 8, 9, 10 shows interest rates on total (short-term and long-term) kuna credits indexed to foreign currency, including interest rates on discounted short-term securities indexed to foreign currency.

Interest rates on foreign currency credits (columns 11, 12 and 13) refer to credits released in Deutsche Mark or US dollars in a reported month, while weighted averages are calculated based on their kuna equivalent using current exchange rate. Credits released in other currencies are not included in this table.

Relative significance of particular interest rates (reported in the last line of the table) refers to data for the last period included in the table. It is calculated as a percentage of corresponding credit category (to which exchange rates apply) in total credits included in the calculation of weighted averages for that period.

**Table G2: Deposit Money Banks' Deposit Rates**

The table shows weighted averages of monthly DMBs' interest rates on kuna and foreign currency deposits, reported on a yearly basis. Savings banks are not covered.

Data on interest rates on DMBs' deposits are obtained from DMBs' periodic reports.

Column 3 reports weighted averages of monthly interest rates on total kuna deposits (sight deposits, savings and time deposits) not indexed to foreign currency. Weighted averages of monthly interest rates on total kuna deposits indexed to foreign currency are reported in column 6.

Interest rates on foreign currency deposits refer to deposits received in Deutsche Mark or US dollars, while weighted averages are calculated based on their kuna equivalent using current exchange rate. Deposits received in other

foreign currencies are not included in the data reported in this table.

The basis for calculation of weighted averages is the end-of-month balance of deposits. Kuna and foreign currency time and savings deposits are exceptions; for them weighted averages are calculated (since July 1995) based on the amounts of those deposits received during the reported month. Weighted averages of interest rates on total kuna and foreign currency deposits (columns 3 and 7) are weighted by the end-of-month balances of all categories included in the calculation.

Kuna and foreign currency deposits used as collateral for credit are included, while restricted deposits (deposits used for payment of imports and other restricted deposits) are not included into the calculation of weighted averages.

**Table G3: Deposit Money Banks' Trade with Foreign Exchange**

Data on trade with foreign exchange between DMBs comprise transactions of purchase and sale of foreign exchange on domestic foreign currency market. The transactions are classified by categories of participants (legal entities or individuals, banks, CNB). Source of data are DMBs periodic reports on trading with foreign exchange, sent to the CNB on a regular basis. The amounts are stated in Euro (EUR), converted from other foreign currencies using the CNB's midpoint exchange rate (reporting period average). Other Croatian National Bank transactions include foreign exchange sales and purchases on behalf of Ministry of Finance.

**Table H1-H4: Balance of Payments**

The balance of payments is compiled in accordance with the recommendations of the International Monetary Fund (Balance of Payments Manual, Fifth Edition, 1993). Data sources include: reports of the Central Bureau of Statistics, the Croatian Health Insurance Institute, the Payments Institute, Commercial banks, enterprises and the Croatian national Bank, as well as research by the Tourism Institute and the Croatian National Bank.

Exports and Imports are shown on an f.o.b. basis. The basic data source for these items is the Report of the Central Bureau of Statistics on merchandise foreign trade of the Republic of Croatia. The data of the Central Bureau of Statistics are modified in accordance with the compilation method of the IMF: merchandise imports, which are shown in the Central Bureau of Statistics' report in c.i.f. terms, are corrected to f.o.b. (corrected for classification) and both imports and exports are corrected so that the coverage includes goods defined as such in the balance of payments methodology but not included in the statistics on merchandise trade.

Regarding exports, beginning with the first quarter of 1999, coverage has been increased via estimates of purchases by individual foreign travelers in the Republic of Croatia. These estimates are based on the Survey on Consumption of Foreign Travelers in Croatia carried out jointly by the Croatian National Bank and the Institute for Tourism. Regarding imports, the difference between c.i.f. and f.o.b. is estimated on the basis of research studies of the CNB on samples of the largest importers, and the resulting value of f.o.b. imports is adjusted on the basis of foreign payments for repairs of ships as well as supply purchases in foreign ports, as well as estimates of the purchases of individual Croatian citizens abroad, obtained via a research study of the CNB. From the first quarter of 1999 on, estimates are based on the Survey on Consumption of Domestic Travelers Abroad carried out jointly by the Croatian National Bank and the Institute for Tourism. For the 1993 to 1996 period, merchandise imports from the merchandise trade statistics are modified by estimates of imports in duty-free zones (prepared by the CNB), while from 1997 on, data on these imports are included in the merchandise trade statistics.

Beginning with the first quarter of 1999, income and expenditures from transport services are compiled on the basis of data from a new CNB research project on international transport services, with two exceptions: first, income and expenditures from road transport are compiled via data on realized foreign payments, and second, a portion of expenditures on transport services for transport of goods imported to the Republic of Croatia are based on a survey of the largest Croatia importers. This survey is carried out in the context of the reformulation of data on imports from a c.i.f. to an f.o.b. basis.

Income from travel-tourism is calculated on the basis of the Survey on the Consumption of Foreign Travelers in Croatia starting in the first quarter of 1999. This survey is carried out jointly by the Croatian National Bank and the Institute for Tourism. Additional data from the Croatian Health Insurance Institute on health services provided to non-residents is also used.

Expenditures from travel-tourism is, starting in the first quarter of 1999, based on the results of the Survey on the Consumption of Domestic Travelers Abroad, and is supplemented by data on foreign exchange expenditures of the Croatian Health Insurance Institute.

Income from transport services is recorded on the basis of research by the Croatian National Bank. This research was based on data provided by Croatian transport enterprises to the CNB. The data from this project are added to data from the statistics on international payments and income from pipelines and road transport, which were not included in the research project.

Expenditures on transport services include part of the difference between c.i.f. and f.o.b. imports, which pertain to services provided by non-residents, as well as estimates of the operating costs of Croatian transport companies in international transport. This estimate was performed by the Croatian National Bank, and amounts to 40% of the income of Croatian transport companies shown in the Croatian National Bank's research.

Income from travel and tourism is calculated as the total value of foreign exchange cash and checks purchased from nonresidents, the purchase of foreign checks from residents, foreign transfers of funds to the accounts of enterprises engaged in tourism, the sale of local currency and travelers checks abroad, health services provided to non-residents, receipts for scholarships and specialized study by non-residents in the Republic of Croatia, estimates of tourist expenditures of non-residents in registered lodging and accommodations and estimates of other forms of tourist expenditures of non-residents. The estimate of tourist expenditure in registered lodging and accommodations is based on research by the Institute of Tourism, and the estimate of other forms of tourist expenditure is based on econometric analysis of the Croatian National Bank. The other categories mentioned are based on data from foreign payments statistics.

---

Expenditures for travel and tourism are calculated as the total value of outflows for official travel, stipends and specialized study, foreign exchange expenditures of the Croatian Health Insurance Institute, outflows for tourism organized by domestic tourism enterprises and estimates of the foreign tourist expenditures of residents. These estimates are based on research by the CNB, while the other categories mentioned are based on data on foreign payments.

Other services includes data from the foreign payments statistics which related to investment projects abroad, customs clearing services, representation fees, insurance services, postal services and the costs of Croatian representative offices overseas. To this category is added a part of unclassified services which can be explained as a linear trend, as well as estimates of the expenditures of international peacekeeping and humanitarian missions for goods and services in the Republic of Croatia, based on research by the Croatian National Bank.

The income account includes data from the foreign payments statistics on payments on the basis of interest, data from CNB research on income paid from foreign direct and portfolio investment of the private sector, Croatian National Bank data and Payments Institute data on income paid from foreign portfolio investment in the official sector and estimates of the factor income of resident peacekeeping and humanitarian missions in the Republic of Croatia, based on research of the Croatian National Bank. For the period 1993 to 1996, data on foreign direct investment do not include data on retained profit.

Current transfers to the government include data from the foreign payments statistics on the payment of pensions and other social transfers, monetary support and gifts, as well as data from the merchandise trade statistics of the Republic of Croatia on imports and exports of goods without payment obligation.

Income from transfers to other sectors includes data from the foreign payments statistics on the total value of foreign exchange transfers received from abroad. To this is added an estimate for unregistered transfers. This estimate is seen as 15% of the difference between the unexplained foreign exchange inflows and outflows of the household sector.

The foreign exchange receipts of the household sector include the purchase of foreign

cash at exchange offices from residents and deposits of foreign cash in foreign exchange accounts of residents at domestic banks. Payments made abroad and income earned through business trips, education and training, tourist receipts and other tourist income are added to this. The total inflow is decreased by: estimated tourist income and estimates of purchases by individual foreign tourists in the Republic of Croatia (Survey on the Consumption of Foreign Tourists in Croatia carried out jointly by the Croatian National Bank and Institute of Tourism) plus consumption of goods and services by members of peacekeeping and humanitarian missions in the Republic of Croatia.

The foreign exchange expenditures of the household sector include purchases of foreign cash by exchange offices and withdrawals of foreign cash from households' foreign exchange accounts at domestic banks. Realized foreign payments and expenditures from business trips, education and training, tourist payments and other tourist expenditures are added to this. The total outflow is decreased by: individuals' expenditures for goods abroad and expenditures for foreign tourism by residents.

Expenditures on transfers of other sectors is based on foreign payments data on the total value of foreign exchange transfers abroad.

Capital accounts are compiled from data on realized foreign payments by migrants (income and expenditures).

Foreign direct and portfolio investment includes data on those investments from the research of the CNB and data from the securities register of the official sector (Central bank and central government) at the Croatian National Bank and Payments Institute. In the 1993 to 1996 period, data on foreign direct investment of the private sector (banks and other sectors) do not include direct foreign debt investment, nor retained profit of the investor.

Credits--trade credit has been compiled since the first quarter of 1996. It includes advances paid for goods imports by Croatian importers. Starting in the first quarter of 1999, it includes loans with maturities below 90 days given by Croatian exporters to foreign buyers. Other investment is classified according to the following institutional sectors: Croatian National Bank, Government, Banks and Other. The Government sector comprises central government, local government and local funds.

The Banking Sector comprises commercial banks.

Assets--foreign exchange and deposits--banks shows the change in the total liquid foreign exchange of banks authorized to do business abroad. Assets--foreign exchange and deposits--other sectors includes a part of the net foreign exchange inflows of the household sector which is not classified on the current account, and which amounts to 85% of the unexplained foreign exchange inflows to the household sector.

Debits--trade credit has been compiled since the first quarter of 1996, and includes data on loans with a maturity below 90 days granted by foreign suppliers to Croatian importers. From the first quarter of 1999 on, this item includes data on advances granted by Croatian exporters to foreign purchasers.

Data on credits and arrears are obtained from statistics on foreign credit relations of the Croatian National Bank, which are based on concluded credit agreements registered with the Croatian National Bank.

Currency and deposits includes changes in those foreign exchange and kuna foreign liabilities of the monetary authorities (CNB) and banks based on current accounts, time accounts, Loro letters of credit, guarantees, sight deposits and demand deposits.

Changes in the foreign exchange reserves of the Croatian National Bank on a transactions basis are estimated using accounting data on the stock of foreign exchange reserves in particular currencies at the end of the months. In the estimation of transactions, changes in the original currencies are transformed into dollar changes using the average monthly exchange rate of the currency in question with the US dollar.

**Table H5: International Reserves and Banks' Foreign Exchange Reserves**

The international reserves of the Croatian National Bank are shown according to the methodology contained in the *Balance of Payments Manual* (International Monetary Fund, 1993), and include those foreign claims of the Croatian National Bank that can be used to bridge imbalances in international payments. International reserves include Special Drawing Rights, reserve position in the International Monetary Fund, foreign currency, and deposits at

foreign banks, as well as bonds and debt instruments.

The foreign exchange reserves of commercial banks include foreign currency and domestic commercial banks' deposits at foreign banks. These foreign exchange reserves represent an additional source of liquidity for bridging imbalances in international payments.

**Table H8: External Debt**

The table shows the balance of external debt at the end of the period, in millions of US dollars, according to the CNB's midpoint foreign currency rate at the end of the period.

External debt is defined as total value of following liabilities for foreign credits: outstanding debt (including principal in arrears) and projection of principal payments.

Principle arrears include principle payments which should have been paid, but for which no statistical information regarding payment has been received.

Interest arrears are estimated by using originally agreed interest rates and do not include late interest.

Short-term credits do not include the use of interbank line of credits.

---

**Table H9: Structure of foreign debt and repayment projection**

The table shows the structure of foreign debt by domestic institutional sectors, as well as the debt stock and a repayment projection for medium-term and long-term borrowing. All data are shown at the midpoint exchange rate of the Croatian National Bank at the end of the period.

Also, the tables show interest-payment projections for medium-term and long-term borrowing.

#### **OTHER LICENSED INSTITUTIONS WITH FULL AUTHORIZATION**

1. HRVATSKA BANKA ZA OBNOVU I RAZVITAK Zagreb

<sup>1)</sup> Authorization includes raising households' f/c deposits and operating exchange offices

<sup>2)</sup> Licensed savings bank not yet operative.

## **Management of the CNB**

**Marko Škreb, Ph.D. Governor**

**Zdravko Rogić, M.S. Deputy Governor**

**Relja Martić, Vice Governor**

## **Board of Executive Directors**

Research and statistics area - Velimir Šonje M.S.

Area of central banking operation- Irena Kovačec

International financial relations area - Jadranka Granić

Area of control and supervision- Čedo Maletić

Accounting, treasury and payment operations area - Đurđa Haramija M.S.

Area of organization planning and information processing- Petar Ćurković M.S.

Area of legal affairs and general services - Tomislav Presečan M.S.

## LIST OF ABBREVIATIONS & SYMBOLS

CNB	- Croatian National Bank
GDP	- gross domestic product
DMB	- deposit money bank
dep.	- deposit
Q	- quarterly
CBS	- Central Bureau of Statistics
manufactur.	- manufacturer
mil	- million
bil	- billion
o.w.	- of which
IMF	- International Monetary Fund
res.	- reserve
SNA	- System of National Accounts
prod.	- producers
RR	- reserve requirement

## ABBREVIATIONS FOR CURRENCY

HRK	- Croatian kuna
ATS	- Austrian schilling
FRF	- French franc
DEM	- German mark
CHF	- Swiss franc
GBP	- British pound
ITL	- Italian lira
USD	- US dollar
SIT	- Slovenian tolar
EUR	- euro

## SYMBOLS

-	- no entry
....	- data not available
0	- value is less than 0.5 of the unit of measure being used
Ŕ	- average
<sup>1)</sup>	- indicates a note beneath the table
*	- corrected data
( )	- incomplete or insufficiently verified data
