

# CROATIAN NATIONAL BANK

BULLETIN No. 54 - November 2000

## REAL SECTOR

Industrial production fell at the end of the third quarter. In September, it was down by 0.9% compared with the same month last year. Over the first nine months of this year, the industrial production index rose by 2.7% compared with the same period in 1999. The slowing down of the industrial production upward trend was caused by a decrease in processing industry, which was in September at a rate lower (by 1.1%) than in 1999, together with a fall in energy supply (0.8%). Only mining grew in September (0.7%). Over the first nine months of this year, the year-on-year index of change by the NCEA sections was significantly reduced only in energy supply (4.6%).

According to main industrial groupings, in 2000, production of capital goods rose most (11.1%), followed by production of intermediate goods (4.4%). This indicator shows that investments, which were on the decline for the past four consecutive months (from the third quarter of 1999 to the second quarter this year), may slowly recover. By divisions of the NCEA, especially favorable results, within processing industry, were recorded by manufacture of radio, television and communication equipment and chemical industry.

By September, goods exports in terms of the kuna, grew by 20%, whereas imports growth rate amounted to 17.7%. In the third quarter, however, exports increased significantly less than at the annual level, amounting to 9.4%, while goods exports rose by 18.9% compared with the same period last year.

## QUARTERLY GROSS DOMESTIC PRODUCT, At constant prices

## MANUFACTURING PRODUCTION INDEX

Change from the same month previous year

## PROCESSING INDUSTRY

Change from the same month previous year

As a result of appreciation of the dollar against the kuna during 2000, data on merchandise trade in dollar terms show significantly lower growth rates. Thus, exports and imports in dollar terms were growing at a 3.7% and 1.7% rate, respectively. The downward trends in the third quarter are even more evident if they are viewed in dollar terms. Exports, thus, declined by 5.1%, whereas imports increased by 3.4%. Merchandise trade in September does not differ significantly from these movements.

According to the NCEA, exports in kuna terms, among industries significant for exports, grew most in agriculture (49.5%), manufacture of coke and refined petroleum (61.9%), radio, television and communication equipment (60.3%), and manufacture of pulp and paper (61.9%). Shipbuilding, i.e. manufacture of other transport equipment, as the most important exports industry, grew at a rate below average (13.2%), whereas exports fell in manufacture of wearing apparel (4.7%) and food products and beverages (10.5%). Merchandise imports grew most in mining (73.9%), manufacture of textiles (58.8%) and radio, television and communication equipment (46.3%).

It should be noted that rise in exports to developed countries (32.5%), especially to EU countries (39.4%) was above average. Consequently, the share of exports to EU countries in merchandise exports grew from 47.9% to 55.7% over the first nine months of this year.

**ELECTRICITY, GAS AND WATER SUPPLY**  
Change from the same month previous year

**INDEX OF PRODUCTION VOLUME IN INDUSTRY**  
BY MAIN INDUSTRIAL GROUPS  
Change from the same month previous year

**REAL RETAIL TURNOVER**  
Change from the same month previous year

This indicator should be considered positive, since, apart from increased product quality, it implies a stronger trade integration into the region with which Croatia will form an integral economic territory in the future.

There were no changes in imports structure, other than the fact that the share of EU countries reached almost 86% of total imports.

In 2000, tourist season was characterized by a rise in night-stays and its prolongation. Thus, 709 thousand tourist arrivals were registered in September, which is a 51.4% increase compared with the same month of 1999, as well as a significant increase compared with 1998. In that month, tourists' night-stays reached 4.1 million, which is 52.7% more than in the same month last year. Foreign tourists account for the major part of this increase. Their arrivals rose by 67.2%, while night-stays went up by 60.5%. These indicators demonstrate that high growth rates in hotel and restaurant sector, which recorded a rise in the gross value-added in the second quarter, will probably continue in the third quarter as well.

The downward trend of construction industry continued in August. The year-on-year rate of change in the physical index of volume of construction projects thus decreased by 6.1% in September, whereas the cumulative index of this indicator fell by 11.5% over the first eight months compared with the same period last year.

## PRICES

In October, retail prices rose on average by 0.6% (or half the rate of September, when the monthly growth reached 1.2%). The cost of living increased by 0.7% and producer's prices by 1.1%.

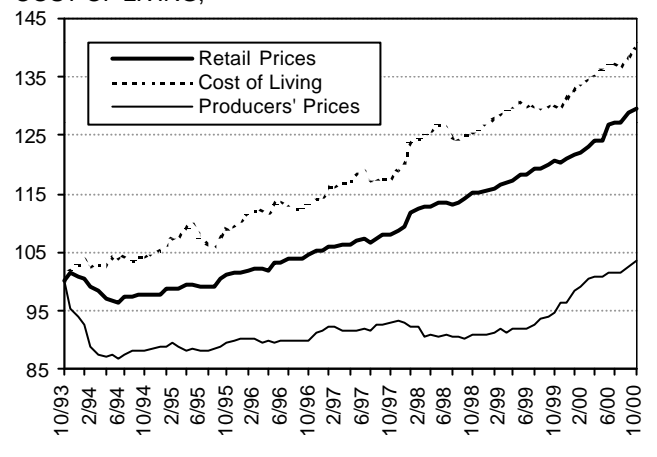

Services prices covered by the retail price index increased slightly (by 0.1%), while goods prices rose by 0.6% compared to the last month. The October slowdown in the growth of aggregate level of prices is even more evident if electricity prices are excluded from the basket of goods which is used for the calculation of the retail price index. The electricity price is administratively determined and it increased by 25% in October. According to the stated indicator, goods prices grew at a significantly lower rate in October, a 0.2% on average. This shows that the increase in petroleum product prices has not yet, apart from a one-time effect on the increase in retail prices, triggered the worrying long-lasting inflationary pressures and caused an increase in other products' prices. In October, the year-on-year inflation measured by the change in the retail price index was 7.3%. It was, above all, the result of this year's positive price shocks on the supply side (the oil prices increased in the world market, and this growth made an additional burden in Croatia by the weakening of the kuna against the American dollar and the increase in excises).

Movements in the core inflation indicator, whose year-on-year change was 4.2% in October, show that the inflation which is mostly driven by demand is stable. The prices of agricultural products and administratively determined prices, which are considered to reflect weakly the inflationary pressures on the demand side, are not included in the calculation of the core inflation due to their seasonal character.

## EMPLOYMENT AND WAGES

In September, unemployment registered with the Croatian Employment Service increased by 10,000 (2.9%), reaching a total 360,000, 10.2% more than in 1999. This increase was mostly the result of seasonal movements, and had no effect on registered unemployment that has been growing since mid-1998. The economy in recession and then the restructuring of enterprises, mostly those in state ownership, influenced this year's growth of unemployment. Although unemployment increased in the first nine months of 2000, employment through the Croatian Employment Service increased by 14.8% compared with the same period last year. At the end of September, total unemployment was 1,321,000. It decreased by 14,000 (1%) compared with August or 43,000 (3.2%) compared with 1999. The unemployment rate stood at 21.4% in end-September, and decreased by 1.8 percentage points compared with 1999.

The September gross wages rose by 3.2% in nominal and 2.9% in real terms. The decrease in gross wages is gradually stopping. They were 7.7% in nominal and 1.1% in real terms higher in September than last year. The net wage bill paid via the Institute for Payment Transactions was on average 8.1% in nominal or 3.3% in real terms higher in the first eight months of 2000 than in the same period last year. Although CBS-data show a decrease in employment, the number of employed who receive their wages via the Institute for Payment Transactions was 11,000 (1.4%) higher in August than in the same month last year.

## MONETARY DEVELOPMENTS

September data show the same trends as observed in the previous months. Total liquid assets and net foreign assets continued to grow, while credits, i.e. net domestic assets, continued to stagnate.

The money supply revealed its pronounced, seasonally induced character of decrease compared with August. It stood at HRK 17.2bn in September, which is HRK 0.6bn less than in August. However, seasonally adjusted and trend values point to continued growth, though slightly slower than in the previous months, of both the currency in circulation and deposit money. This is especially noticeable in the case of deposit money whose growth in the past few months received an additional boost from the collection of budgetary arrears. After this source of funds had dried up, the growth of deposit money slowed down and the cash-deposit ratio stopped falling. Following months of extremely strong growth, the money supply slows down. The money supply's monthly trend rate of growth this year is 2.06%.<sup>1</sup>

At the end of the third quarter the money supply was HRK 17.2bn of which deposit money accounted for HRK 10.9bn and currency in circulation accounted for HRK 6.3bn. The average monthly trend rate of growth of currency in circulation and deposit money this year is 1.0% and 3.8% respectively. The money supply's trend value increased by 17% compared with the same month last year, while that of deposit money increased by as much as 32% and currency in circulation by 3%.

The trend and original values of deposits indicate continued strong growth. At the end of September foreign exchange deposits stood at HRK 44.3bn and kuna deposits stood at HRK 7.5bn so that total liquid assets exceeded HRK 69bn. In relative terms, trend values of foreign exchange deposits' increased by 7.4% while those of kuna deposits increased by 20.1% compared with the same month last year. With regard to maturities, time deposits continued to prevail, while

<sup>1</sup> January has been excluded from the calculation of the rate, due to strong contraction – M1 shock. See previous Information.

short-term time deposits dominated.

Corporate lending continues to stagnate. The monthly trend rate this year is  $-0.8\%$ , and the trend value for September decreased by 8% compared with the same month last year. Credits were HRK 57.8bn. By sectors, household lending continued to be the only growing component. At the end of September, it stood at HRK 21.4bn. During the year corporate lending was around HRK 31.5bn and at the end of September it stood at HRK 31.3bn.

Corporate lending was in sharp contrast to companies' deposits with banks, which, as mentioned earlier, exhibited a strong growth trend during the whole year. Companies' deposit money as well as their kuna and foreign exchange accounts grew strongly this year. The contrast between corporate lending and companies' deposits may suggest that the stagnation of corporate lending was also brought about by decreased corporate demand for credits. Increased liquidity in the corporate sector (measured by balances in the accounts of companies) may point to reluctance on the part of the banks to lend on the supply side but also to a decrease on the demand side. Companies with no access to credits and in need of financing would spend their savings rather than increase it. This would suggest that the current lending stagnation is not just a "credit crunch" caused by banks reluctant to lend to companies but that it is also caused by decreased corporate demand for credits. Further examination of the effects that lower demand for credits has on the current lending stagnation has been made more difficult by the credit market segmentation where companies do not share the same credit worthiness or have the same access to credits and own sources of finance. Thus, it is difficult to conclude on the basis of aggregate data whether the companies are in a "credit crunch" or whether there is simply less demand on their side because they are financing themselves in this post-recession period from their own sources and are increasing their deposits with banks.

#### NET DOMESTIC ASSETS, NET FOREIGN ASSETS AND M4

Growth rates relative to the same month previous year

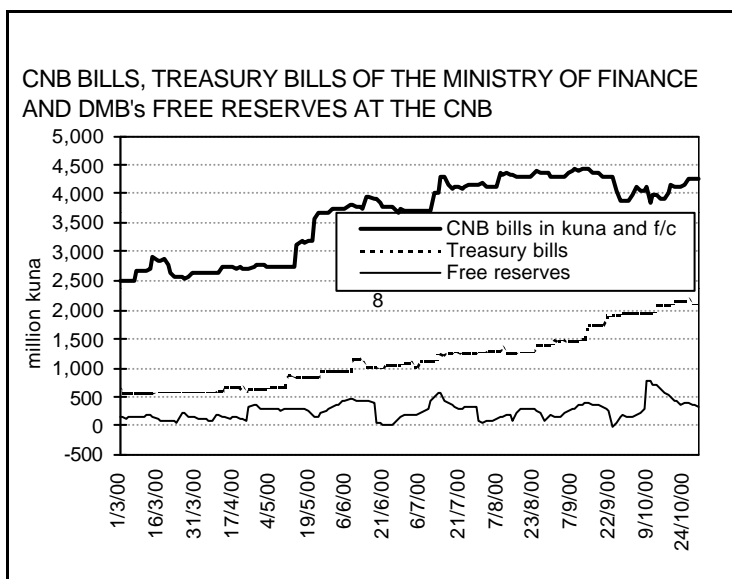

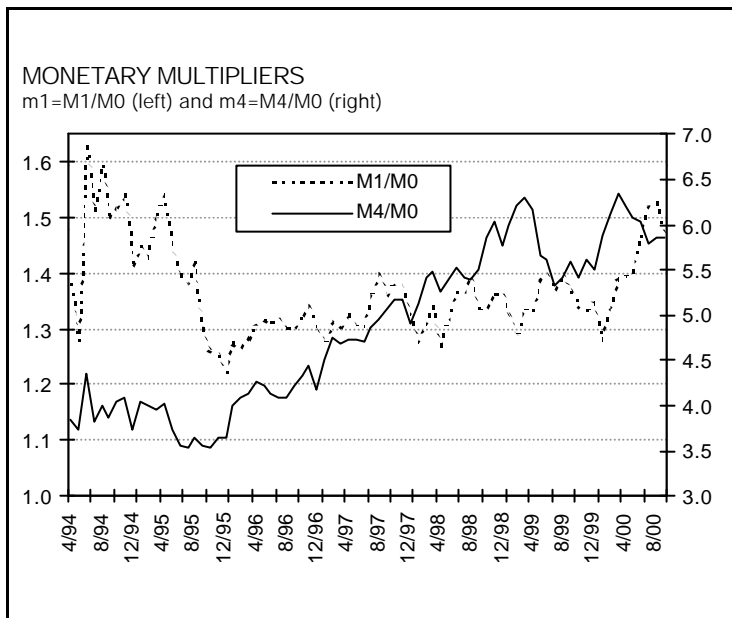

were USD 3.3bn. During October, there were no foreign exchange market interventions. However, in line with the agreement between the central bank and the Ministry of Finance as well as with the monetary policy projection for the fourth quarter, on October 5 USD 50m was purchased from the central government, with the net monetary effect of HRK 428m. Lombard credits during the whole month were zero, thus proving the continued high liquidity of the system which called for no borrowing from the central bank. Data from the money market continued to indicate ample supply which regularly exceeded demand and historically low interest rates. In such an environment the central bank's lender of last resort facility became unnecessary and unattractive.

Reserve money increased by HRK 115m in October compared with the previous month and stood at HRK 11.86bn. As the seasonal fall of currency in circulation continued in October, the increase in reserve money in October was due to the increase in banks' deposits. The balances in settlement accounts were mostly high during the month, at times exceeding HRK 1bn. The average balance in the settlement account in October was HRK 750bn. Required reserves in kuna stood at HRK 4.8bn at the end of October, a slight increase compared to end September. This is a reflection of the September stagnation of the base; i.e. kuna deposits with commercial banks.

During the whole month, the balance in the central government's account with the central bank was high, on average HRK 980m. Holdings of kuna CNB bills at the end of October were a high HRK 2.7bn, which was an increase of almost HRK 0.5bn kuna compared to end September. In an environment characterized by high liquidity, short-term securities of the government and the central bank were a significant tool for leveling of at least a part of that liquidity. Foreign exchange CNB bills stagnated both in September and October, showing that the summer increase in foreign exchange supply came to an end and that in autumn, following a slight depreciation of domestic currency, foreign exchange supply decreased.

## EXCHANGE RATE

The exchange rate of the kuna has continued to be stable. However, the strengthening of the kuna against the Euro noticeable over the last several months, was checked in October. The Euro rose from HRK 7.51 at the end of September, to HRK 7.54 at the end of October. Thus, the total nominal appreciation of the kuna was 0.3% if end-period values are taken. In October, the exchange rate of the kuna against the Euro was around 7.52, the average monthly nominal appreciation of the kuna was 0.1% compared with the previous month, or significantly less than in the May-September period of this year when it was 0.5%.

At the end of October, the kuna strengthened nominally by 1.9% against the Euro compared to the end of last year, while it weakened against the American dollar by 16.4% in the same period. The American dollar stood at HRK 8.9 at the end of October, so that the total nominal depreciation of the kuna against the dollar was 4.2% compared with the end of September. These cross-currency trends, with a simultaneous nominal weakening of the kuna against the Swiss franc (0.5%) and the British pound (4.0%) and its strengthening against the Slovene tolar (0.1%), resulted in a total depreciation of the index of the nominal effective exchange rate of the kuna of 1.6% compared with the end of September. In the last nine months, the kuna weakened against the basket of currencies by a total of 3.6%.

The August depreciation of the index of the nominal effective exchange rate of the kuna and a simultaneous slight relative growth in domestic prices (compared to prices abroad) led to an increase in indicators of price competitiveness. The index of the real effective exchange rate depreciated by 0.7% (with retail prices) and 0.6% (with producer prices) in August.

## BALANCE OF PAYMENTS

In the first two quarters of 2000, the cumulative current account deficit was USD 710.6m, which is a decrease of 37.7% compared with the same period in 1999. The reasons for these developments in the first half of 2000 are twofold. First, the merchandise trade deficit decreased by 11.3% due to an increase in exports of 9.8%, and an increase in imports of only 0.5% compared with 1999. Second, the surplus in the services account increased by 29.4%. This growth in the surplus was partly due to an increase in net income from tourism of 4.4%, and partly due to an increase in net income from transportation of 29.4% (which is related to an increase in exports and tourist transportation). In the first six months of 2000, current transfers were USD 370.9m (an increase of 48.3% compared to the same period of 1999), while the income account ran a deficit of USD -185.5m (a decrease of 6.3%).

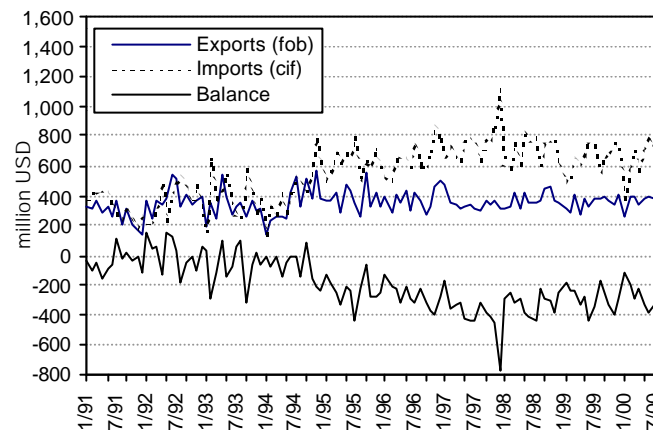

In the first six months of 2000, the cumulative balance in the financial account was USD 466.3m or 51% less compared with the same period of 1999. It resulted mostly from a significant decrease in other investments which were USD 340.5m in the first half of 1999 and USD -572.9m in the same period of 2000. In other words, foreign loans were mostly repaid in the January-June period of 2000. In the January-June period of 2000, the current account was primarily financed by direct foreign investments which increased by 94.9% (reaching USD 582.2m), while portfolio investments (USD 434.2m) increased by 39.2% compared with the same period last year.

The merchandise trade data for the January-September period of 2000 indicate an increase in both exports (3.7%) and imports (1.7%) compared with the same period of 1999. In 2000, the merchandise trade deficit decreased by 1% compared with 1999. However, cause for concern are the data for September showing that exports fell by 8.5% while imports grew by 4.2% compared with 1999.

## MONEY MARKET AND INTEREST RATES

The average interest rate on the Zagreb Money Market continued to decrease last month. It stood at 5.63% in September and fell down to 4.52% during the last twenty working days of October. Supply far exceeded demand (the average daily supply was 3.2 times higher than the average daily demand). The average interest rate on callable loans, still accounting for 80% of the total daily turnover, amounted to 3.2%. The average daily turnover was almost twice lower than in September and the overnight turnover, as a rule in reverse to the daily turnover, also decreased. These are obvious indications that the liquidity of the financial system is very high.

The banking system giro accounts, together with the purchase of short-term CNB bills and Ministry of Finance treasury bills, manifest this high liquidity. The purchase of CNB bills totaled nearly HRK 2.9bn, while the purchase of Ministry of Finance treasury bills surpassed HRK 2.8bn. The only exception was a moderate decrease in the purchase of foreign currency CNB bills, but it still added up to a considerable HRK 1.7bn. However, what marked this period was the convergence of interest rates charged on kuna CNB bills and treasury bills, clearly demonstrated by the latest auctions' figures. Interest rates on treasury bills were 6.7% on 42-day T-bills, 7.5% on 91-day T-bills and 8.2% on 182-day T-bills. The interest rates on CNB bills were the following: 6.73% on 35-day CNB bills, 7.54% on 91-day CNB bills and 7.98% on 182-day CNB bills. It was the first time that the yield on government securities was lower than the yield on CNB securities. Secondary trading in these securities is negligible, accounting for about 4% of purchases.

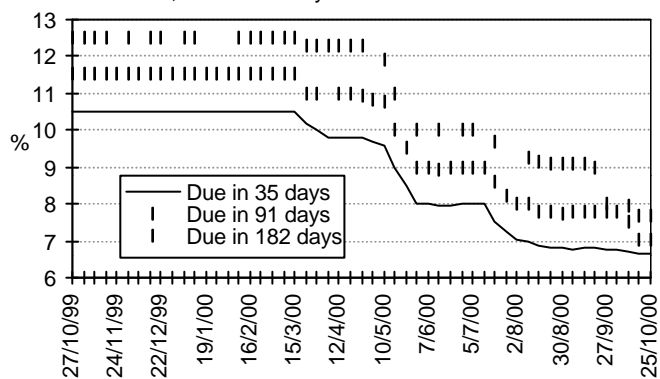

INTEREST RATE ON THE ZAGREB MONEY MARKET,  
Daily data on annual basis

Source: MMZ

INTEREST RATES ON CNB BILLS

On annual basis, on auction days

AVERAGE DMBs' INTEREST RATES ON CREDITS IN KUNA, On annual basis

According to banks' statistical reports, commercial banks' interest rates slightly rose in September compared with August. The average interest rate on total kuna loans went up from 10.3% to 11.0%. However, the amount of newly extended loans diminished, which resulted in an increased weight of short-term household loans with more stable amounts in the long run. The average interest rate on short-term kuna loans to enterprises rose from 6.0% to 6.6%, with the amount of newly granted loans to enterprises being considerably smaller in September. The average interest rate on short-term household loans (current account overdraft facilities) fell to 19.9% and it is expected to go even lower. Interest rates on long-term loans (loans with the currency clause) went up slightly, but not above the level they had already reached. The amount of newly extended long-term household loans (purchase of cars and home loans) increased in September. The average interest rate charged on these loans was 11.9%.

Banks' deposit interest rates decreased, particularly the average interest rate on time deposits. The average interest rate charged on kuna time deposits and foreign currency time deposits went down to 7.4% and 4.7% respectively. Despite the decrease in deposit interest rates the amount of deposits has been on the rise since July last year. Nevertheless, it is obvious that the higher interest rate on kuna deposits has not stimulated their growth, as the amount of newly tied foreign currency deposits was more than five times as high as the amount of newly tied kuna deposits.

These developments in interest rates have affected the interest rate spread, which was wider than in August, but still narrower than in the previous months.

## GOVERNMENT BUDGET

The central government budgetary deficit in September amounted to HRK 351m.

The deficit, together with minor repayments of external debt, was completely financed from domestic sources (by selling Ministry of Finance treasury bills). The total aggregate deficit of the central government in the first nine months of this year built up to as much as HRK 3.7bn. Since the second phase of privatization of Croatian Telecom has been postponed, it is expected that it will increase by another HRK 3bn to the end of this year. It is planned that USD 400m of the foreign bridge loan will be drawn by the end of the year in order to reduce the deficit in a short period.

Collected revenues were HRK 3,784m in September, 2.3% more than in the same month last year. As regards tax revenues, the year-on-year increase in excise revenues amounted to a considerable 41.8%, while all other types of tax revenues were lower on the year-on-year basis. Such substantial excise revenues generated in September were probably a consequence of a good tourist season, but they also partly resulted from realized compensation deals.

September expenditures totaled HRK 4,135m or 9.1% more than in the same month last year. This was the result of a significant increase in expenditures for subsidies and current transfers in September this year.

The expected government budget revision for 2000, as well as the government budget for 2001, should be adopted by the Croatian National Parliament in November.

<sup>1)</sup> The privatisation of Privredna banka Zagreb brought about a one-off decrease in its balance sheet of 2,759.4 million kuna. Loans in f/c to public enterprises diminished on the assets side and at the same time on the liabilities side. Obligations arising from foreign credits diminished on the liabilities side. Loans in f/c to public enterprises are listed under assets item "2.2. Claims on other domestic sectors". Obligations arising from loans in f/c are listed under assets item "2.1 Claims on central government and funds (net)".

<sup>1)</sup> The privatisation of Privredna banka Zagreb brought about a one-off decrease in its balance sheet amount of 2,759.4 million kuna. Loans in f/c to public enterprises diminished on the assets side and at the same time obligations to the Republic of Croatia arising from loans in f/c diminished on the liabilities side. Loans in f/c to public enterprises are listed under assets item "4.2 Claims on enterprises". Obligations to the Republic of Croatia arising from loans in f/c are listed under liabilities item "6. Central government and funds' deposits".

## Classification and Presentation of Data on Claims and Liabilities

Data on financial institutions' claims and liabilities are classified according to institutional sectors and financial instruments. The institutional sectors are: financial institutions, central government and funds, other domestic sectors and foreign sector.

The financial institutions sector includes following sub-sectors: monetary authorities (the central bank), deposit money banks (DMBs), other banking institutions and other financial institutions. The central bank is the Croatian National Bank (CNB). Deposit money banks are institutions the Croatian National Bank has granted permission to perform banking business services in accordance with the Law on Banks, including savings banks during a transition period. Data on DMBs does not include claims and liabilities of banks undergoing bankruptcy procedures, nor former branches of banks with their headquarters in the former Yugoslavia. Other banking institutions comprise housing savings banks, savings and loan cooperatives and investment funds. Other financial institutions are financial institutions not classified as banks or other banking institutions (for example insurance companies)

The central government and funds comprises government institutions including Croatian Roads Authority, State Agency for Deposit Insurance and Bank rehabilitation and Croatian Guarantee Agency, and following central government funds: Croatian Health Insurance Institute, Croatian Pension Insurance Institute, Croatian Employment Service, Croatian Privatization Fund, Public Water Management Fund and Croatian Bank for Reconstruction and Development. Other domestic sectors are local government authorities and local funds, public and private companies and households, including craftsmen and non-profit institutions. In some tables other domestic sectors are divided into following sub-sectors: local government (which comprises local government authorities and local funds), public and private enterprises, and households (including craftsmen and non-profit institutions).

Foreign sector includes foreign legal entities and individuals.

All data on claims and liabilities refer to balances at the end of the reporting period. Foreign exchange items are reported in their kuna equivalent at the midpoint CNB exchange rate at the end of the reporting period.

### Table A1: Monetary and Credit Aggregates

The table shows data on some basic monetary and credit aggregates, including their monthly growth rates. In September 1999, all the monetary aggregates were revised. In previous publications of the CNB, data on claims and obligations of savings banks were not included in the compilation of the monetary aggregates.

*Reserve money* has been taken over in its entirety from the Monetary Authorities Accounts (Table C1).

*Money (M1)* is defined in the same way as the corresponding item in the Monetary Survey (Table B1). It comprises cash outside banks, deposits with CNB by other banking institutions and other domestic sectors as well as DMBs' demand deposits. *Money (M1a)* comprises currency outside banks and DMBs' demand deposits, increased by the demand deposits of the central government and funds with DMBs.

*Broadest money (M4)* comprises Money (M1), savings and time deposits, foreign currency deposits as well as bonds and money market instruments (all above components taken over from the Monetary Survey (Table B1).

*Net domestic assets* are defined as a difference between total liquid assets and foreign assets (net).

*Domestic credit* comprises DMBs' claims on other domestic sectors, other banking institutions and other financial institutions.

In May 1999 banks bankruptcy proceedings have been initiated over few banks so their assets and liabilities are excluded from monetary statistics. In April 1999 those banks' share in Monetary Aggregate M1 amounted to 259.3 million kuna and in Monetary Aggregate M4 amounted to 4,035.8 million kuna. Data for June 1999 are comparable to data for July 1999 if Bank Placements are increased by 3,513.5 million kuna.

### Table B1: Monetary Survey

The monetary survey shows consolidated data from the Monetary Authorities Accounts (Table C1) and DMB's Accounts (Table D1).

*Foreign assets (net)* are the difference between total foreign assets and total foreign liabilities of the CNB and DMBs.

*Domestic credit* is the sum of corresponding items from Monetary Authorities Accounts and DMB's accounts. Claims on central government and funds are reported on the net basis, i.e. decreased by central government and funds' deposits with the CNB and DMBs.

*Money* is the sum of currency outside banks, deposits by other banking institutions with the CNB, deposits by other domestic sectors with the CNB and

---

DMB's demand deposits (item *Demand deposits* in DMB's Accounts, Table D1).

The items *Savings and time deposits*, *Foreign currency deposits* as well as *Bonds and money market instruments* are entirely taken over from the DMB's Accounts, while the item *Restricted and blocked deposits* represents the sum of corresponding items from the Monetary Authorities Accounts (excluding DMB's blocked deposits with the CNB) and DMB's Accounts. *Other items (net)* are unclassified liabilities decreased by unclassified assets.

In May 1999 banks bankruptcy proceedings have been initiated over few banks so their assets and liabilities are excluded from monetary statistics. In April 1999 those banks' share in total amounted to 4,296.3 million kuna. Data for June 1999 are comparable to data for July 1999 if Claims on other domestic sectors and Other items (net) are increased by 3,513.5 million kuna.

#### **Table B2: Number of Reporting Deposit Money Banks and Savings Banks and Their Classification by Size**

The table shows the total number of DMBs and savings banks which report monthly to the CNB. Their operation is shown in the DMB's accounts.

Special reporting requirements applied to savings banks until June 1995. Savings banks were not legally obliged to report on their operations, so that data up to June 1995 only to those savings banks that reported voluntarily to the CNB. From July 1995 on, the data cover all Savings Banks. In accordance with the Law on Banks, savings banks must meet the conditions set out in the law by December 31, 2001, or they will be liquidated.

The table also shows the classification of reporting DMBs and savings banks according to their total assets.

In May 1999 banks bankruptcy proceedings have been initiated over few banks so their assets and liabilities are excluded from monetary statistics.

#### **Table C1: Monetary Authorities Accounts**

The table reports data on claims and liabilities by monetary authorities. In September 1999, the data were revised, with savings banks being transferred for the subsector other banking institutions to the subsector banks. The whole data series has been revised accordingly.

*Foreign assets* include the following forms of foreign currency and kuna claims on foreign legal entities and individuals: monetary gold, holdings of

special drawing rights, foreign cash in vaults, reserve position in the International Monetary Fund, current account balances with foreign banks, time deposits in foreign banks, foreign currency security investments and other claims. *Claims on central government and funds* are loans and overdue claims on the budget of the Republic of Croatia. *Claims in kuna* are short-term loans granted for the purpose of overcoming timing differences between incoming revenues and execution of budgetary expenditures, long-term loans granted by special decrees by the government of the Republic of Croatia, and overdue claims on the State Budget for liabilities to the IMF and foreign banks. *Claims in foreign currency* was a counter-entry to the liability to the IMF based on the succession of membership in that institution.

*Claims on other domestic sectors* are loans and overdue claims on other domestic sectors, including banks in bankruptcy proceedings.

*Claims on DMBs* are credit to DMBs, deposits by the CNB with DMBs and overdue claims on DMBs. *Credit to DMBs* is split according to the type of financial instruments. *Refinancing of DMBs* include loans granted within general and selective quotas up to the end of 1993, as well as advances to DMBs for performing currency exchanges. Refinancing loans granted within the general and selective quotas were paid back in their entirety by the end of April 1994. In July 1994, they were formally revoked. Item *Lombard credits* comprises credits to DMBs for regular maintaining of the day-to-day liquidity, which were replaced by lombard credits in December 1994. Short-term liquidity loans, which have been granted since the beginning of 1999, also serve to bridge liquidity problems. Other credits include interventive credits, special credits for bridging liquidity problems granted in the past (initial credits, prerenhabilitation credits) and due but unpaid credits. Overdue claims on DMBs comprise settlement account overdrafts (until mid-1994) and banks' failure to correctly and promptly allocate and maintain statutory reserve requirements.

Since May 1999 claims on other domestic sectors include overdue claims on banks over which bankruptcy proceedings have been initiated. Due to the reclassification of savings banks from the subsector other banking institutions to the subsector banks, data for Claims on DMBs and Claims on other banking institutions were revised.

*Reserve money* consists of currency outside banks, cash in DMBs' vaults, DMBs' deposits with the CNB, other banking institutions' deposits and other domestic sectors' deposits with the CNB. *DMBs' deposits* are: settlement account balances, statutory reserves deposited on a special account with the CNB

---

as well as CNB bills on obligatory basis. *Deposits by other banking institutions* are: settlement account balances of housing savings banks. *Deposits by other domestic sectors* are: other domestic sectors' giro account balances which, on the basis of legal acts are deposited at the Croatian National Bank.

*Restricted and blocked deposits* include required foreign exchange reserves, restricted deposits and blocked foreign exchange deposits. Banks and savings banks are required to place foreign exchange reserve deposits in accounts at the Croatian National Bank on the basis of certain foreign exchange deposits they hold. Restricted deposits are kuna funds set aside on the basis of court order or legal regulation and deposits of banks over which bankruptcy proceedings have been initiated. Blocked foreign exchange deposits are funds that were set aside in special accounts at the Croatian National Bank for repaying unpaid amounts due to foreign creditors.

*Foreign liabilities* include use of IMF credits, liabilities to international financial institutions and foreign banks.

*Central government and funds deposits* are demand deposits and foreign currency deposits of the Republic of Croatia and republic funds with the CNB, and CNB bills purchased by central government institutions.

*CNB bills* are CNB bills on a voluntary basis in kuna and in f/c excluding CNB bills voluntarily purchased by central government institutions.

*Capital accounts* include reserves, provisions and the income and cost accounts.

*Other items (net)* are unclassified liabilities decreased by unclassified assets of the CNB's accounts.

Due to the reclassification of savings banks from the subsector other banking institutions to the subsector banks, data for Currency outside banks,

DMB's cash in vaults, DMB's deposits and Deposits of Other Banking Institutions were changed.

Since May 1999 including deposits of banks over which bankruptcy proceedings have been initiated.

#### **Table D1: Deposit Money Banks' Accounts**

DMBs accounts include data on DMBs' claims and liabilities. DMBs' mutual claims and liabilities are consolidated. In September 1999, the data was revised to include savings banks. The whole data series was revised accordingly.

*Required reserves* held at the Central Bank include kuna and foreign exchange reserves. Kuna reserves include vault cash and kuna funds held in accounts at the Central Bank. Foreign exchange reserves

include foreign exchange held in accounts at the Central Bank.

*Foreign assets* are the following forms of kuna and foreign currency claims on foreign legal entities and individuals: foreign cash in vaults, deposits with foreign banks (including loro letters of credit and other collateral), securities, loans, equities.

*Claims on central government and funds* are the following forms of claims in kuna and foreign currency: securities and loans. The main forms of claims on the central government are shown separately: bonds issued in accordance with the Decree Law on the Transformation of Household Foreign Exchange Savings Deposits with Banks into the Public Debt of the Republic of Croatia, and bonds issued in accordance with the Law on the Issue of Bonds for the Restructuring of the Economy of the Republic of Croatia.

*Claims on other domestic sectors* include the following claims in kuna and foreign currency: money market instruments, bonds, loans (including acceptances), and equities.

The same forms of kuna and foreign currency claims are included in claims on other banking institutions and other financial institutions, with one difference: *Claims on other banking institutions* also include deposits with those institutions.

The items *Demand deposits, Savings and time deposits, Foreign currency deposits* as well as *Bonds and money market instruments* comprise banks' liabilities to other domestic sectors, other banking institutions and other financial institutions.

*Demand deposits* include giro and current accounts balances and other transferable deposits, minus currency in the payment system, i.e. checks in banks' vaults and checks in collection.

*Savings and time deposits* are: kuna sight deposits as well as kuna time and notice deposits.

*Foreign currency deposits* are: foreign currency sight deposits as well as foreign currency time and notice deposits.

*Bonds and money market instruments* are: banks' liabilities for securities issued (net) and loans obtained.

*Foreign liabilities* comprise the following forms of kuna and foreign currency liabilities to foreign legal entities and individuals: giro and current accounts, savings deposits (including loro letters of credit and other forms of collateral), time deposits, loans received and liabilities due. *Central government and funds' deposits* are all forms of DMBs' kuna and foreign currency liabilities (except restricted and blocked deposits) to the central government and funds.

---

*Credit from central bank* comprises loans obtained from the CNB and deposits by the CNB with DMBs. Repurchase of securities is also considered and treated as loan.

*Restricted and blocked deposits* comprise the following DMBs' liabilities: kuna and foreign currency restricted deposits by other domestic sectors, other banking institutions, other financial institutions, central government and funds as well as foreign legal entities and individuals; and households' blocked foreign currency deposits, regulated by the Decree Law on the Transformation of Household Foreign Exchange Savings Deposits with Banks into the Public Debt of the Republic of Croatia

*Capital accounts* are share capital, profit or less in the current year, retained profit (loss), required reserves, other capital reserves and provisions for identified and unidentified losses

*Other items (net)* are unclassified liabilities decreased by unclassified assets.

In May 1999 banks bankruptcy proceedings have been initiated over few banks so their assets and liabilities are excluded from monetary statistics. In April 1999 those banks' share in total DMBs' accounts amounted to 5 701.4 million kuna. On the assets side, most significant were: Claims on enterprises (4,378.7 million kuna) and Claims on households (701.4 million kuna). On the liabilities side, most significant were: Foreign currency deposits (3,443.7 million kuna), Foreign liabilities (1,024.6 million kuna) and Capital accounts (854.6 million kuna). Beginning in July 1999, the total amount of provisions for identified losses is shown within the Capital accounts line. Data for June 1999 are comparable to data for July 1999 if Claims on other domestic sectors and Capital accounts are increased by 3,513.5 million kuna. Other items have been corrected by small amounts.

#### **Tables D2-D12**

This group of tables (with the exception of Table D5) represents an elaborate presentation of appropriate items of claims and liabilities of DMBs' Accounts (Table D1).

#### **Table D2: Deposit Money Bank's Foreign Assets**

This table shows DMBs' claims on foreign legal entities and individuals.

*Foreign assets* of DMBs comprise foreign assets in kuna and foreign currency.

*Claims on foreign banks* and *Claims on foreign nonbanks* (total and by financial instruments)

are shown separately within both foreign assets in kuna and in foreign currency.,m

In May 1999 banks bankruptcy proceedings have been initiated over few banks so their assets and liabilities are excluded from monetary statistics. In April 1999 those banks' Foreign Assets amounted to 402.3 million kuna. Through June 1999, some household f/c savings deposits were included in Demand deposits and f/c savings deposits.

#### **Table D3: Deposit Money Banks' Claims on the Central Government and Funds**

The table shows kuna and foreign currency DMBs' claims on the central government and funds.

*Bonds* arising from blocked foreign currency savings deposits are issued in accordance with the Decree Law on the Transformation of Household Foreign Exchange Savings Deposits with Banks into the Public Debt of the Republic of Croatia

*Big bonds* are those issued in accordance with the Law on the Issue of Bonds for the Restructuring of the Economy of the Republic of Croatia.

*Other claims* are all other DMBs' kuna and foreign currency claims on central government and funds: securities, loans and equities.

In May 1999 banks bankruptcy proceedings have been initiated over few banks so their assets and liabilities are excluded from monetary statistics. In April 1999 those banks' Claims on Central Government and Funds amounted to 17.8 million kuna.

#### **Table D4: Deposit Money Bank's Claims on Other Domestic Sectors**

The table shows DMBs' kuna and foreign currency claims on other domestic sectors, classified according to financial instruments: money market instruments, bonds, loans and advances (including acceptances and purchased claims), and equities and arrears.

Since October 1994, foreign currency loans can be granted only when DMBs simultaneously borrow abroad in their own name and for the account of the end-user.

In May 1999 banks bankruptcy proceedings have been initiated over few banks so their assets and liabilities are excluded from monetary statistics. In April 1999 those banks' Claims on Other Domestic Sector amounted to 5,088.0 million kuna. Data for June 1999 are comparable with data for July 1999 if the item Loans and Advances under Claims in kuna is increased by 2,904.3 million kuna, the item Shares and Participations is decreased by 520.3 million kuna,

---

and if the item Loans and Advances under Claims in f/c is increased by 1,129.4 million kuna.

**Table D5: Distribution of Deposit Money Banks' Loans by Domestic Institutional Sectors**

The table shows data on kuna and foreign currency loans granted by DMBs to domestic sectors, including acceptances, financial leases, payments made on the basis of guarantees and similar instruments and purchased claims.

In May 1999 banks bankruptcy proceedings have been initiated over few banks so their assets and liabilities are excluded from monetary statistics. In April 1999 those banks' loans amounted to 4,463.3 million kuna. Data for June 1999 are comparable with data for July 1999 if total loans in kuna are increased by 2,972.6 million kuna, and total loans in f/c are increased by 840.9 million kuna.

**Table D6: Demand Deposits with Deposit Money Banks**

The table shows demand deposits with DMBs, classified by domestic institutional sectors.

Demand deposits are the sum of other domestic sectors', other banking institutions' and other financial institutions' giro and current accounts balances, minus currency in the payment system, i.e. by amount of checks in banks' vaults and checks in collection. Banks obligations arising from kuna payment instruments issued are included in the household sector.

In May 1999 banks bankruptcy proceedings have been initiated over few banks so their assets and liabilities are excluded from monetary statistics. In April 1999 Demand deposits with those banks amounted to 259.3 million kuna.

**Table D7: Time and Savings Deposits with Deposit Money Banks**

The table shows *Kuna savings and time deposits* by other domestic sectors, other banking institutions and other financial institutions with DMBs.

In May 1999 banks bankruptcy proceedings have been initiated over few banks so their assets and liabilities are excluded from monetary statistics. In April 1999 Time and Savings Deposits with those banks amounted to 323.7 million kuna. In July 1999, certain deposits of local government, government, enterprises, other banking institutions and other financial institutions were reclassified from savings to time deposits.

**Table D8: Foreign Currency Deposits with Deposit Money Banks**

The table shows foreign currency savings and time deposits by other domestic sectors, other banking institutions and other financial institutions with DMBs. Foreign currency savings deposits are all foreign currency sight deposits, while foreign currency time deposits also include foreign currency notice deposits.

In May 1999 banks bankruptcy proceedings have been initiated over few banks so their assets and liabilities are excluded from monetary statistics. In April 1999 Foreign Currency Deposits with those banks amounted to 3,443.7 million kuna.

**Table D9: Bonds and Money Market Instruments**

The table shows DMBs liabilities for securities issued (net) and loans received from other domestic sectors, other banking institutions and other financial institutions.

*Money market instruments (net)* comprise DMBs net liabilities for CNB bills, bills of exchange (issued and accepted) and other securities issued.

*Bonds (net)* comprise DMBs net liabilities for kuna and foreign currency bonds issued, as well as debt and hybrid instruments that under certain conditions may be included in the supplementary capital of banks.

*Other domestic borrowings* comprises loans received, reported total and classified by institutional sectors.

In May 1999 banks bankruptcy proceedings have been initiated over few banks so their assets and liabilities are excluded from monetary statistics. In April 1999 those banks' Bonds and Money Market Instruments amounted to 9 million kuna. In July 1999, certain debt and hybrid instruments were reclassified from Time and notice deposits to Bonds (net). The amount reclassified was 3,513.5 million kuna.

**Table D10: Deposit Money Banks' Foreign Liabilities**

The table shows DMBs' total foreign currency and kuna liabilities to foreign legal entities and individuals, with the exception of restricted kuna and foreign currency deposits by foreign legal entities and individuals.

DMBs' foreign liabilities comprise foreign currency liabilities and foreign kuna liabilities.

---

Within foreign kuna and foreign currency liabilities, liabilities to foreign banks are reported separately from liabilities to foreign nonbanks (total and by financial instruments)

In May 1999 banks bankruptcy proceedings have been initiated over few banks so their assets and liabilities are excluded from monetary statistics. In April 1999 those banks' Foreign Liabilities amounted to 1,024.6 million kuna.

#### **Table D11: Central Government and Funds Deposits with Deposit Money Banks**

The table reports total DMBs' kuna and foreign currency liabilities to the central government and funds, with the exception of restricted (kuna and foreign currency) deposits by the central government and funds with DMBs.

Kuna and foreign currency deposits by Republic of Croatia and republic funds are shown separately. Kuna deposits comprise demand deposits, savings deposits, kuna time and notice deposits, and kuna loans obtained from the central government and funds. Foreign currency deposits comprise foreign currency sight deposits, as well as savings deposits, foreign currency time and notice deposits.

In May 1999 banks bankruptcy proceedings have been initiated over few banks so their assets and liabilities are excluded from monetary statistics. In April 1999 Central Government and Funds Deposits with those banks amounted to 193.5 million kuna.

#### **Table D12: Restricted and Blocked Deposits with Deposit Money Banks**

The table shows restricted and blocked deposits by the central government and funds, other domestic sectors, other banking institutions, other financial institutions and foreign legal entities and individuals with DMBs.

*Restricted and blocked deposits* include two categories of deposits: restricted (kuna and foreign currency) deposits and blocked foreign currency deposits.

*Blocked foreign currency deposits* include households' foreign currency deposits regulated by the Decree Law on the Transformation of Household Foreign Exchange Savings Deposits with Banks into the Public Debt of the Republic of Croatia

In May 1999 banks bankruptcy proceedings have been initiated over few banks so their assets and liabilities are excluded from monetary statistics. In April 1999 Restricted and Blocked deposits with those banks amounted to 39.9 million kuna. In July 1999, data on blocked deposits of central government and of enterprises were revised.

#### **Table E1: Housing Savings Banks' Accounts**

Housing savings banks' accounts include data on claims and liabilities of the Croatian housing savings banks. All housing savings banks' claims and liabilities refer exclusively to domestic sectors.

Housing savings banks' required reserves held at the Central Bank include kuna vault cash and kuna funds held in accounts at the Central Bank.

Claims on central government and funds are claims in kuna on the Republic of Croatia and republic funds.

Claims on other domestic sectors include kuna loans to local government and households.

Claims on banks include loans extended to banks, as well as deposits with banks.

The item Time deposits includes local government and households time deposits.

Bonds and money market instruments are housing savings banks' liabilities for securities issued (net) and loans obtained.

Capital accounts include share capital, profit or loss in the current year, retained profit (loss), required reserves, other capital reserves, and provisions for identified and unidentified losses.

Other items (net) are unclassified liabilities decreased by unclassified assets.

#### **Table F1 - Credit Rates of Croatian National Bank**

The table shows interest rates used by the CNB to calculate and charge interest on loans and on all other claims.

Lending CNB interest rates are being set by special decrees of the Council of the Croatian National Bank, on annual basis. Exceptionally, from June 1995 to September 11, 1996 interest rate charged by CNB on lombard credits has been 1.5 percentage point higher than the weighted average interest rate on CNB bills on voluntary basis (which serve as collateral for lombard credits) in cases when the weighted average interest rate was higher than 16.5%. Congruently, from June 1995 to August 1996 the table reports weighted average interest rate on lombard credits. Interest rate in September 1996 is calculated as weighted average of interest rate applied in first 10 days of September 1996

(according to the regime mentioned above) and fixed interest rate applied since September 11, 1996.

Time series presented in the table contain certain breaches, due to changes in CNB's monetary policy instruments. Consequently, until November 1994, column 4 shows interest rates on regular credits for maintenance of day-to-day liquidity, which were granted based on securities portfolio, and from December 1994 onwards, interest rates on lombard credits.

Furthermore, data shown in column 6 refer, until September 1994, to interest rates on special credits for savings deposits' payments and for payments from households' current accounts, and from October 1994 until September 1997 to interest rates on daily credits for savings deposits and current accounts in kuna. Daily credits, as opposed to special credits, are paid back on the same day. In October 1997, this instrument was replaced by daily credits for overcoming short-term liquidity problems that are collateralized by CNB bills. Since December 16, 1998 this credit is incorporated in lombard credit, applying different interest rate for its usage within one day.

Data shown in column 7 refer, until December 1994 to interest rate on initial credits, and since March 18, 1998 to credits for overcoming illiquidity problems of banks under evaluation for entry into rehabilitation and restructuring procedures and since February 1999, to interest rates on short-term liquidity credits. Since December 1999 data show interest rates on short term liquidity credit over 3 months which is 1 percentage point higher than interest rate on lombard credits. Interest rate on short-term liquidity credit up to 3 months is 0,5 percentage point higher than interest rate on lombard credits.

Interest rates reported in column 8 refer to the use of statutory reserves, which was being used by the banks (in prescribed percentage) to maintain day-to-day liquidity until September 1994. Interest rates paid until September 1994 on the use of statutory reserve funds in amount above prescribed and/or for longer period than allowed are shown in column 9. Since October 1994, interest rates paid on the use of statutory reserve funds are the same as those used for any other failure to fulfill financial obligations, in accordance with the late interest regulations (shown in column 10).

Until June 1994 the same interest rate was applied to funds used above amounts available on giro accounts and to inaccurately calculated or under-appropriated statutory reserves (reported in column 9). From July to September 1994, interest rate applied to the use of those funds was 21%, and since October 1994 the same interest rates have been applied as for

other failures to fulfill financial obligations, shown in column 10.

#### **Table F2: Deposit Rates of Croatian National Bank**

The table shows interest rates paid by the CNB on funds deposited with the CNB as well as on securities issued.

Interest rates paid by the CNB for appropriated statutory reserve funds are being set by the Council of the CNB. Until 7 October 1993, CNB was setting different exchange rates for statutory reserve funds based on savings and time deposits. Therefore, for that period the table reports weighted average interest rate on appropriated statutory reserve funds (column 3). From 8 October 1993 until the end of February 1994, CNB paid no interest on appropriated statutory reserve funds, and since March 1994, uniform rate has been applied to these funds.

Interest rates on obligatory CNB bills are set by the Council of the CNB.

Until October 1993, interest rates on CNB bills on voluntary basis were also set by the Council of the CNB, while since November 1993, they have been set at CNB bills' auction sales. Congruently, since November 1993, columns 5, 6 and 7 report weighted average interest rates attained in auctions of the CNB bills.

Until October 1994, interest rates on CNB bills on voluntary basis due in 30 and 90 days are reported in columns 6 and 7 respectively.

Since April 1998 column 9, 10, 11 report weighted average interest rates of the voluntary CNB bills in EUR and USD (until December 1998 in DEM and USD), due in 63, 91, 182 and 365 days attained in CNB bill's auctions as a weighted average of subscribed amounts in those two currencies.

#### **Table F3: Deposit Money Banks' Reserves on Obligatory Basis**

This table shows data on monthly averages of day-to-day balances of DMB's required reserves with the CNB. Savings banks are included beginning in July 1999, and the earlier data have not been revised.

*Reserve requirement* (column 3) represents the prescribed amount of funds banks are required to deposit on a special statutory reserve account with the CNB, or to maintain (in average) on their settlement accounts or in vaults. This amount corresponds with the statutory reserve instrument of January 1995, while until December 1994 it comprised two instruments:

---

statutory reserves and liquid assets requirement - LAR (except for the part in which banks were conforming to this requirement by registering CNB bills on voluntary basis).

Column 4 shows weighted average reserve requirement ratio as a percentage of the reserve requirement (column 3) in the reserve base. Column 5 shows the portion of the reserve requirement banks are required to deposit on a special statutory reserves account with the CNB (until December 1994 this amount corresponds with the statutory reserves instrument, while since January 1995 until May 1998, banks have been required to deposit at least 75% of the total reserve requirement on a special account with the CNB and since May 1998 at least 60% of the amount).

Column 6 shows the percentage of the statutory reserves deposited with the CNB in the total reserve requirement.

Column 7 shows the total amount of other obligatory deposits with the CNB, including obligatory CNB bills, those voluntary CNB bills used by banks to maintain the prescribed minimal liquidity (LAR), special statutory reserves (until July 1995) and statutory reserves on f/c deposits, f/c credits from foreign banks and guaranties and f/c credits from foreign banks.

Column 8 shows the total reserve requirement as a sum of reserve requirement and other deposits with the CNB on obligatory basis. Column 9 shows the percentage of total reserve requirement in the reserve base.

Column 10 shows weighted average remuneration rate for all forms of immobilized funds (i.e. for all components of total reserve requirement).

Column 11 shows the use of obligatory reserves, which includes use of appropriated statutory reserve funds (authorized and unauthorized), inaccurately calculated statutory reserves, non-maintenance of the prescribed minimal liquidity, i.e. (since January 1995) non-maintenance of the minimal average settlement account and vault balance (determined in accordance with the calculation of statutory reserves), unregistered amount of the CNB bills on obligatory basis and inaccurately calculated special statutory reserves (until July 1995) and inaccurately calculated statutory reserves on f/c deposits, f/c credits from foreign banks and guaranties and f/c credits from foreign banks.

**Table F4: Deposit Money Banks' Liquidity Indicators**

The table reports monthly averages of day-to-day balances of some indicators of DMBs' liquidity. Savings banks are included beginning in July 1999. The past data has not been revised.

Column 3 shows free reserves, defined as bank's total reserves (on settlement accounts and in vaults) decreased by the minimal average settlement account and treasury balance, as prescribed by instruments of the CNB (until December 1994 by the requirement for banks' minimal liquidity, and since January 1995 by statutory reserve requirement).

Column 4 shows the primary liquidity ratio as a percentage of monthly day-to-day free reserves averages in monthly day-to-day averages of deposits which constitute the reserve base.

Column 5 shows the monthly average of day-to-day balances of secondary liquidity sources used. Secondary liquidity sources comprise: use of statutory reserves (until October 1994), regular loans for maintenance of day-to-day liquidity (until November 1994), use of funds exceeding those available on the bank's giro account (until October 1994), special credits for overcoming illiquidity problems (initial credits, credits for overcoming illiquidity problems of banks under evaluation for entry into rehabilitation and restructuring procedures), lombard credits (since December 1994), intervention credits for overcoming illiquidity (since October 1994), short-term liquidity credits (since February 1999) as well as outstanding liabilities due to the CNB.

Column 6 reports monthly average of day-to-day balances of CNB bills on voluntary basis in kuna (until December 1994, this amount is decreased by the portion of voluntarily registered CNB bills used by banks to maintain the prescribed minimal liquidity).

Column 7 reports monthly average of day-to-day balances on CNB bills on voluntary basis in foreign currency (EUR and USD).

**Table G1: Deposit Money Banks' Credit Rates**

The table contains weighted averages of DMBs' monthly interest rates on kuna and foreign currency loans, reported on a yearly basis. Savings banks are not covered.

Columns 3 and 4 show interest rates on the interbank, daily and overnight money markets, according to information received from Money Market Zagreb. Data on DMBs' interest rates on kuna and foreign currency credits are based on DMBs' periodic reports. Basis for calculation of weighted averages are amounts of credits bearing corresponding interest rates, which were disbursed during the reported month, with

the exception of interest rates on giro and current accounts credit lines, for which weighted averages were calculated based on the balance of these loans at the end of the reported month.

Column 5 shows interest rates on total (short-term and long-term) kuna credits not indexed to foreign currency. Interest rates on short-term kuna credits (shown in column 6) also include interest rates on discounted short-term securities (not indexed to foreign currency), weighted based on their face value.

Columns 8, 9, 10 shows interest rates on total (short-term and long-term) kuna credits indexed to foreign currency, including interest rates on discounted short-term securities indexed to foreign currency.

Interest rates on foreign currency credits (columns 11, 12 and 13) refer to credits released in Deutsche Mark or US dollars in a reported month, while weighted averages are calculated based on their kuna equivalent using current exchange rate. Credits released in other currencies are not included in this table.

Relative significance of particular interest rates (reported in the last line of the table) refers to data for the last period included in the table. It is calculated as a percentage of corresponding credit category (to which exchange rates apply) in total credits included in the calculation of weighted averages for that period.

#### **Table G2: Deposit Money Banks' Deposit Rates**

The table shows weighted averages of monthly DMBs' interest rates on kuna and foreign currency deposits, reported on a yearly basis. Savings banks are not covered.

Data on interest rates on DMBs' deposits are obtained from DMBs' periodic reports.

Column 3 reports weighted averages of monthly interest rates on total kuna deposits (sight deposits, savings and time deposits) not indexed to foreign currency. Weighted averages of monthly interest rates on total kuna deposits indexed to foreign currency are reported in column 6.

Interest rates on foreign currency deposits refer to deposits received in Deutsche Mark or US dollars, while weighted averages are calculated based on their kuna equivalent using current exchange rate. Deposits received in other foreign currencies are not included in the data reported in this table.

The basis for calculation of weighted averages is the end-of-month balance of deposits. Kuna and foreign currency time and savings deposits are exceptions; for them weighted averages are calculated (since July 1995) based on the amounts of those deposits received during the reported month. Weighted averages of interest rates

on total kuna and foreign currency deposits (columns 3 and 7) are weighted by the end-of-month balances of all categories included in the calculation.

Kuna and foreign currency deposits used as collateral for credit are included, while restricted deposits (deposits used for payment of imports and other restricted deposits) are not included into the calculation of weighted averages.

#### **Table G3: Deposit Money Banks' Trade with Foreign Exchange**

Data on trade with foreign exchange between DMBs comprise transactions of purchase and sale of foreign exchange on domestic foreign currency market. The transactions are classified by categories of participants (legal entities or individuals, banks, CNB). Source of data are DMBs periodic reports on trading with foreign exchange, sent to the CNB on a regular basis. The amounts are stated in Euro (EUR), converted from other foreign currencies using the CNB's midpoint exchange rate (reporting period average). Other Croatian National Bank transactions include foreign exchange sales and purchases on behalf of Ministry of Finance.

#### **Table H1-H5: Balance of Payments**

The balance of payments is compiled in accordance with the recommendations of the International Monetary Fund (Balance of Payments Manual, Fifth Edition, 1993). Data sources include: reports of the Central Bureau of Statistics, the Croatian Health Insurance Institute, the Payments Institute, Commercial banks, enterprises and the Croatian national Bank, as well as research by the Tourism Institute and the Croatian National Bank.

Balance of Payments of the Republic of Croatia data are recorded in US dollars (USD) and national currency (HRK). The balance of payments in both reporting currencies is compiled using the same sources of information and the same principles regarding the scope of transactions covered and the procedures for composing particular positions. Depending on the sources of data available, conversion of transaction values from the original currencies into reporting currencies is performed:

- a) by applying the midpoint exchange rate of the Croatian National Bank on the date of the transaction;
- b) by applying monthly and quarterly average midpoint exchange rates of the Croatian National Bank;
- c) by applying the average monthly exchange rate versus the US dollar when assessing transactions representing the difference between balances evaluated

---

according to the exchange rate applicable at the end of the period.

Exports and Imports are shown on an f.o.b. basis. The basic data source for these items is the Report of the Central Bureau of Statistics on merchandise foreign trade of the Republic of Croatia. The data of the Central Bureau of Statistics are modified in accordance with the compilation method of the IMF: merchandise imports, which are shown in the Central Bureau of Statistics' report in c.i.f. terms, are corrected to f.o.b. (corrected for classification) and both imports and exports are corrected so that the coverage includes goods defined as such in the balance of payments methodology but not included in the statistics on merchandise trade.

Regarding exports, beginning with the first quarter of 1999, coverage has been increased via estimates of purchases by individual foreign travelers in the Republic of Croatia. These estimates are based on the Survey on Consumption of Foreign Travelers in Croatia carried out jointly by the Croatian National Bank and the Institute for Tourism. Regarding imports, the difference between c.i.f. and f.o.b. is estimated on the basis of research studies of the CNB on samples of the largest importers, and the resulting value of f.o.b. imports is adjusted on the basis of foreign payments for repairs of ships as well as supply purchases in foreign ports, as well as estimates of the purchases of individual Croatian citizens abroad, obtained via a research study of the CNB. From the first quarter of 1999 on, estimates are based on the Survey on Consumption of Domestic Travelers Abroad carried out jointly by the Croatian National Bank and the Institute for Tourism. For the 1993 to 1996 period, merchandise imports from the merchandise trade statistics are modified by estimates of imports in duty-free zones (prepared by the CNB), while from 1997 on, data on these imports are included in the merchandise trade statistics.

Beginning with the first quarter of 1999, income and expenditures from transport services are compiled on the basis of data from a new CNB research project on international transport services, with two exceptions: first, income and expenditures from road transport are compiled via data on realized foreign payments, and second, a portion of expenditures on transport services for transport of goods imported to the Republic of Croatia are based on a survey of the largest Croatia importers. This survey is carried out in the context of the reformulation of data on imports from a c.i.f. to an f.o.b. basis.

Income from travel-tourism is calculated on the basis of the Survey on the Consumption of Foreign Travelers in Croatia starting in the first quarter of 1999.

This survey is carried out jointly by the Croatian National Bank and the Institute for Tourism. Additional data from the Croatian Health Insurance Institute on health services provided to non-residents is also used.

Expenditures from travel-tourism is, starting in the first quarter of 1999, based on the results of the Survey on the Consumption of Domestic Travelers Abroad, and is supplemented by data on foreign exchange expenditures of the Croatian Health Insurance Institute.

Other services includes data from the foreign payments statistics which related to investment projects abroad, customs clearing services, representation fees, insurance services, postal services and the costs of Croatian representative offices overseas. To this category is added a part of unclassified services which can be explained as a linear trend, as well as estimates of the expenditures of international peacekeeping and humanitarian missions for goods and services in the Republic of Croatia, based on research by the Croatian National Bank.

The income account includes data from the foreign payments statistics on payments on the basis of interest, data from CNB research on income paid from foreign direct and portfolio investment of the private sector, Croatian National Bank data and Payments Institute data on income paid from foreign portfolio investment in the official sector and estimates of the factor income of resident peacekeeping and humanitarian missions in the Republic of Croatia, based on research of the Croatian National Bank. For the period 1993 to 1996, data on foreign direct investment do not include data on retained profit.

Current transfers to the government include data from the foreign payments statistics on the payment of pensions and other social transfers, monetary support and gifts, as well as data from the merchandise trade statistics of the Republic of Croatia on imports and exports of goods without payment obligation.

Income from transfers to other sectors includes data from the foreign payments statistics on the total value of foreign exchange transfers received from abroad. To this is added an estimate for unregistered transfers. This estimate is seen as 15% of the difference between the unexplained foreign exchange inflows and outflows of the household sector.

The foreign exchange receipts of the household sector include the purchase of foreign cash at exchange offices from residents and deposits of foreign cash in foreign exchange accounts of residents at domestic banks. Payments made abroad and income earned through business trips, education and training,

tourist receipts and other tourist income are added to this. The total inflow is decreased by: estimated tourist income and estimates of purchases by individual foreign tourists in the Republic of Croatia (Survey on the Consumption of Foreign Tourists in Croatia carried out jointly by the Croatian National Bank and Institute of Tourism) plus consumption of goods and services by members of peacekeeping and humanitarian missions in the Republic of Croatia.

The foreign exchange expenditures of the household sector include purchases of foreign cash by exchange offices and withdrawals of foreign cash from households' foreign exchange accounts at domestic banks. Realized foreign payments and expenditures from business trips, education and training, tourist payments and other tourist expenditures are added to this. The total outflow is decreased by: individuals' expenditures for goods abroad and expenditures for foreign tourism by residents.

Expenditures on transfers of other sectors is based on foreign payments data on the total value of foreign exchange transfers abroad.

Capital accounts are compiled from data on realized foreign payments by migrants (income and expenditures).

Foreign direct and portfolio investment includes data on those investments from the research of the CNB and data from the securities register of the official sector (Central bank and central government) at the Croatian National Bank and Payments Institute. In the 1993 to 1996 period, data on foreign direct investment of the private sector (banks and other sectors) do not include direct foreign debt investment, nor retained profit of the investor.

Other investment is classified according to the following institutional sectors: Croatian National Bank, Government, Banks and Other. The Government sector comprises central government, local government and local funds. The Banking Sector comprises commercial banks.

Assets--trade credit has been compiled since the first quarter of 1996. It includes advances paid for goods imports by Croatian importers. Starting in the first quarter of 1999, it includes loans with maturities below 90 days given by Croatian exporters to foreign buyers as well as long-term and short-term (from 91 days to 1 year) trade credits granted to the government and other sectors.

Assets – credit includes data on loans granted abroad, classified according to institutional sectors. Data are obtained from statistics on foreign credit relations of the Croatian National Bank, which are based on concluded credit agreements registered with the Croatian National Bank.

Assets--foreign exchange and deposits--banks shows the change in the total liquid foreign exchange of banks authorized to do business abroad. Assets--foreign exchange and deposits--other sectors includes a part of the net foreign exchange inflows of the household sector which is not classified on the current account, and which amounts to 85% of the unexplained foreign exchange inflows to the household sector.

Liabilities--trade credit has been compiled since the first quarter of 1996, and includes data on loans with a maturity below 90 days granted by foreign suppliers to Croatian importers. From the first quarter of 1999 on, this item includes data on advances granted by foreign purchasers to Croatian exporters for exports of goods, as well as data on long-term and short-term (from 91 days to 1 year) trade credits received by the government and other sectors.

Data on credits received from abroad and corresponding arrears are shown by institutional sectors. They are obtained from statistics on foreign credit relations of the Croatian National Bank, which are based on concluded credit agreements registered with the Croatian National Bank.

Currency and deposits includes changes in those foreign exchange and kuna foreign liabilities of the monetary authorities (CNB) and banks based on current accounts, time accounts, Loro letters of credit, guarantees, sight deposits and demand deposits.

Changes in the foreign exchange reserves of the Croatian National Bank on a transactions basis are estimated using accounting data on the stock of foreign exchange reserves in particular currencies at the end of the months. In the estimation of transactions in the period from 1993 to the first quarter of 1999, changes in the original currencies were transformed into dollar changes using the average monthly exchange rate of the currency in question against the US dollar. Starting from the second quarter of 1999, the source of data on changes in international reserves has been a Report on International Reserves Transactions compiled by the CNB Accounting Department.

#### **Table H6: International Reserves and Banks' Foreign Exchange Reserves**

The international reserves of the Croatian National Bank are shown according to the methodology contained in the *Balance of Payments Manual* (International Monetary Fund, 1993), and include those foreign claims of the Croatian National Bank that can be used to bridge imbalances in international payments. International reserves include Special Drawing Rights, reserve position in the International Monetary Fund,

---

foreign currency, and deposits at foreign banks, as well as bonds and debt instruments.

The foreign exchange reserves of commercial banks include foreign currency and domestic commercial banks' deposits at foreign banks. These foreign exchange reserves represent an additional source of liquidity for bridging imbalances in international payments.

#### **Table H7: International reserves and foreign currency liquidity**

International reserves and foreign currency liquidity are shown in accordance with a Template on international reserves and foreign currency liquidity, drawn up by the IMF. A detailed explanation of the Template is given in "Data Template on International Reserves and Foreign Currency Liquidity – Operational Guidelines, October 1999" issued by the IMF.

The first part of the Template shows total assets of the Croatian National Bank in convertible foreign currency. Official international reserve assets (I.A.) show only those types of assets that are readily available to the CNB at any moment for bridging international payments mismatches. Official international reserves include: short-term foreign negotiable debt securities, foreign currency cash, foreign currency sight deposits, foreign currency time deposits which can be withdrawn before maturity, foreign currency time deposits with a remaining maturity of less than three months, reserve position with the IMF, special drawing rights, gold, and reverse repos with foreign currency negotiable debt securities. Other foreign currency reserve assets of the CNB (I.B.) include foreign currency time deposits with a maturity of over three months.

The second part of the Template shows fixed predetermined foreign currency net liabilities of the Croatian National Bank and the central government (excluding extrabudgetary funds) that fall due in the next twelve months. Foreign currency loans, debt securities and deposits (II.1.) include future interest payments on banks' foreign currency reserve requirements with the CNB (only interest payments for the next month are included), payments of future maturities of foreign currency CNB bills, future principal and interest payments on loans from the IMF, and future principal and interest payments on the central government's foreign currency debts (excluding extrabudgetary funds). Aggregate short and long positions in forwards and futures in foreign currency (II.2.) include future collections (+) or payments (-) arising from currency swaps between the CNB and domestic commercial banks (temporary sale or

purchase of foreign currency). The item Other (II.3) includes future payments arising from repo agreements with foreign currency negotiable securities.

The third part of the Template shows predetermined contingent foreign currency net liabilities of the Croatian National Bank and the central government (excluding extrabudgetary funds), which fall due in the course of the next twelve months. Contingent foreign currency liabilities (III.1) include future principal and interest payments on foreign loans guaranteed by the central government, and banks' foreign currency reserve requirements. (The inclusion of reserve requirements in foreign currency is based on the assumption that there will be no changes in ratios or in the base of foreign currency reserve requirements, which comprises household deposits in foreign currency with remaining maturities of up to three months). Undrawn credit lines show potential inflows (+) or outflows (-) which would arise from drawdowns under these credits.

The fourth part of the Template lists memo items. Short-term, domestic currency debt indexed to foreign currency (IV.a) shows obligations arising from the Law on the Transformation of Household Foreign Exchange Deposits into the Public Debt of the Republic of Croatia, which fall due in the next 12 months. Pledged assets (IV.c) show time deposits in foreign currency with maturities of over 3 months listed in item I.B. which are also a pledge. Repo transactions with securities show the value of collateral that is the subject of repo agreements and reverse repo transactions with securities as well as how these transactions are registered in the Template. The currency structure of international and other foreign currency reserves shows the foreign currency structure of the total foreign currency assets of the CNB (section I).

#### **Table H10: Indices of Effective Exchange Rate of the Kuna**

Index of the nominal effective exchange rate of the kuna is a weighted geometric average of the index of bilateral exchange rates of the kuna against the euro, US dollar, Swiss franc, British pound and Slovenian tolar. The weights are determined based on the average share of a particular foreign currency in the structure of the current account of the balance of foreign currency transactions between July 1996 and January 2000. The year 1995 is a base period for calculating the index. The index of the nominal effective exchange rate is an aggregate indicator of the average value of national currency against a basket of currencies. An increase in the index of the nominal effective exchange rate of the kuna in a certain period indicates that the kuna has

---

depreciated against the currency basket. The index of the real effective exchange rate is a weighted geometric average of the index of bilateral exchange rates of the kuna corrected for the relevant relative price indices (the ratio of price indices in partner countries and domestic prices). Producer price and retail price indices are used, in particular the total harmonized retail price index for the Economic and Monetary Union member countries. Data for the last two months are preliminary.

### **Table H11: External Debt structured by Domestic Sectors**

According to a new methodology in force starting in March 2000, external debt is defined as the total of liabilities of residents, including: deposits of foreign legal entities and individuals (these deposits were not included under the old methodology), loans granted by foreigners with an original maturity longer than 90 days (loans for financial purposes are counted regardless of their maturity) and bonds and money market instruments issued on foreign markets (at face value).

External debt by domestic sector is shown in the same manner as in the Capital and Financial Account of the BOP:

- 1) Direct Investments – include borrower lender transactions that are interrelated by ownership (borrower or lender owns more than 10 percent of the other);
- 2) Government – in addition to Central Government, this item includes Government Funds, the Croatian Bank for Reconstruction and Development, local government authorities and funds;
- 3) Croatian National Bank;
- 4) Banks - banking institutions and saving banks;
- 5) Other domestic sectors – consist of other financial institutions (other than banks and savings banks), enterprises and households.

Each sector is further divided into Portfolio and other investments. Portfolio investments include bond and money market instruments. Other investments include currency and deposits (foreign deposits) and Credits. Credits are divided into Trade Credits (sale of goods for delayed payment) and Other Credits (all other credit obligations).

Outstanding external debt is expressed in millions of US dollars according to the CNB's midpoint foreign currency rate at the end of the period. The balance includes so-called non-reported principal payments (they should have been paid but are not statistically reported as paid) and future principal payments.

---

**Table H12: External Debt structured by Creditors**

The Table shows outstanding external debt by foreign creditors valued in the same way as in Table H8.

**Table H13: External Debt and Estimated Future Payments structured by Domestic Sectors**

The Table shows outstanding debt at the end of the period and the principal and interest payment projection. All data are shown at the midpoint exchange rate of the CNB at the end of period.

Projected interest payments do not include interest on foreign deposits and late interest. Payments are projected at the interest rates at the contracting time and do not reflect changes of variable interest rates.

The memo points out the outstanding publicly guaranteed debt – total and the outstanding debt of the banking sector and other sectors covered by government guarantee. The difference is the amount of the government guarantees issued to the Government sector (for example HBOR, Croatian Roads Authority, etc. included in a broad definition of Government).

**Table I3: Central Government Debt**

Data on central government debt are gathered from available data and are not reconciled with the Ministry of Finance of the Republic of Croatia. Central government debt consists of domestic and external debt. The sources of data on domestic debt of the central government are the following: first, the official publication of the Ministry of Finance "Ministry of Finance Monthly Statistical Review" regarding data on securities issued by the Republic of Croatia, and second, Monetary Authorities' Accounts and Deposit Money Banks' Accounts regarding data on securities issued by the central government funds and loans received. The source of data on central government external debt is the external debt statistics collected by the CNB.

## LICENSED BANKS

### a) licensed banks in accordance with Article 37 of the Banking Law (full authorization)

1. ALPE JADRAN BANKA d.d. Split
2. BANK AUSTRIA CREDITANSTALT CROATIA d.d. Zagreb
3. BAYERISCHE HYPO - UND VEREINSBANK AG Main branch Zagreb
4. BNP-DRESDNER BANK (CROATIA) d.d. Zagreb
5. BRODSKO-POSAVSKA BANKA d.d. Slavonski Brod
6. CASSA DI RISPARMIO DI TRIESTE - BANCA d.d.
7. CENTAR BANKA d.d. Zagreb
8. CONVEST BANKA d.d. Zagreb
9. CREDO BANKA d.d. Split
10. CROATIA BANKA d.d. Zagreb
11. DALMATINSKA BANKA d.d. Zadar
12. DUBROVAČKA BANKA d.d. Dubrovnik
13. ERSTE & STEIERMÄRKISCHE BANK d.d. Zagreb<sup>1)</sup>
14. GOSPODARSKO KREDITNA BANKA d.d. Zagreb
15. HRVATSKA POŠTANSKA BANKA d.d. Zagreb
16. HYPO ALPE-ADRIA-BANK d.d. Zagreb
17. IMEX BANKA d.d. Split
18. ISTARSKA BANKA d.d. Pula
19. ISTARSKA KREDITNA BANKA UMAG d.d. Umag
20. JADRANSKA BANKA d.d. Šibenik
21. KARLOVAČKA BANKA d.d. Karlovac
22. KREDITNA BANKA ZAGREB d.d. Zagreb
23. KVARNER BANKA d.d. Rijeka
24. MEĐIMURSKA BANKA d.d. Čakovec
25. PARTNER BANKA d.d. Zagreb
26. PODRAVSKA BANKA d.d. Koprivnica
27. POŽEŠKA BANKA d.d. Požega
28. PRIVREDNA BANKA - LAGUNA BANKA d.d. Poreč
29. PRIVREDNA BANKA ZAGREB d.d. Zagreb<sup>2)</sup>
30. RAIFFEISENBANK AUSTRIA d.d. Zagreb
31. RIADRIA BANKA d.d. Rijeka
32. RIJEČKA BANKA d.d. Rijeka
33. SISAČKA BANKA d.d. Sisak
34. SLATINSKA BANKA d.d. Slatina
35. SLAVONSKA BANKA d.d. Osijek
36. SPLITSKA BANKA d.d. Split
37. ŠTEDBANKA d.d. Zagreb
38. VARAŽDINSKA BANKA d.d. Varaždin
39. VOLKSBANK d.d. Zagreb
40. ZAGREBAČKA BANKA d.d. Zagreb<sup>3)</sup>

### b) licensed banks in accordance with Article 36 of the Banking Law (midium authorization)

41. HYPOBANKA d.d. Zagreb
42. KAPTOL BANKA d.d. Zagreb
43. NAVA BANKA d.d. Zagreb

**c) licensed banks in accordance with Article 35 of the Banking Law (limited authorization)**

44. SAMOBORSKA BANKA d.d. Samobor

**d) banks not yet licensed in accordance with Articles 35, 36 and 37 of the Banking Law**

45. RAZVOJNA BANKA "DALMACIJA" d.o.o. Split

<sup>1)</sup> Bjelovarska banka d.d. Bjelovar took over Trgovačka banka d.d., Zagreb and Čakovečka banka d.d., Čakovec on September 1, 2000 and from this date on they operate under the new name.

<sup>2)</sup> The bank took over Krapinsko zagorska banka d.d. Krapina at the beginning of July 2000.

<sup>3)</sup> The bank took over Zagrebačka banka - Pomorska banka d.d. Split at the beginning of July 2000.

## LICENSED SAVINGS BANKS

1. BANICA CREDO ŠTEDIONICA d.o.o. Split <sup>1)</sup>
2. GOSPODARSKA ŠTEDIONICA d.d. Vrbovec <sup>1)</sup>
3. HIBIS ŠTEDIONICA d.d. Zagreb
4. KRAPINSKA ŠTEDIONICA d.d. Krapina
5. KRIŽEVAČKA ŠTEDIONICA d.d. Križevci
6. MARVIL ŠTEDIONICA d.d. Zagreb
7. MEĐIMURSKA ŠTEDIONICA d.d. Čakovec <sup>1)</sup>
8. PRIMORSKA ŠTEDIONICA d.d. Rijeka <sup>1)</sup>
9. PRVA OBRTNIČKA ŠTEDIONICA d.d. Zagreb <sup>1)</sup>
10. SLAVONSKA ŠTEDIONICA d.d. Zagreb
11. ŠTEDIONICA BROD d.d. Slavonski Brod <sup>1)</sup>
12. ŠTEDIONICA DORA d.d. Zagreb <sup>1)</sup>
13. ŠTEDIONICA GROŠ BANAK d.o.o. Zagreb
14. ŠTEDIONICA KOVANICA d.d. Varaždin <sup>1)</sup>
15. ŠTEDIONICA MORE d.d. Zagreb <sup>1)</sup>
16. ŠTEDIONICA SA-GA d.d. Zagreb <sup>1)</sup>
17. ŠTEDIONICA SONIC d.d. Zagreb <sup>1)</sup>
18. ŠTEDIONICA SPLITSKO-DALMATINSKA d.d. Split <sup>1)</sup>
19. ŠTEDIONICA ZAGIŠTED d.d. Zagreb
20. ŠTEDIONICA ZLATICA d.d. Zagreb <sup>1)</sup>
21. ŠTEDIONICA ZLATNI VRUTAK d.d. Zagreb
22. TRGOVAČKA ŠTEDIONICA d.o.o. Zagreb
23. ViD ŠTEDIONICA d.d. Zagreb <sup>1)</sup>

## LICENSED HOUSING SAVINGS BANKS

1. HRVATSKA STAMBENA ŠTEDIONICA d.d. Varaždin
2. PRVA STAMBENA ŠTEDIONICA d.d. Zagreb
3. RAIFFEISEN STAMBENA ŠTEDIONICA d.d. Zagreb
4. WÜSTENROT STAMBENA ŠTEDIONICA d.d. Zagreb

<sup>1)</sup> Operating license includes collection of household foreign exchange savings and exchange operations.

## OTHER LICENSED INSTITUTIONS WITH FULL AUTHORIZATION

1. HRVATSKA BANKA ZA OBNOVU I RAZVITAK Zagreb

## REPRESENTATIVE OFFICES OF FOREIGN BANKS

1. BANK FÜR KÄRNTEN UND STEIERMARK AG, Zagreb
2. CASSA DI RISPARMIO DI UDINE E PORDENONE SPA, Zagreb
3. COMMERZ BANK AKTIENGESELLSCHAFT, Zagreb
4. DEUTSCHE BANK AG, Zagreb
5. KREDITNA BANKA d.d. TUZLA, Zagreb
6. LHB INTERNATIONALE HANDELSBANK AG, Zagreb

## BANKS AND SAVINGS BANKS UNDER BANKRUPTCY PROCEEDINGS

Name of bank/savings bank	Date of bankruptcy proceedings initiation
1. ADRIA ŠTEDIONICA d.o.o. Zagreb	13/10/2000
2. AGROOBRTNIČKA BANKA d.d. Zagreb	14/06/2000
3. CIBALAE BANKA d.d. Vinkovci	20.10.2000.
4. GLUMINA BANKA d.d. Zagreb	30/04/1999
5. GRADSKA BANKA d.d. Osijek	03/05/1999
6. GRAĐANSKA ŠTEDIONICA d.o.o. Karlovac	03/11/1998
7. HRVATSKO GOSPODARSKA BANKA d.d. Zagreb	19/04/2000
