^a Calculated by applying the average annual exchange rate (HRK/1 EUR) to the GDP in kuna terms.

^b From 1996 to 1998, the rate of inflation was measured by the retail price index. From 1999 on, it is measured by the consumer price index.

^c External debt indicators for the period 1998-2006 are shown on a gross basis, while the indicators for the period up to 1997 do not include interest arrears and accrual interest, hybrid and subordinated instruments, repo transactions of banks and the CNB, deposits of international financial institutions with the CNB, and one-sided effects of the secondary bond market.

^d Includes principal payments on long-term debt net of principal payments on trade credits and direct investments, as well as total interest payments net of interest payments on direct investments.

^e Total balance excluding capital revenues (GFS 1986) in the period from 1999 to 2001 is shown on a cash basis. From 2001 on, total balance is shown on a modified accrual basis and includes CM, CR CPF and DAB.

^f Public debt includes general government debt and issued government guarantees.

^g Employment and unemployment rates as at November 1996 and as at June 1997.

Information on Economic Trends

Real Sector

GDP calculation results for the fourth quarter of 2006 corroborated the estimates of accelerated economic activity growth, based on available monthly economic indicators. Gross domestic product at constant prices went up 4.8% in the fourth quarter of 2006 relative to the same period a year before. The same GDP growth rate was reported for the entire 2006. As expected, the largest contributions to economic growth in late 2006 came from personal consumption and gross fixed capital formation. The annual growth rates of these two aggregate demand components were 4.1% and 9.2% respectively, during the fourth quarter. Similar growth trends were observed in government consumption, which reached its highest annual growth rate in 2006 (4.4%) in the fourth quarter. Real growth in goods and services exports outpaced the growth in their imports, so that, unlike in the first nine months, net foreign demand made a positive con-

tribution to GDP formation.

As suggested by recent economic indicators, positive trends in the real sector continued early in 2007. Total volume of industrial production, seasonally and calendar adjusted, rose at an average rate of 6.4% in January and February 2007. These trends in industry were mainly driven by strong domestic demand for investment and consumer goods. According to nominal CBS data on merchandise trade, foreign demand stabilised at the level recorded at end-2006. The change in demand for these products also affected the trend in inventories of finished industrial products during February, temporarily arresting their continuous growth observed since mid-2006. This was mostly helped by a decline in consumer goods inventories, accounting for more than a half of total inventories, which can be explained by somewhat slower production growth in non-durable consumer goods over this period.

According to the NCEA, production was brisk in manufacturing at end-2006 and early in 2007. Its annual rates of

change exceeded 8.0% in the first two months of 2007, seasonal factors excluded. The production growth was observed in the entire manufacturing sector, and was mainly fuelled by favourable movements in the manufacture of food products, manufacture of wood, printing and metal manufacturing industry.

As suggested by seasonally adjusted data, the strongest production growth in January and February 2007, was recorded in mining and quarrying (15.8% and 11.7% respectively), which accounts for approximately 7.0% of total industrial production. These developments were in keeping with noticeable strengthening of investment activity (especially in the private sector) early in the year, suggesting a continuation of favourable trends in construction.

A decline in production in energy (electricity, gas and water) supply, observed throughout 2006, continued during the first two months in 2007. The negative trends in energy supply were partly attributable to an unexpectedly mild winter.

January 2007 saw a continuation of favourable trends in construction. According to seasonally adjusted data, the level of construction works increased further in this month, and their total volume rose by almost 13.0% relative to the same period last year. Almost equal annual growth rates were recorded in both construction works on buildings and other construction works. Favourable trends in construction are likely to continue into the next period, as suggested by a pronounced increase in the value of net construction project orders at end-2006, as well as by strong demand for home loans at the end of 2006 and early this year.

According to the available volume indicators, the beginning of 2007 was also marked by strong performance in hotels and restaurants. Tourist arrivals and nights rose by 6.9% and 9.4% respectively in January, relative to the same month in 2006. However, these upward trends were still slightly more moderate early in 2007, compared with end-2006, when they were exceptionally strong. While the observed period is less significant for the annual trend in hotels and

restaurants, the stated results still point to extended tourist seasons, recorded in recent years.

Employment and Wages

After having grown for six consecutive months, registered unemployment declined in February 2007 relative to the previous month. Thus, registered unemployment stood at 298 800 at end-February, down 308 or 0.1% from end-January. The data on registered unemployment, excluding seasonal factors, also point to reduced unemployment. The number of unemployed persons was 14 600 or 4.9% lower at the end of February 2007 compared with end-February last year. The drop in registered unemployment was partly due to a considerable decline in the number of the newly registered with the CES paralleled with a mild decrease in outflows from the register.

According to preliminary data, total employment also fell in February 2007 relative to the previous month. In addition to the preliminary CES data on employment for February, the annual revision was published, with final employment data for January 2007. As a result of the revision, the number of employed persons was adjusted upwards by 40 400 (2.9%), so that total employment stood at 1456.9 thousand in January 2007. In the period from January 2006 to January 2007, employment rose by 50 300 or 3.6%. Owing to such developments, the registered unemployment rate reached 17.0% in February, down 1.3 percentage points from the same month in 2006.

The annual growth in average real gross and net wages paid in February resulted from a rise in nominal wages and a slowdown in consumer prices over this period. The annual growth rate of average real gross wage paid in February stood at 6.0%, up 0.7 percentage points on January. Owing to the tax progression effects, real net wages rose at a lower annual rate than average real gross wages, 5.0% or 1 percentage point above the rate in the previous month.

Prices

The overall CPI rose by 0.3% in February compared with January. The largest contribution to this growth was provided by increased prices of housing and miscellaneous services relating to dwelling (due to increased utility charges and increased prices of heating, liquid and solid fuels and water supply). Monthly consumer price growth in February was also boosted by increased prices of food, mainly fruit. In February this year, there was no seasonal increase in the prices of vegetables which in the past two years made a great contribution to total monthly growth of consumer prices in that month. February also saw, as compared with the month before, a 12.6% increase in the prices of package holidays. The year-on-year rate of consumer price inflation was down from 1.8% in January to 1.2% in February, which can be attributed to the favourable effects of the base period.

The growth of consumer prices was more pronounced in

Source: CBS.

March than in February, when it reached 0.6% compared with the previous month, with the year-on-year growth rate of consumer price inflation accelerating to 1.8%. The largest contribution to monthly price increase in March of 0.4 percentage points was provided by seasonal increase in the prices of clothing and footwear. The increase in the prices of crude oil on the world markets caused a 2.6% increase in the price of refined petroleum products on the domestic market in March compared with the month before with the contribution of this group of products to overall monthly inflation in March standing at 0.1 percentage points. A contribution of 0.1 percentage points to monthly price growth in March was also provided by the price growth of agricultural products, most notably vegetable prices which rose by 4.5% compared with February.

In February and March the prices of goods and services in the basket used in the calculation of core inflation rose on average by 0.2% and 0.5%, respectively, compared with the previous month. The rate of year-on-year core inflation fell from 2.4% in January to 2.3% in February, rising again to 2.5% in March.

Producer prices of industrial products rose by 0.2% in February compared with the month before. The largest monthly price increase of 1.4% in February, is attributable to the industrial grouping which comprises durable consumer goods, with the largest increase taking place in the manufacture of furniture and other manufacturing (1.5%). Influenced by increased prices of energy and intermediate goods, the producer price index of industrial products rose by 0.6% in March, compared with February. Increased energy prices were due to an increase in refined petroleum products producer prices of 4.3%, compared with February. The year-on-year rate of change of producer prices of industrial products fell from 2.2% in January to 1.7% in February, rising again in March to 2.0%.

Exchange Rate

The nominal exchange rate of the kuna against the euro was stable on the domestic market in March. Following its February appreciation, the exchange rate of the kuna against the euro continued to strengthen in the first seven days of March and then started weakening. As a result, March saw a slight depreciation of the exchange rate of the kuna of 0.5% with the value of the euro rising from HRK 7.35/EUR on 28 February to HRK 7.38/EUR on 31 March. The central bank did not hold any foreign exchange auctions in March and the banks met their liquidity needs at regular reverse repo auctions. The CNB engaged in foreign exchange transactions with the government in March, selling a net total of EUR 64.7m worth of foreign currency to the Ministry of Finance. Overall, the exchange rate of the kuna against the euro slightly depreciated in the first quarter of the year (0.5%). In addition to seasonal factors, increased demand for foreign

currency in January, the weakening of the kuna against the euro in the first quarter was also due to stronger demand of the corporate sector for foreign currency in March.

Depreciation of the American dollar against the euro, which started in February, continued into March. The exchange rate of the American dollar against the euro weakened by a total of 0.9% in March. Interest rate spread fall, resulting from an increase in the ECB benchmark interest rate (from 3.5% to 3.75% on 8 March), and unchanged benchmark U.S. interest rate at 5.25% made a favourable contribution to the value of the euro. Developments in the world foreign exchange markets made an impact on the exchange rate of the kuna against the dollar which appreciated in March by a total of 0.4%: from HRK 5.56/USD on 28 February to HRK 5.54/USD on 31 March. Kuna also strengthened against the pound sterling (0.6%), but weakened against the Swiss franc by 0.1% in March. This, together with the previously mentioned developments in the exchange rate of the kuna against the euro and the American dollar, led to a 0.3% depreciation of the index of the daily nominal effective exchange rate of the kuna (31 March compared to 28 February).

As suggested by last available data, developments in the indicators of price competitiveness of exports were disparate (January 2007 compared to December 2006). With depreciation of the average monthly index of the nominal effective exchange rate of the kuna standing at 0.6%, the index of the effective exchange rate of the kuna appreciated in real terms by 0.4% in January, deflated by producer prices, as a result of stronger monthly growth of producer prices in Croatia compared with that abroad. The index of the real effective exchange rate of the kuna deflated by consumer prices depreciated by 0.3% in January, and its depreciation was less pronounced compared with the weakening of the nominal effective exchange rate of the kuna as domestic prices growth in that month was faster than the growth of foreign prices.

Monetary Developments

In the first two months of 2007 total liquid assets (M4) held steady and the growth of bank placements slowed down compared to their average monthly growth in 2006.

There was a particularly pronounced seasonal decline in money (M1) early in the year which continued into February when this monetary aggregate fell by HRK 0.6bn. After falling by HRK 3.1bn in the first two months of the year, M1 stood at HRK 45.4bn at end-February, growing steadily by a high 22.2% annually.

Developments in money in the first two months of this year were mostly influenced by a fall in corporate demand deposits of HRK 2.5bn. By contrast, household transaction account balances held steady during that period. At end-February, total demand deposits were HRK 31.4bn, their annual growth rate falling to 23.9%. The other component of money, currency outside banks, declined in January and held steady in February, reaching HRK 14.0bn at the end of the month. Its annual growth rate in February this year was 18.4%.

As regards non-monetary deposits, the first two months of 2007 were marked by their seasonally unusual increase of HRK 1.7bn or 3.9%. The largest contribution to kuna deposits growth from the beginning of the year to end-February was provided by corporate deposits and deposits of other banking institutions. By contrast, household kuna deposits continued their slight downward trend present from September last year. At end-February, total kuna non-monetary deposits reached HRK 46.6bn, continuing their fast annual growth rate which stood at 56.2%. In terms of structure of kuna non-monetary deposits, this period saw further replacement of kuna deposits with a currency clause by kuna deposits without a currency clause, which started after the central bank amended its decision on the minimum foreign currency liquidity in September last year. Such developments led to a fall in the share of foreign currency indexed kuna deposits in total kuna deposits from 49.7% at end-Sep-

tember 2006 to 31.4% at end-February this year.

Following their increase in January, foreign currency deposits, exchange rate effects excluded, held steady in February. Since the beginning of the year, foreign currency deposits were up by HRK 1.3bn, with the total increase being attributable to the growth of household foreign currency savings.

On an annual level, the growth of foreign currency deposits accelerated from the beginning of the year, partly due to the effects of the base period. At end-February, total foreign currency deposits were HRK 89.6bn, their annual growth rate reaching 7.6%, or 8.4%, if exchange rate effects are excluded.

Seasonal fall in money during the observed period was compensated by the growth of quasi-money, so that total liquid assets (M4) held steady in the first two months of the year. At end-February, M4 was HRK 182.7bn, growing annually by 20.4%.

This year's credit activity of banks is characterised by more moderation than that last year, as a result of central bank decision to restrict the growth of placements. Under February amendments to a central bank decision, banks were provided greater flexibility in terms of planning their dynamics of permissible credit growth, i.e. credit growth not subject to compulsory CNB bills purchase. Bank placements to the non-banking sector at end-February reached HRK 186.5bn, their annual growth rate falling slightly and standing at 22.2% at the end of the month (23.2% if exchange rate effects are excluded).

Both the corporate and the household sectors, as two major sectors, contributed to total bank placements growth in the first two months (HRK 3.1bn). Loans to the corporate sector rose by HRK 1.2bn and stood at HRK 79.5bn at end-February, growing annually by 24.0%. With an increase of HRK 2.5bn, household loans reached HRK 98.1bn, growing annually by 23.2%. In terms of household loans structure, housing loans continued to account for the largest share of the increase, with their share in total household loans rising to 39% at end-February.

Figure 20

Figure 23

Figure 21

Figure 24

^a NIUR = international reserves – foreign liabilities – CNB bills in f/c – reserve requirements in f/c – foreign currency government deposits.

Figure 22

Figure 25

Bank placements to the central government shrank by HRK 0.7bn from the beginning of the year, while government deposits with banks rose by HRK 0.4bn. At end-February, net bank claims on the central government stood at HRK 15.8bn, falling by 17.6% compared with the same month previous year.

The first two months of 2007 saw a worsening in the foreign position of banks. Banks' foreign assets fell by HRK 3.8bn, but remained sufficient to meet the obligation relating to the coverage of foreign currency liabilities by foreign currency claims. Further foreign borrowing of banks caused an increase of HRK 2.1bn in their foreign liabilities. As a result of such developments, the net foreign assets of banks (NFA) deteriorated in the first two months of 2007 by HRK 5.9bn and stood at HRK -42.3bn at the end of February.

Monetary environment in March 2007 was stable and characterised by the absence of any greater pressure on the exchange rate of the domestic currency. In such conditions, the creation of reserve money took place exclusively through regular weekly reverse repo auctions.

Following February amendments to the Decision on the purchase of compulsory CNB bills, which provided for the banks greater flexibility in terms of their placements growth planning during 2007, credit activity of banks accelerated somewhat. The demand for reserve money heightened accordingly, as seen primarily in larger amounts sought at reverse repo auctions. The average amount sought at central bank auctions rose from HRK 1.2bn in the first two months of this year, to HRK 2.5bn in March. The Croatian National Bank accepted all the received bids, while the marginal repo rate remained unchanged at 3.5%.

Following reserve requirement calculation in March, the average required settlement account and bank vault balances in the new reserve requirement maintenance period remained almost unchanged and stood at HRK 9.0bn. Owing to good liquidity of the monetary system, the banks successfully met their reserve requirement maintenance obligation in March, with an average amount of free reserves standing at HRK 0.6bn. As usual, the banks made use of the standing

facility to deposit their surplus liquidity with the CNB typically before the new reserve requirement allocation. As a result, in one day in March alone overnight deposits with the CNB rose to HRK 3.1bn.

Developments in reserve money (M0) in March were influenced by the usual fluctuations in its main components. Following an increase in currency of HRK 0.4bn and in banks' deposits with the CNB of HRK 0.9bn, M0 was up by HRK 1.3bn in March and reached HRK 45.6bn at the end of the month. The annual growth rate of reserve money held steady at a high level and amounted to 20.6%.

Due to the absence of foreign exchange interventions and stagnation in foreign currency and marginal reserve requirements, international reserves of the CNB did not change significantly in March. Their slight fall (EUR 46m) was mainly the result of sale of foreign currency to the government for the settlement of due foreign obligations. At end-March 2007, international reserves of the CNB were EUR 9,520m.

Money Market and Interest Rates

Notwithstanding the rise in interest rates, generated by increased demand for kuna in the domestic market, financial sector liquidity remained solid in February and March 2007. In February, demand for kuna was additionally spurred by the issuance of the new kuna government bond, worth HRK 2.5bn, and by the issuance of one kuna corporate bond. In March, however, pressures on kuna liquidity were partly generated by intensive payments of bank loans to shipyards, and partly by foreign exchange transactions between the central bank and the government, which resulted in the withdrawal of HRK 476.8m net from the market. In this period, the central bank placed somewhat higher amounts at reverse repo auctions, thus contributing to the creation of liquidity needed by the financial system. The decline in the number of T-bill auctions held in February was another factor

contributing to favourable liquidity conditions.

The weighted interest rate on overnight loans intermediated by the ZMM grew from 1.79% in January to 2.19% in February and to 2.68% in March, or to its record high since August 2005. Standing at HRK 142.1m, the average daily turnover in these loans was considerably higher in February than in January, but dropped to HRK 85.2m in March. The weighted interest rate on other loans intermediated by the ZMM grew to 3.79% in February, hitting its record high since November 2005, and fell to 3.60% in March. Their average daily turnover was much smaller in February than in January 2007 and stood at HRK 13.7m, while it grew to HRK 41.1m in March. Concurrently, the average daily turnover in overnight loans generated by direct inter-bank trading rose considerably, reaching HRK 757.0m in February and HRK 729.5m in March. In line with this, the weighted interest rate on these loans trended up from 2.39% in January to 3.01% in February and 3.36% in March.

As the government floated new bond issue, the MoF held

only one auction of T-bills in February and three auctions in March. Increased demand for T-bills by auction participants marked both months, causing a further reduction in yields on these securities. The weighted interest rates on T-bills maturing in 91, 182 and 364 days thus fell from 3.46%, 3.63% and 3.88% respectively in January to 3.07%, 3.30% and 3.50% respectively in March. The stock of total subscribed T-bills went up to HRK 13.2bn at end-March.

Lending and deposit interest rates of banks grew slightly in the first two months of 2007. Bank interest rates on short-term corporate loans, after trending downwards over longer period of time, grew compared with December, while the upward trend in interest rates on long-term corporate loans did not continue. Bank interest rates on short-term and long-term household loans grew mildly in both January and February. Interest rates on foreign currency deposits continued to trend upwards, as well as interest rates on kuna deposits without a currency clause.

The weighted interest rate on short-term kuna corporate

loans without a currency clause went up to 7.03% in February. In contrast, the weighted interest rate on long-term kuna corporate loans with a currency clause dropped to 5.84% in January and rose to 6.11% in February. The weighted interest rate on short-term household loans without a currency clause grew from 11.84% in December 2006 to 11.96% in January and to 12.10% in February 2007. The main factor here was strong growth in the share of overdraft loans, commonly the most expensive loans, in total newly granted short-term household loans without a currency clause. After hitting its record low of 6.22% in December 2006, the weighted interest rate on long-term kuna household loans with a currency clause rose to 6.28% in January and to 6.40% in February 2007.

The weighted interest rates on kuna time deposits without a currency clause, maturing in less than three months, rose to 3.14% in February compared with December, due to a considerable growth in the weighted interest rate on corporate kuna time deposits. After trending downwards in January, the weighted interest rate on foreign currency time deposits with a maturity of up to three months grew to 3.83% in February, which was a slight increase over its December value.

With the weighted interest rate on kuna loans without a currency clause growing faster than the weighted interest rate on kuna deposits without a currency clause, the spread between these two interest rates increased from 7.16 percentage points in December 2006 to 7.52 percentage points in February 2007. The spread between the weighted interest rate on kuna loans with a currency clause and the weighted interest rate on foreign currency deposits fell from 3.36 percentage points in December to 3.16 percentage points in January, but grew again in February, to 3.30 percentage points.

Balance of Payments

According to the preliminary CBS data, total exports of goods amounted to USD 1.7bn (EUR 1.3bn) and imports of goods to USD 3.4bn (EUR 2.6bn) in the first two months of 2007. The foreign trade deficit stood at USD 1.8bn (EUR 1.3bn), rising by 18.7% in dollar terms and 9.4% in euro terms over the same period last year. Faster growth in the dollar value of the deficit is attributed to the weaker dollar-euro exchange rate in the first two months of 2007 than in the same period last year. In consequence of imports growing at higher rate than exports, the imports/exports coverage rate fell from 49.2% in the January-February period of 2006 to 48.7% in the January-February period of 2007.

Measured in US dollars and constant 2002 exchange rate terms, exports and imports grew at considerably lower rates in the first two months of 2007 than in the same period last year, as compared to their rates measured in current exchange rate terms. Accordingly, the growth in exports (measured in constant exchange rate terms) stood at 10.1% in the January-February period of 2007, a slowdown from 19.8% recorded in the same period last year. Broken down by individual SITC divisions, the key contributors to exports growth in the first two months of the year were exports of electrical machinery, apparatus and appliances, and exports of other transport equipment (ships). However, it should be noted that exports growth of other transport equipment was marked by a year-on-year slowdown. In addition, strong

Source: CNB.

growth rates were also observed in exports of power generating machinery and equipment, and plastics in primary forms. In contrast, exports of oil and refined petroleum products, which were the main generators of the overall export growth in previous periods, trended downwards. Specifically, after growing by 81.1% in the first two months of 2006, the value of exports of this energy product went down by 12.4% in the first two months of 2007, largely due to a reduction in its export volume. Moreover, a downward trend was also seen in exports of electricity and medical and pharmaceutical products.

Measured in constant exchange rate terms, total imports of goods grew by 11.1% in the first two months of 2007, or three times less than in the same period last year (31.4%). The major contributor to this was the fall in the value of imported oil and refined petroleum products (-15.3%), which is attributed to the decrease in the volume of imported oil and refined petroleum products and lower oil prices on the world market. Oil and oil and refined petroleum products

excluded, total imports continued to trend downwards, falling from 22.7% to 16.2%. Imports of iron and steel, which grew by one-half, and imports of road vehicles, whose strong growth from 2006 continued into 2007, contributed the most to imports growth (oil and refined petroleum products excluded) in the reference period. Dynamic imports of capital goods marked the first two months of 2007. Moreover, imports of general industrial machinery and equipment, and imports of electrical machinery, apparatus and appliances grew the most within the SITC division of machinery and transport equipment (excluding other transport equipment and road vehicles).

Government Finance

According to the preliminary MoF data, consolidated central government revenues amounted to HRK 100.4bn in 2006, or HRK 0.2bn more than planned in the revised budget. Total revenues grew by 8.4% in 2006 compared with 2005, due mostly to a 9.4% increase in tax revenues. Other key contributors to total revenue growth were VAT (up at an annual rate of 8.3%), social contributions (up 8.2%) and profit tax (up 28%). As the third most important revenue category, excise revenues (a levy for road building and maintenance included) went up by 5.7% year-on-year, with revenues from excises on cars and tobacco products rising the most. However, due to the base period effect (i.e. the absence of dividend payment by T-HT, which amounted to HRK 1bn in 2005), revenues from dividends went down by a significant 85.7% in 2006.

Consolidated central government expenditures amounted to HRK 98.7bn in 2006, or HRK 0.3bn less than planned in the revised budget. In addition, consolidated central government expenditures grew by 6.9% year-on-year, due mostly to a 5.4% increase in social benefits (the largest individual expenditure item in the central government budget). Expenditures on the use of goods and services, which

grew by a sizeable 29.5% year-on-year, and expenditures on compensation of employees also made significant contribution to total expenditure growth.

The consolidated central government deficit (on a cash basis, GFS 1986) totalled HRK 6.4bn in 2006, down HRK 1.4bn or 17.6% over the same period last year. This was almost completely due to budgetary central government revenues growing at a faster pace than expenditures, and to a smaller extent to lower expenditures for the acquisition of non-financial assets. The deficit was mostly financed by domestic borrowings and privatisation revenues, while the amount of new foreign borrowings was significantly lower

than that due for repayment.

According to the CNB data, total central government debt (inclusive of CBRD debt) grew by HRK 1.7bn in the January-December period of 2006, reaching HRK 108.4bn at year-end. Domestic central government debt rose by HRK 4.9bn in 2006, mostly on account of issued bonds. Central government external debt fell by HRK 3.8bn net during the same period, which is, to a large extent, attributed to the repayment of a Samurai bond in February and a eurobond in March, amounting to JPY 25bn and EUR 300m respectively, and repayments made on both the Series A and Series B London Club bonds, with the Series B bonds fully retired as of July 2006.

Issued government guarantees rose by HRK 1.7bn net in 2006, with domestic guarantees rising by HRK 2bn and foreign guarantees dropping by HRK 0.3bn.

Statistical Survey

Classification and Presentation of Data on Claims and Liabilities

Data on financial institutions' claims and liabilities are classified according to institutional sectors and financial instruments. Institutional sectors are: financial institutions, central government and funds, other domestic sectors and foreign sector.

The financial institutions sector includes the following sub-sectors: monetary authorities (the central bank), banks, other banking institutions and non-banking financial institutions. The central bank is the Croatian National Bank (CNB). Banks are institutions to which the Croatian National Bank has issued a license to perform banking business services in accordance with the Banking Act, including savings banks during a transition period. Data on banks do not include claims and liabilities of banks undergoing bankruptcy proceedings, nor former branches of banks headquartered outside the Republic of Croatia. Other banking institutions comprise housing savings banks, savings and loan cooperatives and investment funds. Non-banking financial institutions are financial institutions not classified as banks or other banking institutions (for example insurance companies, pension funds).

The central government and funds consists of two sub-sectors, the Republic of Croatia and central government funds. Until December 2003, the sub-sector the Republic of Croatia included government authorities, including the Croatian Roads and the Croatian High-

ways, the State Agency for Deposit Insurance and Bank Rehabilitation and the sub-sector central government funds included the Croatian Institute for Health Insurance, the Croatian Pension Insurance Institute, the Croatian Employment Service, the Croatian Privatisation Fund, the Croatian Waters and the Croatian Bank for Reconstruction and Development.

Since January 2004, the Croatian Roads, the Croatian Highways, and the State Agency for Deposit Insurance and Bank Rehabilitation have been reclassified, from the sub-sector the Republic of Croatia to the sub-sector central government funds.

Other domestic sectors include local government authorities, public and other enterprises and households, including craftsmen and non-profit institutions providing services to households. The sub-sector other enterprises also comprises banks undergoing bankruptcy proceedings. In some tables other domestic sectors are divided into the following sub-sectors: local government (which comprises units of local and regional self-government), public and other enterprises, and households (including craftsmen and non-profit institutions).

Foreign sector includes foreign legal and natural persons.

All data on claims and liabilities refer to balances at the end of the reporting period. Foreign exchange items are reported in their kuna equivalent at the CNB's midpoint exchange rate at the end of the reporting period.

^a Domestic credit decreased by a one-off HRK 2,759.4m.**Table A1: Monetary and Credit Aggregates**

The table shows data on some basic monetary and credit aggregates, including their monthly growth rates. In September 1999, all the monetary aggregates were revised. In previous publications of the CNB, data on claims and obligations of savings banks were not included in the compilation of the monetary aggregates.

Reserve money is taken over in its entirety from the Monetary Authorities Accounts (Table C1).

Money (M1) is defined in the same way as the corresponding item in the Monetary Survey (Table B1). It comprises currency outside banks, deposits with the CNB by other banking institutions and other domestic sectors as well as banks' demand deposits. Money (M1a) comprises currency outside banks and banks' demand deposits, increased by the demand deposits of the central government and funds with banks.

Broadest money (M4) comprises Money (M1), savings and time deposits, foreign currency deposits as well as bonds and money market instruments (all components are taken over from the Monetary Survey, Table B1).

Net domestic assets are defined as a difference between total liquid assets and foreign assets (net).

Domestic credit comprises banks' claims on other domestic sectors, other banking institutions and non-banking financial institutions.

In May 1999, bankruptcy proceedings have been initiated against several banks so their assets and liabilities are excluded from monetary statistics. In April 1999, those banks' share in monetary aggregate M1 amounted to 259.5 million kuna and in monetary aggregate M4 amounted to 4,035.8 million kuna. Data for June 1999 are comparable with data for July 1999 if Domestic credit is increased by 3,513.5 million kuna.

^a The first revaluation of securities with the effect of HRK 165.5m was conducted within the CNB's international reserves as at 31 December 2001. Accrued interest on deposits, with the effect of HRK 63.8m, was included in the international reserves as at 31 December 2001 as well. The CNB's foreign liabilities increased by HRK 6.4m on the basis of accrued interest, while liabilities on the basis of required foreign exchange reserves increased by HRK 8.6m.

Table B1: Monetary Survey

The monetary survey shows consolidated data from the Monetary Authorities Accounts (Table C1) and Banks' Accounts (Table D1).

Foreign assets (net) are the difference between total foreign assets and total foreign liabilities of the CNB and banks.

Domestic credit is the sum of corresponding items from Monetary Authorities Accounts and Banks' Accounts. Claims on central government and funds are reported on a net basis, i.e. decreased by central government and funds' deposits with the CNB and banks.

Money is the sum of currency outside banks, deposits by other

banking institutions with the CNB, deposits by other domestic sectors with the CNB and banks' demand deposits (item Demand deposits in Banks' Accounts, Table D1).

Items Savings and time deposits, Foreign currency deposits as well as Bonds and money market instruments are entirely taken over from the Banks' Accounts, while item Restricted and blocked deposits represents the sum of corresponding items from the Monetary Authorities Accounts (excluding banks' blocked deposits with the CNB) and Banks' Accounts. Other items (net) are unclassified liabilities decreased by unclassified assets.

Table B2: Number of Reporting Banks and Savings Banks and their Classification by Total Assets

The table shows the total number of banks and savings banks during the transition period which report monthly to the CNB. Their operations are shown in the Banks' Accounts. Monetary statistics includes reporting institutions under liquidation and, until February 2005, institutions whose operating licences have been revoked, but which have not initiated liquidation proceedings.

Special reporting requirements applied to savings banks until June 1995. Savings banks were not legally obliged to report on their operations, so that data up to June 1995 relate only to those savings banks that reported voluntarily to the CNB. From July 1995 on, the data cover all registered savings banks. Savings banks that were granted a bank operating license are required to adjust their operations to the provisions of the Banking Act by 31 December 2006.

The table also shows the classification of reporting banks and savings banks according to their total assets.

^a From October 2001 to May 2003 Liabilities to foreign banks include also liabilities based on CNB bills subscribed by non-residents.

^b In December 2002, CDA accounts with the CNB for the gross and net settlement of purchased securities have been reclassified from the sector central government to the sector other financial organisations.

Table C1: Monetary Authorities Accounts

The table reports data on claims and liabilities by monetary authorities.

Foreign assets include the following forms of foreign currency and kuna claims on foreign legal and natural persons: monetary gold, holdings of special drawing rights, foreign cash in vault, reserve position in the International Monetary Fund, current account balances with foreign banks, time deposits with foreign banks and accrued interest, foreign currency security investments and other claims.

Claims on central government and funds are loans and overdue claims on the budget of the Republic of Croatia. In accordance with the Croatian National Bank Act that entered into force in April 2001, the Croatian National Bank may not extend credit to the Republic of Croatia. Hence, this item comprises only overdue claims on the budget of the Republic of Croatia based on the payment system operations and the liabilities to the IMF and foreign banks. Until April 2001, Claims in kuna were short-term loans granted for the purpose of overcoming timing differences between incoming revenues and execution of budgetary expenditures, long-term loans granted by special decrees by the government of the Republic of Croatia, and overdue claims on the budgetary central government, while Claims in foreign currency was a counter-entry to the liability to the IMF based on the succession of membership in that institution.

Claims on other domestic sectors are loans and overdue claims on other domestic sectors, including banks in bankruptcy proceedings.

Claims on banks are credits to banks and overdue claims on banks. Credits to banks comprise Lombard credits, short-term liquidity credits, other credits and reverse repo transactions. Item Lombard credits comprises credits to banks for regular maintaining of the day-to-day liquidity, which were replaced by lombard credits in December 1994. Short-term liquidity credits, which have been granted since the beginning of 1999, also serve to bridge liquidity problems. Other credits include intervention credits, special credits for bridging liquidity problems granted in the past (initial credits, prerehabilitation credits), due but unpaid credits and banks' deposits with the CNB. From April 2005 on, reverse repo transactions are conducted on a weekly basis. Overdue claims on banks comprise settlement account overdrafts (until mid-1994) and banks' failure to correctly and promptly allocate and maintain statutory reserve requirements.

Since May 1999, Claims on other domestic sectors include overdue claims on banks against which bankruptcy proceedings have been initiated. Due to the reclassification of savings banks from the

sub-sector other banking institutions to the sub-sector banks, data for Claims on banks and Claims on other banking institutions have been revised.

Reserve money consists of currency outside banks, cash in banks' vaults, banks' deposits with the CNB, other banking institutions' deposits and other domestic sectors' deposits with the CNB. Banks' deposits are: settlement account balances, statutory reserves deposited on a special account with the CNB (including, from March 2006, special reserve requirement on liabilities arising from issued securities), CNB bills on an obligatory basis and overnight deposits. Deposits by other banking institutions included, until September 2003, settlement account balances of housing savings banks. Deposits by other domestic sectors are other domestic sectors' giro account balances which, on the basis of legal acts are deposited with the Croatian National Bank.

Restricted and blocked deposits include required foreign exchange reserves and accrued interest, restricted deposits and blocked foreign exchange deposits. Banks are required to set aside the reserve requirements against certain foreign exchange sources of funds and the marginal reserve requirements (from August 2004 on) in special accounts at the Croatian National Bank. Restricted deposits are kuna funds set aside on the basis of a court order or legal regulation, kuna funds set aside in the period between May 1999 and April 2002 and deposits of banks against which bankruptcy proceedings have been initiated. Blocked foreign exchange deposits are funds that were set aside in special accounts at the Croatian National Bank for repaying unpaid amounts due to foreign creditors.

Foreign liabilities include use of IMF credits, liabilities to international financial institutions and foreign banks and accrued interest.

Central government and funds deposits are demand deposits and foreign currency deposits of the Republic of Croatia and central government funds with the CNB, and CNB bills purchased by central government institutions.

CNB bills are kuna and f/c CNB bills on a voluntary basis, excluding CNB bills voluntarily purchased by central government institutions.

Capital accounts include reserves, provisions and the income and cost accounts.

Other items (net) are unclassified liabilities decreased by unclassified assets of the Monetary Authorities Accounts.

Due to the reclassification of savings banks from the sub-sector other banking institutions to the sub-sector banks, data for Currency outside banks, Banks' cash in vaults, Banks' deposits and Deposits of other banking institutions were revised.

Table D1: Banks' Accounts

Banks' Accounts include data on banks' claims and liabilities. Banks' mutual claims and liabilities are consolidated.

Required reserves held at the central bank include kuna and foreign exchange reserves. Kuna reserves include vault cash and kuna funds held in accounts at the central bank. Foreign exchange reserves include foreign exchange held in CNB's foreign exchange accounts.

Foreign assets are the following forms of kuna and foreign currency claims on foreign legal and natural persons: foreign cash in vaults, deposits with foreign banks (including loro letters of credit and other collateral), securities, loans, and equities.

Claims on central government and funds are the following forms of claims in kuna and foreign currency: securities and loans.

Claims on other domestic sectors include the following claims in kuna and foreign currency: money market instruments, bonds, loans (including acceptances), and equities.

The same forms of kuna and foreign currency claims are included in claims on other banking institutions and non-banking financial institutions, with one difference: Claims on other banking institutions also include deposits with those institutions.

Items Demand deposits, Savings and time deposits, Foreign currency deposits as well as Bonds and money market instruments comprise banks' liabilities to other domestic sectors, other banking institutions and non-banking financial institutions.

Demand deposits include giro and current accounts balances and banks' obligations arising from kuna payment instruments issued, minus currency in the payment system, i.e. checks in banks' vaults and checks in collection.

Savings and time deposits are kuna sight deposits as well as kuna

time and notice deposits.

Foreign currency deposits are foreign currency sight deposits as well as foreign currency time and notice deposits.

Bonds and money market instruments are banks' liabilities for securities issued (net) and loans obtained. Issued subordinated and hybrid instruments, purchased by foreign investors, are excluded from this item.

Foreign liabilities comprise the following forms of kuna and foreign currency liabilities to foreign legal and natural persons: giro and current accounts, savings deposits (including loro letters of credit and other forms of collateral), time deposits, loans received and liabilities due. Issued subordinate and hybrid instruments, purchased by foreign investors, are also included in loans received. Central government and funds' deposits are all forms of banks' kuna and foreign currency liabilities (except restricted and blocked deposits) to the central government and funds.

Credit from central bank comprises loans obtained from the CNB and deposits by the CNB with banks. Repurchase of securities is also considered and treated as a loan.

Restricted and blocked deposits comprise the following banks' liabilities: kuna and foreign currency restricted deposits by other domestic sectors, other banking institutions, non-banking financial institutions, central government and funds as well as foreign legal and natural persons; and households' blocked foreign currency deposits, regulated by the Act on Converting Households' Foreign Exchange Deposits into the Public Debt of the Republic of Croatia.

Capital accounts are share capital, profit or loss for the previous and current year, retained earnings (loss), legal reserves, reserves provided for by the articles of association and other capital reserves, hedging reserves, unrealised gains (losses) from financial assets clas-

sified as available-for-sale assets, value adjustments and specific reserves for unidentified losses.

Other items (net) are unclassified liabilities decreased by unclassified assets, including the fair value of derivative financial instruments.

Tables: D2 – D12

This group of tables (with the exception of Table D5) represents an elaborate presentation of appropriate items of claims and liabilities of Banks' Accounts (Table D1).

Table D2: Banks' Foreign Assets

This table shows banks' claims on foreign legal and natural persons.

Foreign assets of banks' comprise foreign assets in kuna and foreign currency.

Claims on foreign banks and Claims on foreign non-banks (total and by financial instruments) are shown separately within both foreign assets in kuna and in foreign currency.

Table D4: Banks' Claims on Other Domestic Sectors

The table shows banks' kuna and foreign currency claims on other domestic sectors, classified according to financial instruments: money market instruments (including factoring and forfaiting since

January 2004), loans and advances (including acceptances and purchased claims), and equities.

Until October 1994, foreign currency loans could be granted only when banks simultaneously borrowed abroad in their own name and for the account of the end-user.

Table D6: Demand Deposits with Banks

The table shows demand deposits with banks, classified by domestic institutional sectors.

Demand deposits are the sum of other domestic sectors', other

banking institutions' and non-banking financial institutions' giro and current accounts balances, minus currency in the payment system (i.e. amount of checks in banks' vaults and checks in collection). Banks' obligations arising from kuna payment instruments issued are included in the household sector.

Table D9: Bonds and Money Market Instruments

The table shows banks' liabilities for securities issued (net) and loans received from other domestic sectors, other banking institutions and non-banking financial institutions.

Money market instruments (net) comprise banks' net liabilities for CNB bills, bills of exchange (issued and accepted) and other secu-

rities issued.

Bonds (net) comprise banks' net liabilities for kuna and foreign currency bonds issued, as well as issued subordinated and hybrid instruments, excluding those purchased by foreign investors.

Other domestic borrowing comprises loans received, reported total and classified by institutional sectors.

Table D10: Banks' Foreign Liabilities

The table shows banks' total foreign currency and kuna liabilities to foreign legal and natural persons, with the exception of restricted kuna and foreign currency deposits by foreign legal and natural persons.

Banks' foreign liabilities comprise foreign currency liabilities and

foreign kuna liabilities.

Within foreign kuna and foreign currency liabilities, liabilities to foreign banks are reported separately from liabilities to foreign non-banks (total and by financial instruments). Loans and advances also include issued subordinated and hybrid instruments purchased by foreign investors.

Table D11: Central Government and Funds' Deposits with Banks

The table reports total banks' kuna and foreign currency liabilities to the central government and funds, with the exception of restricted (kuna and foreign currency) deposits by the central government and funds with banks.

Kuna and foreign currency deposits by the Republic of Croatia and central government funds are shown separately. Kuna deposits comprise demand deposits, savings deposits, time and notice deposits, and loans obtained from the central government and funds. Foreign currency deposits comprise savings deposits, time and notice deposits, and refinanced loans.

Table D12: Restricted and Blocked Deposits with Banks

The table shows households' restricted deposits (kuna and foreign currency) and blocked deposits.

Restricted and blocked deposits include two categories of deposits: restricted (kuna and foreign currency) deposits and blocked for-

foreign currency deposits.

Blocked foreign currency deposits include households' foreign currency deposits regulated by the Act on Converting Households' Foreign Exchange Deposits into the Public Debt of the Republic of Croatia.

Table E1: Housing Savings Banks' Accounts

Housing savings banks' accounts include data on claims and liabilities of the Croatian housing savings banks. All housing savings banks' claims and liabilities refer exclusively to domestic sectors.

Housing savings banks' required reserves held at the central bank include funds in vaults. Until September 2003, they also included kuna funds held in accounts at the central bank.

Claims on central government and funds are claims in kuna on the Republic of Croatia and central government funds.

Claims on other domestic sectors include kuna loans to local government and households.

Claims on banks include loans extended to banks, as well as deposits with banks, including, since October 2003, accounts for regu-

lar operations with banks.

Claims on other banking institutions include investments in investment funds.

Item Time deposits includes local government and households' time deposits.

Bonds and money market instruments are housing savings banks' liabilities for securities issued (net) and loans obtained.

Capital accounts are share capital, profit or loss for the previous and current year, retained earnings (loss), legal reserves, reserves provided for by the articles of association and other capital reserves, hedging reserves, unrealised gains (losses) from financial assets classified as available-for-sale assets, value adjustments and specific reserves for unidentified losses. Other items (net) are unclassified liabilities decreased by unclassified assets.

^a Weighted averages of weighted repo rates achieved at regular reverse repo auctions of the CNB in the reporting month.

^b Breaks in the series of data are explained in notes on methodology.

^c Since 14 December 2005.

Table F1: Credit Rates of the Croatian National Bank

The table shows interest rates used by the CNB to calculate and charge interest on credits from the primary issue and on all other claims.

Credit rates of the CNB are set by decisions of the Council of the Croatian National Bank, on annual basis. Exceptionally, from June 1995 interest rate charged by the CNB on Lombard credits was 1.5 percentage point higher than the weighted average interest rate on CNB bills on a voluntary basis (which serve as collateral for Lombard credits) in cases when the weighted average interest rate was higher than 16.5%. Congruently, from June 1995 to August 1996 the table reports the weighted average interest rate on Lombard credits.

Data shown in column 4 refer to weighted interest rates of weighted repo rates achieved at regular reverse repo auctions of the CNB in the reporting month.

Time series presented in the table contain certain breaks, due to changes in the CNB's monetary policy instruments.

Data shown in column 7 refer, until September 1994, to interest rates on special credits for savings deposits' payments and for pay-

ments from households' current accounts, and from October 1994 until September 1997 to interest rates on daily credits for savings deposits and households' current accounts in kuna. Daily credits, as opposed to special credits, are paid back on the same day. In October 1997, this instrument was replaced by daily credits for overcoming short-term liquidity problems that are collateralized by CNB bills. Since December 1998 until April 1999, this credit is incorporated in Lombard credit, applying different interest rate for its usage within one day.

Data shown in column 8 refer, until December 1994, to interest rate on initial credits, and since 18 March 1998, to credits for overcoming liquidity problems of banks under evaluation for entry into rehabilitation and restructuring procedures and since February 1999, to interest rates on short-term liquidity credits. Since December 1999, data show interest rates on short-term liquidity credit with a maturity over 3 months which is 1 percentage point higher than interest rate on Lombard credits. Interest rate on short-term liquidity credit up to 3 months is 0.5 percentage point higher than interest rate on Lombard credits.

^a Breaks in the series of data are explained in notes on methodology.

Table F2: Deposit Rates of the Croatian National Bank

The table shows interest rates used by the CNB to calculate and pay interest on funds deposited with the CNB and on issued securities.

Interest rates paid by the CNB for appropriated statutory reserve funds are set by a decision of the Council of the CNB. Until April 2005, the appropriated statutory reserve funds included the calculated statutory reserve funds that were deposit in a special statutory reserve account with the CNB, or maintained (in average) in bank's settlement accounts, or deposited in a special account with the CNB for the settlement of net positions in the NCS. From April 2005, they include the calculated statutory reserve funds allocated to a special statutory reserve account with the CNB (column 3).

Interest rates on CNB bills on an obligatory basis are set by a decision of the Council of the CNB. Interest rates on CNB bills on a voluntary basis are set at CNB bills' auction sales. Congruently, columns 5, 6 and 7 report weighted average interest rates attained at auctions of CNB bills.

From November 1994 through January 2001, columns 7 and 8 report interest rates on CNB bills on a voluntary basis due in 91 and 182 days respectively.

Since April 1998 columns 9 through 13 report weighted average interest rates on CNB bills on a voluntary basis in EUR and USD (until December 1998 in DEM and USD) attained at CNB bills' auctions as a weighted average of subscribed amounts in those two currencies.

Column 14 reports the interest rate on overnight deposits with the CNB.

Table F3: Banks' Reserve Requirements

This table shows data on monthly averages of day-to-day balances of banks' kuna and foreign currency reserve requirements with the CNB. Savings banks are included beginning in July 1999.

Column 3 shows the weighted average reserve requirement ratio as a percentage of the kuna and foreign currency reserve requirement in the reserve base.

Reserve requirement (column 4) represents the prescribed amount of funds banks are required to deposit in a special statutory reserve account with the CNB, or to maintain (in average) in their settlement accounts and in vaults, or in accounts of liquid foreign exchange claims (which include foreign currency cash and checks in foreign exchange, liquid foreign exchange claims maintained in the accounts with the high-grade foreign banks and foreign currency CNB bills).

Column 5 shows the amount of kuna reserve requirements. Between January 1995 and December 2000, this amount corresponded with the statutory reserve requirement instrument, while until December 1994 it comprised two instruments: statutory reserves and liquid assets requirement – LAR (except for the part in which banks were conforming to this requirement by registering CNB bills on a voluntary basis). In December 2000, reserve requirements in kuna and in foreign currency were unified, i.e. reserve requirements rate, periods for calculating, allocating and maintaining reserve requirements were unified, as well as a minimum percentage of the total reserve requirements deposited with the Croatian National Bank. Starting from September 2001, column 5 includes also the f/c component of reserve requirements that is set aside/maintained in kuna.

Column 6 shows the amount of foreign currency reserve requirements, i.e. the prescribed amount of funds banks are required to de-

posit in the CNB's foreign exchange accounts, or to maintain (in average) in accounts of liquid claims. Until November 2000, the calculation base consisted of average daily balances of household foreign exchange savings deposits with a remaining maturity of up to 3 months, while starting from December 2000 the base consists of foreign exchange sources of funds, including: ordinary foreign exchange accounts, special foreign exchange accounts, sight foreign exchange accounts and savings deposits, received foreign exchange deposits and received foreign exchange loans, as well as obligations arising from securities issued in foreign exchange (excluding the bank's equity securities). Starting from November 2001, the base includes also hybrid and subordinated instruments.

Column 7 shows the total amount of other obligatory deposits with the CNB, including CNB bills on an obligatory basis, those CNB bills on a voluntary basis used by banks to maintain the prescribed minimal liquidity (LAR), special statutory reserves until July 1995, special reserve requirement on liabilities arising from issued securities from March 2006, statutory reserves on f/c deposits, f/c credits from foreign banks and guarantees for such credits and marginal reserve requirement (from August 2004).

Column 8 shows the portion of the kuna reserve requirement which banks deposit in a statutory reserve account with the CNB (until December 1994 this amount corresponded with the statutory reserve instrument, while since January 1995 a minimum percentage of the total reserve requirement banks are required to deposit in a special statutory reserve account with the CNB has been prescribed). In April 2005, this percentage was set at 70%.

Column 9 shows the portion of the foreign currency reserve requirement which banks deposit in the CNB's foreign exchange accounts. The percentage for allocating the foreign currency component of reserve requirements calculated on the basis of foreign ex-

change funds of non-residents and foreign exchange funds received from legal persons in a special relationship with a bank amounts to 100%, while the percentage for allocating the remaining portion of the foreign currency component of reserve requirements amounts to 60%.

Column 10 shows the weighted average remuneration rate on all forms of immobilized kuna funds which include reserve requirements and other obligatory deposits with the CNB.

Column 11 shows the weighted average remuneration rate on allocated funds in foreign currency, including the marginal reserve requirement funds (from August 2004 on). From June 2005 the CNB pays remuneration equalling 50% of the US Federal Funds Target Rate for the funds allocated in US dollars and 50% of the ECB Minimum Bid Refinance Rate for the funds allocated in euros. In both cases the rate in effect on the day of allocation is applied.

Table F4: Banks' Liquidity Indicators

The table reports monthly averages of day-to-day balances of some indicators of banks' liquidity. Savings banks are included beginning in July 1999.

Column 3 shows free reserves in kuna, defined as bank's total reserves (in settlement accounts and in vaults) decreased by the minimal average settlement account and vault balance, as prescribed by instruments of the CNB.

Column 4 shows free reserves in foreign currency, defined as funds for the maintenance of foreign currency reserve requirements (foreign currency cash and checks in foreign exchange, liquid foreign exchange claims maintained in the accounts with the high-grade foreign banks and foreign currency CNB bills) decreased by the minimal required balance of these funds in the same period.

Column 5 shows the primary liquidity ratio as a percentage of monthly day-to-day kuna free reserves averages (column 3) in monthly day-to-day averages of deposits which constitute the reserve base.

Column 6 shows the monthly average of day-to-day balances of secondary liquidity sources used. Secondary liquidity sources comprise: Lombard credits (since December 1994), short-term liquidity credits (since February 1999), and overdue liabilities to the CNB.

Column 7 reports the monthly average of day-to-day balances of kuna CNB bills on a voluntary basis (until December 1994, this amount is decreased by the portion of voluntarily registered CNB bills used by banks to maintain the prescribed minimal liquidity).

Column 8 reports the monthly average of day-to-day balances of foreign currency CNB bills on a voluntary basis (EUR and USD).

Column 9 reports the monthly average of day-to-day balances of kuna MoF treasury bills. Until September 2002, it shows the discounted value of treasury bills, while starting from October 2002, it shows their nominal value.

	February	2.19	3.79	9.59	9.83	7.03	12.10	13.18	4.71	8.40	6.79	9.39	
Relative significance ^a		–	–	80.08	66.63	29.93	36.70	32.04	4.66	13.45	5.13	8.32	

^a Relative significance is calculated as a percentage of corresponding credit category in total credits disbursed in the reporting month (according to data for the last period included in the table).

Note: A break in the time series occurred due to changes in the methodology used in interest rate statistics as of 1 January 2001. This especially refers to interest rates shown in columns 5, 6 and 7. Interbank credits, which bear relatively low interest rates, were, among others, excluded from short-term credits to enterprises. The increase in interest rates was also caused by the weighting method: all categories are weighted by the amounts of newly-granted credits, except credit lines whose relative share grew in the new coverage, which are weighted by book balances.

Table G1: Banks' Interest Rates on Kuna Credits Not Indexed to Foreign Currency

The table contains weighted averages of banks' and savings banks' monthly interest rates on kuna credits not indexed to f/c, reported on a yearly basis.

Up to December 2001, data refer to weighted averages of banks' monthly interest rates on kuna credits not indexed to f/c granted to legal persons (which included enterprises, the public sector, financial institutions, non-profit institutions and non-residents) and households, reported on a yearly basis. Savings banks are not covered.

Starting from January 2002, data refer to weighted averages of banks' and savings banks' monthly interest rates on kuna credits not indexed to f/c granted only to enterprises (public and other) and households, reported on a yearly basis.

Up to February 1996, columns 3 and 4 showed interest rates on the interbank money market, according to information published by the Zagreb Money Market (ZMM). Starting from March 1996, interest rates on the money market are calculated as weighted monthly averages of weighted daily interest rates and shown separately for trad-

ing in overnight credits and trading in other credits on the ZMM. In the period between May 1998 and January 2001, the repayment of credits granted on the interbank overnight market was guaranteed by banks' required reserves with the CNB. Columns 5 through 13 show weighted averages of banks' and savings banks' monthly interest rates classified by maturity and sectors. Interest rates on short-term credits to enterprises also include interest rates on callable loans.

Data on banks' and savings banks' interest rates on kuna credits not indexed to f/c are based on banks' and savings banks' periodic reports. The basis for calculation of weighted averages are amounts of credits bearing corresponding interest rates, which were disbursed during the reporting month, with the exception of interest rates on giro and current account credit lines, for which weighted averages were calculated based on the balance of these loans at the end of the reporting month.

Relative significance of particular interest rates (reported in the last line of the table) refers to data for the last period included in the table. It is calculated as a percentage of the corresponding credit category (to which exchange rates apply) in total credits included in the calculation of weighted averages for that period.

Table G2: Banks' Interest Rates on Kuna Credits Indexed to Foreign Currency and on Credits in Euros

weighted averages of monthly interest rates, in % on annual basis

^a Relative significance is calculated as a percentage of corresponding credit category in total credits disbursed in the reporting month (according to data for the last period included in the table).

Table G2: Banks' Interest Rates on Kuna Credits Indexed to Foreign Currency and on Credits in Euros

The table contains weighted averages of banks' and savings banks' monthly interest rates on kuna credits indexed to f/c and on credits in euros, reported on a yearly basis.

Up to December 2001, data refer to weighted averages of banks' monthly interest rates on kuna credits indexed to f/c and on credits in euros (or German marks) granted to legal persons (which included enterprises, the public sector, financial institutions, non-profit institutions and non-residents) and households, reported on a yearly basis. Savings banks are not covered.

Starting from January 2002, data refer to weighted averages of banks' and savings banks' monthly interest rates on kuna credits indexed to f/c and on credits in euros granted only to enterprises (public and other) and households, reported on a yearly basis.

Data on banks' and savings banks' interest rates on kuna credits indexed to f/c and on credits in euros are based on banks' and savings

banks' periodic reports. The basis for calculation of weighted averages are amounts of credits bearing corresponding interest rates, which were disbursed during the reporting month.

Columns 3 through 11 show weighted averages of banks' and savings banks' monthly interest rates classified by maturity and sectors. Interest rates on short-term credits to enterprises also include interest rates on callable loans.

Up to December 2001, interest rates on credits in euros (columns 12, 13 and 14) refer to credits released in German marks in the reporting month, and starting from January 2002, they refer to credits released in euros, while weighted averages are calculated based on their kuna equivalent using current exchange rate. Credits released in other currencies are not included in this table.

Relative significance of particular interest rates (reported in the last line of the table) refers to data for the last period included in the table. It is calculated as a percentage of the corresponding credit category (to which exchange rates apply) in total credits included in the calculation of weighted averages for that period.

Table G3: Banks' Interest Rates on Kuna Deposits Not Indexed to Foreign Currency

weighted averages of monthly interest rates, in % on annual basis

^a Relative significance is calculated as a percentage of corresponding deposit category in total deposits received in the reporting month (according to data for the last period included in the table).

Table G3: Banks' Interest Rates on Kuna Deposits Not Indexed to Foreign Currency

The table contains weighted averages of banks' and savings banks' monthly interest rates on kuna deposits not indexed to f/c, reported on a yearly basis.

Up to December 2001, data refer to weighted averages of banks' monthly interest rates on kuna deposits not indexed to f/c received from legal persons (which included enterprises, the public sector, financial institutions, non-profit institutions and non-residents) and households, reported on a yearly basis. Savings banks are not covered.

Starting from January 2002, data refer to weighted averages of banks' and savings banks' monthly interest rates on kuna deposits not indexed to f/c received from enterprises (public and other) and households, reported on a yearly basis.

Data on banks' and savings banks' interest rates on kuna deposits not indexed to f/c are based on banks' and savings banks' periodic reports.

Column 3 reports weighted averages of monthly interest rates on total kuna deposits (giro and current accounts, household savings deposits and time deposits) not indexed to f/c. Column 4 shows

weighted averages of monthly interest rates on deposits in giro and current accounts not indexed to f/c received from enterprises (until December 2001, all legal persons) and households, and column 5 shows weighted averages of monthly interest rates on total time deposits not indexed to f/c.

The basis for calculation of weighted averages for kuna time deposits not indexed to f/c are the amounts of those deposits received during the reporting month. The basis for calculation of weighted averages for deposits in giro and current accounts are the end-of-month book balances of those deposits. Weighted averages of interest rates on total kuna deposits not indexed to f/c (column 3) are weighted by the end-of-month balances of all categories included in the calculation.

Kuna and foreign currency deposits used as collateral for credit are included, while restricted deposits (deposits used for payment of imports and other restricted deposits) are not included into the calculation of weighted averages.

Relative significance of particular interest rates (reported in the last line of the table) refers to data for the last period included in the table. It is calculated as a percentage of the corresponding deposit category (to which exchange rates apply) in total deposits included in the calculation of weighted averages for that period.

	December	3.67	3.30	4.07	2.94	0.25	0.23	0.17	0.32	0.44	
2007	January	3.85	3.98	4.22	2.99	0.25	0.23	0.16	0.37	0.40	
	February	3.96 ^b	3.56	4.31	3.01	0.25	0.23	0.17	0.34	0.46	
Relative significance ^a		1.54	1.37	0.15	45.52	27.15	18.93	2.69	4.98	0.55	

^a Relative significance is calculated as a percentage of corresponding deposit category in total deposits received in the reporting month (according to data for the last period included in the table).

^b Of the total amount of deposits to which this interest rate refers, 21.21 percent refers to enterprises.

Table G4a and b: Banks' Interest Rates on Kuna Deposits Indexed to Foreign Currency and on Foreign Currency Deposits

The table contains weighted averages of banks' and savings banks' monthly interest rates on kuna deposits indexed to f/c and on foreign currency deposits, reported on a yearly basis.

Up to December 2001, data refer to weighted averages of banks' monthly interest rates on kuna deposits indexed to f/c and on foreign currency deposits received from legal persons (which included enterprises, the public sector, financial institutions, non-profit institutions and non-residents) and households, reported on a yearly basis. Savings banks are not covered.

Starting from January 2002, data refer to weighted averages of banks' and savings banks' monthly interest rates on kuna deposits indexed to f/c and on foreign currency deposits received from enterprises (public and other) and households, reported on a yearly basis.

Data on banks' and savings banks' interest rates on kuna deposits indexed to f/c and on foreign currency deposits are based on banks' and savings banks' periodic reports.

Column 3 reports weighted averages of monthly interest rates on total kuna savings and time deposits indexed to f/c received from enterprises (until December 2001, all legal persons) and households, whereas weighted averages of monthly interest rates on time deposits are shown in columns 4 (short-term deposits) and 5 (long-term deposits) respectively.

Up to December 2001, interest rates on foreign currency deposits refer to deposits received in German marks or US dollars, and start-

ing from January 2002, they refer to deposits received in euros and US dollars, while weighted averages are calculated based on their kuna equivalent using current exchange rate. Deposits received in other currencies are not included in this table.

The basis for calculation of weighted averages for kuna time deposits indexed to f/c and foreign currency time deposits are the amounts of those deposits received during the reporting month. The basis for calculation of weighted averages for savings deposits indexed to f/c are the end-of-month book balances of those deposits. Starting from January 2002, weighted averages of interest rates on total kuna deposits indexed to f/c (column 3) are weighted by the end-of-month balances of all categories included in the calculation.

The average interest rate on total foreign currency deposits (column 6) refers to the weighted average of monthly interest rates on savings and time deposits, which are weighted by the end-of-month balances of all categories included in the calculation.

The basis for calculation of weighted averages of monthly interest rates on total foreign currency savings deposits (column 7) are the end-of-month balances of those deposits.

The basis for calculation of weighted averages of monthly interest rates on total foreign currency time deposits (column 12) are the amounts of those deposits received during the reporting month. The same basis is applied in calculating weighted averages of monthly interest rates on total short-term foreign currency deposits (column 13) and on total long-term foreign currency deposits (column 18).

Relative significance of particular interest rates (reported in the

^a Preliminary data.

Note: In the period from January 1994 to September 2001 all foreign exchange sale and purchase transactions in banks' reports delivered to the CNB were recorded based on realised sale/purchase transaction regardless of the contracted term for realisation and were as such transferred into the Table on Banks' Trade with Foreign Exchange. As of the of change in the reporting scope dated 1 October 2001 reports contain data on contracted sale and purchase of foreign exchange broken down by spot, forward and swap transactions. Based on the aforesaid the data for 2002, 2003 and 2004 have been revised so as to include only the data on contracted spot transactions with banks no longer included into the "legal persons" category.

Table G5: Banks' Trade with Foreign Exchange

Data on trade with foreign exchange between banks comprise spot transactions of the purchase and sale of foreign exchange in domestic foreign currency market. Spot transactions are contracted obligations to buy/sell foreign currency within maximally 48 hours. The

transactions are classified by category of participants (legal and natural persons, domestic and foreign banks and the CNB). Sources of data are banks' reports on trading with foreign exchange and statistical data on foreign payment operations.

Other Croatian National Bank transactions include foreign exchange sales and purchases on behalf of the Ministry of Finance.

^a Preliminary data.

Note: The item net errors and omissions also comprises the counter entry of a part of revenues from travel services which relates to such revenues not stated in the banks' records.

Table H1-H6: Balance of Payments

The balance of payments of the Republic of Croatia represents a systematic overview of the value of economic transactions performed by the Croatian residents with foreign countries within a particular period. It is compiled in accordance with the recommendations of the International Monetary Fund (Balance of Payments Manual, Fifth Edition, 1993). Data sources include: 1. reports of the government institutions (Central Bureau of Statistics and Croatian Institute for Health Insurance), 2. special reports of the Croatian National Bank (International Transaction Reporting System (ITRS), external debt relations, monetary statistics and reserve assets) and 3. estimates and statistical research carried out by the Croatian National Bank.

Balance of payments of the Republic of Croatia data are reported in three currencies: in euros (EUR), US dollars (USD) and domestic currency (HRK). In all cases, the same data sources are used and the same principles regarding the scope of transactions and the procedures for compiling particular items are applied. Since the original data are reported in different currencies, the transaction values are converted from the original currency into the reporting currency by applying the exchange rate from the CNB exchange rate list in one of the following manners:

- by applying the midpoint exchange rate on the date of the transaction;
- by applying the average monthly or quarterly midpoint exchange rate in the case the transaction date is not available;

- by applying the end-of-period exchange rate for the calculation of a change in the transaction value between the two periods; the end-of-period balances reported in the original currency serve as a basis for calculating the change in the original currency value, which is converted, by applying the average midpoint exchange rate in the observed period, into the value of change in the reporting currency.

The Report of the Central Bureau of Statistics on merchandise foreign trade of the Republic of Croatia represents the basic data source for the balance of payments items related to exports and imports. These data are adjusted, in accordance with the recommended compilation method, for coverage and classification. Accordingly, goods exports and imports in the balance of payments are reported at f.o.b. parity. The value of exports at this parity is already contained in the previously mentioned CBS Report, whereas the value of imports f.o.b. is estimated on the basis of research studies of the CNB on the stratified sample of importers. The resulting value serves as a basis for the estimate of the share of transportation and insurance services by which the original value of imports c.i.f., stated in the CBS Report, is reduced. In the 1993-2001 period, this share stood at 7.10% (estimated only on the basis of the largest and large exporters), while from 2002 on it has amounted to 3.73%. In the period from 1993 to 1996, the value of imports was modified by estimates of imports in duty free zones, which have been included in the merchandise trade statistics since 1997. Starting from 1996, goods exports and imports have been modified by the data on repairs on goods and goods procured in

^a Preliminary data.

ports by carriers. In addition, since 1999, based on the Survey on Consumption of Foreign Travellers in Croatia and Domestic Travellers Abroad, the item of goods exports has been modified by the estimated value of goods sold to foreign travellers and tourists and taken out of the Republic of Croatia. The item of goods imports is adjusted for the estimated value of goods imported personally by the Croatian citizens from the neighbouring countries (shopping expenditures).

Transportation, travel and other services are reported separately under service account. Income and expenditures on the basis of transportation, in the 1993-1998 period, were adopted from the ITRS. Starting from 1999, income and expenditures arising from transportation of goods and passengers, as well as the value of accompanying services, which together constitute the total value of these services, have been compiled on the basis of the results of the Research on transactions related to international transportation services, carried out by the CNB. Owing to an exceptionally large population of road carriers, income and expenditures on the basis of road transportation are not adopted from this research. They are compiled by using ITRS data. As regards transportation of goods, expenditures are supplemented by a portion of transportation and insurance costs related to imports of goods which belongs to non-residents and which is estimated by adjusting the value of imports at c.i.f. parity to the value of imports f.o.b.

Income from services rendered to foreign travellers and tourists, as well as expenditures incurred by domestic travellers and tourists abroad are shown under the position Travel. In the 1993-1998 period, this position was assessed by using various data sources which did not provide for a full coverage in accordance with the recommended methodology. Accordingly, in the second half of 1998, the Croatian National Bank started to carry out the Survey on Consumption of Foreign Travellers in Croatia and Domestic Travellers Abroad and use its results for compiling the Travel position. Since early 1999, the results of this Survey, based on carrying out a survey of travellers (stratified sample) at border crossings, have been combined with the Ministry of the Interior data on total number of foreign and domestic travellers, along with the data on distribution of foreign travellers by

countries contained in the CBS Report on tourism, in order to assess the corresponding balance of payment items.

Other services position is compiled by using different data sources: apart from income and expenditures related to insurance and communication services, which have been determined by the CNB special statistical research since 2001, the values of all other services are adopted from the ITRS.

Transactions in the income account are classified into four main groups. Compensation of employees item is compiled on the basis of the ITRS. Income from direct investment, portfolio investment and other investment are reported separately. Data on reinvested earnings are reported separately, under direct investment income, calculated on the basis of the CNB Research on direct and other equity investment. In contrast to data on dividends, these data are not available for the 1993-1996 period, since at that time they were not reported separately. On the basis of statistical data on external debt relations, starting from 1997, income from direct investment includes data on interest arising from credit relations between residents and non-residents directly related through ownership. Income from equity portfolio investment is compiled on the basis of the same research, whereas data on debt portfolio investment income have been compiled since 1999, based on income reported in statistics on foreign credit relations, which also encompass payments related to debt securities owned by non-residents. Income from other investments includes all payments and collections of interest in accordance with the foreign credit relations statistics.

Current transfers are reported separately for the general government sector and other sectors. The ITRS is used as the main data source on current transfers for both sectors. In addition to taxes and excise duties, pensions, monetary support and donations, which are included in current transfers of both sectors, the government sector also encompasses data on multilateral co-operation, whereas other sectors include data on workers' remittances. Current transfers of the general government sector also include data on exports and imports of goods without a payment obligation, provided by the CBS. In the 1993-1998 period, current transfers of other sectors also encom-

^a Preliminary data.

passed an estimate of unregistered foreign currency remittances, which accounted for 15% of the positive difference between unclassified inflows and outflows of the household sector. From 1993 to the second quarter of 1996, the CNB also assessed a portion of the outflow based on current transfers. Since 2002, inflows and outflows based on current transfers of other sectors are supplemented by the data of the CNB special statistical research on international transactions related to insurance services.

Capital account is compiled on the basis of the ITRS, particularly on their part related to transfers of migrants. In addition, capital account includes transfers that cannot be classified into current transfers, such as allocation of gold of the former SFRY or investments in patents and rights.

Foreign direct investments include equity capital, reinvested earnings and debt relations between ownership-related residents and non-residents. Direct investments are investments whereby a foreign owner acquires a minimum of 10% interest in equity capital of a company, regardless of whether a resident invests abroad or a non-resident invests in Croatian residents. The CNB Research on foreign direct investments started in 1997 when companies included in the survey also delivered data on direct investments for the 1993-1996 period. For the same period, no data are available on reinvested earnings and other capital under direct investment position, where all debt relations between related residents and non-residents are classified (excluding the banking sector). Such data actually became available only after the stated research has been launched. Since 1999 data on debt relations within direct investments have been collected on the basis of external debt relations statistics.

Data on equity portfolio investments are collected from the same data source as the data on direct investments. Debt portfolio investments include all investments in short-term and long-term debt securities that cannot be classified under direct investments. In the 1997-1998 period, these data were collected through the CNB Research on direct and portfolio investments, and since 1999 data on external debt relations and monetary statistics data for bank investment have been used. Starting from 2002 and 2004, this position has

also been compiled for investment funds and pension funds, respectively.

Other investment encompasses all other debt investments that have not been mentioned, apart from investment constituting reserve assets. Other investments are classified by instruments, maturity and sectors. Trade credits, in the 1996–2002 period, included the CNB estimates of advance payment and deferred payments, made on the basis of the sample of the largest and large importers and exporters. Data on advance payments have been estimated since 1996, while data on short-term deferred payments (first up to 90 days, then up to 150 days, and today from 8 days to 1 year) have been collected since 1999. In 2003 this research was replaced by a new one, where the selected companies, regardless of their size (stratified sample), are obliged to submit data. Data on deferred payments with the original maturity of more than one year are adopted from the CNB foreign credit relations statistics. Credits granted by residents to non-residents, i.e. foreign loans utilised by residents and granted by non-residents, which cannot be classified into direct investments or trade credits, are classified by the institutional sector and maturity under the corresponding positions of other investment. The CNB foreign credit relations statistics represent the data source for these positions. Currency and deposit position shows residents' claims on foreign countries for foreign cash and deposits with foreign banks, as well as obligations of the Croatian banks for deposits owned by non-residents. Monetary statistics represent a data source for the general government sector and banks sector. Data on balance and currency structure of foreign assets and liabilities, contained in monetary statistics, are used to assess transactions from which the exchange rate effect was eliminated. In the 1993-1998 period, data on other sectors' claims under this position were compiled on the basis of the CNB estimate of a portion of net foreign currency inflows of the household sector which is not classified under current transfers. Since 1999 this position has included only the data based on the Bank for International Settlement quarterly data, while data in the fourth quarter of 2001 and in the first two quarters of 2002 relate to the effect of the EMU countries' currencies changeover to the euro.

^a Preliminary data.

In the period from 1993 to 1998, the estimate of reserve assets transactions was made by converting the changes in the original currencies into the US dollars by applying the average monthly exchange

rate of the currencies contained in the reserves. Since 1999 the changes in reserve assets balance have been calculated on the basis of the CNB accounting data.

^a Preliminary data.

Table H7: International Reserves and Banks' Foreign Exchange Reserves

The international reserves of the Croatian National Bank are shown according to the methodology contained in the Balance of Payments Manual (International Monetary Fund, 1993), and include those foreign claims of the Croatian National Bank that can be used to bridge imbalances in international payments. International reserves

include special drawing rights, reserve position in the International Monetary Fund, gold, foreign currency and deposits with foreign banks, as well as bonds and debt instruments.

The foreign exchange reserves of banks include foreign currency and domestic banks' deposits with foreign banks. These foreign exchange reserves represent an additional source of liquidity for bridging imbalances in international payments.

^a Until January 2001: Currency structure of official reserve assets and other foreign currency assets. ^b In accordance with the recommendation made by the IMF, time deposits with a maturity over 3 months were also included in Official reserve assets (I.A.). These deposits were previously included in Other foreign currency assets (I.B.).

Table H8: International Reserves and Foreign Currency Liquidity

International reserves and foreign currency liquidity are shown in accordance with a Template on international reserves and foreign currency liquidity, drawn up by the IMF. A detailed explanation of the Template is given in “International Reserves and Foreign Currency Liquidity – Guidelines for a Data Template, 2001”.

The first part of the Template shows total assets of the Croatian National Bank in convertible foreign currency. Official reserve assets (I.A.) show those types of assets that are readily available to the CNB at any moment for bridging imbalances in international payments. Official international reserves include: short-term foreign negotiable debt securities, foreign cash, foreign currency sight deposits, foreign currency time deposits which can be withdrawn before maturity, foreign currency time deposits with a remaining maturity of up to 1 year, reserve position with the IMF, special drawing rights, gold, and reverse repos with foreign negotiable debt securities.

The second part of the Template shows fixed predetermined foreign currency net liabilities of the Croatian National Bank and the central government (excluding central government funds) that fall due in the next 12 months. Foreign currency loans, securities and deposits (II.1.) include future interest payments on banks’ foreign currency reserve requirements with the CNB (only interest payments for the next month are included), payments of future maturities of foreign currency CNB bills, future principal and interest payments on loans from the IMF, and future principal and interest payments on the central government’s foreign currency debts (excluding central government funds). Aggregate short and long positions in forwards and futures in foreign currencies (II.2.) include future collections (+) or payments (-) arising from currency swaps between the CNB and domestic banks (temporary sale or purchase of foreign currency). Item Other (II.3.) includes future payments arising from repo agreements

with foreign negotiable debt securities.

The third part of the Template shows predetermined contingent foreign currency net liabilities of the Croatian National Bank and the central government (excluding central government funds), which fall due in the following 12 months. Contingent liabilities in foreign currency (III.1.) include future principal and interest payments on foreign loans guaranteed by the central government, and banks’ foreign currency reserve requirements. (The inclusion of reserve requirements in foreign currency is based on the assumption that there will be no changes in ratios or in the base of foreign currency reserve requirements, which comprises foreign exchange sources of funds, including ordinary foreign exchange accounts, special foreign exchange accounts, sight foreign exchange accounts and savings deposits, received foreign exchange deposits and received foreign exchange loans, as well as obligations arising from securities issued in foreign exchange (excluding the bank’s equity securities) and hybrid and subordinated instruments). Undrawn credit lines show potential inflows (+) or outflows (-) which would arise from drawdowns under these credits.

The fourth part of the Template lists memo items. Short-term, domestic currency debt indexed to foreign currency (IV.a) shows obligations arising from the Act on Converting Households’ Foreign Exchange Deposits into the Public Debt of the Republic of Croatia, which fall due in the next 12 months. Pledged assets (IV.c) show time deposits in foreign currency with a maturity over 3 months listed in item I.B. which are also a pledge. Repo transactions with securities show the value of collateral that is the subject of repo agreements and reverse repo transactions with securities as well as how these transactions are registered in the Template. Until December 2000, the currency structure of international and other foreign currency reserves showed the currency structure of the total foreign currency assets of the CNB (section I.). From January 2001, the currency structure refers to official reserve assets (section I.A.).

Table H9: Midpoint Exchange Rates of the Croatian National Bank (period average)

The annual averages of CNB midpoint exchange rates are calculated based on the midpoint exchange rates effective on the working days in a year, using CNB exchange rate lists whose application dates pertain to the calculation period.

The monthly averages of CNB midpoint exchange rates are calculated based on the midpoint exchange rates effective on the working days in a month, using CNB exchange rate lists whose application dates pertain to the calculation period.

The data show the annual and monthly averages of CNB midpoint exchange rates for selected currencies from 1992 to date, in kuna terms. The averages related to the calculation periods from the beginning of 1992, when the legal tender in the Republic of Croatia was the Croatian dinar, until the introduction of the kuna on 30 May 1994, are shown in kuna equivalent, and are denominated by dividing their values by one thousand (1,000).

The annual and monthly averages of midpoint exchange rates for the euro from 1992 until end 1998 are the averages of midpoint exchange rates applied for the ECU.

Table H10: Midpoint Exchange Rates of the Croatian National Bank (end of period)

The table shows CNB midpoint exchange rates applied on the last day of the observed period.

The data show CNB midpoint exchange rates for selected currencies from 1992 to date, in kuna terms. The end of period midpoint ex-

change rates related to the periods from the beginning of the time series in 1992 until the introduction of the kuna on 30 May 1994 are shown in kuna equivalent and are denominated by dividing their values by one thousand (1,000).

The midpoint exchange rates for the euro applied on the last days of the observed periods from 1992 until end 1998 are the end of period midpoint exchange rates applied for the ECU.

Table H11: Indices of the Effective Exchange Rate of the Kuna

2007	January	88.97	92.17 ^a	88.21 ^a
	February	88.82	92.53 ^a	88.17 ^a
	March	88.41		

^a Preliminary data.

Note: From 1 January 2001, the euro-zone related price series includes Greece as well. Slovenia became an EMU member on 1 January 2007. Accordingly, the weight assigned to the Slovenian tolar (0.2%) has been added to the euro weight (70.6%), which now amounts to 70.8%. The weights assigned to the US dollar, pound sterling and Swiss franc have been kept at 27.2%, 1.0% and 1.0% respectively.

Table H11: Indices of the Effective Exchange Rate of the Kuna

The index of the nominal effective exchange rate of the kuna is a weighted geometric average of the index of bilateral nominal exchange rates of the kuna against the euro, US dollar, Swiss franc, pound sterling and Slovenian tolar. The series of the indices of the effective exchange rate of the kuna, calculated in accordance with the modified CNB methodology for calculating the nominal and real effective kuna exchange rate (for the basic CNB methodology, see Bulletin No. 64, Box: 2, October 2001), were first published in the CNB Bulletin No. 94 (June 2004). The weights are determined based on the average share of a particular foreign currency in the structure of the current account – ITRS data between January 2000 and December 2003 (between July 1996 and January 2000 in the previous version of notes on methodology under Table H10). The new weights have been assigned to the euro (70.6%), US dollar (27.2%), Swiss franc (1.0%) and pound sterling (1.0%) and thus replaced the old weights: euro (66.2%), US dollar (30.7%), Swiss franc (1.6%) and pound sterling (1.2%). The weight assigned to the Slovenian tolar remained unchanged at 0.2%. The year 2001 is a base period for calcu-

lating the indices of the effective exchange rate of the kuna (1995 in the previous version of notes on methodology under Table H10). The index of the nominal effective exchange rate is an aggregate indicator of the average value of the domestic currency against a basket of currencies. An increase in the index of the nominal effective exchange rate of the kuna in a certain period indicates that the kuna has depreciated against the basket of currencies, and vice versa. The index of the real effective exchange rate is a weighted geometric average of the index of bilateral exchange rates of the kuna adjusted for the relevant relative price indices (the ratio of price indices in partner countries and domestic prices). Producer price and consumer price indices, and the total harmonized consumer price index for the eurozone countries are used as deflators. The time series for consumer prices in Croatia is constructed in the following manner: retail price indices are used until December 1997 inclusive, and consumer price indices are used as of January 1998. Data for the last two months are preliminary. The historical data may be corrected for the subsequent changes in the data published by the statistical offices of the countries whose prices are included in the calculation of the index of the real effective exchange rate of the kuna.

Table H12: Gross External Debt by Domestic Sectors

External debt is defined as the external debt liabilities of residents on the basis of debt securities issued in foreign markets (at face value), credits (repo agreements included) regardless of their contractual maturity, deposits of non-residents, and trade credits granted by non-residents with contractual maturity of more than 180 days (90 days up to 11 July 2001 and 150 days up to 31 December 2002).

External debt by domestic sectors is shown in the same manner as in the Capital and Financial Account of the BOP. Item Government shows external debt of the general government, which includes the Republic of Croatia, central government funds (including the Croatian Bank for Reconstruction and Development, the State Agency for Deposit Insurance and Bank Rehabilitation, the Croatian Roads and the Croatian Highways), and local government. Item Croatian National Bank shows the central bank debts. Item Banks shows debts of banks. Item Other sectors shows debts of other banking institutions, non-banking financial institutions, enterprises, non-profit institutions and households, including craftsmen. Item Direct investment shows borrower – lender transactions of other sectors that are interrelated by ownership (borrower or lender owns more than 10 percent of the other).

Each sector data are further shown by contractual maturity (short-term and long-term) and by debt instrument. From the beginning of 2004, instruments included in item Currency and deposits (3. Banks) are reported in accordance with their maturity. Data for the previous periods are reported only on a long-term basis.

Outstanding gross external debt includes principal and interest ar-

rears, as well as accrual interest and future principal payments.

Outstanding debt data are shown at the CNB's midpoint exchange rate at the end of the period.

Data are considered preliminary until after publication of the final BOP data for the reporting quarter.

Table H13: Public Sector Gross External Debt, and Publicly Guaranteed and Non-Publicly Guaranteed Private Sector Gross External Debt

The gross external debt position presented in this Table highlights the role of the public sector.

Public sector includes the general government (including the Republic of Croatia, central government funds and local government), the central bank, public enterprises and mixed ownership companies. Public enterprises are defined as enterprises in 100% ownership of business entities from the public sector. Mixed ownership companies are defined as companies in which business entities from the public sector have a share larger than 50%.

Publicly guaranteed private sector gross external debt is defined as the external debt liabilities of business entities not covered by the definition of the public sector, the servicing of which is guaranteed by a business entity from the public sector.

Non-publicly guaranteed private sector gross external debt is defined as the external debt liabilities of business entities not covered by the definition of the public sector, the servicing of which is not guaranteed by the public sector.

Items are valued in the same manner as in Table H12.

Table H13: Public Sector Gross External Debt, and Publicly Guaranteed and Non-Publicly Guaranteed Private Sector Gross External Debt

Table H14: Gross External Debt by Domestic Sectors and Projected Future Payments

The Table shows outstanding gross external debt, projected principal payments and estimated interest payments according to the CNB's midpoint exchange rate at the end of the period.

Principal payments on Currency and deposits of non-residents are projected according to the available monetary statistics data on original and remaining maturity.

Estimated interest payments do not include interest on deposits from non-residents, repo transactions and hybrid and subordinated instruments, as well as late interest on these instruments. Future interest payments are estimated at the interest rates at the contracting time and do not reflect changes of variable interest rates.

Projected payments of accrual interest, which are an integral part of the gross external debt, increase the projected principal payments in the first quarter period and, consequently, decrease the interest payments estimated for the same period.

^a Preliminary data.**Table H15: International Investment Position – Summary**

This table is made in accordance with the recommendations of the IMF (Balance of Payments Manual, Fifth Edition, 1993). Data sources include: reports from banks, enterprises, the Croatian National Bank, and the Zagreb Stock Exchange.

Data on international investments of the Republic of Croatia and international investments into the Republic of Croatia are recorded in euros (EUR) and US dollars (USD). Depending on the sources of data available, the conversion of values from the original currencies into the reporting currencies is performed:

- by applying the current rate of exchange or the average monthly midpoint exchange rate of the Croatian National Bank to transactions;
- by applying the midpoint exchange rate of the Croatian National Bank on the reporting date to balances.

The source of data on foreign direct and portfolio equity investment is the statistical research of the Croatian National Bank. The equity investments have been monitored since the beginning of 2001 and are corrected for changes in the official index of the Zagreb Stock Exchange (CROBEX).

Portfolio debt investment and other investment are classified according to the following institutional sectors: the Croatian National Bank, government, banks and other sectors. The government sector comprises central government and funds and local government authorities. The banking sector comprises banks.

Item Portfolio debt investment – Assets and liabilities comprises data on investments of residents into debt securities issued by

non-residents (assets) and investments of non-residents into debt securities issued by residents (liabilities). The source of data is the register of foreign credit relations kept by the Croatian National Bank, which also comprises claims and liabilities arising from bonds and money market instruments.

Item Other investment – Trade credits – Assets and liabilities comprises foreign claims and foreign liabilities of the said sectors arising from trade credits. The source of data is the register of foreign credit relations kept by the Croatian National Bank.

Item Other investment – Loans – Assets and liabilities comprises data on loans granted and received between residents and non-residents classified according to institutional sectors. The source of data is the register of foreign credit relations kept by the Croatian National Bank.

Item Other investment – Currency and deposits – Assets shows the total liquid foreign exchange of banks authorized to do business abroad reduced by the amount of foreign exchange deposited by banks with the CNB in fulfilment of a part of their reserve requirements. In addition to banks' foreign claims, foreign claims of the government sector are also shown. The sources of data are reports from the government and banks.

Item Other investment – Currency and deposits – Liabilities shows the total foreign exchange and kuna liabilities of the said sectors abroad arising from current accounts, time and notice deposits, sight deposits and demand deposits. The sources of data for this item are reports from banks.

Item International reserves of the CNB is compiled on the basis of the CNB Accounting Department reports which contain data on their balances and changes.

^a Irrespective of the note under the heading "Classification and presentation of data on claims and liabilities", the debt of the Croatian Roads, the Croatian Highways and the State Agency for Deposit Insurance and Bank Rehabilitation, presented in this table under headings 2. External debt of central government and 1. Domestic debt of central government, was reclassified from the sub-sector of the Republic of Croatia to the sub-sector central government funds in December 1998 and December 2002 respectively.

Table I3: Central Government Debt

Data on the central government debt are gathered from available data and are not reconciled with the Ministry of Finance of the Republic of Croatia. The central government debt consists of domestic and external debt. The sources of data on domestic debt of the central government are the following: the Ministry of Finance Monthly Sta-

tistical Review, Monetary Authorities Accounts and Banks' Accounts. The source of data on the central government external debt is the external debt statistics collected by the CNB. The supplement provides data on the central government guaranteed debt. Banks are the source of data on guarantees for domestic debt, while the external debt statistics collected by the CNB are the source of data on guarantees for external debt.

Table J1: Consumer Price and Producer Price Indices

The Central Bureau of Statistics (CBS) introduced the consumer price index (CPI) in early 2004. This indicator of price movements was compiled in accordance with the methodological principles laid down by the ILO and Eurostat. In its First Release, issued on 17 February 2004, the CBS published the data on movements in the CPI in January 2004 and the time series for the CPI as of January 2001. The CBS subsequently constructed the time series for the consumer price

index encompassing the period from January 1998 to December 2000. As expected following the introduction of the new index, the CBS has stopped publishing the retail price index (RPI) and the cost of living index whose calculation methodologies have not been adequately harmonised with internationally accepted standards. The main characteristic of the CPI are discussed in Box 1 in the CNB Bulletin No. 91 (2004). The data on the average year-on-year consumer price inflation rate are shown in the Bulletin table on Economic Indicators.

Table J2: Core Consumer Price Indices

^a Since January 2007, the CPI has been calculated and published by the CBS on the new base 2005 = 100. Source: Central Bureau of Statistics.

Table J2: Core Consumer Price Indices

The Central Bureau of Statistics calculates the core consumer price index in the manner that agricultural products prices and administrative prices (which among others include the prices of electricity and refined petroleum products) are excluded from the basket of

goods and services used in the calculation of the total consumer price index. A total of 111 goods and services are excluded and their share in the consumer price basket stood at 30.06% in 2005 (of which: agricultural products accounted for 6.93 percentage points, and administrative prices for 23.13 percentage points). The zero weighting method is used to exclude the prices of goods and services.

Table J3: Average Monthly Net Wages

in current prices, in kuna

Year	Month	Nominal amount in kuna	Chain indices	Monthly year-on-year indices	Cumulative year-on-year indices

Table J4: Consumer Confidence Index, Consumer Expectations Index and Consumer Sentiment Index

The CNB Consumer Confidence Survey has been carried out regularly since April 1999 in accordance with the methodology of the European Commission, the Joint Harmonised EU Programme of Business and Consumer Surveys. Until April 2005 the CNB conducted the survey once a quarter (in January, April, July and October). As of May 2005 the CNB carries out the survey in monthly frequency in co-operation with the European Commission, using its technical and financial assistance. The Croatian National Bank bears sole responsibility for the creation and conduct of the survey.

The questionnaire contains 23 questions, examining consumer perception of the changes as regards every-day economic issues. The value of the response index is determined in line with the set methodology, based on the responses to the questions from the Consumer Confidence Survey. The movements of three composite indices, consumer confidence index (CCI), consumer sentiment index (CSI) and consumer expectations index (CEI), are calculated and monitored based on the value of the response indices. Each of the said composite indices is calculated as the arithmetic average of the response indices (I), i.e. as the average of previously quantified responses to individual questions from the survey:

$$I_i = \sum_z^k r_i \cdot w_i$$

where: r is the value of the response, w is the share of respondents opting for a particular response (weight), i question from the ques-

tionnaire, z is the offered/chosen response, k is the number of offered responses to a particular question.

The value of the said indices ranges $-100 < I_i < 100$. Higher index values than those recorded over the previous period point to an increase in expectations (optimism) as regards the specific segment covered by the particular question.

The table shows the values of chosen response indices for the following questions:

I1: How has the financial situation of your household changed over the last 12 months?

I2: How do you expect the financial position of your household to change over the next 12 months?

I3: How do you think the general economic situation in Croatia has changed over the past 12 months?

I4: How do you expect the general economic situation in Croatia to develop over the next 12 months?

I7: How do you expect the number of people unemployed in Croatia to change over the next 12 months?

I8: In view of the general economic situation, do you think now is the right moment for people to make major purchases such as furniture, electrical/electronic devices, etc.?

I11: Over the next 12 months, how likely is it that you will save any money?

The components of composite indices are as follows:

CCI: I2, I4, I7×(-1), I11

CEI: I2, I4

CSI: I1, I3, I8

List of Banks & Savings Banks

1 March 2007

Licensed Banks

1. Banka Brod d.d., Slavonski Brod
2. Banka Kovanica d.d., Varaždin
3. Banka Sonic d.d., Zagreb
4. Banka Splitsko-Dalmatinska d.d., Split
5. Centar banka d.d., Zagreb
6. Credo banka d.d., Split
7. Croatia banka d.d., Zagreb
8. Erste & Steiermärkische Bank d.d., Rijeka
9. Gospodarsko kreditna banka d.d., Zagreb
10. Hrvatska poštanska banka d.d., Zagreb
11. Hypo Alpe-Adria-Bank d.d., Zagreb
12. Imex banka d.d., Split
13. Istarska kreditna banka Umag d.d., Umag
14. Jadranska banka d.d., Šibenik
15. Karlovačka banka d.d., Karlovac
16. Kreditna banka Zagreb d.d., Zagreb
17. Kvarner banka d.d., Rijeka
18. Međimurska banka d.d., Čakovec
19. Nava banka d.d., Zagreb
20. OTP banka Hrvatska d.d., Zadar
21. Partner banka d.d., Zagreb
22. Podravska banka d.d., Koprivnica
23. Primorska banka d.d., Rijeka
24. Privredna banka Zagreb d.d., Zagreb
25. Raiffeisenbank Austria d.d., Zagreb
26. Samoborska banka d.d., Samobor
27. Slatinska banka d.d., Slatina
28. Slavenska banka d.d., Osijek
29. Sociétés Générale – Splitska banka d.d., Split
30. Štedbanka d.d., Zagreb
31. VABA d.d. banka Varaždin, Varaždin
32. Volksbank d.d., Zagreb
33. Zagrebačka banka d.d., Zagreb

Licensed Housing Savings Banks

1. HPB – Stambena štedionica d.d., Zagreb
2. PBZ Stambena štedionica d.d., Zagreb
3. Prva stambena štedionica d.d., Zagreb
4. Raiffeisen stambena štedionica d.d., Zagreb
5. Wüstenrot stambena štedionica d.d., Zagreb

Other Licensed Institutions with Full Authorization

1. Hrvatska banka za obnovu i razvitak, Zagreb

Representative Offices of Foreign Banks

1. Bank für Kärnten und Steiermark AG, Zagreb

2. Commerzbank Aktiengesellschaft, Zagreb
3. Deutsche Bank AG, Zagreb
4. Komercijalna banka a.d., Zagreb
5. LHB Internationale Handelsbank AG, Zagreb
6. Sanpaolo IMI S.p.A., Zagreb

Banks and Savings Banks under Bankruptcy Proceedings

Name of bank/savings bank	Date of bankruptcy proceedings initiation
1. Adria štedionica d.o.o., Zagreb	12/10/2000
2. Agroobrtnička banka d.d., Zagreb	14/06/2000
3. Alpe Jadran banka d.d., Split	15/06/2002
4. Cibalae banka d.d., Vinkovci	20/10/2000
5. Glumina banka d.d., Zagreb	30/04/1999
6. Gospodarska štedionica d.d., Vrbovec	03/04/2003
7. Gradska banka d.d., Osijek	03/05/1999
8. Hrvatska gospodarska banka d.d., Zagreb	19/04/2000
9. Ilirija banka d.d., Zagreb	06/04/1999
10. Invest štedionica d.o.o., Zagreb	30/06/1999
11. Komercijalna banka d.d., Zagreb	30/04/1999
12. Međimurska štedionica d.d., Čakovec	17/03/2004
13. Neretvansko gospodarska banka d.d., Ploče	10/05/1999
14. Štedionica Groš banak d.o.o., Zagreb	23/04/2001
15. Štedionica Mediteran d.o.o., Split	5/12/2001
16. Trgovačko-turistička banka d.d., Split	08/09/2000
17. Županjska banka d.d., Županja	03/05/1999

Banks and Savings Banks under Liquidation Proceedings

Name of bank/savings bank	Date of liquidation proceedings initiation
1. Investicijsko-komercijalna štedionica d.d., Zagreb	31/05/2000
2. Križevačka banka d.d., Križevci	03/01/2005
3. Primus banka d.d., Zagreb	23/12/2004
4. Štedionica Dora d.d., Zagreb	01/01/2002
5. Štedionica SA-GA d.d., Zagreb	31/12/2001
6. Štedionica Zlatni vrutak d.d., Zagreb	28/12/2001

Banks and Savings Banks whose License Was Revoked, but Have Not Initiated Liquidation Proceedings

Name of bank/savings bank	Date of revoking operating license
1. Hibis štedionica d.d., Zagreb	07/03/2001
2. Marvil štedionica d.d., Zagreb	08/06/2001
3. Zagrebačka štedionica d.d., Zagreb	22/03/2000

Management of the Croatian National Bank

1 March 2007

Members of the Council of the Croatian National Bank

Chairman of the Council	Željko Rohatinski
Members of the Council	Boris Cota Davor Holjevac Vlado Leko Branimir Lokin Željko Lovrinčević Relja Martić Adolf Matejka Silvije Orsag Tomislav Presečan Jure Šimović Sandra Švaljek Mladen Vedriš Boris Vujčić

Management of the CNB

Governor	Željko Rohatinski
Deputy Governor	Boris Vujčić
Vicegovernor	Davor Holjevac
Vicegovernor	Relja Martić
Vicegovernor	Adolf Matejka
Vicegovernor	Tomislav Presečan

Executive Directors

Research and Statistics Area	Ljubinko Jankov
Central Banking Operation Area	Irena Kovačec
Foreign Exchange Operations Area	
Prudential Regulation and Bank Supervision Area	Željko Jakuš
